Senator Lodge of Massachusetts just managed to weather the storm. His plurality over Gaston was about 8,000—a fourth of what it was in 1916. W. N. Ferris, who defeated Senator Townsend in Michigan, announces that his first effort when he gets to Washington will be to unseat Senator Newberry.

Irrespective of partisan feeling, there will be widespread regret over the defeat of Senators Kellogg of Minnesota and Poindexter of Washington, for both have proved themselves able, honest and industrious servants of the people. The same may be said for Hitchcock of Nebraska. Senator James A. Reed of Missouri, who was repudiated by his party two years ago, goes back for a third term with a majority of 34,000. Shortly before the election former President Wilson wrote a letter saying that if Reed were returned to the senate he would "of course be there a man without a party."

FOES of prohibition were considerably elated by certain features of the election. Illinoisans voted two to one for amendment of the Volstead act to permit beer and light wines; California defeated the proposed state enforcement law; Massachusetts rejected a proposal to harmonize the state prohibition law with the federal enforcement act; Governor Edwards of New Jersey, "wettest of the wets," was elected senator; New York Democrats won on a platform with a light wine and beer plank; and in Minnesota Congressman Volstead, author of the enforcement act, was defeated. The wets believe they have gained at least 30 and maybe 60 votes in the house.

On the other hand, the drys won a test vote in Ohio by 100,000, and their leaders insist they will still control congress. While Volstead was retired, the man who beat him, Rev. O. J. Kvale, Independent, says he is "drier than Volstead." However, Volstead will normally be succeeded as chairman of the judiciary committee by Graham of Pennsylvania, who is decidedly liberal in the matter of prohibition.

It was a sad day for the once weaker sex. Of all the woman candidates for seats in the senate and house, only one was elected, and her term will end on March 4 next. She is Mrs. Winnifred Mason Huck, who will fill out the unexpired term of her father, the late Congressman-at-Large William E. Mason of Illinois. Moreover, as Representative Alice M. Robertson of Oklahoma was defeated by a mere man, there will not be one woman in the Sixty-eighth congress.

PRESIDENT HARDING still hopes to have the ship subsidy bill passed by this congress and therefore has called an extra session to begin November 20. The measure is almost certain to encounter stubborn opposition in the senate, and many leaders of both parties believe it cannot get through.

MUSTAPHA KEMAL PASHA and the Turkish national assembly are not satisfied with the victories they have already won and are threatening to stir up a lot more trouble in the Near East. The sultan's ministry having resigned, Rafet Pasha, nationalist governor of Constantinople, assumed power there, and the allied high commission accepted the new regime. But about the same time the Angora government demanded that the allied troops be removed from the city at once, stating that its occupation by foreign soldiery was inconsistent with Turkish independence. The nationalists also announced that foreign warships could not enter the straits without permission and then only one at a time, and that only one vessel of each nation should be stationed at Constantinople. These demands were firmly rejected by the allied high commission, the French agreeing with the British that no such concessions should be made and that the allies must retain military control over the city until peace had been established and that the terms of the Mudania agreement must be observed. The request of the nationalists that the Turkish railways in Europe and Asia that have been under temporary allied control be handed over to them also was refused. Thereupon the Turks, reiterating their demands, called three additional classes to the colors and mobilized large forces near Constantinople. Lieutenant General Harington warned Rafet Pasha he would permit no usurpation of allied authority.

The allied governments admitted the situation was acute and growing dangerous. The British suggested postponement of the Lausanne conference, but M. Poincare for France urged that it open without delay. It was said that Lord Curzon, Poincare and Premier Mussolini all would attend the meeting because of the fear that the soviet Russians would try to persuade the Turks to join them in a combine for the domination of the Near East.

TO CELEBRATE the fifth anniversary of the Russian revolution, some 400,000 soviet troops and armed workers marched in review in Moscow last week before the delegates to the Third Internationale now in session. It was an inspiring sight for the communists who dream of world revolution. Premier Lenin did not appear before the Internationale, but others told of the Red progress in various lands. Leo Kameneff admitted that there is "a temporary victory for reaction, capitalism and imperialism in the western countries, especially in Italy and Germany," but told the workers they must hold tight to their rifles. German delegates said there would be a Red revolution soon in their country.

FOLLOWING the advice of the international economic and financial experts, the German government has asked the reparations commission for a two-year moratorium on all reparations payments—coal, iron and other goods as well as cash—and for outside financial help. The experts assert that the stabilization of the mark, the first essential for the recovery of Germany, is impossible under present conditions and charge that the existing catastrophe is due to internal financial policies combined with the impossible conditions of the Versailles treaty. They propose the establishment of a currency bank which should have the supoprt of foreign banks and also 500,000,000 gold marks from the Reichsbank's reserve. The lifting of restrictions abroad against German trade and giving to Germany full customs rights are recommended.

DETERMINED, as they themselves declare, to smash the Irish Free State government or die in the attempt, the Irish republicans are keeping Dublin in a state of perpetual disorder and alarm by sniping, looting and incendiarism. Sometimes they get even bolder, as on Wednesday when they placed machine guns on housetops and made an attack on the Wellington military barracks. There were numerous casualties before the rebels were ousted. Mary MacSwiney, sister of the late lord mayor of Cork, is in Mountjoy prison and has started on a hunger strike, declaring she will starve herself to death as did her brother in a British prison. Other republican prisoners have joined her in this.

ONE of the worst mine disasters of recent years occurred near Spangler, Pa., when gas exploded in a mine of the Reilly Coal company. Seventy-nine men were killed and thirty-two seriously injured. The state mine inspector says someone was guilty of negligence in not reporting gas pockets or in the methods of testing for gas.

IN MARION, ILL., great difficulty is being experienced in getting a jury to try the first batch of five defendants in the Herrin mine massacre case. The citizens are persistently dodging jury service. Judge Hartwell took under advisement a motion by the defense that the indictments be quashed on the grounds that the grand jury was illegally selected and was unduly influenced.

News of Minnesota

EVENTS of the week throughout the "State of Ten Thousand Lakes" told in brief form

Duluth—With the close of navigation one month away, the total receipts of coal at the Duluth and Superior docks for the season up to Nov. 1, aggregate approximately one-third the tonnage received during 1921.

New Richland—The congregation of Trinity Lutheran church here, has decided to erect a new edifice next spring. $35,000 has been pledged. The new church, to have a seating capacity of 500, will cost $40,000.

Glencoe—The McLeod county rural teachers will meet in their annual teachers' institute at Glencoe the week ending November 18th. More than one hundred teachers are expected.

Walker—The proposal to divide Cass county has been defeated, according to information received by the county auditor here. The vote against the division is running two to one over that for division.

Waterville—Officers named for the 1923 organization of the Waterville street fair include J. L. Ebling, president; Charles E. Lawald, vice president; A. F. Kohlzer, secretary; William Warburton, treasurer.

St. Paul—A new strain of sugar cane that will yield increases over old varieties has been developed by Dr. J. J. Williams of the state farm of the University of Minnesota.

Minneapolis—Employes of the Minneapolis office of the United States Veterans Bureau No. 1, organized a United States Veterans' bureau employes' savings and loan fund at a meeting of the organization here.

Minneapolis—Dr. Henrik Shipstead spent $1,201.95 in his campaign for United States senator, including $300 spent for an automobile, he reported in his expenditure statement to the secretary of the senate at Washington.

Moorhead—Steps will be taken by both the Great Northern and Northern Pacific companies to install safety apparatus at all crossings in Moorhead and the speed of all trains passing through will be limited to six miles an hour representatives of the companies told the city council at a meeting here.

Crookston—Crookston claims the largest family in Minnesota. Mr. and Mrs. Christian J. Van Oostbree became the parents of their twentieth child. The family moved here from Amsterdam, Holland. Father is 62 years old and the mother 42.

Faribault—Friday was Faribault's day to celebrate. The American Legion and the citizens of Faribault joined to celebrate the end of the World war and the completion of the great paved highway that links the southern part of the state with the Twin Cities and the Thousand Lakes of the North.

Minneapolis—The largest September freight movement in and out of Minneapolis since 1916 is revealed in a summary of figures for October. Only the heavy grain movement of 1915 and 1916 enable those years to show a greater September volume than 1922. A total of 37,193 loaded freight cars were received in Minneapolis this September and a total of 29,536 were forwarded from Minneapolis.

Bemidji—A new county in Minnesota—to be known as Lake of the Woods—will be created as soon as the Beltrami county canvassing board makes a report to Governor Preus. Voters of Beltrami county voted to split the county, the proposal carrying by a majority of approximately 200 votes.

Minneapolis—The Minnesota College of Agriculture will send a potato and apple judging team to the Midwest Horticultural Exposition at Council Bluffs, Iowa, the week ending November 18. This announcement was made by Prof. W. G. Brierley, who has been coaching the men on apple judging while Prof. F. A. Krantz has been teaching potato judging.

Bemidji—Francis Rhea, star end and a "triple threat" man on the Bemidji high school eleven, broke the second finger of his left hand and will be lost to the Navy Blue and White squad for the balance of the season.

Fairmont—More than 400 per cent gross on an investment of $340 has proved to Cal Crissinger, of Manyaska township, that there is money in raising sheep. In the fall of 1921 Crissinger bought a carload of ewes for $340. From this bunch he sold $225 worth of wool, and in October this year sold with their lambs all but 20, which he kept for breeding ewes. He received $1,447 for the sheep, and has

Crookston—Of three women candidates for county office in Polk county two were elected Tuesday. Miss Myrtle Hoyland was elected judge of probate and Miss Minnie Bos was elected clerk of the district court.

Minneapolis—Delay in repealing the six-cent street car fare in Minneapolis is in prospect as the result of the fact that all briefs in the contempt case brought by the city against car officials will not reach the state supreme court before December.

St. Paul—Accommodations will be provided for winter sportsmen visiting Itasca State park, state forestry board have decided.

Princeton—State Auditor Ray P. Chase, collapsed from overexertion in the campaign while speaking here. He paused, was too tired to resume and fainted.

Austin—Fear of a diphtheria epidemic caused the closing of the Adams consolidated school, 20 miles southeast of Austin, following quarantine of several homes.

Minneapolis—Erection of an addition to the Minnesota Union, on the university campus, is indicated by a permit issued. It is to cost $50,000 and be completed Jan. 30.

Minneapolis—The state canvassing board will convene on the morning of November 28 to count the votes cast in the state general election.

Thief River Falls—The annual poultry show of the Pennington County Poultry association will be held Dec. 12, 13 and 14, it was announced here. It is hoped to have 1,000 entries.

Duluth—Shipping in and out of the Twin Ports has been delayed somewhat because of severe gales sweeping this end of Lake Superior.

Lake City—The large dairy barn on the farm of the late Mrs. Mary McCahill was destroyed by fire of unknown origin. The loss is approximately $25,000.

Minneapolis—Miss Gratia Countryman, city librarian of this city, was selected as foreman of the Hennepin county grand jury, being the first woman in Minnesota ever to serve in this capacity.

Duluth—Duluth's annual building record has been smashed. Permits for construction issued thus far this year by the city building inspector total more than the number granted during all of 1921. Permits for the first 10 months of the year total $5,450,000.

Willmar—A large number of relatives and friends gathered at the home of Mr. and Mrs. Christian Haug in Pennock to assist them in celebrating their 53rd wedding anniversary.

Minneapolis—"Flivver" owners to the contrary notwithstanding, representatives of an eastern motor car concern proved here it is possible to knock down a complete automobile engine and reassemble it correctly within an hour, in a demonstration at the experimental engineering building of the University of Minnesota.

Hibbing—A temporary injunction was granted Paul Shevchuck and Fred Novell, Brooklyn plumbers, in a decision handed down by Judge Martin Hughes, restraining the village of Hibbing and the plumbing board from enforcing the provisions of the ordinance which requires plumbers to obtain licenses.

St. Paul—This city has passed its $5,000,000 school bond program by a 3 to 1 vote on the face of returns in 60 of 200 city precincts. Of the precincts reported, only two gave the school bond proposition a minority vote.

Waseca—A drive for funds to construct a new private school building for Sacred Heart academy has resulted in the subscription of more than $51,000 for the new structure by members of the parish of this city.

Alden—B. F. Muldown, formerly of the Farmers State bank of Lyle, Minn., has purchased the controlling interest of Thomas Ellingson in the Security State bank of Alden.

Hibbing—Joseph Penosky of Ghenn was fined $53.50 in court here. He was arrested by Warden Woods for using the headlights on his machine to attract deer.

Moose Lake—The Moose Lake Poultry association has been organized. It has a membership of 28. Franklyn S. Emmett was elected president.

St. Cloud—Jubilee services were conducted at the First Presbyterian church here in honor of Rev. V. Campbell, who retires as pastor emeritus after 58 years of continuous services, each person presenting the veteran pastor with flowers.

Tracy—Because of an accident on her first streetcar ride, Rose Myrtle Hansen, aged 20, of Tracy, was awarded $20,000 damages by a jury in Judge F. M. Nye's court. The Minneapolis Street Railway company was the defendant. It is the largest damage verdict in district court in many years.

Duluth—Eighteen vessels, two of them carrying hard coal and the rest soft coal have arrived here over the week end. Four more vessels bearing hard coal are on the way. No soft coal shortage is anticipated but dealers see a shortage in anthracite.

Waseca—The Waseca county grand jury has requested the condemning of the county jail and the building of a new one or the complete renovation and remodeling of the old structure. The action follows the refusal of District Judge Childress to sentence

Soil Project Report Interesting.

Agents in Red river valley counties are reporting some very interesting results from the season's soil projects. In Norman county 221 bushels per acre of potatoes were harvested on the Sulrud farm where the complete fertilizer 2-8-5 was used at the rate of 500 pounds an acre. The check plot returned 169.5 bushels per acre, thus showing an increase from the use of fertilizer of 51.5 bushels per acre. In Pennington county one farmer harvested 42 bushels of corn to the acre when phosphate had been applied

Short Course in Dairying.

The annual dairy short course season will open at University Farm on Nov. 13 and continue with only occasional interruptions until March 10. Five courses will be given, in addition to a state-wide creamery managers conference which will be held at the farm Jan. 4.

The courses have been planned to help the student in acquiring a better understanding of the problems and tasks connected with the manufacture of dairy products in order that he may qualify for positions

WORKS FOR CHILD MUST KEEP WELL

Mothers in a Like Situation Should Read This Letter from Mrs. Enrico

Chicago, Illinois.—"I took Lydia E. Pinkham's Vegetable Compound for a serious trouble. I had tried doctors and all said the same—an operation. At first I only felt the pain on my left side, but later I seemed to feel it on both sides. I am a power sewing-machine operator and have a little girl to support. I work in a tailor shop and that line of work has been very slack this year and I am home part of the time. I do not like to take any chances, so I consulted my friends, and one lady said, 'Take Lydia Pinkham's medicine,' so I did. I have felt better right along and am in good enough health to go to work. I recommend your Vegetable Compound and Sanative Wash to all."—Mrs. MARY ENRICO, 459 N. Carpenter St., Chicago, Illinois.

Often the mother is obliged to support her children and good health is necessary. Lydia E. Pinkham's Vegetable Compound is just the medicine you can depend upon. It is a medicine for women's ailments and the relief it brought Mrs. Enrico it may bring to you. Keep well by taking Lydia E. Pinkham's Vegetable Compound.

Coated Tongue
Nature's Warning of Constipation

When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus replaces it.

Nujol is a lubricant—not a medicine or laxative — so cannot gripe. Try it today.

Nujol
REG. U.S. PAT. OFF.
A LUBRICANT—NOT A LAXATIVE

Still Companions.

Uncle Josiah is a Parke county farmer, who for many years, though a deacon in the church, took his "nip" on the side. But he always strenuously denied the charge. His two college nephews came to see him the other day, and he tried to impress them. He showed them the old place. "It's all here as it was when you were little fellows," he said, "except the old oaken bucket, an' it's—"

"Down in the cellar with all the extra jugs and jars since the Volstead bill became a law," one of them winked.

Uncle tried to look still more pious. "The trouble with the generation of today is that they are so worldly," he began.

Then nephew finished it for him, "and wise."—Indianapolis News.

The Gift House.

There had been a veritable deluge of blotters. For days May had brought her offerings to the teacher's desk—mysterious looking packages which always proved to be the inevitable blotters. Finally, in perplexity, the teacher called May to her and said, "It's lovely of you, dear, to bring these blotters, but really, I've so many now—"

"Oh, that's all right," was the answer, "we've got so many at home, mamma said: 'What'll we ever do with all these blotters? Why don't you take 'em to your teacher?'"

It is said that political graveyards are never robbed, yet there are a lot of dead ones in politics.

Weak and Miserable?

Are you dull, tired and achy—bothered with a bad back? Do you lack ambition, suffer headaches and dizziness—feel "all worn out"? Likely your kidneys are to blame. Lameness, sharp stabbing pains, backache and annoying urinary disorders are all symptoms of weakened kidneys. Don't wait for more serious trouble. Get back your health and keep it! Use *Doan's Kidney Pills.* Thousands of folks tell their merit. *Ask your neighbor!*

A North Dakota Case

Mrs. A. Dixon, 1215 Bridge Ave., Grand Forks, N. D., says: "My back ached and when I stooped I could hardly stand the misery. The day's work left me lame and sore across my kidneys. Specks blurred my sight and my nerves became unstrung. My kidneys didn't act right. A relative recommended Doan's Kidney Pills and after I had taken them I was benefited wonderfully."

CULLING OF FLOCK NECESSARY FOR SUCCESS WITH POULTRY

(By O. A. Barton)

Perhaps no other poultry movement ever inaugurated has caused so much discussion, favorable and unfavorable, and so much real action as has the culling movement which has swept over the country during the last few years.

To a certain extent culling can and should be a continuous process. Any diseased, injured, crippled, or otherwise defective fowl should be eliminated from the flock as soon as detected likewise, any birds which are low in vitality, regardless of age. This rule applies to growing chicks as well as mature fowls.

The application of the real culling test for production, however, is most effective between August 1 and October 15. The outstanding good ones and the exceptionally poor ones can be detected at other times, but the great mass of medium ones cannot be accurately culled at other times, especially during the spring months.

Culling is primarily a breeding problem resulting from a desire for an increased production, and greater profits. These aims result in greater satisfaction and more pleasure. Culling is a double process, including the elimination of the undesirable stock and at the same time the selection of the ones most desirable to retain for future production and breeding purposes. Remember that the best producers; and so in culling ,retain the birds showing development for heavy production, without so much attention to their age. It ordinarily is not very profitable, however, to keep hens for more than two laying years, unless they are retained especiall as breeders because of their breed, character, and production performance.

In the culling process there are several characteristics or indicators which aid us in detecting the producers. Sometimes the indications may conflict, in which case it is wise to use good judgment in weighing the evidence against the individual.

Factors Indicating Productive Tendencies.

Health.—Vitality is essential for production. Eliminate diseased, weak, inactive underdeveloped hens regardless of past production or apparent breed quality. Producers will be active, alert and busy.

Molt.—(One of the most valuable factors in detecting the low producer.) The poorest layers will usually be the first ones to molt, frequently molting in June or July and usually taking a long time for the molt, even three months or more. The best layers will usually molt later in the season, will take less time for it, and will be laying again before really cold weather sets in.

The ideal time for the molt is between October 1 and November 15. December is too late for two good reasons; the weather at that time is too severe for the molting hen, and the poultryman cannot afford to have the hens idle at that time, for eggs are usually at the highest price.

Discard the hen which molts in June and July and save those molting after September 1, if not otherwise undesirable. The late molter can usually be detected by her soiled, ragged and broken plumage, while the early molter will have clean new plumage or many pin feathers.

Color Test—In those breeds required to have yellow shanks, beak, and body color, such as Leghorns, Wyandottes, Rocks and Reds, the color usually fades out from those parts in proportion to the time and extent of production. The yellow pigment leaves the vent after a few eggs have been laid, next from the beak, and then from the eye ring after three or four weeks of laying. After the bird has laid from three to four months the yellow pigment finally leaves the shanks.

In theory, the hen showing rich color in shank and beak in August and September would be a poor layer and should be discarded. But we must be especially careful in applying this color test or serious errors will be made. When fowls have free access to grass range, especially alfalfa and sweet clover, the color does not fade out so fast, and some soils have a tendency to bleach out the shank color. Individual fowls may also have by nature a paler shank color than others, or the reverse. A hen may have been broody and may even have hatched a brood of chickens. layer will usually show a dry, shrunken vent, of the same color as the body of the fowl.

The Head Parts.

The laying hen or the one about to lay will usually have a comb waxy in appearance, red and well developed. While we cannot say that the hen with the largest comb is the best layer, we can say that we seldom find a really heavy producer with poorly developed comb and wattles.

Look for well developed, well shaped comb with wattles well developed and far apart, ear obes bright, and well developed, eyes bright, keen and alert.

The beak is one of the working tools of the hen, and should be short, stout, and firmly set.

Pelvic Test.

The pointed extremities of the back bone, one on each side of the vent are the pelvic bones. These bones in the undeveloped pullet are very close together, and as she approaches the laying period they gradually spread farther apart until they are at least two finger widths apart (allowing at least three-fourths of an inch for each finger) or the diameter of an egg. This is a natural physical change which must take place before the hen can lay, for the egg must pass between these bones in the laying process.

These bones should be thin, straight, and well spread. The laying hen will usually have more than two fingers spread between the pelvic bones and may have three or even four, the wider the better.

When the hen ceases production she has a tendency to take on fat. The pelvic bones will draw closer together and will feel thicker and heavier because of the assembled layers of fat in that region. Consequently, the thin pelvic bone is best.

There is quite naturally a difference in weight of the bones in the different breeds. The heavier breeds have heavier bones than the lighter breeds. The thickness of bones must be relatively considered, however, in regard to the size and breed, but the thinner the better.

The pelvic bones should also be quite straight. Sometimes they are curved inward, and form hooks. These should be avoided.

If there is any question as to whether the hen is laying after the pelvic test, the matter can easily be settled by the condition of the skin oven the abdomen. If the hen is laying the skin will be soft, loose and pliable; if not laying the skin will usually be found to be tight and rigid with layers of fat underneath.

Abdominal Capacity.

The last and perhaps the most vital point to consider is the abdominal capacity. A heavy producer must consume a large amount of feed, and her digestive tract must have an abundance of room for expansion. Likewise, the hen does not make one egg a day and lay it the same day, but carries several partially developed eggs at the same time. This process requires additional room for the oviduct and the ovary. A heavy laying hen needs a wide, long, and deep body. Measure width over the back, and depth from the pelvic bones down to the rear end of the breast bone or keel. At least three fingers depth for the smaller breeds and at least four fingers for the larger breeds should be the standard; more depth is better. The hen will not have so great depth when not laying as when she is in laying condition.

Summary.

Discard These Hens—Diseased, crippled, weak, under-developed, broken down with excessive fat, early molters; those with small, dry vent; small, dull comb and wattles; thick, heavy pelvic bones, close together; hard abdomen, and a short keel bone with small span between keel and the pelvic bones. Small breeds should have at least three fingers depth and larger breeds at least four fingers.

Retain These Hens—Alert, active, healthy, vigorous, strong, and well developed; the ones which molt after September 1; the ones with large moist vents, thin straight, flexible pelvic bones, well spread, with deep span between pelvic bones and keel; abdomen large soft and pliable; and those whose shank and beak color indicates heavy production. Breed characteristics that should not be ignored when standard bred poultry is kept.

DAIRY POINTS

BUTTER RATED FOR QUALITY

Producers Lose Much Money Because of Imperfect Conditions and Methods in Making.

(Prepared by the United States Department of Agriculture.)

If you are a producer or manufacturer of butter, were you disappointed in the price you received for that last shipment? Quality is the chief factor in determining butter prices, and according to United States Department of Agriculture circular 236, just issued, even small defects in quality may result in the loss of a sale or a cut in price.

Several million dollars annually are lost to producers and manufacturers because of imperfect conditions and methods in production, manufacture and marketing of dairy products, the circular states. During 1920 the marginal difference in the prices of high and low quality butter amounted at times to as much as 15 cents between 37 score and 92 score. Lack of proper attention or care in the creamery in grading the cream, or in churning, working, salting or packing the butter are stated to be mainly responsible for this condition.

The circular enumerates and describes the various factors such as flavor, body, color, salt and package that influence price. These factors are given specific ratings by local and federal butter inspectors, and receivers, in determining the final score of the product, and the ratings are governed by the absence or presence of certain defects described in the circular.

It is stated that there has never before been a time in the history of American butter making when it paid so well to produce high-quality butter as during recent years. But to secure an active demand and the largest net return not only high quality and uniformity of the product are necessary, but a knowledge of market requirements and good marketing methods are required.

Taking Butter From Churn.

Circular 236, entitled "Defects in the Quality of Butter," has been prepared so that producers and manufacturers may know precisely how butter is rated for quality in the markets, and how the defects which lower the price may be obviated. Copies of the circular can be obtained free upon request to the United States Department of Agriculture, Washington, D. C.

Influence of Breed

The breed of a dairy cow has a distinct influence on the water content of her milk. For example, Jersey milk as an average contains 14.7 per cent total solids, of which 5.35 per cent is fat, while Holstein milk contains, on the average, 11.85 per cent total solids, of which 3.42 per cent is butterfat. In other words every 100 pounds of Jersey milk contains 85 pounds of water, while every 100 pounds of Holstein milk contains 88 pounds of water. The difference in feeding value amounts to 2.61 pounds of milk solids per 100 pounds of milk in favor of Jersey milk.

There's Money in Milking.

The greatness of the dairy industry is more appreciated now than for several years past. Dairying actually shows a gain during the past year of several hundred million dollars, while most of the other farm branches show losses into the billions.

Dairy Improvement.

Replacing the low producing cows with better ones and later with purebreds is only one of the ways in which a dairy improvement association helps a community.

TURKEY RAISING MAY BE MADE VERY PROFITABLE OCCUPATION

(Prepared by the United States Department of Agriculture.)

Despite a steady increase in the prices producers have received for turkeys since 1915, production has steadily decreased, according to figures published by the United States Department of Agriculture. The average prices received during the four months October to January, 1915-16, was 15 cents a pound. The average price received during the corresponding period in 1920-21, was 32 cents a pound. In 1900, the census figures showed 6,594,695 turkeys on farms in the United States, while in 1910, there were only 3,688,708, and in 1920 there were 3,627,028.

Big Increase in Price.

During the past six years the price of turkeys has increased to the producer more than 100 per cent, while during the past 20 years the number of turkeys produced has decreased about 50 per cent, the department states.

It is common knowledge that turkeys are not easily handled, for by nature they are wanderers, and they usually give considerable concern to those whose duty it is to keep them on the home premises. The almost unconquerable inclination of turkeys to wander into the fields of neighbors has often caused strained feelings, and many owners of flocks have abandoned the business of raising turkeys on that account. Turkeys are also seriously afflicted by a disease known as blackhead which has caused heavy losses, and in some instances the business has been given up entirely for this reason. These causes of loss together with the frequent ravages of wild animals including dogs and rats, have all tended to discourage development of the industry.

Driving a Flock of Turkeys to Market.

The raising of turkeys may be a very profitable occupation where there is an abundance of range, ample feed, and reasonable freedom from preying animals, the department states. Even for those who have a limited range there are opportunities for raising a few turkeys each year if proper time and attention are devoted to it. The department points out, however, the desirability of those who enter the business to study it thoroughly in all its features.

Difficult to Ship Alive.

It is very difficult to ship turkeys alive to market since the shrinkage is very heavy. Ordinarily turkeys do not eat very much when confined, and therefore they are usually killed and dressed locally and then shipped to market, packed in barrels or boxes. Turkeys, like chickens, may be either scalded or dry picked, but the dry-picked birds are preferred in most markets because they keep better, and there are no losses of their substance by reason of a great deal of the soluble substance being removed by soaking in water or by packing in ice. There are conditions, of course, where there is no alternative but to pack the birds in ice and ship them in barrels. The objection to scalded-dressed birds does not obtain to the same extent, where the birds are dressed and sold immediately to the consumer.

An Excellent Specimen.

Turkeys mature and fleshen very much better in the fall when the atmosphere is crisp and fairly cold, such as prevails for some weeks preceding the holiday season. During this season the birds are in greatest demand, although the cold storage product may be had at all seasons. Warm weather during the week preceding the holidays has a marked effect on demand, and, other conditions being equal, the quality of dressed turkeys for the holiday market may be predicted to a great degree by weather conditions during the fall season.

RAISING SCRUB LIVE STOCK

Unnecessary Waste of Time and Feed, Declares Doctor Mohler, Chief of Animal Bureau.

"There is increasing evidence," declares Dr. J. R. Mohler, chief of the bureau of animal industry of the United States Department of Agriculture, "that raising scrub live stock is an unnecessary waste of time and feed. Any live stock owner can improve the quality of his herds and flocks by the better-sires route. Purebred sires permit the raising of grades, crossbreds, or purebreds—whichever is preferred—depending on the kind of females used."

Increasing Milk Checks.

The cows should now be kept in the barn at night and made as comfortable as possible. This care combined with plenteous feeding will do much toward making the winter milk checks larger.

Shallow Cultivation Best.

Generally speaking, the shallower the cultivation the better, as long as weeds are killed.

PEAS THRIVE IN MANY SECTIONS

Too Much Space Required for Growing in Garden.

Crop Will Thrive on Almost Any Good Garden Soil and Require Only Moderate Amount of Fertilizer —Alaska Seed Best.

(Prepared by the United States Department of Agriculture.)

Peas, sometimes spoken of as English peas, are adapted for growing from the Gulf of Mexico to Canada, and from Maine to California, with the exception of a few local sections where they do not thrive. Peas require too much space for growing extensively in the small garden, say specialists of the United States Department of Agriculture, but are especially adapted to the farm garden.

In Florida and certain of the gulf coast regions the seed is planted in the fall and the peas gathered during the first days of spring. Farther north the seed is planted in February and March and the peas ready for use in May and June. Going still farther into New England and the northwest they are planted in April and ready for use in July or August, all dependent, however, upon the locality. In the southern district, where the ground rarely ever freezes, the seeds are planted about 1½ inches deep, but farther north where late freezes are liable to form a heavy crust over the ground the seed should be covered three to four inches in light sandy soils but not quite so deep in heavier or clay soils.

Alaska or Earliest of All is considered one of the best of the early varieties and easy to grow. One pint of seed of the Alaska will plant about 100 feet of row, and while it is desirable to have brush or wire netting for them to climb on, they may be grown without any support whatever. Gradus, Thomas Laxton, American Wonder, Sutton's Excelsior and Laxtonian are among the best early peas.

POULTRY

GROUND GRAIN IS ESSENTIAL

Less Work Is Required of the Gizzard and More Food Can Be Used for Flesh and Eggs.

(Prepared by the United States Department of Agriculture.)

A mash composed of ground grains or their by-products and some form of animal protein is an essential part of a ration for both growing chickens and laying hens. The reason is that birds putting on growth or producing eggs cannot assimilate enough nutriment from whole or cracked grains to supply the maximum need. When the grain is ground, little work is required of the gizzard, and much more of the feed can be used in making flesh or eggs.

Feeding Grain to the Farm Flock.

The scratch grain part of the ration, however, is needed to give the gizzard something to do in order to keep the birds in health. For laying hens the scratch grain thrown in the litter provides an incentive to needed exercise.

It was once thought that the mash should be fed wet to produce the best results, but experiments have proved that in spite of the slightly better palatability of the wet feed, the convenience of feeding it dry overbalances any slight gain in production. Feeding it dry is now the usual method. Digestibility is not increased by wetting.

The principal objection to the wet mash is that it requires too much labor. It must be moistened, then carried to the hens once a day, and the troughs must be cleaned after each feeding. Cleanliness is absolutely essential, because indigestion and diarrhea will result from feeding in dirty troughs. On the other hand, the dry mash hopper may be filled once a week or even less frequently, and needs no further attention. Hens do not overeat of dry mash as they sometimes do of wet feed.

PROPER SIZE OF HEN FLOCK

Number Which Can Be Kept Most Efficiently Will Depend Upon Space Available.

The size of the flock which can be kept most efficiently will depend upon the space available and upon the amount of table scraps and other waste available for feed. It is a mistake to overstock your land, says the United States Department of Agriculture. Better results will be obtained from a few hens in a small yard than from a large number. The back-yard flock rarely should consist of more than 20 or 25 hens; and often of not more than eight or ten. For 20 or 25 hens you should have a yard 25 by 3 feet in size.

POULTRY NOTES

A constant supply of broken charcoal makes a good digestive regulator.

* * *

Don't keep meat scraps in a warm moist place.

* * *

The best medicine for poultry of any age is good care.

* * *

The floor of the poultry house should be dry. It should always be well bedded with straw.

* * *

A platform under the roosts keeps the floor clean and increases the capacity of the house.

* * *

When selecting breeding cockerels, choose the birds that matured early and show bright intelligent heads with short bills.

* * *

Look out also for moldy wheat or grain mash of any kind left in the bottom of the hopper. This will quickly

Remember Your Savings Account

Every parent should start a Savings Account for his children. Deposit a dollar to their account and encourage them to save pennies, nickles and dimes to add to it.

A dollar looks mighty big to the child, and the meager start will provide him or her with the beginning of an account that may the means of their education in training for a successful life. And the saving habit that is formed in childhood will last througout life.

PERHAPS LEATHER WON THE WAR.

A total of 580,182 horses and mules were on army property rolls during the war.

For these 1,763,199 brushes were bought—nearly three for each animal.

For these 2,033,204 nose-bags were bought, more than three to each animal.

For these 2,850,853 halters were bought, nearly five to each animal.

Of the 580,182 horses and mules 86,000 were saddle horses. For these 945,000 saddles were bought, not quite eleven saddles to each horse.

A total of 712,510 sets of spur straps were bought, enough to supply every mounted officer with thirty-six sets.

Altogether our army leather program cost three quarters of a billion dollars. And one reason why, during and after the war, civilian shoes cost from $15 to $20 a pair was that the army program called for more leather than America produced—which may also be a reason why Uncle Sam paid for 32,000,000 pairs of shoes an average of $7.15 a pair.—American Legion Weekly.

Starting with a skirt that is twelve inches from the ground, they now say that every inch a girl adds to her skirt adds two years to her age—so far as appearances go. Some of our grandmothers have been traveling in short skirts and learning to tango. If they are to be put back into long drapes they will look their 70 years all right, and will permanently join the wall flower class. The long black skirts should be reserved for girls under 16. They can wear them and still defy the mirror. Someone said that a woman is as old as her neck. That seems to be a mistake. She is as young as her legs.—Los Angeles Times.

Had there never been any sorrow in the world there had never been any sympathy.

LOCAL FIRM M[illegible]ES BIG SLAS[illegible] PRICES

Trade Ter[illegible] to Awaken Throu[illegible]eighty Ad in The Banner.

The attention of readers of The Banner is called to the large advertisement of H. Christianson & Son, which will be found on another page of this issue. Coming at a season of the year when the average family is adding to its stock of supplies for the winter, the appeal of this progressive firm for business should meet with a ready response from the people of Goodridge and vicinity.

It is not the habit of H. Christianson & Son to put on sales at frequent intervals—or rather alleged sales—as is the case with merchants in many of the larger towns. When a sale is announced by this firm it means something. Prices have been cut to the core all along the line and the goods offered are of the very best quality.

The sale will open next Saturday morning, December 2, and will continue for one week only. Christianson & Son have been in business in this village for many years and have built up an enviable reputation as merchants. They believe in advertising and feel that their success is in large measure due to the fact that they have endeavored to gain the confidence of the people through the use of publicity of various kinds—principally newspaper advertising.

Those of the business men of Goodridge who are inclined to a pessimistic view of conditions at present and who bemoan the tendency of buyers to confer their custom upon towns where merchants are alive to the value of advertising, have themselves largely to blame for this state of affairs. They can fight the outside merchant with his own weapon and have the distinct advantage of playing the game on the home grounds. The Banner has a habit—almost a craving—to see the legitimate trade of a territory go where it rightfully belongs—at home. The local newspaper offers the best means in the world for accomplishing this end. The only thing remaining is for the local merchant to wake up to a realization of this fact.

Banner columns afford the vehicle for the merchant to carry his message to the buying public. The conclusion is obvious.

Theodore Tandberg spent the weekend in Thief River Falls visiting with friends and relatives.

Some Pennington County Corn That Makes 'Em Fat

BUS TO MEET ELECTRIS CAR FOR TRIP TO DAIRY SHOW

The Banner is informed that the Crookston 'bus will meet the electric car at Thief River Falls to take passengers to Red Lake Falls to attend the dairy show to be held there December 5, 6 and 7. Creamery men and dairy cow breeders throughout Pennington county are expected to attend and it is urged that all farmers who are able to do so take in the show. Chris Heen, dairy commissioner of Minnesota, will speak and a good program has been arranged. A cup will go to the creamery which is represented there by the largest number of patrons.

GOODRIDGE CHOIR SINGS AT THIEF RIVER FALLS CHURCH

The Goodridge Free Lutheran church choir autoed to Thief River Falls Sunday morning and sang at the Zion church, where Evangelist Peter E. Nelson has been holding meetings for the past week. They favored the congregation with songs at the forenoon and afternoon meetings. The following members of the choir were present: Clenora Urdahl, Mabelle Tweeton, Gretta Gulrud, Carrie Urdahl, Minnie Lindbloom and Pearl Bergeson and Messrs. Elmer Resan, G. C. Gulrud, O. N. Urdahl and H. B. Rockne.

McLeod Ships Guernseys.

Stuart McLeod was among the Pennington county breeders of Guernseys who shipped a carload of these well-known dairy animals to Waseca to be distributed among patrons of the creamery there. Altogether there was 24 head and it is understood that all of the cows brought a good price.

COMMUNITY CLUB IS ATTENDED BY MANY

Program Given on Friday Evening Is Among the Best of Season.

Bing, bang and lots of pep—three monosyllable words—are the only suitable expressions whereby The Banner can convey its estimation of the fine Community Club arousal Friday evening, November 24th.

First, three snappy songs were chirruped by the audience that filled every available sitting and standing space on the second floor of the large school house; the crowd had but a few moments to draw into their wanting lungs the lacking oxygen, when four maidens dressed in cornstalk made in Hula Hula dancing skirt style made their appearance and did an intentional injustice to their otherwise unblemished vocal abilities.

Next was introduced the Goodridge Augmented Anti-Harmony Orchestra, which rendered "Sit-and-Pant Echoes" written especially for the occasion by the nimble bandmaster with the villainous looking mustache and who brought out the "technique" and "expressive" parts of the selection with his baton that would have made Beethoven stare with envy, especially the tympanums obeyed the gestures signifying fortismo to an extent of perfection.

A flute solo with an expressive obligato throughout was next that caused a good many aches from the strenuous mirth already adhered to.

In order to quiet the uproarous laughter and to give the audience something more sombre, 12 little boys and girls gave a drill, composed of singing and elocutionary selections. This was highly appreciated and much praise was evident for the teachers who had striven to train the youngsters for their various roles.

An accordion solo by Oscar Wiseth by no means a "to be scoffed at accordionist," was hugely enjoyed by all admirers of the "go from me and come to me" instrument.

A doctor's laboratory was next uncovered before astonished obticals, with a medical practitioner of stinted growth in consultation with a patient of extravagant height, who desired to become somewhat more abrupt and tea-kettle shape. The efficient doctor diagnosed the case and found it necessary to inject a medical compound into the cranium of the elongated individual and in order to do this he secured a nine-foot ladder and scaled to the top and performed the "miracle" that brought a gasp of astonishment from the audience when a shrinkage commenced that ended in the desired size and shape. The crowd was still inclined to be disbelieving of the doctor's abilities and in order to clearly demonstrate his phenomena he injected another serum into the skull that caused a sudden run of the person's head towards the ceiling that resulted in the former size and shape. An ear-bursting applause was the unanimous compliment.

The following number was a vocal solo by the able conductor, delivered in a bass voice that harmoniusly rumbled from octave to octave with resemblance in sound of a 75-car freight train passing over a span, and with the alacrity of a chipmunk climbing a tree.

As a concluding number the audience sang two more songs, after which the crowd enjoyed themselves at the various fishing ponds, fortune telling booths, etc.

DAN SHAW IS POSTMASTER

A telegram from Washington late last evening conveyed the information that Daniel Shaw had been appointed postmaster of Thief River Falls, to take effect today. It seems that Mr. Morgan had quietly tendered his resignation and Congressman Steenerson recommended Mr. Shaw for the unexpired term, which ends next July.

GRAVELLING STATE ROAD BETWEEN COUNTY LINES

Operations were commenced Monday for the gravelling of the northern part of the state road running between the Red Lake county line and the Marshall county line. The work undoubtedly will be completed precipitately as a large number of teams and wagons are being prepared for the hauling. The stretch to be gravelled extends from Goodridge north to the Marshall county line. From Goodridge and as far south as the road extends was gravelled a year ago this fall.

LUTHERAN CHURCH.

(Missouri Synod)

Sunday, Dec. 3: German services at Germantown at 3 P. M. Sunday school at 2 P. M. English services in the parsonage in Goodridge at 8 P. M. "We preach Christ Crucified." H. Lutz, pastor.

Annual Business Meeting.

The annual business meeting of Nazareth congregation in Goodridge will be held in the church Tuesday, December 12, at 2 o'clock P. M., for the purpose of electing officers for the ensuing year, and do such other business that may come before the meeting.

H. A. HALVORSON, Secretary.

OLD-TIME RESIDENT OF MOYLAN IS DEAD

Passes Away Sunday Night at Home of Step-Daughter in Thief River.

Sunday, November 26, at Thief River Falls occurred the demise of Jacob Einarson, a farmer residing about 10 miles north of Goodridge and well-known in this village.

Death occurred at the home of Mr. and Mrs. Ferdie Brown, the latter being his step-daughter, and was caused by heart failure. Mr. Einarson was on his way to consult a doctor, having left here Saturday accompanied by Albert Wilkins, a neighbor, who left him at the Brown home and returned.

His health seemed to have improved Saturday evening when he retired, but in attempting to awaken him Sunday morning he was found dead.

Deceased was 65 years old and has resided here for about 20 years. He is survived by one son, Harold, age 16, and by three step-children. Funeral services were held at St. Hilaire Tuesday.

AN ERROR.

An error was made in our last week's issue when we neglected to mention that Miss Lena Resan entertained with her brother Monday night instead of Sunday night at a venison dinner. We also failed to mention two other guests, namely, Misses Thelma and Guida Gilbertson.

Mrs. McDonald Entertains.

Mrs. R. H. McDonald delightfully entertained a few young ladies Saturday evening. The hours were spent at cards and music, followed by dainty refreshments. Those present were: Misses Pearl Bergeson, Magda Nelson, Minnie Lindbloom, Adeline Davids, Sena and Hilda Christiansou.

Ladies' Aid to Meet.

The Ladies' Aid meets at the church December 7, entertained by Mrs. H. A. Halvorson and Mrs. M. G. Thoreson. All are invited.

Missionary to Speak.

Missionary Eilason will preach in the Scandinavian language at the Free Lutheran church of Goodridge Sunday, December 3. English services at 8 o'clock P. M. in the same church.

John Svare arrived from Pelican Rapids Thursday to visit at the K. Roysland home at Erie for an indefinite time.

Mrs. Mickel Nelson returned Tuesday morning from Thief River Falls, where she spent a day visiting.

LUTHER LEAGUE HAS EXCELLENT PROGRAM

Active Program Committee Makes Event Enjoyable Affair.

The Luther League relinqu[illegible] excellent a program Wednes[illegible] evening as has ever been performed since the organization came into being.

Much encomium is due to the program committee and to the people who were partakers in the deliverance of the program. The following fine numbers were delivered in a polished manner:

Song, Luther League; scripture reading and prayer, Rev. Aaker; song, Luther League group of girls; recitation, Esther Ronkin; reading, Clarice Aarness; song, Tena Gaudland, Hazel Thoreson and Eunice Thoreson; concert reading, Alice Stephenson, Ruth McDonald, Edith Gunderson, Ida Bundhund, Florence Halvorson; discourse, Rev. Aaker; song, Luther League.

The usual election of committees was held with following nominees: Program committee, Ruth McDonald and Tena Gaudland. A lunch committee was also named.

A large and appreciative assembly of hearers were in attendance. A light lunch with a minimum charge of 10 cents was served immediately after the performance.

EDDIE KUSMACK BREAKS WRIST IN STARTING AUTO

Eddie Kusmack, the young son of Mr. and Mrs. John Kusmack, had the ill fortune of breaking the carpus of his right arm Friday evening. The accident occurred when the lad attempted to crank a Chevrolet car with the result that it recoiled and severed the bone. The boy was taken to Thief River Falls Saturday, where the injured member was set and at the present he is getting along nicely.

BUYER FOR CREAMERY HAS OFFICE IN BANNER "BLOCK"

The offices of Noble Urdahl, cream buyer for the Goodridge Creamery, were moved Sunday to the west room of the Wold building, occupied by The Banner. The move from the creamery up town was made because of the distance of the creamery from the business center, many patrons objecting to the haul.

I. D. Converse of Grygla stopped in at Goodridge Thursday of last week en route to Red Lake Falls, where he will take up his future residence.

Hercules Cold Solder

ASIA MINOR IS TRAGEDY SCENE

Refuges Crowding Down to the Fringes of Black Sea and Mediterranean.

NO FOOD FOR STARVING

Pitiful Appeals for Help Sent by American Warships in Near East—Snow Makes Suffering Intense.

Constantinople—Another human tragedy that promises to rival the Smyrna fire is developing in northern Asia Minor, where the tide of a quarter of a million Christian inhabitants is sweeping in full flood to the fringes of the Black sea and the Mediterranean.

These refugees are clamoring to be saved. The American naval base at Constantinople is deluged with S O S calls from the flotilla of American destroyers patrolling the Mediterranean and Black sea coasts of Asia Minor, which are crowded with Christians fleeing from the Turk. There is a poignant note of despair and tragedy in every message snatched from the air. Appeals from land to "save our souls" are received almost hourly and are taxing the capacity of the American radio staff here.

Thousands of Orphans.

Appeals come from every part of Anatolia, where whole Christian communities are migrating and where the American Near East Relief is working heroically to overcome almost insuperable obstacles, including the removal of orphans for great distances to the sea.

Cryptic radiographs received here indicated that "a critical situation was developing with surprising suddenness; the whole interior is blanketed with snow, adding immeasurably to the misery of the exiles."

A wireless from the destroyer Barry said:

"Five hundred Christians are arriving at Samsun daily from parts unknown."

Another from the Barry, relayed from Sivas, in the interior of Anatolia, said:

"Ten thousand Christians and two thousand orphans trudging through the snow from Sivas are looking to the Americans to save them."

Many Near Death.

Another destroyer relayed a dramatic appeal to the Near East Relief at Constantinople from James H. Crutcher of Tuscaloosa, Ala., at Samsun. "Can you take a thousand mountain children? If not it means their end."

One from the destroyer Lawrence came from Americans at Trebizond, declaring: "We cannot hold up evacuation of Trebizond much longer. We are overwhelmed by arrivals from the interior. Instruct immedaitely."

RUSSIA ASKS PARLEY HAND

Lausanne—America's insistence for the open door and equality economically in the Near East, which follows her traditional demands for equal commercial privileges in the Far East, was cited by the Russian delegation as supporting an official communication forwarded by the Russian delegation to the conference asking for the right of speech on all matters before the body.

Russia objects vigorously to any attempt to limit her activities in the discussion of the future status of the Dardanelles; she claims that all topics on the Lausanne agenda are closely related to the supreme object of freedom of the straits and that stable peace in the Near East can be attained only by allowing the Russian delegates free participation on the same basis as the other great powers.

Points to U. S. Stand.

In their official petition the Russians affirm that only by following the principle of equality can the conference hope to reach the goal of greater equity in their relations between nations—"as expressed at the opening of the conference and confirmed by the recent declaration of the representative of the United States."

ILLINOIS ROCKED BY QUAKE

St. Louis, Mo.—Considerable property damage was caused by earth tremors of moderate intensity in eastern Missouri, southern Illinois, western Indiana, and northwestern Kentucky, according to reports reaching here. The tremors shook buildings and homes, toppled chimneys from residences, broke windows, knocked chinaware from shelves and frightened residents in the parts of the four states.

Hunger Striker Is Released.

Dublin—Miss Mary MacSwiney, who has been hunger striking in Mount Joy prison, has been released. Her release came on the twenty-third day of her hunger strike. She had refused to take food since her arrest on November 4, when she was seized during a raid on a house in Aylesbury Road by nationalist troops who were seeking Eamonn De Valera. Miss MacSwiney was released at 7 p. m., and was taken in an automobile to the Mater hospital.

1.—Congresswoman Winnifred Mason Huck of Chicago (left) dictating to her secretary her first letter from her new office in Washington. 2.—Palace of the former German kaiser on the island of Corfu, now used by the American Near East Relief to shelter orphan refugees from Turkey. 3.—Miss Esther McDonald of Northwestern university, voted the most beautiful girl in mid-west colleges.

NEWS REVIEW OF CURRENT EVENTS

President Asks Congress in Extra Session to Pass Ship Subsidy Bill.

DEMOCRATS ALL AGAINST IT

Measures Link Bonus and Modification of Volstead Act—Turks at Lausanne Are Having Hard Sledding—Clemenceau's Frank Speeches in American Cities.

By EDWARD W. PICKARD

> GEORGES CLEMENCEAU, the "Tiger" of France, is telling his American audiences that Europe's unrest is due to the fact that the United States abandoned the Old World to its troubles without trying to help it adjust matters after the war. He says we should enter an informal alliance with France and Great Britain. What do you and your acquaintances think about that?

PRESIDENT HARDING, addressing the extra session of congress which opened Monday of last week, appealed for the enactment of a ship subsidy bill. He said there were but three courses to be taken in this matter—"constructive, obstructive and destructive." And though he admitted there is, even in his own party, decided opposition to such a measure, he urged that congress take the constructive course. He argued that the measure as drafted provided complete safeguards against exploitation for favored interests and said that he believed government aid for the merchant marine was as justifiable as government aid of industry through tariff laws or railways through land grants and loans, and government expenditures for good roads, inland waterways, reclamation and irrigation projects.

Mr. Harding especially emphasized the point that the contemplated legislation would not call for new expenditures, but instead proposes to substitute for the present annual drain of $50,000,000 upon the public treasury direct compensation equal to a trifle more than half that amount.

Congress listened to the President calmly and coldly and then the majority got busy with the program, to do the best it could in the circumstances. The bill was quickly reported favorably by the committee on merchant marine, and on Wednesday the house adopted a special rule for its consideration. This provided for three days of general debate and three for consideration of amendments, and a final vote on Wednesday of this week. Meanwhile the Democratic members in caucus decided to oppose the measure solidly, and some Republicans let it be known they would vote in the negative because they thought the people of their districts didn't want the bill.

THERE were two interesting features of the senate's session Tuesday. The first was the swearing in of the first woman to hold a seat in the United States senate—Mrs. W. H. Felton of Georgia. Senator-elect George delayed the presentation of his credentials that this historic event might take place. Next day Mrs. Felton answered once to her name in the roll call, told the senate how proud she was, and retired after 22 hours and 25 minutes of actual service.

The other feature was the bringing up of the Ku Klux Klan matter. A letter from Governor Parker of Louisiana to a New York ex-service man was read by Senator Walsh of Massachusetts. It urged that senators and congressmen be asked to assist in combating the organization. Governor Parker was in Washington at the time, having journeyed there to appeal to the President for federal aid in driving the Klan from his state. Mr. Harding told him the federal government could interfere in the matter only where federal interests were involved and that he was confident Louisiana could take care of the situation. Parker left for home with the statement that he was going to make a fight to the finish against the Klan. Governor Hardwick of Georgia says he will co-operate with Governor Parker in this, and already Governor Allen of Kansas has started legal proceedings to stop the operations of the Klan in his state, because it has not filed its articles of incorporation. Governor Olcott of Oregon also has declared himself the unrelenting foe of the Klan.

TRUMAN H. NEWBERRY of Michigan put an end to the long controversy over his election as senator and at the same time relieved his party of great embarrassment by resigning his seat. He said it would be futile for him to attempt to continue his public service as he would be continually hampered by "partisan political persecution." Republican leaders, though sympathizing with Mr. Newberry, agreed that he had adopted a wise course.

TWO soldiers' bonus bills have been introduced in the house, and both of them involve modification of the Volstead prohibition act for both provide for financing the bonus by taxes on liquors now classed as intoxicating. The bill introduced by Representative Hill of Maryland provides that the bonus be financed by a 20 per cent tax on beer and cider containing not more than 2.75 per cent alcohol. The measure sponsored by Representative Britten is the old bill amended so that the necessary funds shall be raised by a tax of $10 a barrel on domestic beer, $30 a barrel on imported beer, $10 a gallon on imported champagne, $5 a gallon on imported still wines, and $2 a gallon on domestic wines.

Whether either or both of these bills are fathered by the "wet" organizations is not stated, but the coupling of the bonus and the liberalizing of the Volstead act may turn out to be a clever and winning move. The Association Opposed to Prohibition is on the war path and overlooking no chance. Its executive committee has decided to conduct active campaigns to have the state and national conventions of both parties insert "wet" planks in their platforms.

Senator Spencer of Missouri, Democrat, has announced that he will introduce a bill to create a scientific commission to investigate and decide the question, "When is liquor intoxicating?"

ISMET PASHA and his Turkish Nationalist colleagues find themselves up against a tough proposition in the Near East peace conference which began its sessions at Lausanne on Monday. Lord Curzon, by promising Britain's full support for the French program in relation to Germany, brought about complete accord between Great Britain and France in regard to the terms to be imposed on the Turks, and in general it appeared that Italy would agree with them. To start with, the allies decided, over the protests of the Turks, that the proceedings of the conference should be secret and every delegate was pledged not to reveal them, the press being given only a brief communique each day. After several days the Turks again protested against this, asserting that the British and French delegates were giving out the news to correspondents secretly, while they, as Moslem gentlemen, were observing their pledge. All of which availed them nothing. Ismet also objected in vain to the presence of "third parties," especially the Japanese, in the conference, and asked why Russia was not fully represented. In the latter he was backed up by Premier Mussolini of Italy who declared Russia should participate fully in the conference. This stand of the Fascist statesman was a great surprise to the British and French. The soviet delegation was a week late in arriving.

When the conferees got down to business Ismet Pasha submitted the demand of Turkey for the 1913 frontiers or those resulting from the second Balkan war, and for a plebiscite in western Thrace. The allies virtually decided at once that these demands should be rejected, but it was said the matter might be referred to a committee. They were opposed vigorously by Venizelos for Greece and by the Bulgarians, Rumanians and Jugo-Slavs.

Stambouliski asked the conference to give Bulgaria a corridor to the Aegan sea, including Dedeagatch, but Greece and the allied powers opposed this. It is not unlikely Bulgaria will be granted an outlet by the free use of a railroad to Dedeagatch, which would remain Greek territory.

Abdul Medjid Effendi, a man of scholarly attainments, has been elected caliph of the Mohammedan church by the Nationalist assembly, and installed in Constantinople. The deposed sultan reached Malta safely under protection of the British, and it has been rumored that they will make use of him later in India to create antagonism there against the Nationalists.

WILHELM CUNO, the new German chancellor, spent much of the week selecting the members of his cabinet from the bourgeoise parties, and seemingly he believes his government will be strong enough to withstand the assaults of the angry united Socialists. The latter rejected President Ebert's appeal to drop their quarrel with the People's party and help save Germany from collapse. This caused Ebert to repudiate his own party and authorize Cuno to ignore the Socialists.

KING GEORGE opened the new British parliament with the usual speech from the throne, in which he asked that, as regards trade and employment, the ameliorative measures prepared by the Lloyd George government be continued and extended. James R. MacDonald, who had been elected leader of the Labor party and therefore is leader of the opposition in parliament, started the debate on the king's speech by calling for alleviation of the distress arising from unemployment. How serious this question is was made plain by the enormous parade of the unemployed in London which at first demanded access to Prime Minister Bonar Law but was turned away from Downing street by diplomacy. The first urgent business of parliament, however, will be the passage of the Irish bill, for if the Free State constitution has not been ratified by December 6 the Anglo-Irish treaty will lapse.

M. GEORGES CLEMENCEAU is delivering a series of addresses in the largest American cities, explaining the present day attitude of France and telling Americans wherein, as he thinks, their own country is at fault in not taking an active part in the efforts to revive Europe. His strictures and his advice are received with enthusiasm, with interest or with dissent, according to the opinions of his individual hearers and readers, but always they are received with friendly spirit, for the old man himself inspires admiration and liking everywhere. It is not likely that he can induce America to enter into the alliance with France and Great Britain which he advocates, but probably he will be successful in giving us a better understanding of the policy of France and her urgent needs.

ANOTHER great mine disaster occurred last week, this time near Birmingham, Ala. Cars running wild severed an electric cable and a spark caused a terrible dust explosion 1,100 feet from the entrance. Four hundred and seventy-five men were trapped, and of these 84 were killed. Many others were severely injured.

EVERYONE will be interested in the story which came out of French Lick Springs, Ind., where Mayor Hylan of New York has been stopping after a visit to Chicago. It is to the effect that Hylan and Mayor Thompson of Chicago have formed an alliance for the purpose of getting William Randolph Hearst nominated for the presidency in 1924. It is said they will hold over the heads of the leaders of the Democratic party the threat of forming a third party to include all the insurgents and more radical farmer and labor elements. In fact, Hylan made just that threat in a statement to the press.

DAIRY HINTS

EXCELLENT GIFT FOR YOUTH

Department of Agriculture Suggests Purebred Calf, Pig or Some Other Animal.

(Prepared by the United States Department of Agriculture.)

In selecting birthday and Christmas gifts for children in rural communities, why not give a purebred pig, calf, or other animal? This is the suggestion of the United States Department of Agriculture, which, with the various states, is conducting the "Better Sires—Better Stock" campaign. A recent questionnaire study of the utility value of purebred live stock showed, among other results, that home influence is an important factor governing the breeding of superior domestic animals. In fact, it ranks in importance next to sales, fairs, and shows, taken collectively. When parents show their interest in good stock the children are more likely to do so.

One breeder told of receiving some purebred live stock as a wedding gift from his father-in-law. That beginning was an important influence, which resulted in an entire herd of well-bred, profitable animals, a practical influence in the couple's prosperity and happiness.

A Club Member and His Purebred Calf.

Gifts of good live stock, the department points out, are not only acceptable in themselves but with proper handling multiply and give pleasure, satisfaction, and financial benefits for an indefinite period.

Common Sense Counts

Success in the dairy business or in keeping even a small herd of dairy cows depends (like most things do) in a great measure upon the use of good common sense. Cows produce the most milk usually in the latter part of May and June. Therefore, what does the wise dairy farmer do? He maintains as nearly as possible the year round, the conditions of those months when production is the highest.

Palatable food, a succulent ration, and a balanced ration, together with a moderate temperature and comfortable surroundings, will bring as near the ideal producing conditions as is possible, and an effort to keep conditions so will pay big returns.

FEED DRY COW ON ROUGHAGE

Daily Allowance of Bran or Oats Is Favored—Cabbage and Pumpkins Are Very Good.

During the eight or ten weeks that cows go dry, their food should be chiefly roughage. A daily allowance of two pounds of bran or oats, or a mixture of two parts each of bran and oats and one part of linseed meal or corn-oil meal makes a proper feed for a cow near calving. Some roots, cabbage, pumpkins, or squashes are also very good. Highly carbonaceous roughage, such as straw and corn stalks, is not good at this particular time. Such feeds, with cold water, cold drafts, or lying out at night on damp or frozen ground, are the chief causes of caked udder or garget.

Cleanliness in Everything.

Milk pails and other utensils should be free so far as is possible from crevices where dirt may lodge and be hard to remove. Cream separators and other dairy utensils should always be cleaned properly immediately after use. This practice not only improves the quality of the milk and cream but makes the work easier and the utensils last longer.

Clean Utensils.

All utensils which come in contact with milk and cream should be kept clean at all times. It is well to use pails with a partly covered top because this keeps out 50 per cent of the dirt and other impurities which would otherwise get into the milk.

Safeguards in Calf Feeding.

Critical in a calf's life is when his feed is changed from whole milk to skim milk. To avoid scours make the change very gradually, adding a little skim milk to the whole milk each day.

SPENT HALF HER TIME IN BED

Farmer's Wife Tells How Lydia E. Pinkham's Vegetable Compound Made Her a Well Woman

Carter's Creek, Tenn.—"Three years ago I was almost an invalid. I spent half of my time in bed, being afflicted with a trouble which women of a certain age are apt to have. I took Lydia E. Pinkham's Vegetable Compound Tablets and used Lydia E. Pinkham's Sanative Wash. I am a well woman now and have been for two years. I can work as well as any one who is younger and as I am a farmer's wife I have plenty to do for I cultivate my own garden, raise many chickens and do my own housework. You may publish this letter as I am ready to do anything to help other women as I have been so well and happy since my troubles are past."—Mrs. E. T. GALLOWAY, Carter's Creek, Tenn.

Most women find plenty to do. If they are upset with some female ailment and troubled with such symptoms as Mrs. Galloway had, the smallest duty seems a mountain.

If you find it hard to keep up, if you are nervous and irritable, without ambition and out of sorts generally, give the Vegetable Compound a fair trial. We believe it will help you greatly, for it has helped others.

Progress in Sahara.

The limits of the great arid wastes of the Sahara desert are slowly being narrowed by the invasion of windmills and motorcars. The oases are being linked together by good motor highways and the sinking of wells is greatly increasing the tillable area. The soil is fertile and, wherever water can be obtained, tropical fruits, millet and other cereals may be raised.

A trans-Saharian railroad has been proposed by the French government, but there are many technical problems to be solved in the construction of such a line. The desirability and value of a rail connection across the desert between southern Algeria on the north and western French Africa on the south is obvious.

Risky Talk.

"Air like wine—"

"Shut up. Do you want to get us arrested?"—Louisville Courier-Journal.

Help That Bad Back!

ARE you tortured with constant backache—tired, weak, all unstrung after the least exertion? Evening find you worn out and discouraged? Then look to your kidneys! When the kidneys weaken, poisons accumulate in the system and cause nagging backache, stabbing pains, headaches and dizziness. You feel nervous, irritable and "blue," and likely suffer annoying bladder irregularities. Don't wait. Neglect may lead to serious kidney sickness. Use *Doan's Kidney Pills. Doan's* have helped thousands and should help you. *Ask your neighbor!*

A North Dakota Case

O. T. White, carpenter, 402 W. 12th St., Devils Lake, N. D., says: "There was a constant, dull ache through the small of my back and often I was so lame I could hardly straighten. My kidneys acted too freely. The secretions were unnatural. I used Doan's Kidney Pills and they corrected the trouble."

The Goodridge Banner.

"Devoted to the Agricultural Interests of the Finest Dairy Section of Minnesota."

VOL. XVI. NO. 37 FRIDAY, DEC. 1, 1922. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA $1.50 PER YEAR.

State Board of Health

LOCAL FIRM M[illegible]ES BIG SLAS[illegible] PRICES

Trade Ter[illegible] to Awaken Throu[illegible] [illegible]ighty Ad in The Banner.

The attention of readers of The Banner is called to the large advertisement of H. Christianson & Son, which will be found on another page of this issue. Coming at a season of the year when the average family is adding to its stock of supplies for the winter, the appeal of this progressive firm for business should meet with a ready response from the people of Goodridge and vicinity.

It is not the habit of H. Christianson & Son to put on sales at frequent intervals—or rather alleged sales—as is the case with merchants in many of the larger towns. When a sale is announced by this firm it means something. Prices have been cut to the core all along the line and the goods offered are of the very best quality.

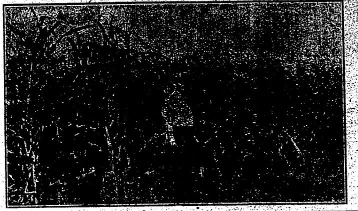
The sale will open next Saturday morning, December 2, and will continue for one week only. Christianson & Son have been in business in this village for many years and have built up an enviable reputation as merchants. They believe in advertising and feel that their success is in large measure due to the fact that they have endeavored to gain the confidence of the people through the use of publicity of various kinds—principally newspaper advertising.

Those of the business men of Goodridge who are inclined to a pessimistic view of conditions at present and who bemoan the tendency of buyers to confer their custom upon towns where merchants are alive to the value of advertising, have themselves largely to blame for this state of affairs. They can fight the outside merchant with his own weapon and have the distinct advantage of playing the game on the home grounds. The Banner has a habit—almost a craving—to see the legitimate trade of a territory go where it rightfully belongs—at home. The local newspaper offers the best means in the world for accomplishing this end. The only thing remaining is for the local merchant to wake up to a realization of this fact.

Banner columns afford the vehicle for the merchant to carry his message to the buying public. The conclusion is obvious.

Theodore Tandberg spent the week-end in Thief River Falls visiting with friends and relatives.

Some Pennington County Corn That Makes 'Em Fat



BUS TO MEET ELECTRIS CAR FOR TRIP TO DAIRY SHOW

The Banner is informed that the Crookston 'bus will meet the electric car at Thief River Falls to take passengers to Red Lake Falls to attend the dairy show to be held there December 5, 6 and 7. Creamery men and dairy cow breeders throughout Pennington county are expected to attend and it is urged that all farmers who are able to do so take in the show. Chris Heen, dairy commissioner of Minnesota, will speak and a good program has been arranged. A cup will go to the creamery which is represented there by the largest number of patrons.

GOODRIDGE CHOIR SINGS AT THIEF RIVER FALLS CHURCH

The Goodridge Free Lutheran church choir autoed to Thief River Falls Sunday morning and sang at the Zion church, where Evangelist Peter E. Nelson has been holding meetings for the past week. They favored the congregation with songs at the forenoon and afternoon meetings. The following members of the choir were present: Clenora Urdahl, Mabelle Tweeton, Gretta Gulrud, Carrie Urdahl, Minnie Lindbloom and Pearl Bergeson and Messrs. Elmer Resan, G. C. Gulrud, O. N. Urdahl and H. B. Rockne.

McLeod Ships Guernseys.

Stuart McLeod was among the Pennington county breeders of Guernseys who shipped a carload of these well-known dairy animals to Waseca to be distributed among patrons of the creamery there. Altogether there was 24 head and it is understood that all of the cows brought a good price.

COMMUNITY CLUB IS ATTENDED BY MANY

Program Given on Friday Evening Is Among the Best of Season.

Bing, bang and lots of pep—three monosyllable words—are the only suitable expressions whereby The Banner can convey its estimation of the fine Community Club arousal Friday evening, November 24th.

First, three snappy songs were chirruped by the audience that filled every available sitting and standing space on the second floor of the large school house; the crowd had but a few moments to draw into their wanting lungs the lacking oxygen, when four maidens dressed in cornstalk made in Hula Hula dancing skirt style made their appearance and did an intentional injustice to their otherwise unblemished vocal abilities.

Next was introduced the Goodridge Augmented Anti-Harmony Orchestra, which rendered "Sit-and-Pant Echoes" written especially for the occasion by the nimble bandmaster with the villainous looking mustache and who brought out the "technique" and "expressive" parts of the selection with his baton that would have made Beethoven stare with envy, especially the tympanums obeyed the gestures signifying fortismo to an extent of perfection.

A flute solo with an expressive obligato throughout was next that caused a good many aches from the strenuous mirth already adhered to.

In order to quiet the uproarious laughter and to give the audience something more sombre, 12 little boys and girls gave a drill, composed of singing and elocutionary selections. This was highly appreciated and much praise was evident for the teachers who had striven to train the youngsters for their various roles.

An accordion solo by Oscar Wiseth by no means a "to be scoffed at accordionist," was hugely enjoyed by all admirers of the "go from me and come to me" instrument.

A doctor's laboratory was next uncovered before astonished obticals, with a medical practitioner of stinted growth in consultation with a patient of extravagant height, who desired to become somewhat more abrupt and tea-kettle shape. The efficient doctor diagnosed the case and found it necessary to inject a medical compound into the cranium of the elongated individual and in order to do this he secured a nine-foot ladder and scaled to the top and performed the "miracle" that brought a gasp of astonishment from the audience when a shrinkage commenced that ended in the desired size and shape. The crowd was still inclined to be disbelieving of the doctor's abilities and in order to clearly demonstrate his phenomena he injected another serum into the skull that caused a sudden run of the person's head towards the ceiling that resulted in the former size and shape. An ear-bursting applause was the unanimous compliment.

The following number was a vocal solo by the able conductor, delivered in a bass voice that harmoniously rumbled from octave to octave with resemblance in sound of a 75-car freight train passing over a span, and with the alacrity of a chipmunk climbing a tree.

As a concluding number the audience sang two more songs, after which the crowd enjoyed themselves at the various fishing ponds, fortune telling booths, etc.

DAN SHAW IS POSTMASTER

A telegram from Washington late last evening conveyed the information that Daniel Shaw had been appointed postmaster of Thief River Falls, to take effect today. It seems that Mr. Morgan had quietly tendered his resignation and Congressman Steenerson recommended Mr. Shaw for the unexpired term, which ends next July.

GRAVELLING STATE ROAD BETWEEN COUNTY LINES

Operations were commenced Monday for the gravelling of the northern part of the state road running between the Red Lake county line and the Marshall county line. The work undoubtedly will be completed precipitately as a large number of teams and wagons are being prepared for the hauling. The stretch to be gravelled extends from Goodridge north to the Marshall county line. From Goodridge and as far south as the road extends was gravelled a year ago this fall.

LUTHERAN CHURCH.

(Missouri Synod)

Sunday, Dec. 3: German services at Germantown at 3 P. M. Sunday school at 2 P. M. English services in the parsonage in Goodridge at 8 P. M. "We preach Christ Crucified." H. Lutz, pastor.

Annual Business Meeting.

The annual business meeting of Nazareth congregation in Goodridge will be held in the church Tuesday, December 12, at 2 o'clock P. M., for the purpose of electing officers for the ensuing year, and do such other business that may come before the meeting.

H. A. HALVORSON, Secretary.

OLD-TIME RESIDENT OF MOYLAN IS DEAD

Passes Away Sunday Night at Home of Step-Daughter in Thief River.

Sunday, November 26, at Thief River Falls occurred the demise of Jacob Einarson, a farmer residing about 10 miles north of Goodridge and well-known in this village.

Death occurred at the home of Mr. and Mrs. Ferdie Brown, the latter being his step-daughter, and was caused by heart failure. Mr. Einarson was on his way to consult a doctor, having left here Saturday accompanied by Albert Wilkins, a neighbor, who left him at the Brown home and returned.

His health seemed to have improved Saturday evening when he retired, but in attempting to awaken him Sunday morning he was found dead.

Deceased was 65 years old and has resided here for about 20 years. He is survived by one son, Harold, age 16, and by three step-children. Funeral services were held at St. Hilaire Tuesday.

AN ERROR.

An error was made in our last week's issue when we neglected to mention that Miss Lena Resan entertained with her brother Monday night instead of Sunday night at a venison dinner. We also failed to mention two other guests, namely, Misses Thelma and Guida Gilbertson.

Mrs. McDonald Entertains.

Mrs. R. H. McDonald delightfully entertained a few young ladies Saturday evening. The hours were spent at cards and music, followed by dainty refreshments. Those present were: Misses Pearl Bergeson, Magda Nelson, Minnie Lindbloom, Adeline Davids, Sena and Hilda Christiansou.

Ladies' Aid to Meet.

The Ladies' Aid meets at the church December 7, entertained by Mrs. H. A. Halvorson and Mrs. M. G. Thoreson. All are invited.

Missionary to Speak.

Missionary Eilason will preach in the Scandinavian language at the Free Lutheran church of Goodridge Sunday, December 3. English services at 8 o'clock P. M. in the same church.

John Svare arrived from Pelican Rapids Thursday to visit at the K. Roysland home at Erie for an indefinite time.

Mrs. Mickel Nelson returned Tuesday morning from Thief River Falls, where she spent a day visiting.

LUTHER LEAGUE HAS EXCELLENT PROGRAM

Active Program Committee Makes Event Enjoyable Affair.

The Luther League relinquished as excellent a program Wednesday evening as has ever been performed since the organization came into being.

Much encomium is due to the program committee and to the people who were partakers in the deliverance of the program. The following fine numbers were delivered in a polished manner:

Song, Luther League; scripture reading and prayer, Rev. Aaker; song, Luther League group of girls; recitation, Esther Ronkin; reading, Clarice Aarness; song, Tena Gaudland, Hazel Thoreson and Eunice Thoreson; concert reading, Alice Stephenson, Ruth McDonald, Edith Gunderson, Ida Bundhund, Florence Halvorson; discourse, Rev. Aaker; song, Luther League.

The usual election of committees was held with following nominees: Program committee, Ruth McDonald and Tena Gaudland. A lunch committee was also named.

A large and appreciative assembly of hearers were in attendance. A light lunch with a minimum charge of 10 cents was served immediately after the performance.

EDDIE KUSMACK BREAKS WRIST IN STARTING AUTO

Eddie Kusmack, the young son of Mr. and Mrs. John Kusmack, had the ill fortune of breaking the carpus of his right arm Friday evening. The accident occurred when the lad attempted to crank a Chevrolet car with the result that it recoiled and severed the bone. The boy was taken to Thief River Falls Saturday, where the injured member was set and at the present he is getting along nicely.

BUYER FOR CREAMERY HAS OFFICE IN BANNER "BLOCK"

The offices of Noble Urdahl, cream buyer for the Goodridge Creamery, were moved Sunday to the west room of the Wold building, occupied by The Banner. The move from the creamery up town was made because of the distance of the creamery from the business center, many patrons objecting to the haul.

I. D. Converse of Grygla stopped in at Goodridge Thursday of last week en route to Red Lake Falls, where he will take up his future residence.

Hercules Cold Solder

Guaranteed to mend holes, cracks or leaks in any kind of Metals, Aluminum, Granite Ware, Tin, Galvanized Ware, Brass, Iron, Lead, Gas, Steam and Water Pipes. Will stop leaks and cracks in Cylinders, Tanks and in Automobile Radiators.

ASIA MINOR IS TRAGEDY SCENE

Refuges Crowding Down to the Fringes of Black Sea and Mediterranean.

NO FOOD FOR STARVING

Pitiful Appeals for Help Sent by American Warships in Near East—Snow Makes Suffering Intense.

Constantinople—Another human tragedy that promises to rival the Smyrna fire is developing in northern Asia Minor, where the tide of a quarter of a million Christian inhabitants is sweeping in full flood to the fringes of the Black sea and the Mediterranean.

These refugees are clamoring to be saved. The American naval base at Constantinople is deluged with S O S calls from the flotilla of American destroyers patrolling the Mediterranean and' Black sea coasts of Asia Minor, which are crowded with Christians fleeing from the Turk. There is a poignant note of despair and tragedy in every message snatched from the air. Appeals from land to "save our souls" are received almost hourly and are taxing the capacity of the American radio staff here.

Thousands of Orphans.

Appeals come from every part of Anatolia, where whole Christian communities are migrating and where the American Near East Relief is working heroically to overcome almost insuperable obstacles, including the removal of orphans for great distances to the sea.

Cryptic radiographs received here indicated that "a critical situation was developing with surprising suddenness; the whole interior is blanketed with snow, adding immeasurably to the misery of the exiles."

A wireless from the destroyer Barry said:

"Five hundred Christians are arriving at Samsun daily from parts unknown."

Another from the Barry, relayed from Sivas, in the interior of Anatolia, said:

"Ten thousand Christians and two thousand orphans trudging through the snow from Sivas are looking to the Americans to save them."

Many Near Death.

Another destroyer relayed a dramatic appeal to the Near East Relief at Constantinople from James H. Crutcher of Tuscaloosa, Ala., at Samsun. "Can you take a thousand mountain children? If not it means their end."

One from the destroyer Lawrence came from Americans at Trebizond, declaring: "We cannot hold up evacuation of Trebizond much longer. We are overwhelmed by arrivals from the interior. Instruct immedaitely."

RUSSIA ASKS PARLEY HAND

Lausanne—America's insistence for the open door and equality economically in the Near East, which follows her traditional demands for equal commercial privileges in the Far East, was cited by the Russian delegation as supporting an official communication forwarded by the Russian delegation to the conference asking for the right of speech on all matters before the body.

Russia objects vigorously to any attempt to limit her activities in the discussion of the future status of the Dardanelles; she claims that all topics on the Lausanne agenda are closely related to the supreme object of freedom of the straits and that stable peace in the Near East can be attained only by allowing the Russian delegates free participation on the same basis as the other great powers.

Points to U. S. Stand.

In their official petition the Russians affirm that only by following the principle of equality can the conference hope to reach the goal of greater equity in their relations between nations—"as expressed at the opening of the conference and confirmed by the recent declaration of the representative of the United States."

ILLINOIS ROCKED BY QUAKE

St. Louis, Mo.—Considerable property damage was caused by earth tremors of moderate intensity in eastern Missouri, southern Illinois, western Indiana, and northwestern Kentucky, according to reports reaching here. The tremors shook buildings and homes, toppled chimneys from residences, broke windows, knocked chinaware from shelves and frightened residents in the parts of the four states.

Hunger Striker Is Released.

Dublin—Miss Mary MacSwiney, who has been hunger striking in Mount Joy prison, has been released. Her release came on the twenty-third day of her hunger strike. She had refused to take food since her arrest on November 4, when she was seized during a raid on a house in Aylesbury Road by nationalist troops who were seeking Eamonn De Valera. Miss MacSwiney was released at 7 p. m., and was taken in an automobile to the Mater hospital.

Measures Link Bonus and Modification of Volstead Act—Turks at Lausanne Are Having Hard Sledding—Clemenceau's Frank Speeches in American Cities.

By EDWARD W. PICKARD

> **GEORGES CLEMENCEAU, the "Tiger" of France, is telling his American audiences that Europe's unrest is due to the fact that the United States abandoned the Old World to its troubles without trying to help it adjust matters after the war. He says we should enter an informal alliance with France and Great Britain. What do you and your acquaintances think about that?**

PRESIDENT HARDING, addressing the extra session of congress which opened Monday of last week, appealed for the enactment of a ship subsidy bill. He said there were but three courses to be taken in this matter—"constructive, obstructive and destructive." And though he admitted there is, even in his own party, decided opposition to such a measure, he urged that congress take the constructive course. He argued that the measure as drafted provided complete safeguards against exploitation for favored interests and said that he believed government aid for the merchant marine was as justifiable as government aid of industry through tariff laws or railways through land grants and loans, and government expenditures for good roads, inland waterways, reclamation and irrigation projects.

Mr. Harding especially emphasized the point that the contemplated legislation would not call for new expenditures, but instead proposes to substitute for the present annual drain of $50,000,000 upon the public treasury direct compensation equal to a trifle more than half that amount.

Congress listened to the President calmly and coldly and then the majority got busy with the program, to do the best it could in the circumstances. The bill was quickly reported favorably by the committee on merchant marine, and on Wednesday the house adopted a special rule for its consideration. This provided for three days of general debate and three for consideration of amendments, and a final vote on Wednesday of this week. Meanwhile the Democratic members in caucus decided to oppose the measure solidly, and some Republicans let it be known they would vote in the negative because they thought the people of their districts didn't want the bill.

THERE were two interesting features of the senate's session Tuesday. The first was the swearing in of the first woman to hold a seat in the United States senate—Mrs. W. H. Felton of Georgia. Senator-elect George delayed the presentation of his credentials that this historic event might take place. Next day Mrs. Felton answered once to her name in the roll call, told the senate how proud she was, and retired after 22 hours and 25 minutes of actual service.

The other feature was the bringing up of the Ku Klux Klan matter. A letter from Governor Parker of Louisiana to a New York ex-service man was read by Senator Walsh of Massachusetts. It urged that senators and congressmen be asked to assist in combating the organization. Governor Parker was in Washington at the time, having journeyed there to appeal to the President for federal aid in driving the Klan from his state. Mr. Harding told him the federal government could interfere in the matter only where federal interests were involved and that he was confident Louisiana could take care of the situation. Parker left for home with the statement that he was going to make a fight to the finish against the Klan. Governor Hardwick of Georgia says he will cooperate with Governor Parker in this, and already Governor Allen of Kansas has started legal proceedings to stop the operations of the Klan in his state, because it has not filed its articles of incorporation. Governor Olcott of Oregon also has declared himself the unrelenting foe of the Klan.

TRUMAN H. NEWBERRY of Michigan put an end to the long controversy over his election as senator and at the same time relieved his party of great embarrassment by resigning his seat. He said it would be futile for him to attempt to continue his public service as he would be continually hampered by "partisan political persecution." Republican leaders, though sympathizing with Mr. Newberry, agreed that he had adopted a wise course.

TWO soldiers' bonus bills have been introduced in the house, and both of them involve modification of the Volstead prohibition act for both provide for financing the bonus by taxes on liquors now classed as intoxicating. The bill introduced by Representative Hill of Maryland provides that the bonus be financed by a 20 per cent tax on beer and cider containing not more than 2.75 per cent alcohol. The measure sponsored by Representative Britten is the old bill amended so that the necessary funds shall be raised by a tax of $10 a barrel on domestic beer, $30 a barrel on imported beer, $10 a gallon on imported champagne, $5 a gallon on imported still wines, and $2 a gallon on domestic wines.

Whether either or both of these bills are fathered by the "wet" organizations is not stated, but the coupling of the bonus and the liberalizing of the Volstead act may turn out to be a clever and winning move. The Association Opposed to Prohibition is on the war path and overlooking no chance. Its executive committee has decided to conduct active campaigns to have the state and national conventions of both parties insert "wet" planks in their platforms.

Senator Spencer of Missouri, Democrat, has announced that he will introduce a bill to create a scientific commission to investigate and decide the question, "When is liquor intoxicating?"

ISMET PASHA and his Turkish Nationalist colleagues find themselves up against a tough proposition in the Near East peace conference which began its sessions at Lausanne on Monday. Lord Curzon, by promising Britain's full support for the French program in relation to Germany, brought about complete accord between Great Britain and France in regard to the terms to be imposed on the Turks, and in general it appeared that Italy would agree with them. To start with, the allies decided, over the protests of the Turks, that the proceedings of the conference should be secret and every delegate was pledged not to reveal them, the press being given only a brief communique each day. After several days the Turks again protested against this, asserting that the British and French delegates were giving out the news to correspondents secretly, while they, as Moslem gentlemen, were observing their pledge. All of which availed them nothing. Ismet also objected in vain to the presence of "third parties," especially the Japanese, in the conference, and asked why Russia was not fully represented. In the latter he was backed up by Premier Mussolini of Italy who declared Russia should participate fully in the conference. This stand of the Fascist statesman was a great surprise to the British and French. The soviet delegation was a week late in arriving.

When the conferees got down to business Ismet Pasha submitted the demand of Turkey for the 1913 frontiers or those resulting from the second Balkan war, and for a plebiscite in western Thrace. The allies virtually decided at once that these demands should be rejected, but it was said the matter might be referred to a committee. They were opposed vigorously by Venizelos for Greece and by the Bulgarians, Rumanians and Jugo-Slavs.

Stamboulski asked the conference to give Bulgaria a corridor to the Aegan sea, including Dedeagatch, but Greece and the allied powers opposed this. It is not unlikely Bulgaria will be granted an outlet by the free use of a railroad to Dedeagatch, which would remain Greek territory.

Abdul Medjid Effendi, a man of scholarly attainments, has been elected caliph of the Mohammedan church by the Nationalist assembly, and installed in Constantinople. The deposed sultan reached Malta safely under protection of the British, and it has been rumored that they will make use of him later in India to create antagonism there against the Nationalists.

WILHELM CUNO, the new German chancellor, spent much of the week selecting the members of his cabinet from the bourgeoise parties, and seemingly he believes his government will be strong enough to withstand the assaults of the angry united Socialists. The latter rejected President Ebert's appeal to drop their quarrel with the People's party and help save Germany from collapse. This caused Ebert to repudiate his own party and authorize Cuno to ignore the Socialists.

KING GEORGE opened the new British parliament with the usual speech from the throne, in which he asked that, as regards trade and employment, the ameliorative measures prepared by the Lloyd George government be continued and extended. James R. MacDonald, who had been elected leader of the Labor party and therefore is leader of the opposition in parliament, started the debate on the king's speech by calling for alleviation of the distress arising from unemployment. How serious this question is was made plain by the enormous parade of the unemployed in London which at first demanded access to Prime Minister Bonar Law but was turned away from Downing street by diplomacy. The first urgent business of parliament, however, will be the passage of the Irish bill, for if the Free State constitution has not been ratified by December 6 the Anglo-Irish treaty will lapse.

M. GEORGES CLEMENCEAU is delivering a series of addresses in the largest American cities, explaining the present day attitude of France and telling Americans wherein, as he thinks, their own country is at fault in not taking an active part in the efforts to revive Europe. His strictures and his advice are received with enthusiasm, with interest or with dissent, according to the opinions of his individual hearers and readers, but always they are received with friendly spirit, for the old man himself inspires admiration and liking everywhere. It is not likely that he can induce America to enter into the alliance with France and Great Britain which he advocates, but probably he will be successful in giving us a better understanding of the policy of France and her urgent needs.

ANOTHER great mine disaster occurred last week, this time near Birmingham, Ala. Cars running wild severed an electric cable and a spark caused a terrible dust explosion 1,100 feet from the entrance. Four hundred and seventy-five men were trapped, and of these 84 were killed. Many others were severely injured.

EVERYONE will be interested in the story which came out of French Lick Springs, Ind., where Mayor Hylan of New York has been stopping after a visit to Chicago. It is to the effect that Hylan and Mayor Thompson of Chicago have formed an alliance for the purpose of getting William Randolph Hearst nominated for the presidency in 1924. It is said they will hold over the heads of the leaders of the Democratic party the threat of forming a third party to include all the insurgents and more radical farmer and labor elements. In fact, Hylan made just that threat in a statement to the press

DAIRY HINTS

EXCELLENT GIFT FOR YOUTH

Department of Agriculture Suggests Purebred Calf, Pig or Some Other Animal.

(Prepared by the United States Department of Agriculture.)

In selecting birthday and Christmas gifts for children in rural communities, why not give a purebred pig, calf, or other animal? This is the suggestion of the United States Department of Agriculture, which, with the various states, is conducting the "Better Sires—Better Stock" campaign. A recent questionnaire study of the utility value of purebred live stock showed, among other results, that home influence is an important factor governing the breeding of superior domestic animals. In fact, it ranks in importance next to sales, fairs, and shows, taken collectively. When parents show their interest in good stock the children are more likely to do so.

One breeder told of receiving some purebred live stock as a wedding gift from his father-in-law. That beginning was an important influence, which resulted in an entire herd of well-bred, profitable animals, a practical influence in the couple's prosperity and happiness.

A Club Member and His Purebred Calf.

Gifts of good live stock, the department points out, are not only acceptable in themselves but with proper handling multiply and give pleasure, satisfaction, and financial benefits for an indefinite period.

> **Common Sense Counts**
>
> Success in the dairy business or in keeping even a small herd of dairy cows depends (like most things do) in a great measure upon the use of good common sense. Cows produce the most milk usually in the latter part of May and June. Therefore, what does the wise dairy farmer do? He maintains as nearly as possible the year round, the conditions of those months when production is the highest.
>
> Palatable food, a succulent ration, and a balanced ration, together with a moderate temperature and comfortable surroundings, will bring as near the ideal producing conditions as is possible, and an effort to keep conditions so will pay big returns.

FEED DRY COW ON ROUGHAGE

Daily Allowance of Bran or Oats Is Favored—Cabbage and Pumpkins Are Very Good.

During the eight or ten weeks that cows go dry, their food should be chiefly roughage. A daily allowance of two pounds of bran or oats, or a mixture of two parts each of bran and oats and one part of linseed meal or corn-oil meal makes a proper feed for a cow near calving. Some roots, cabbage, pumpkins, or squashes are also very good. Highly carbonaceous roughage, such as straw and corn stalks, is not good at this particular time. Such feeds, with cold water, cold drafts, or lying out at night on damp or frozen ground, are the chief causes of caked udder or garget.

Cleanliness in Everything.

Milk pails and other utensils should be free so far as is possible from crevices where dirt may lodge and be hard to remove. Cream separators and other dairy utensils should always be cleaned properly immediately after use. This practice not only improves the quality of the milk and cream but makes the work easier and the utensils last longer.

Clean Utensils.

All utensils which come in contact with milk and cream should be kept clean at all times. It is well to use pails with a partly covered top because this keeps out 50 per cent of the dirt and other impurities which would otherwise get into the milk.

Safeguards in Calf Feeding.

Critical in a calf's life is when his feed is changed from whole milk to skim milk. To avoid scours make the change very gradually, adding a little skim milk to the whole milk each day.

SPENT HALF HER TIME IN BED

Farmer's Wife Tells How Lydia E. Pinkham's Vegetable Compound Made Her a Well Woman

Carter's Creek, Tenn.—"Three years ago I was almost an invalid. I spent half of my time in bed, being afflicted with a trouble which women of a certain age are apt to have. I took Lydia E. Pinkham's Vegetable Compound Tablets and used Lydia E. Pinkham's Sanative Wash. I am a well woman now and have been for two years. I can work as well as any one who is younger and as I am a farmer's wife I have plenty to do for I cultivate my own garden, raise many chickens and do my own housework. You may publish this letter as I am ready to do anything to help other women as I have been so well and happy since my troubles are past."—Mrs. E. T. GALLOWAY, Carter's Creek, Tenn.

Most women find plenty to do. If they are upset with some female ailment and troubled with such symptoms as Mrs. Galloway had, the smallest duty seems a mountain.

If you find it hard to keep up, if you are nervous and irritable, without ambition and out of sorts generally, give the Vegetable Compound a fair trial. We believe it will help you greatly, for it has helped others.

Progress in Sahara.

The limits of the great arid wastes of the Sahara desert are slowly being narrowed by the invasion of windmills and motorcars. The oases are being linked together by good motor highways and the sinking of wells is greatly increasing the tillable area. The soil is fertile and, wherever water can be obtained, tropical fruits, millet and other cereals may be raised.

A trans-Saharian railroad has been proposed by the French government, but there are many technical problems to be solved in the construction of such a line. The desirability and value of a rail connection across the desert between southern Algeria on the north and western French Africa on the south is obvious.

Risky Talk.

"Air like wine—"

"Shut up. Do you want to get us arrested?"—Louisville Courier-Journal.

Help That Bad Back!

ARE you tortured with constant backache—tired, weak, all unstrung after the least exertion? Evening find you worn out and discouraged? Then look to your kidneys! When the kidneys weaken, poisons accumulate in the system and cause nagging backache, stabbing pains, headaches and dizziness. You feel nervous, irritable and "blue," and likely suffer annoying bladder irregularities. Don't wait. Neglect may lead to serious kidney sickness. Use Doan's Kidney Pills. Doan's have helped thousands and should help you. Ask your neighbor!

A North Dakota Case

O. T. White, carpenter, 402 W. 12th St., Devils Lake, N. D., says: "There was a constant, dull ache through the small of my back and often I was so lame I could hardly straighten. My kidneys acted too freely. The secretions were unnatural. I used Doan's Kidney Pills and they corrected the trouble."

Get Doan's at Any Store, 60c a Box

DOAN'S KIDNEY PILLS

FOSTER-MILBURN CO., BUFFALO, N. Y.

Bad Breath

Is Usually Due to Constipation

When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus replaces it.

Nujol is a lubricant—not a medicine or laxative — so cannot gripe. Try it today.

Nujol

A LUBRICANT—NOT A LAXATIVE

DON'T DESPAIR

If you are troubled with pains or aches; feel tired; have headache, indigestion, insomnia; painful passage of urine, you will find relief by regularly taking

LATHROP'S GOLD MEDAL HAARLEM OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles and National Remedy of Holland since 1696. Three sizes, all druggists. Guaranteed. Look for the name Gold Medal on every box and accept no imitation

WHEAT SHOWS GAIN

Sluggish Rally Brings Covering and Liquidation.

U. S. Bureau of Markets, Washington, D. C., for week ended Nov. 24, 1922.

LIVESTOCK AND MEATS:—Chicago hog prices declined 20 to 35c for the week. Beef steers practically unchanged; butcher cows and heifers steady to 15c higher; feeder steers steady to 25c lower and veal calves 75c net lower for the week. Sheep and lamb prices generally lower; fat lambs steady to 10c feeding lambs steady to 25c and fat ewes steady to 50c lower, while yearlings declined 50 to 75c for the week. On November 24th Chicago hog prices were strong to 15c higher than Thursdays best time, all classes beef cattle practically steady with stocker and feeders weak to 16c lower. Fat lambs steady to strong, feeders quiet around steady and sheep weak to unevenly lower. November 24, Chicago prices—Hogs, top, $8.05; bulk of sales $7.70 to $8; medium and good beef steers $6.75 to 11.75; butcher cows and heifers $3.60 to $10.65; feeder steers $5.25 to $7.50; light and medium weight veal calves $7.25 to 9; fat lambs $13 to 14.65; feeding lambs $12.25-14; Yearlings $9.25 to 12.50; fat ewes $5 to $8. Stocker and feeder shipments from 12 important markets during the week ending November 17th were: Cattle and Calves $143,030; Hogs 19,206; Sheep 165,503. Prices in wholesale fresh markets were mixed for the week. Beef and pork loins weak to $1 lower; veal weak to $1 higher; lamb steady to $2 higher while mutton was unchanged. On Nov. 24th beef steady at some markets and steady to $1 higher at others; Veal and mutton steady; Nov. 24th prices good grade meats: Beef $14-17; veal $13-16; Lamb $25-29; Mutton $12-16; Light pork loins $17 to $20; heavy loins $14 to $19.

GRAIN:—Market strong first two days of week on improved milling and foreign demand, and buying by seaboard houses, but prices were unsettled within a small range the remainder of week. Chicago December wheat declined 1¾c net for the week; Chicago December corn down one cent. Wheat market unsettled on the 24th but clodsehigher chmrldwshurdishrdl but closed higher on good export business, strong cash market, and strength in Liverpool. Undertone in corn strong but trade not large. Country offerings light. Closing prices in Chicago cash market—No. 2 Red Winter wheat $1.29; No. 2 Hard winter wheat $1.20; No. 2 mixed corn 73c; No. 2 yellow corn 74c; No. 3 white oats 44c. Average farm prices—No. 2 mixed corn in central Iowa about 60c; No. 1 dark Northern wheat in Central North Dakota $1.02; No. 2 Hard winter wheat in central Kansas $1.05; Closing future prices. Chicago Dec. wheat $1.18½; Chicago Dec. corn 70⅝c; Minneapolis Dec. wheat $1.17½; Kansas City December wheat $1.10; Winnipeg December wheat $1.04.¾.

DAIRY PRODUCTS:—Butter markets have continued very firm despite some nervous undertone. Current arrivals barely heavy enough to supply current demand but traders have operated cautiously at the high price level. Many buyers turning to storage if suitable quality can be found. Latest reports indicate further decrease in production. Closing prices 92 score butter, New York 53; Chicago 52½c.

Cheese markets firm and on basis practically full cent higher than a week ago following Monday advances on Wisconsin cheese boards. Small styles appear a trifle draggy. Distributing markets supporting country market advances. Held cheese moving at approximately same prices as fresh.

Cheese prices at Wisconsin Primary markets—November 23rd; Twins 25; Daisies 25½; Double Daisies 25¼; Longhorns 25; Square prints 25½; Young Americas 25½.

Minneapolis Closing Cash Prices.

Spring wheat—No. 1 dark northern, 1.20@1.29; No. 1 northern, 1.18@1.27; No. 1 dark hard, 1.24@1.29; No. 1 hard, 1.16@1.18. No. 1 am. dur., 1.14@1.20; No. 1 durum, 1.00@1.07 Corn No. 2 yellow, 70c@71c. Oats No. 2 white, 40c@43c. Barley, choice to fancy, 59c @63c. Rye No. 3, 85c. Flaxseed No. 1, 2.43@2.45.

South St. Paul Live Stock.

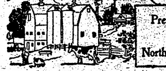
So. St. Paul—Steers, $3.50@$6 25; veal calves, $2.50@$7.50; cows and heifers, $3.00@$4.25; hogs, $7.25@ $7.80; sheep and lambs, $8.00@$13.50.

BUTTER—Extras, 48c; firsts, 44c; seconds, 39c; packing stock, fresh sweet, 26c; stale goods, 5c; grease, 1c; storage sweet extras, 45c.

EGGS—Country receipts, rots out, per case, $13.50; No. 1 candled, good extras, free from rots, small dirty and checks out, per case 48c; dirty and held stock, rots and leakers out, dozen 22c; checks, rots and leakers out, 21c; quotations on eggs include cases, fancy storage eggs 30c.

Paris—The French Senate avoided a direct vote on the woman suffrage bill by technical use of the Senate regulations.

PERTINENT POINTERS for MODERN FARMERS



Prepared Under Direction of North Dakota Agricultural College

PROPER METHODS OF FEEDING BRING POULTRY MEN SUCCESS

By O. A. BARTON and G. W. McILROY
North Dakota Agricultural College

Feeding for Egg Production.

The farm flock that lays is the farm flock that pays, but strange as it may seem, the average farm flock does not receive all of the different feeds needed for egg production. A few hundred pounds of the right kind of feed to supplement the home grown feeds may greatly increase the profits from the flock.

A complete ration consists of six different parts: scratch feed, mash, animal feed, mineral feed, green feed, and water.

The scratch feed, which consists of whole or cracked grain, can usually be grown at home. The grains recognized as best by most poultry experts are corn and wheat. Corn may be fed whole or may be cracked if convenient and economical. The hen can digest the whole kernel equally as well as the cracked one, but when cracked and fed in a litter of straw she receives more exercise in hunting for the grain. Barley and oats are good poultry feed. The chief fault with these gains is that they carry too much hull, composed largely of crude fiber of which the hen utilizes very little. Hulled oats are an excellent feed, but are usually too expensive to be fed extensively. Rye is not considered a good poultry feed because of its unpalatability, and particularly because of its effect upon the digestive tract.

Grain and Mash Feed.

During winter the scratch feed should be fed in a litter of straw 10 or 12 inches deep, so that the hens have to scratch for it. Scratching means exercise and exercise helps to keep hens healthy. About one-third of the day's allowance is fed in the morning and the remaining two-thirds in the evening, an hour or so before the hens go to roost. If the flock has abundant range during the summer the amount of grain given can be reduced considerably. The hen's appetite and condition of flesh should be the feeder's guide as to the amount they should get. Ordinarily the average hen will need about four ounces of grain a day. Heavy feeding and little exercise will probably result in the storing up of fat, and hens that are too fat do not usually lay well.

The hen cannot make eggs economically from grains alone, and so a mash composed of common by-products such as bran, shorts, and gluten feed is given her. These feeds are palatable, and furnish vegetable protein. The hen should receive some animal protein, fed in the mash or in addition to it. Some of the common sources of animal protein are skim milk or buttermilk, insects during the summer time, and some form of waste meat.

Tests at experiment stations have shown that hens cannot find enough animal protein on range in summer to make egg production profitable. Even though the hen has all the milk she wants during the summer it will be well to supply additional animal protein in the mash. Fresh meat from various animals, such as rabbits, animals caught for their fur, calves not good enough to raise, old horses, or an animal killed accidentally may be fed during the winter. If the animal is large, a good practice is to dress it and hang it up so that it will freeze solid until ready to feed. The best way to feed such material is to cut off a piece and run it through a bone grinder. Another way is to hang a piece of meat from the ceiling of the poultry house high enough so that the hens have to jump to reach it. This also gives them exercise. If this practice is followed one should take special precautions to see that the meat does not decompose, for decayed meat will probably cause serious digestive disorders. For this reason fresh meat should not be fed this way during the summer.

Provide Mineral Feeds.

Mineral feed serves as a source of shell material and aids the grinding process in the gizzard. The more common materials are oyster shell, clam shell, and lime rock grit. It is commonly thought when a hen lays soft shelled eggs that she is not receiving enough shell material, but the trouble probably lies with the hen rather than with her rations. Shell and grit come in 100 pounds sacks and are crushed fine enough so that they are ready for feed. Charcoal is sometimes fed to hens to help regulate the digestive tract, for charcoal is a good absorbent. Some flocks eat charcoal readily, and others will not, but it is a good practice to supply it. Some growers find it most desirable to mix charcoal in the mash for the birds often scratch it out of a hopper and waste it.

As shell material is comparatively cheap it should be before the hens at all times. A convenient way to feed it is in a self feeding hopper with three compartments, one for oyster shell, one for grit and another for charcoal.

Green Feed Essential.

A good supply of green feed helps increase egg production, keeps the flock in good health, makes the yolks of eggs a rich yellow—a condition sometimes desirable. Dark yellow yolks may also be richer in vitamines than are the lighter colored yolks. During the summer give the flock an abundance of clover, alfalfa, or other pasture, and in the winter supply green feed in some form or other. Cabbage, mangels, and sprouted oats are good winter green feeds, and should be given to the hens daily.

Cabbages are usually suspended from the ceiling so that the hens must jump for them. Mangles may be fed conveniently by splitting them in half lengthwise and driving them over a nail in the wall about 18 or 20 inches from the floor. Heat and moisture are necessary to sprout oats, but some growers may find that mold grows and destroys the oats for feed. If mold develops oats may be treated with formalin. A tablespoonful of formalin to a pailful of water used to dampen the oats, will generally prevent the growth of molds. The oats should be thoroughly mixed with the solution. Clover and alfalfa chaff fed dry or steamed with boiling water may be fed, although these are not as good as the other green feeds mentioned.

Water, sometimes little considered in connection with the hen's ration, is an important part. Each dozen of eggs contains about a pint of water, and about 55 per cent of the hen's body itself is composed of water. During the summer the hen can probably find enough water about the farm or perhaps she must get it from the barnyard or from stagnant pools. Many growers do not take the trouble to see that the hen has water to drink during the winter, but allow her to supply her wants by eating snow. Such a practice should be discouraged. Give the flock plenty of fresh, clean water to drink, and have it before them at all times, being sure to keep the containers clean.

Laying Rations Recommended.

Several good rations for laying hens follow. Feeds used at the North Dakota station are: Scratch feed—cracked corn, 10 pounds; wheat, 10 pounds; oats or barley 5 pounds. Mash—bran, 100 pounds; middlings, 100 pounds; fine ground corn, 100 pounds; ground oats, 100 pounds; meat scrap, 100 pounds; salt, 3 pounds.

The proportion of scratch feed to mash is about two to one. Dry buttermilk may be substituted for meat scrap or if sour milk or fresh buttermilk are available in unlimited quantities the meat scrap may be reduced to 50 per cent.

The following is a ration recommended by the poultry department of the University of Wisconsin: Scratch feed—cracked corn, 2 pounds; wheat, 2 pounds; oats, 1 pound. Mash—bran, 100 pounds; middlings, 100 pounds; corn feed meal, 100 pounds; gluten feed, 100 pounds; meat scrap, 100 pounds.

The standard laying ration used and recommended by Purdue University is as follows: Scratch feed—corn, 10 pounds; wheat, 10 pounds; oats, 5 pounds. Mash—Bran, 5 pounds; shorts 5 pounds; meat scrap, 3½ pounds.

One change which may be made in the mash is to substitute three pounds of tankage or 50 pounds of skim milk for the three and one-half pounds of meat scrap.

The Iowa experiment station recommends the following feeds: Scratch feed—corn, 100 pounds; wheat, 100 pounds; oats, 100 pounds. Mash—shorts, 200 pounds; cornmeal, 200 pounds; ground oats, 100 pounds; and tankage, 100 pounds.

Dried buttermilk or meat scrap may be substituted for tankage.

SELECTION OF SITE FOR ICE HOUSE

(Prepared by the United States Department of Agriculture.)

While the ice house is a common thing among the outbuildings now found on many farms, yet there are many farms which do not have it. Farmers not enjoying this useful piece of equipment have need to consider, as fall comes along, what arrangements should be made so that they may have a place ready to store ice when cold weather arrives.

The selection of a site for an ice house is very important. Other conditions being suitable, the ice house on a dairy farm should be placed as near as possible to the milk house, in order to reduce the labor of handling and to encourage the more liberal use of ice. On a general farm the ice house should be located near the residence. To facilitate drainage the ground on which the ice house stands should be porous and slope away from the building. Advantage also may be taken of the nearness of hills, trees, or buildings, which often afford protection from hot winds, thus saving ice.

Type of Building.

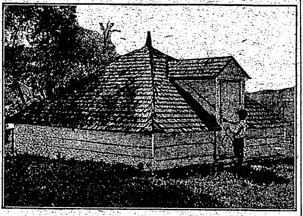
The construction of the ice house depends to a great extent upon local conditions, the size of the house, and the difficulty of obtaining ice. These factors help to determine the sum that may wisely be spent for such a building. Where ice is expensive or hard to obtain, a better constructed and insulated and therefore more expensive ice house is advisable. Where natural ice can be harvested and stored cheaply a cheap structure is usually satisfactory, and the loss from melting ice is a small consideration.

Getting in the Ice Crop for Next Summer.

The cost of harvesting and storing, the interest on the money invested, and repairs and depreciation on the building, are to be considered in relation to the ice loss from melting; and the type of house to be built depends upon these factors. It never pays to build permanently in other than a substantial manner, and careful thought should be given the matter before erecting a cheap makeshift that will not give adequate service.

Farmer's Ice House With Milk Room.

An ice house should be built where it will be shielded as much as possible from the wind and from the direct rays of the sun. The object is to prevent the outside heat from passing into the interior and melting the ice; consequently every effort must be made to resist the passage of heat by placing in the walls a material or a form of construction which will reduce the transfer of heat from the outside to the inside. No material known will entirely prevent the passage of heat, but several kinds of material, called non-conductors or insulators, offer a high resistance to its passage. The best insulators appear to be those that contain entrapped air in the greatest number of small spaces.



Ice House Is Useful Piece of Equipment on Any Farm.

As to the size, this must depend upon the amount of ice that will be needed. A cubic foot of ice weighs about 57 pounds, so in storing ice it is customary to allow from 40 to 50 cubic feet per ton for the mass of ice, but the quantity that an ice house of a given size will hold depends upon the manner in which the ice is stored. Generally speaking, in the north it will take one and one-half tons for cooling the milk from each cow, and two tons per cow in the South. Allowing 50 cubic feet for a ton of packed ice, ten tons will require about 500 cubic feet of space.

Detailed figures as to capacity, together with directions and building plans, are found in literature issued by the United States Department of Agriculture, which is always ready to answer inquiries on this as on other subjects pertaining to farm practice.

PREVENT MOLD IN BUTTER TUBS

Cause of Much Annoyance and Source of Big Losses.

Receptacle Is Steamed for Thirty Seconds and Inner Surface Paraffined and Rubbed With Salt—Meets Need of Creameries.

(Prepared by the United States Department of Agriculture.)

The growth of mold on butter in tubs is a cause of great annoyance to dealers and a common source of loss to creameries. Preventive treatments designed to do away with this trouble have been devised by various people, and these have been carefully studied by the United States Department of Agriculture. The treatment that has been found most successful consists in soaking the tubs in cold water, steaming them for 30 seconds with live steam, paraffining the inner surface, and then rubbing over the paraffin with salt. In addition, the liners for the tubs are soaked for 30 minutes in a saturated solution of boiling brine. Under the supervision of the department several million pounds of butter have been packed in tubs and liners treated in this manner and no cases of mold have been reported.

A number of methods of treating tubs and liners have been tried out in comparison with the one just described, but no other has been equally successful. Some tubs and liners were merely soaked in cold water, and in these the mold made an abundant growth. When the tubs and liners were soaked in a saturated solution of cold brine the growth of the mold was somewhat reduced. Butter in tubs that were soaked in water and steamed for 30 seconds with live steam, and lined with liners that had been dipped in a saturated solution of boiling brine, developed very little mold; but results were still better when paraffin and salt were used as described above.

The treatment found most satisfactory is inexpensive and meets the needs of creameries of any type and in any part of the country.

POULTRY

POINTS ON POULTRY CULLING

Well to Discard Young Cockerels and Pullets That Are Slow in Growing and Feathering.

(Prepared by the United States Department of Agriculture.)

In selecting the future flock it is well to discard the young cockerels and pullets that are slow in growing and feathering, and also those that have crooked beaks, backs, legs and tails.

The winter flock of chickens should consist only of the best grown pullets of the year which hold out some prospect of "earning their keep." Culling is usually begun in July and August by successful poultry raisers, and by the end of September all nonproducers should be weeded out of the flock, with a consequent reduction in the feed bill. Hens which have been fed for more than a year and which molt during July and August are likely to be slackers and should be the first to go. The chances are they will not lay again for some time, the poultry specialist of the Alabama experiment station believes. It is usually advisable to standardize the flock by having all of one breed, but there are special conditions under which the raising of two breeds is advised. Those having mongrel chickens will find it profitable to develop a purebred flock, the United States Department of Agriculture advises. This can easily be done within two or three years by buying a few settings of eggs of the desired breed for hatching purposes. Recent investigations at the U. S. experiment farm indicate that quicker results may often be obtained by such a purchase than by grading up the mongrel stock.

Standardized Flock of One Breed.

SEPARATE PENS FOR PULLETS

By Keeping Breeders Apart From Rest of Flock They Can Be Handled Differently.

It is often desirable to keep the pullets and the older hens separate. It may be that the flock owner will want to use more of the tested hens for breeders, and by keeping them apart from the rest of the flock they can be handled a little differently, says the United States Department of Agriculture. The yearling hens, or sometimes older ones, and the well-developed pullets are better for the breeding flock because the larger eggs produced will bring out larger and stronger chicks.

Some poultry raisers think that the older hens are better than even well-grown pullets that are laying full-sized eggs. They say that the germ cell in the egg from the older bird is stronger. However, eggs from the best pullets ordinarily will produce satisfactory chicks.

POULTRY NOTES

Success with poultry depends more on health than on breed.

* * *

It is a good plan to have hoppers hung on the wall where grit and oyster shell are always accessible.

* * *

Good, bright, alfalfa hay saved from the last cutting will come in handy this winter when green feed is scarce.

* * *

If the thought ever comes to you of crossing breeds, forget it. It's a step backward in the chicken business.

* * *

These cool mornings foretell the coming soon of cold and stormy days. It's time to see that the poultry house is made windproof.

* * *

Besides being educators, the poultry shows will stimulate your pep and enthusiasm for better chickens, which in turn will increase profits.

THANKSGIVING DAY.

Yesterday was Thanksgiving Day. It is a national holiday in the United States and is generally observed. But, like Christmas, the Fourth of July and other holidays which should mean a great deal to the American people, Thanksgiving Day has degenerated for the most part simply into a day of remission from manual toil and one in which people are presumed to enjoy a feast where turkey forms the principal ingredient. The average man loses sight of the spiritual and historical significance of the day in enjoying its material blessings.

Here in Northwestern Minnesota we have a great deal to the thankful for. It is true that conditions have not been of the best for some time, but isn't it also true that our people could be a whole lot worse off? All that is necessary to convince ourselves that we are well off is to compare our conditions with those under which people in other parts of the world are compelled to exist. All we have to do is to look at the facts from an unprejudiced viewpoint, and we cannot help but reach the conclusion that even here in eastern Pennington county there is much for men and women to be truly thankful for.

Actual want is a thing unheard of here. People live in peace and plenty, with a sufficient reserve to provide the necessities of life until another harvest. There is a spirit of friendliness and neighborliness in the air which makes life mighty worth while to those who will but see. No man, however humble, need live his life here without enjoying the confidence and respect of his fellows. Isn't that worth something? Have you ever given these things a thought when tempted to bemoan the fact that you reside in a little rural community away up in the northwest corner of Minnesota? With all of its glitter and glare, its hustle and bustle, and its heartless conquest of the weaker members of society, the large city can offer nothing like this. The thin veneer of modern society is unknown here, and God knows we are better off for it. In the country, pretense and make-believe are dispensed with and men are esteemed by their fellows in accordance with their actual worth—not in dollars and cents, but in that far more valuable commodity known as character.

After all, then, we find that we have a great deal to be thankful for. Let us not get into the habit of magnifying our ills—real and imaginary—to the exclusion of the good things of life. Material things are well and good, and absolutely necessary for the welfare of the human family. But in our quest for things material we should not lose sight of the spiritual and moral significance of Thanksgiving Day. In the midst of our feasting let us lend a few moments to sober thought. It will do us good.

GOD'S CRAFTSMEN.

This newspaper has a wholesome respect for the clergy and their mission in life. Right here in Goodridge are two men who have dedicated their lives to a labor for God and in this they should receive the aid of every man, woman and child in our midst.

Theirs is not the rosiest existence in the world and goodness knows it is not highly remunerative.

The least we can do is to lend them our assistance and helpfulness in their chosen field.

We refer, of course, to Rev. H. Lutz, pastor of the Missouri Synod Lutheran Church and Rev. A. O. Aakre, pastor of the Norwegian Lutheran church.

There are people living right here in our midst who are inclined to minimize and discredit the value of the church and the ministry as a factor in everyday existence and country life.

The Banner does not adhere to that view and has slight sympathy with that character of ignorance and so narrow an outlook upon the days that lie before us.

Let his desparangers follow the country minister into the depths of his work in the Vineyard of God and we venture the assertion that their unsympathetic ideas would soon diminish and lose themselves in the clouds of doubt.

It is safe to assume that most of us like to hear of the things that await us beyond Death's dark river and The Banner is therefore without sympathy for the individual who would deliberately hinder us and deter us in our quest for knowledge [illegible] which lies beyond this life.

When the time comes that the portals of the grave have opened and our earthly remains disappear beneath the folds of cold clay, when the final words of mortal man are spoken over our tomb, we have not the alternative of further decision.

It is then too late.

The time for redemption of our sins has passed when clanking chains unfasten the cemetery entrance and the funeral cortege passes to the little plot set aside as our portion remaining left on earth.

Why don't these belittlers of God's craftsmen let them alone in their honest purpose to do good. There are those of us who thirst for their spiritual advise and resent the rantings of intellectual pee-wees who couldn't give sound advice to a crippled jackass!

The great Bishop Kent, who spent 72 years in arriving at a sound basis for religion died a believer, so why on God's green earth should some kindergarten authority on the Book of Books attempt to lead us over strange paths?

Real God-fearing people resent it!

Judge Page Morris evidently does not believe that competition is a good thing in the illicit liquor traffic. When a convicted offender comes before him for sentence, the kindly judge puts him behind the bars, which leaves clear sailing for competing bootleggers until such time as he can return to resume his business at the old stand. However, Judge Morris has the right idea. Nothing in the world throws fear into the heart of a moonshiner more than a long jail sentence, and no doubt it would have a marked effect on the industry in general if other courts discontinued the fining (or licensing) system and put the offenders behind the bars for a sufficient length of time to make them thoroughly disgusted with the contemptible traffic.

"Though your sins be as scarlet they shall be white as snow; though they be red like crimson, they shall be as wool." (Isaiah 1,18). Will any one deny the squareness of this beautiful excerpt from the Bible? If so, probably it is best that the devil takes him.

An exchange tells of a distant relative of Henry Ford who was recently discovered in the north woods of Minnesota after having lived there in complete exile for 35 years. Now he will probably buy a flivver and rejoin the family group.

Present indications point to all kinds of fun in the Minnesota legislature next winter. Times would be pretty dull in the North Star state were it not for the bi-ennial performance put on by its lawmakers.

According to market reports in the city papers, the price of leather is steadily advancing. It is barely possible that the general prevalence of bootlegging is a contributing cause.

Did you go to church Thanksgiving day and offer up humble thanks to Almighty God for the blessings He bestowed upon you during 1922? No? Shame on you!

Some folks have an idea that the proper manner of observing Thanksgiving is to take a whack at established order and a whale of a smack from a jug of moonshine.

One person a day, on an average, is killed by automobiles in Minneapolis. At that rate the city will be entirely depopulated in about a thousand years.

SCHOOL NOTES

The new high school seats have arrived. Those who sat in the arm chairs for the past weeks have certainly earned their new seats.

* * *

The Literary Society rendered the following program last Friday: Roll-call and minutes, by secretary; recitation, Luella Urdahl; recitation, Myrtle Iverson; impromptu, Herbert Nelson; Olga Grimley, Norton Gunderson, Alice Coan; dialogue, Gertrude Anderson, Ray Jensen, Alvin Halvorson, Freda Bundhund, Henry Fjeld, Gust Thompson, Emma Gilbertson. Laura Swanson and Alice Franzman were waitresses and Ethel Vaughan was the guest of honor.

* * *

All the pupils are looking forward to the Thanksgiving vacation. Since school will not open until Tuesday after Thanksgiving, we will have a good long rest.

* * *

The pupils on the honor roll for this month are; Herbert Nelson, Esther Ronkin.

The fellow who thinks he is a bird must quail at the thought.

THANKSGIVING.

(By REV. H. LUTZ).

Text: "It is a good thing to give thanks unto the Lord." Psalm 92,1.

In spite of the fact that—all in all—the crops were not as good this season as had been expected; in spite of the fact that the cost of living is still high and conditions in the business world still poor; and in spite of the fact that the producer gets comparatively little for the labor of his hands, yet there are many things for which each and every one of us have reasons to be thankful.

The writer does not say that you have not had hardships to bear. He does not claim that you have not had sorrow and grief, that you have not met with disappointments and misfortunes, that you have not been forced to lay many of your fondest hopes into the grave, that you have not seen many of your sincerest wishes shattered. In short, we do not say that this past year has been a year of pure joy and success and entirely without sorrow and misfortune.

But, aside from the fact that adversity, in its way, is one of our greatest blessings—Thanksgiving is a day on which we should not and do not wish to grieve and lament and complain about that which we did not like, but rather a day on which we should and would be truly thankful for the good that we did enjoy. Therefore, let us for the time being—God grant for all times—forget about our troubles and let our thoughts dwell upon those things which can awaken and strengthen in us a spirit of thankfulness.

We have had three square meals every day, and that without begging for them. Instead of walking about clothed in rags, we would dress respectably. We had a roof over our head to protect us against rain and snow, against cold and heat, against all changes of temperature and weather. We had loving relatives and kind friends to rejoice with us when we were happy and to weep with us when we had sorrow; to sympathize with us when we suffered pain or misfortune and to assist us with our plans and prayers. We had neighbors who in case of need were willing to give assistance.

Our country was at peace with all the world. Law and order reigned for the most part. Robbers and murderers did not take our lives or possessions. We did not suffer great loss by fire or storm. While many of our fellowmen—who are no worse than we—lost their lives, health or goods by lightning, auto or other accidents, sickness or carelessness, we have been spared. The angel of death has again reaped his grim harvest among young and old, strong and weak, rich and poor, but we have not been touched.

Above all, we Christians have again had abundant opportunity to hear and learn the Word of Life, and to partake of the blessed Sacrament, to bring our children to Christ in holy baptism and to help keep them with Him through instruction in Sunday school and otherwise. God has not changed His gospel of grace, but it still reads as it always did: "Through your sins be as scarlet they shall be as white as snow; though they be red like crimson, they shall be as wool" (Isaiah 1,18). And this is possible although "there is no difference, all have sinned and come short of the glory of God" because we are "justified FREELY by His grave through the redemption, which is in Jesus Christ," in this way that He "died for all; the just for the unjust that He might bring us to God."

This comforting message still holds good, and was preached to us again this year. In fact, all the exhortation and instruction and comfort and consolation and peace and blessing of God's Holy Word was ours for the accepting. If we did not receive it, it was our own fault.

Considering all these and thousands of other gifts of God, too numerous to mention, have we not all reason to be thankful?

Of course we have, and we are duly thankful, but do we agree with David in our text that "it is a good thing to give thanks unto the Lord?" It is only then, when our thanksgiving is directed to the great and kind Giver above, that it amounts to anything. In every other case it is a mere show, and an empty form. We may rest assured that a bounteous Thanksgiving dinner, a grand celebration, dancing and wild games do not constitute true thanksgiving.

True thanksgiving is a thing of the heart. And it can be found only there where there is a humble spirit which gives all glory and credit for success to God, and an unselfish spirit, which is willing to share God's gifts with others, and give some of them back to Him for support of His kingdom. [illegible] which [illegible] all earthly [illegible]

God grant us such humble, unselfish, God-fearing hearts! Amen!

GRYGLA

(From The Eagle.)

Alvin Magneson celebrated his 12th birthday last Monday afternoon, assisted by a number of his boy friends.

The village schools have been closed this week owing to the teachers attending the county teachers' institute at Warren.

The recent cold weather with no snow has made good skating on the ditch and a boy that is without skates is a back number.

Ole Landro of Thief River Falls has been spending a number of days in this vicinity, principally to attend the funeral of Mrs. M. Teigland.

Thomas Byklum, an old man aged 82 years, died last week in the town of Hamre. Further particulars we have as yet been unable to learn.

BROTHER DIES

Word [illegible] here Monday [illegible] of the death of [illegible] Urdahl of Redondo Beach, Cal. Deceased was a brother of Christ and Osmund Urdahl. Mr. Urdahl was at one time a land-owner here and has visited in Goodridge numerous times. His health has been failing for some time and he sought relief by removing to California, where his demise occurred.

Magna Erickson left Wednesday for Thief River Falls on a shopping tour.

A series of meeting will be held at the Reiner church Tuesday and Wednesday. Rev. V. O. Aaker, pastor of the church, A. Stenes and Mr. Haugen will be speakers.

Mr. and Mrs. John Vraa were very pleasantly surprised last Saturday evening by a large number of their friends. The evening was spent in various games after which a delicious lunch was served. Mr. and Mrs. Vraa were presented with a purse of money as a token of the esteem in which they are held in the community.

Harry Erickson, John Vraa and Richard Aakre left Monday for the eastern part of the state, where they will be employed.

This is the season of the year when the fellow who likes to tell how many he killed at one shot has his innings.

Mortgage Foreclosure Sale.

Whereas, Default has occurred in the conditions of that certain mortgage duly executed and delivered by M. O. Seavey and Rachael Seavey, his wife, Mortgagors, to Ole A. San, Mortgagee, bearing date the 1st day [illegible] of August, 19[illegible] in book [illegible] of Mortgages, on page [illegible] such default consisting in the non-payment of the interest upon the principal sum of such mortgage, which interest, to-wit, the sum of Two Hundred Eighty-six and 80-100 dollars ($286.80) became due and payable on July 1, 1922, and, whereas, the undersigned, Nick Bundhund, was on the 10th day of July 1922, duly appointed guardian of the estate of said Ole A. San by the Probate Court of Pennington County, Minnesota, and a certified copy of the letters of guardianship issued to the undersigned as such guardian has been duly recorded in the office of the said Register of Deeds. And, whereas, the undersigned did on November 6, 1922, pay the interest then due upon a prior mortgage upon and against the premises hereinafter described, amounting to the sum of One Hundred Twenty-four and 42-100 dollars ($124.42). And, whereas, the undersigned, as guardian has declared and does hereby declare the whole sum secured by said Mortgage to be due and payable, and, whereas, there is now claimed to be due and is due at the date of this notice upon said mortgage the sum of Five Thousand Two Hundred Ninety-five and 92-100 dollars ($5,295.92), including the interest so paid on said prior mortgage, and no action or proceeding having been instituted at law or otherwise, to recover the debt secured by said Mortgage, or any part thereof.

NOW, THEREFORE, NOTICE IS HEREBY GIVEN, That by virtue of [illegible] quarter [illegible] teen [illegible], and the east half of the southeast quarter (E½ SE¼) of section sixteen (16) and the west half of the southeast quarter (W½ SE¼) of section sixteen (16) in township one hundred fifty four (154), north of range forty (40), west of the fifth principal meridian, containing 240 acres, according to the Government survey thereof, in Pennington county, and state of Minnesota, with the hereditaments and appurtenances; which sale will be made by the sheriff of Pennington county, at the front door of the Court House, in the city of Thief River Falls, in said county and state, on the 6th day of January, 1923, at 10 o'clock A. M. of that day, at public vendue, to the highest bidder for cash, to pay said debt of Five thousand two hundred ninety five and 92-100 dollars ($5,295.92) and the interest, and taxes, if any, on said premises and Seventy-five dollars ($75.00) attorney's fees, as stipulated in and by said Mortgage in case of foreclosure, and the disbursements allowed by law; subject to redemption at any time within one year from the day of sale, as provided by law.

Dated November 16, 1922.

NICK BUNDHUND,
as Guardian of the Estate of Ole A. San, Incompetent, Mortgagee.
H. O. CHOMMIE,
Attorney for Mortgagee,
Thief River Falls, Minnesota.

"NADINE LA VITTE!"

SYNOPSIS—The time is the late '60s or early '70s and the scene a steamboat on the Mississippi river. All the types of the period are present and the floating palace is distinguished by merriment, dancing and gallantry. There are the customary drinking and gambling also. Virgil Drace, a young northern man, is on his way south on a mission of revenge. He meets an eccentric character in the person of one Liberty Shottle, who is constantly tempting the goddess of chance. They agree to a singular pact. Drace gets his mind off his mission by entering into deck sports in which he exhibits an unusual athletic prowess. Drace, seeing an opportunity to use Shottle, confides to him that his mission is to find a certain ex-guerrilla, Stepho la Vitte, who had murdered Drace's father. It is his determination to hang La Vitte as high as Haman. Drace falls in love with a striking young beauty on the boat.

CHAPTER III—Continued.

—4—

"That's what comes to a horse that wanders from his stable-lot out on the frozen pond," said Shottle as Drace came up to laugh at him.

"You've made a rip in the skirt of the ball sure enough," Drace replied, taking him by the arm. And then suddenly he halted, for he caught sight of a girl coming toward him. A moment before, there had been numerous young women in the room, but now there was only one—the barbaric rose maid, the girl who had touched his heart with a torch.

With her walked a tall, handsome and well-dressed young man. Her hand rested upon his arm, and she seemed to listen with pleasure to his evidently ardent wooing. She looked at Drace, one glance, and then turned her eyes back to her cavalier and passed on. And a flame of jealousy was added to the turmoil that already held possession of him.

"Who is she, Shottle?" demanded Drace.

"I don't know, but I'll find out. Lord, but she is a fetcher."

He moved off, dodging the dancers here and there, while Drace sat alone in a window, waiting.

The orchestra struck up the supper-march, and Shottle, stalking his prey, saw the lady who had so excited Drace's interest seated with her cavalier in an alcove and supping daintily. Possessing himself of a plate and a goodly portion of chicken, Shottle returned and brazenly seated himself near them, listening with all his ears.

"Nadine," the cavalier was saying, "you wrong me in thinking I seek to influence you through my friendship with your father. It is true he owes me much; and it is true that if I were to become a member of his family I would forget that. But I want to make you care for me for myself. If—"

"Hush, Mr. Boyce," said the girl. "There are people near—this is no place to discuss such things."

The young man lowered his voice, and Shottle could hear no more. He calmly finished his chicken and then sought out Drace, whom he found pacing up and down impatiently.

"Well?" demanded Drace.

"His name," announced Shottle, "is Boyce. Frederick Boyce, probably—or maybe John. It would be John, I'd think."

"Hang his name!" exclaimed Drace. "Did you find out hers?"

"Nadine," replied Shottle with a triumphant air.

"Nadine," repeated Drace, and caressed the name with his lips. "But what's her last name?"

"Brown probably, or maybe Jones. Or it might even be Smith."

Drace scowled his wrath at such flippancy. "Look here, Lib," he said. "I'll give you twenty-five dollars to find out her full name and where she lives. I'll give you a hundred if you'll find somebody who'll introduce me to her."

"It's a bet," said Shottle. "But I must warn you you're late. Boyce wants her to marry him, and he's got a hold on her father. But she stood him off."

"H'm—she stood him off? My offer stands, Lib. She couldn't possibly throw herself away on a low-looking fellow like that."

Shottle asked for the twenty-five in advance, was denied and took himself off, grumbling. He found Boyce and the girl called Nadine just leaving the little alcove, and stopped them, bowing low. "Sir," he said, addressing Boyce, "I have been directed to inform this lady that she has been awarded a prize as the best waltzer in the room. If you will be so good as to give me her name and address in order that it may be delivered to her?"

Boyce regarded Shottle suspiciously. "Well!" he exclaimed. "I didn't know they did that sort of thing here. What is the prize and who is giving it?"

"The prize," replied Shottle blandly, "is a—turkey. It is given by the—by a leading butcher of the town."

Boyce laughed, and the girl added her silver merriment. "I'm sure I'm flattered," she said. "The name is Nadine la Vitte, and the address—"

She broke off, and flushed a little. Shottle's jaw had dropped; then he gulped with an extraordinary contortion of his face in the endeavor to mask his astonishment. "And the address?" he pursued.

The girl and Boyce exchanged a troubled look. "I think," interposed Boyce, "it would be better to take the—the fowl home tonight. Perhaps you would be good enough to deliver it to our carriage. It is ordered for one o'clock—Number 297." Bowing with pelican grace, Shottle departed, but he delayed some ten minutes in dark thought before he sought Drace again. For Shottle wanted the hundred dollars, and if he were to tell Drace that her name was La Vitte! Could it be possible that she was Stepho's daughter?

He presented himself before Drace at length. "Master," he announced, "her name is Nadine Brown and her address is Carriage Number 297."

"Carriage Number Two— But that is no address. And—"

"Listen, Master," went on Shottle hurriedly. "I have a scheme—a magnificent scheme. Not only shall you be introduced to this lady, but you shall be presented to her in the role of a protector and rescuer."

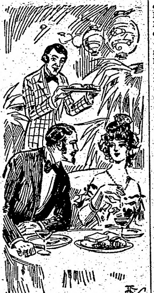
"How in the world will you manage that?"

"Very simple. At ten minutes past one, you are to be standing on Blank street just beyond the lamp at the corner of X street. Carriage 297 will drive past. From out the shadow of a garden wall two men will spring out and stop the carriage—attempt to rob this Boyce fellow and that girl. You will rush up with a cane—a cane, Virgil, no pistol—and drive off the robbers! You are a hero—the lady thanks you. Tableau!"

"But—but—"

"Leave it all to me—but give me that twenty-five dollars. I know fellows who'd hold up the devil himself for five."

At ten minutes past one o'clock Virgil Drace was standing in the shadow of a tree near the street-crossing decided upon, cursing himself for a hairbrained fool and Shottle for an addlepated rogue. A rattle of wheels came to his ears, and a cab approached him. As it came under the lamp at the corner, Virgil was sure he recognized the flamingo neck of Liberty Shottle rising from the turned-up collar of the cabby on the box.



Possessing Himself of a Plate and a Goodly Portion of Chicken, Shottle Returned and Brazenly Seated Himself Near Them.

"Good Lord!" gasped Drace. "He's done it. Pray heaven Boyce carries no pistol."

The cab passed him. And then from the shadow of a wall a hundred yards or so distant two dark figures darted out. There came a hoarse command, a stifled scream, a cry for help. Drace ran forward and found Boyce, Nadine and the supposed cabman standing with uplifted hands beside the vehicle while a masked desperado threatened them with a pistol and a second robber demanded their valuables.

Now Drace played his part right gallantly, rushing upon the robbers with uplifted cane. The fellow with the pistol fired once—then a blow on the wrist from Drace's stick sent the weapon flying. The pain of the blow enraged the fellow, however, and as Drace made at the second robber, the first one struck him heavily, momentarily dazing him. The two supposed robbers now took to their heels, pursued half-heartedly by Cabman Shottle and energetically by Boyce, who had been robbed in good earnest. And to complete the melee, the poor cab-horse, frightened by the pistol-shot, galloped off with the ramshackle vehicle lurching behind it.

Nadine turned to Drace, her face lighted with gratitude. She held forth her hand. With a grace that would not have mocked a Highlander who, schooled in France, had followed home the Queen of Scots, he bent over it and reverently touched it with his lips. Wild was her nature, this half-barbaric maid, and she snatched her hand away, but repenting instantly, smiled and spoke.

"I thank you much. You are brave. You are like one on the stage, the hero."

Her words came freely, and with just enough of accent to convince that they were sweeter than if there were none. Drace asked her if she remembered him, and her black velvet eyes flashed dark in astonishment.

"How could I when never have I seen you? You must mistake me. No."

"I saw you on the boat, at the ball at the St. Louis," Drace said. "But come to think of it, I know that it would be vanity on my part to believe that you have seen me."

"No, it would not be vanity," pleasantly she contradicted him, shaking her head, her cloud of hair. "The brave do not be vain, but I did not see you. I am so sorry. You sorry, too, ha?"

She laughed, and Drace thought that never till that moment had he heard music in its sweetest purity. Then Boyce and Shottle returned, panting—Shottle to disappear again in pursuit of his vanished vehicle.

"Sir, I thank you most heartily for your assistance," said Boyce, grasping Drace's hand. "My name is Boyce—Rupert Boyce. May I—"

"Mine, sir, is Virgil Drace," responded that young man. "I am only too glad to have been of help. I'm afraid, however, you'll have to finish your journey on foot. May I have the pleasure of walking with you?"

This suggestion, however, Boyce declined. And although Drace insisted as far as the bounds of courtesy would permit, both Boyce and the girl evaded consent. And they left him standing thunderstruck on the street corner—for the girl had said, giving him her hand again in parting: "I thank you once more for your help, Mr. Drace. I hope I may see you again some time. My name is Nadine la Vitte, and I am often in New Orleans."

Drace passed an uneasy night, his mind torn by his suspicion that Nadine la Vitte was the daughter of old Stepho. And when Liberty came to his room next morning, eager for praise and reward, the truth came out. Nadine was indeed the daughter of old Stepho; Liberty had overheard enough while disguised as the cabman to confirm that. But where she lived in New Orleans, Liberty had failed to learn; he had planned to drive them home, but the runaway of the cab horse had sent that plan agley.

CHAPTER IV

Now more than ever was Drace resolved to find where the girl lived, to find old Stepho, to— What would he do when he found them? He was bent on revenge upon his father's murderers, on solving the secret of that buried money; yet he was in love with that arch-scoundrel's daughter. Or was he? He must find her, make sure. And he said as much to Shottle.

"There are some things that can't be done by mere determination," said Shottle, his mind on filling a flush.

"No, but judgment ought to be the master and director of determination. I tell you what we'll do. This afternoon we'll take the French quarter by streets and knock at every door."

That afternoon they set out on their quest. But the scheme of knocking at every door soon seemed foolish and impertinent. They decided to halt only in front of habitations that seemed to invite inquiry, consult their instinct; but as repeated failure blunts instinct dull, hope became a critic, without creative adventure, and advised a return to the hotel. Then they thought that night would be a fitter time. They might catch sight of the girl or Boyce at the theater.

"I am Colonel Shottle, sir, and not Lib!"

(TO BE CONTINUED.)

Curious Rays.

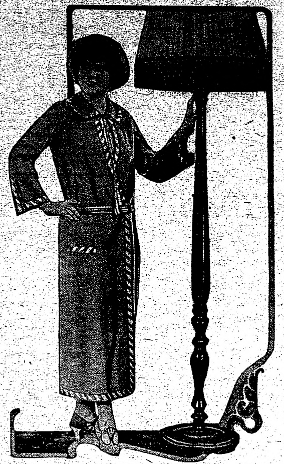
It was Blondlot, a French chemist, who discovered a new set of radiations emitted by a Roentgen tube, differing from the X-rays, in that they can be concentrated by means of a quartz lens, and can also be reflected. The X-rays undergo neither reflection nor refraction. The rays first mentioned pass through aluminum, paper and wood, being rectilinearly polarized on their emission. They are susceptible of both rotary and elliptical polarization. But they produce neither fluorescence nor photographic action.

Perfume Took Name From City.

The original recipe for the famous perfume, eau-de-Cologne, was discovered by an Italian living in Cologne in 1709.

CONVENIENT HOUSE FROCKS; PRETTY PARTY FROCKS

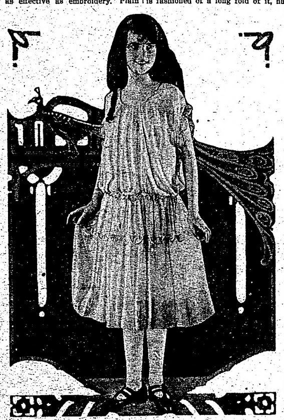
House frocks are among the things that it is hardly worth while to make at home; they may be bought ready-made at such reasonable prices and are so satisfactory in other respects. There is a steady demand for them so that manufacturers are constantly presenting new models to fill the needs of women who do more or less of the housework necessary to their home making. Where one has time to make these frocks at home it is a good idea to study the ready-made models because they embody points that are important.



Pretty Model for House Frock.

Just now sateen in black and colors, plain and striped chambrays, checked and cross-bar ginghams and a variety of percales, are featured in the displays, with sateen attracting most attention. It is shown in black, made in about the same style as that of the frock illustrated, and Persian or Paisley patterns in printed sateen is used for trimming.

Strong shades of blue, in chambray, make pretty house frocks with bright, figured cretonnes, cut into triangles, applied for trimming. The cretonne as effective as embroidery. Plain chambray in blue, lavender, green or light brown, bordered with bias bands of striped cotton material, showing white and the color of the frock, makes neat dresses like that in the picture. Cotton cord and tassel are appropriate neck finishings and a flat belt of the material confines the waist.



Simple but Pretty Party Frock.

Christmas time is coming, bringing with it holidays, homecomings from school, parties, feastings, gifts for everyone. It is a little bit of heaven for the youngsters—a joyous parenthesis in their long school year. Everyone is more or less busy, making ready for its great day, and for festivities to follow and everyone is entitled to a few of those dear, frivolous inconsequential things that the eternal feminine delights in, as party frocks ribbons and jewelry.

It is a simple matter to make a party frock that will transform this into a happy world for the young girl, for most party frocks are simple. They depend upon the loveliness of sheer fabrics, the beauty of color, and designing that will interpret the gay, and perhaps prankish, spirit of young girlhood, for their charm. All of these good points are combined in the pretty frock illustrated, and it may be taken as a criterion among party dresses designed for maids in their earlier teens or even younger. The picture tells the story of the dress perfectly. It is a crepe de chine frock, in peach color and has a kimono blouse and straight, full skirt. The round neck is bound with the crepe and all the trimming is fashioned of a long fold of it, having its raw edge bound with a very narrow bias fold. Petals and flowers are used, the petals for finishing the short sleeves and as a banding on the skirt and flowers set about the waist on a narrow ribbon girdle.

Business Woman Feared She Had Heart Trouble

"Since Tanlac has overcome a bad case of indigestion and nervousness of three or four years' standing for me, my work here in the store is a pleasure, and I am certainly grateful for the good health it has given me," said Mrs. J. W. Pickins, of 516 E. 15th St., Los Angeles, who owns and operates the book store at 219 Mercantile Place.

"I was so run down that I felt miserable all the time. My sleep was broken and restless, I had no appetite, and the gas from undigested food caused my heart to palpitate so I thought I had heart trouble. For a time I had a swelling in my legs, too, and it was an effort for me to get about.

"It is wonderful how Tanlac has given me such perfect relief from these troubles. I eat heartily now, sleep like a child at night, and just feel fine all the time."

Tanlac is sold by all good druggists.—Advertisement.

You Have to Be an Optimist.

The amateur gardener was digging away at the weeds in his potato patch.

"Makes it harder with the weeds so thick, doesn't it?" said a friend who was looking on.

"No, it's easier," retorted the enthusiast. "You don't have to walk so far to the next weed."—Wheeler's Magazine.

W. L. DOUGLAS

A TRUE RAT STORY

Auburntown, Tenn., 6-22-22.
Stearns Electric Paste Co.,

Dear Sirs: Mr. Robert T. Donnell of Auburntown, Tenn., came in our store the other day and wanted something to kill rats, so I sold him a box Stearns Rat Paste. And he put some paste on six biscuits that night and the next morning he found fifty-four big rats. And the second night he put out four more biscuits with paste on them, and the second morning he found seventeen more rats, making a total of seventy-one rats in two nights, and there were lots more that he did not find.

This is some big rat tale, but, nevertheless, it is so. Just thought would write to let you know that your rat paste is good.

Respectfully, KENNEDY BROTHERS.

Very effective

Lacked Cow Touch.

A Brown county woman, who could hardly be classed as a connoisseur, or even a dilettante, was looking at one of Will Vawter's hills o' Brown landscapes one day and focussed a scornful orb on a cow in the painting. She said it didn't look like a cow, and then, to cap the climax, she ran her hand over the rough surface of the artist's work and said: "Now, see there, that don't feel like a cow at all!"—Indianapolis News.

Buffalo—Two Minneapolis men are being held in the city jail here, following their capture, in connection with the slaying Wednesday of Rudolph Mauer, city marshal of South Haven.

Winona—An automobile driven by Fred Kleist, after narrowly missing colliding with another machine, struck a tree with such force that one of the springs was imbedded in the trunk.

Minneapolis—Judge Page Morris and a jury in United States district court are going to observe Thanksgiving day by holding the first session of federal court ever called here on a holiday.

St. Cloud—Organization of the St. Cloud chapter, Daughters of the American Revolution, is completed, with Mrs. Marshall H. Coolidge of Minneapolis, state regent in charge of installation.

Minneapolis — Scores of persons have written letters to Judge Page Morris during the last few weeks offering confidential information about places wheree liquor is made and sold, and as a result prohibition agents have made several arrests.

Owatonna—The agriculture department of the Owatonna high school has been selected by the Minnesota Department of Education to serve as a demonstration school, where seniors of the agriculture education classes, soon to become high school instructors, themselves, will receive practical training.

Minneapolis—Judge Mathias Baldwin of municipal court was appointed to the Hennepin county district bench by Governor Preus to fill the vacancy caused by the death of Judge W. E. Hale six months ago, Gunnar H. Nordbye to suceced Judge Baldwin on the municipal bench and Levi M. Hall to succeed Thomas H. Salmon of conciliation court.

Preston—Dave Coonradt, 50 years old, of Mabel, was sentenced to the state penitentiary following conviction in district court on a charge of poisoning a herd of cattle owned by Archie Gordon, a neighbor. The maximum penalty is two years.

Crookston—Pauline Hipsher who left her home at Warroad two weeks ago has returned home with her father, the police announced she was located, following the publication of a newspaper story, telling of her disappearance. According to the police she confessed that she ran away from home.

[illegible] four players poisoning.

Duluth—Real estate and personal property in St. Louis county have decreased about $2,000,000 in valuation during the last year, according to figures received.

Duluth—Six superheated moguls of the Duluth Iron Range railway passed through Duluth enroute to their destination.

Crookston — A postmaster for Crookston will be selected at a civil service examination to be held December 9 by the civil service commission, it was announced.

Winona—Allen Gantenbein, died at a hospital here as a result of a wound suffered when he was shot by Enos Behner, following a quarrel in a saloon at Alma early November 12.

Jeffers, Minn.—The sudden removal of the Rev. J. V. Roberts from the pastorate of the local Methodist church by the district superintendent has caused considerable feeling in the membership of the church here.

Chisholm—Members of the American Legion auxiliary are making an appeal for preserves and jam, which they wish to send to former service men at the Aberdeen hospital at St. Paul for their Thanksgiving dinner.

Duluth — Dutchland Aggie Tiny Prince II, the grand champion bull of the National Dairy exposition, was sold to George P. Grout by John B. Irwin of Richfield station, Minneapolis. The price was not made public.

Windom—Convicted on the charge of having stolen pigs, to a considerable value, August Quiram and his wife, Nellie Quiram, will spend the next five years of their lives in different penal institutions of the state.

Keewatin—Night work at the Bennett mine requiring the immediate employment of 250 additional men and an increased pay roll approaching $20,000, was announced by W. P. Chinn, of Duluth, general manager of the mine.

Hibbing—The Commercial club this afternoon decided to ask George Pauley, superintendent of the school experimental farm, to interest himself in proposed calf clubs to be formed among the rural school children of the district.

Minneapolis—An effort to reach the half mollion dollar mark in the Community fund campaign is being made by 3,000 volunteer workers. Subscriptions of more than $300,000 were obtained in the first day and a half of the campaign.

Jackson—Bernie Peterson, aged 16, has been taken to the St. Cloud reformatory after having been found guilty of manslaughter in the second degree. Peterson, it was shown, ran down and killed Mads Hansen here on the night of Sept. 10, 1921.

Windom, Minn.—Dr. A. M. Wright of this place, has been indicted by the grand jury on a charge of manslaughter in the second degree. Dr. Wright is accused of having run down and killed Mrs. G. S. Redding in this city a few weeks ago.

Hibbing—Village authorities have agreed to accept from the Maryland Casualty company $35,000 in full settlement of the claim for $42,312.96, alleged to have been found short in the accounts of the village during the terms of two former treasurers.

Hibbing—The first case of its kind ever tried in northern Minnesota, whereby a clergyman attempted to collect for back salary was settled in district court. Rev. Father Schumak, former priest of the Russian Orthodox church in Chisholm, sued for $315.

Minneapolis—The Pence Automobile company of Minneapolis, filed amended articles of incorporation with the secretary of state increasing its capital stock from $1,000,000 to $8,000,000. Harry E. Pence, president, and E. C. Malcolmson, secretary, signed the articles.

Duluth—About one-tenth of the big game hunters in this section of the north country brought back trophies, according to estimates made by veteran hunters. It is estimated that the smallest number of deer and moose in the history of the north country fell before the nimrods' rifles.

St. Paul—Governor J. A. O. Preus indicated that he would fill a vacancy on the district court bench in Minneapolis within a few days and that he would select one of the two municipal judges recently elected to district judgeships, thereby creating a vacancy as municipal judge.

Duluth—Enactment of a new state wide teachers' pension law, to include all classes of teachers, city, rural and university, will be sought of the state legislature, when it meets in January, in accordance with recommendations of the Minnesota Education association pension committee.

Duluth, Minn.—Because what he thought was a fox hiding in a hole proved to be a wolf, Clarence H. Dunning of this city, is $15 ahead. Dunning was driving into the north country to hunt deer when he saw the tail of an animal protruding from a hole in the side of the ditch along the road. Thinking it was a fox, he pulled the tail, expecting to catch the animal. When it had backed out far enough for Dunning to see it was a wolf, he grabbed a pole and clubbed it to death. He received $15 bounty for the pelt.

Minneapolis—Minnesota income tax dodgers are being sought by a force of 30 deputy internal revenue agents who started out to serve 2,000 warrants charging failure to file income tax returns.

Thief River Falls—With approximately 150 suspected cases of diphtheria reported here, city officials and leading citizens, at an informal meeting decided to await the report on 400 cultures sent to the state board of health before deciding whether to turn the auditorium into a hospital. Only six of the persons afflicted are confined to their beds.

Don't think because you can get a big can of Baking Powder for little money that you are saving anything.

There's Only One Way to Save on Bake-Day, Use

CALUMET

The Economy BAKING POWDER

BEST BY TEST

—It costs only a fraction of a cent for each baking.

—*You use less* because it contains more than the ordinary leavening strength.

The sales of Calumet are over 150% greater than that of any other baking powder.

THE WORLD'S GREATEST BAKING POWDER

WESTERN CANADA for Big Wheat Crops

160 ACRE FARMS IN WESTERN CANADA FREE

Canada is the world's greatest producer of wheat—second only to the United States—yet only about 12% of the tillable area has been worked. Yields of 40 bushels of wheat per acre are not uncommon. Oats have given as high as 100 bushels per acre, while 40 to 50 bushels per acre are ordinary yields; barley and rye in like proportion. Cattle and horses thrive on the native grasses which grow abundantly and corn and sunflower culture are highly successful.

Stock Raising, Dairying and Mixed Farming

secure for the industrious settler ample returns for his energy. Clearing the cost of one's farm with a single year's crop has an appeal, and has been done by hundreds of Western Canada farmers. Taxes only upon land (not on improvements). Perfect climate, attractive social conditions, good neighbors, churches, schools, telephones, excellent markets and shipping facilities make life happy as well as prosperous.

Ignorance.

Senator Medill McCormick said at a dinner in Washington:

"The League of Nations has failed. To champion it is to show an ignorance equal to the copy reader's.

"You remember, I am sure, the escape of A. Savage Landor, the explorer, from Thibet? Landor escaped, you know, but he bore the marks of brutal tortures.

"This happened back in 1909 or 1910. There was a copy reader in Chicago at the time who had never heard of the explorer, Landor, and when the dispatch about him came in, the poor ignorant copy reader edited it so that it appeared in his paper in the morning like this:

"'A savage landor has made its apperance in Thibet but the beast escaped after being badly mauled.'"

DYED HER DRAPERIES, SKIRT AND A SWEATER WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple that any woman can dye or tint faded, shabby skirts, dresses, waists, coats, sweaters, stockings, hangings, draperies, everything like new. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is guaranteed, even if you have never dyed before. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run. So easy to use.—Advertisement.

Long Words.

In respect to legitimate words most authorities agree that first in rank comes "antidisestablishmentarianism" (28) letters, followed by "honorificabilitudinity" ((22 letters).

Every man loves a wood fire in the grate, but seldom well enough to saw the logs for it.

Our Sacrifice Is Your Gain!

Your Dollar Will Do Double Duty Here For One Week!

In order to raise some money in a hurry, we have decided to put on a sale and have cut all prices to the core. As is well-known, H. Christianson & Son seldom put on a sale, but when they do it means something to the consumer. For example, we are offering 15 pounds of pure granulated sugar for $1 with each $10 cash purchase. Coming at an opportune time, this sale will afford you an opportunity to clothe the entire family at the lowest possible cost with the best merchandise obtainable anywhere, overshoes, warm caps, shirts, underwear, hosiery and warm clothing of all kinds. We are selling men's heavy all-rubber four-buckle overshoes at $2.98 which cost us $3.50. We mention this is an illustration of the numerous bargains to be had here and the entire stock in our store has been reduced in price in a like comparison. Come to this sale and we are sure you will be amazed at the great price slashings, as in all the time we have been established in business in Goodridge we have never offered anything like this before. All we ask you to do is to come in and look around and we are sure you will agree with us that the prices quoted in this advertisement are genuine. READ THEM OVER; MANY OTHERS HERE!

Sale Opens Saturday Morning, Dec. 2

Ends Saturday Evening, December 9th

State Board of Health

HEARING ON RED LAKE PROJECT BEGINS AT THIEF RIVER FALLS YESTERDAY

Hundreds of Interested Farmers From This Section Make Protest Against Unfair Assessments for Benefits; Cost of Project, $603,000, Would Fall Upon Residents of 8 Townships.

The final hearing upon the proposed Red Lake project, which was commenced some years ago to deepen the Red Lake River, began yesterday at Thief River Falls before Judges Grindeland, Watts and Stanton. A large complement of attorneys, court reporters, engineers and viewers are attending the hearing.

Hundreds of farmers from the vicinity of Goodridge are also attending the hearing as interested parties, many of them being there to object to the assessment recently filed by the viewers, which places the burden of cost directly upon the lands contiguous to the river. In other words, the entire cost is assessed against 127,000 acres of land upon the Red Lake reservation and 117,000 acres in the townships of Goodridge, Hickory, Star, Deer Park, Mayfield, Highlanding, Kratka and Reiner.

The entire assessment for benefits is approximately $1,800,000, while the cost of the project is estimated at $603,000. The average assessment for benefits would indicate that the cost to the farmers will reach $2.50 per acre, but many farmers hardly know whether to believe the figures of the Conservancy Board or not.

The protest which is being made is based, of course, upon the unfairness of the assessment, the project having originated as a flood control measure which was to benefit the entire Red Lake Basin. As the matter now stands, the attorneys and promoters claim the laws of Minnesota prevent the viewers from going outside of the natural watershed to assess the benefits.

Owing to present conditions, farmers are not very keen about further drainage, and those who are to appear in protest will go on the theory that if the improvement is necessary and desirable, someone better able than the farmers should be included in the assessment. Several water powers are to be found on the Red Lake River and it is felt that some measure of cost should be assessed against them.

Then there are numerous towns in the Red River valley which will receive benefits, and why not make them stand at least a part of the burden, say the farmers.

The case promises to be the most bitterly contested drainage proceeding which has ever come before the courts and The Banner will endeavor to keep its readers well informed in the matter.

Payne's Entertain.

Mr. and Mrs. Jay Payne entertained at their home the following guests at a Thanksgiving dinner: Mr. and Mrs. V. O. McLeod and family and the H. B. Rockne family.

Community Service Sunday.

Come to the Community service in the school building Sunday, December 10, at 8 P. M. Come and hear an interesting sermon in English on some practical topic by Rev. Elgin Halter. Everybody cordially invited.

ANNUAL BUSINESS MEETING.

The annual business meeting of Nazareth congregation in Goodridge will be held in the church Tuesday, December 12, at 2 o'clock P. M. for the purpose of electing officers for the ensuing year, and do such other business that may come before the meeting. H. A. Halvorson, secretary.

One of Pennington County's Farm Homes

"ALFALFA ON EVERY FARM IN STATE," NEWEST SLOGAN

"Some alfalfa on every Minnesota farm" is suggested as a slogan for county extension forces by Ralph F. Crim of University Farm, extension specialist in farm crops and farm management. Mr. Crim has prepared a list of Minnesota growers who have alfalfa seed of fine quality for sale at reasonable prices. This list can be obtained of him or from your county agent. Farm crops men of the University advise purchases of alfalfa seed as soon as possible, as prices are likely to be higher in the spring.

Grimm alfalfa seed is the best, they say, because it has been tested under the severest Minnesota conditions. Mr. Crim advises buyers to insist on seed that is certified or can be.

NORWEGIAN LUTHERAN CHURCH.

Sunday, Dec. 10: Sunday school and Bible class at 10 A. M. Norwegian services at 8 P. M. All who understand the Scandinavian language, please come. The congregation holds its annual business meeting Tuesday, December 12, at 2 P. M. All members are urged to be present. The Luther League meets Wednesday, December 13, at 8 P. M. Good program. Everybody welcome. Torgerson's Ladies' Aid meets with Mrs. Torjus Halvorson Thursday, December 14. The confirmation classes meet as usual. V. O. Aaker, pastor.

DEER MAKES GOOD PET.

Paul LaRocque, who lives just over the line in Clearwater county, was in town Saturday. Early this spring he picked up a fawn in the woods near his place, that had been deserted by its mother. It was but a day or two old at the time, and after taking it home he brought it back to life by feeding it from a bottle. As it grew up it developed a great attachment for the whole family and although never restrained in any way it has never left the LaRocque home any great distance. They received a permit from the state game commissioner to keep the animal in captivity, but it has never been shut up, except as it went into the barn. As the open season for shooting deer approached, the little doe was covered with a red blanket securely laced on, as a protection against any hunter who might see it. But during the entire season it never left the place and often tried to get into the house by turning the door knob with its nose. During the warm days when the door of the house was left open it would walk into the house and take the cookies away from the children if they were lunching.—Mahnomen Pioneer.

"HARD TIMES" DANCE HELD HERE THANKSGIVING EVE

The "hard times" dance given at the Goodridge Hall Thanksgiving evening was well attended despite the violent weather and bad roads. Music was furnished by a five-piece string orchestra composed of the following instrumentations: Piano, Ellard Iverson; violin; George Josephson; cello, O. O. Stephenson; mandolins, George Asper and Palmer Wold.

LUTHERAN CHURCH
(Missouri Synod)

M. at Germantown. English services in the parsonage in Goodridge at 8 P. M. "Receive with meekness the engrafted Word, which is able to save your souls." (James 1,21). H. Lutz, pastor.

MR. LAUGH-MAN.

Ho, Mr. Laugh-Man! Hit me with a smile,
Soak me with ripples of delight—
Poke me with your cheery
Fun and frolic, all unweary,
Give a touch of sunlight to my sight
Ho, Mr. Laugh-Man! Peg me with a pun,
Nudge me with a point of merriment;
Sweep the midnight glooming
From my heart and set me blooming
In a little laughing corner of content.
Ho, Mr. Laugh-Man! Tumble me around
Shake me till I have a retinue
Of hopes that spill their laughter
From the basement to the rafter
Making me a Laugh-Man just like you!

THE WOMAN SPEAKS

When first I was your bride
I dreamed you were a god,
And the joy within me died
When I caught a glimpse inside
Of your train of human clod.
But now with clearer eyes
As I watch and probe and scan,
The heart within me cries
For the dream that daily dies:
If only you were a Man!

Unanimous!

Times were hard for an old couple in Europe so they wrote to their son in America: "If you don't help us we will have to go to the poorhouse."

Two weeks later they received a cable collect: "Make reservations for three. I'm joining you."

TWO REAL SNOWSTORMS PAY VISIT TO GOODRIDGE

Goodridge and vicinity was visited by two real snowfalls and blizzards within the last 10 days. One made its appearance Thanksgiving Day and and continued long into the night, being reinforced by a whipping wind. Early Monday morning a quieter fall of snow began, which gradually increased in ferocity until it turned into a biting blizzard, which built up snow drifts that made roads almost impossible to traverse.

Drill Night.

Drill Captain—Right shoulder arms, left shoulder arms! Present a-rms! Right sho'der arms! Left sho'der a-r——"

Militia Rook (putting gun down)—"F'r Heaven's sake, man—MAKE UP YOUR MIND!"

Order in the Court Room.

"Get the prisoner's name and then go tell his mother."

"Plaiz, y'r honor, don't you think his mother knows his name?"

STUART McLEOD HEAD OF DAIRYMEN'S ASSO.

Popular Goodridge Man Is Honored at Closing Session of Convention.

Red Lake Falls, Minn., Dec. 7.—The 19th annual convention of the Red River Valley Dairymen's Association closed this afternoon with the election of Stuart McLeod, Goodridge, as president succeeding N. P. Hanson, of Detroit.

A. R. Knutson, Pelican Rapids, was elected first vice-president, Marius Waldal, Plummer, second vice-president; Leonard Houske, Halstad, secretary, and E. E. Thorson, Hendrum, treasurer. Axel Anderson, Erskine, won the butter contest and J. J. Fosse of Fertile the dairymen's contest.

The 1923 meeting place will be decided at a meeting of the board of directors next summer.

Among the prominent speakers at the convention were Chris Heen, state dairy and food commissioner, and Superintendent Selvig.

Entertained at Urdahl Home.

Mr. and Mrs. Carl Christianson and son, Loren, were entertained at a midday meal at the C. N. Urdahl home Sunday, December 3. After dinner the afternoon was enjoyably spent in conversation and in playing cards.

Graveling State Road.

Work on the state road is progressing rapidly and last Wednesday a total of 57 teams were busy hauling gravel for the project.

SOVIET ENVOY BACKS TURKEY

Asks that Bosphorus and Dardanelles be open to Turk Warships Only.

EQUALITY DEMANDED

Says Waters Belong to Turks and Should Be Used Only by Turks Whether in Peace or War.

Lausanne—The fundamental position of Russia on the question of the status to be given the Bosphorus, the Sea of Marmora and the Straits of Dardanelles was outlined by Foreign Minister Tchitcherin, who read a prepared statement in French, of which the following official summary was given out:

"The Russian delegation will strive to attain equality of the positions and rights of Russia and her allies—the Ukraine and Georgia—with the positions and rights of the other powers; and will strive to safeguard the peace and security of Russian territories and liberty of their economic relations with the other powers."

Want Durable Settlement.

M. Tchitcherin contended that permanent liberty of the commercial navigation and pacific maritime communications in the Bosphorus, the Sea of Marmora, and the Dardanelles, must be assured in the most absolute manner and without restrictions. He said:

"Maintenance of peace on the Black sea and the security of its coasts, peace in the Near East and the security of Constantinople should be guaranteed in a durable manner. This means that the Dardanelles and the Bosphorus, in time of peace, as in time of war, ought to be constantly closed to the warships and armed vessels, as well as the military airplanes of all countries except Turkey. Only in this way can liberty of peaceful navigation in these waters be effectually guaranteed.

Belong to Turkey, He Says.

M. Tchitcherin said that the Russian government started with the elementary fact that the Bosphorus and the Dardanelles belong to Turkey, and that the Turkish people are entitled to full sovereignty over their territory and waters.

M. Tchitcherin said Turkey could effectively defend her waters against attack by possessing the right to fortify and arm her coasts, by possessing a fleet of warships, and by utilizing for her defense every technical means of modern warfare.

M. Tchitcherin then passed to what was interpreted as an allusion to England. He said:

"Closing the straits to other warships conforms to the principle of equality between states. Throwing them open will give a preponderating position to the strongest maritime power."

3 BILLION ASKED FOR BUDGET

Deficit for 1922 Almost $274,000,000 Over Income.

Washington—Appropriations aggregating $3,078,940,331 for the fiscal year beginning next July 1 were proposed to congress by President Harding in the second annual federal budget. This is exclusive of the postal service and compares with actual appropriations for this fiscal year totalling $3,274,238,690.

Government expenditures for the coming fiscal year, also exclusive of the postal service, were estimated at $3,180,843,234, as compared with an estimate of $3,703,801,671 for this fiscal year and an actual outlay of $3,795,302,499 for the fiscal year ended last June 30.

Hopes for Excess.

The total federal revenue for 1924 was reckoned at $3,361,812,359, or an excess of $180,969,125 over projected expenditures. The estimated revenue for this fiscal year was $3,429,862,959, or $273,938,712 less than the expected outlay.

Mr. Harding said, however, that it was hoped to eliminate this deficit before the end of the year, adding that if this hope were not realized the expected surplus for 1924 would give a margin to take care of a deficit.

In his message accompanying the detailed budget, the president frankly told congress that whether the country could look forward to any further material reduction in federal expenditures and taxes in future years depended largely upon whether there was a curtailment of expansion of federal aid in lines of research, improvement and development.

Greek Prince Is Exiled.

Athens—Prince Andrew, brother of former King Constantine, has been sentenced by a military court to banishment for life and deprivation of his rank. He will not suffer actual degradation. The judgment of the court finds that Prince Andrew refused to obey orders in the presence of the enemy and moved his army corps in another direction, but considers that in view of his lack of experience in commanding masses of fighting troops application of the penalties provided by law would not be justifiable.

NEWS REVIEW OF CURRENT EVENTS

Greeks Execute Six Alleged Traitors and Britain Severs Relations.

LAUSANNE MEET DEADLOCKED

Mosul Oil Fields Subject of Much Dispute—France Reported Ready to Occupy the Ruhr — House Passes Ship Subsidy Bill.

By EDWARD W. PICKARD

THE revolutionary government of Greece has tried, convicted and executed three former premiers, two former cabinet officers and a general for conspiring to commit high treason, in connection with the Greek debacle in Asia Minor. Great Britain protested against the executions and has broken off diplomatic relations with Greece. Do you think this is justified, or do you believe the affair is no business of Britain's any more than was the execution of Erskine Childers by the Irish Free State?

MORE trouble looms for Greece. Last week the military court-martial in Athens found guilty a number of those accused of conspiracy to commit high treason in connection with the defeat of the Greek armies by the Turks, and six of them were condemned to death. These were former Premiers Gounaris, Stratos and Protopapadakis; former Cabinet Members Baltazzi and Theotokis and General Hadjanestis, who commanded the Asia Minor armies. General Stratigos and Admiral Goudas were condemned to life imprisonment. Great Britain, through Minister F. O. Lindley, was quick to protest against the carrying out of the death sentences, but the Greeks ignored this and within a few hours the six were lined up and shot.

Minister Lindley at once notified the Greek government that Great Britain had broken off relations with it and he departed for Lausanne to confer with Lord Curzon, the British foreign minister. Just why the British felt it their duty to pursue this course was not revealed in the dispatches, but a good guess is that they were glad to find this opportunity to sever a relationship that had become exceedingly irksome and that had brought on them little but abuse and ridicule. Now they are able to quit Greece with a gesture, of righteousness. But the results for Greece are likely to be very serious, for Great Britain has been her financial mainstay and if she cannot form other close friendships she may find herself practically isolated. At this writing no other nation has followed the lead of Britain, but it was said in Washington that the incident might cause the indefinite postponement of recognition of the Greek government by the United States. Before the execution Jefferson Caffery, the American charge d'affaires in Athens, on his personal account, advised against it.

King George did not approve of the executions and asked permission to leave the country. Instead, he was held under strict surveillance in the royal palace just outside of Athens.

EXACTLY what is going on in the Lausanne conference is being carefully concealed, the official communiques being brief statements from which the important facts are all omitted. The correspondents, reduced to conjecture, send out many stories of dissension, and there is good reason to believe some of these are based on truth. It is certain that the two committees handling the questions of the frontiers of Turkey and the possession of the Mosul oil fields are making little progress. The Turks, refusing to recognize the Mudros armistice of 1918, decline to accept responsibility for the cost of maintaining allied troops in Constantinople, which some weeks ago reached a total of half a billion dollars. They also insist they are the owners of the Mosul oil fields, which are in the Mesopotamian territory mandated to Britain. This oil question is perhaps the most troublesome one the conference has to deal with. It is reported the English may finally consent to throw over Feisal and his kingdom of Iraq and let Turkey have the territory, provided they are assured of concessions for the development of the oil fields. Several other European nations claim a share, however, and Americans have large interests in the region, which Messrs. Child and Grew are trying to safeguard by insisting on the open door. The Angora government seems rather partial to the Americans in this matter. It also is desirous that the American schools and colleges shall continue in operation in Turkey.

Eastern Thrace and Adrianople have been turned over to the Turks and they are with difficulty being held back from crossing the Maritza river and seizing Karagatch, which they claim because it is the terminus of the railroad from Constantinople. The Greeks have two army corps posted along the western bank of the river.

THERE were important developments in Paris last week concerning the possible occupation of the Rhineland by the French when the expected default in reparations payments by the Germans comes in January. Cables from Paris almost flatly asserted that the government had completed its arrangements for such action, including plans for both military and civil administration of the territory to be seized, and it was assumed that there would be no objection by Great Britain, since France was supporting the British program in relation to the Near East. On Wednesday, however, Premier Poincare cabled to Ambassador Jusserand in Washington directions to state that there was not the slightest foundation in fact for the report that the French government was contemplating a forcible entry into the Ruhr.

Chancellor Cuno had notified the allies that his government fully indorsed the "final" demand of Doctor Wirth for a moratorium of three or four years on all reparations payments and a huge international loan. Berlin was greatly disturbed by the reports from Paris, but could only reiterate that fulfillment of the treaty of Versailles would ruin both Germany and France. Questioned in the house of commons, Prime Minister Bonar Law said he had no information that would justify him in saying the French occupation of the Ruhr was imminent; but just before that he had a long conference with the French ambassador, and this was significant because heretofore he has insisted on leaving foreign affairs to the foreign office.

IN HIS American addresses, especially the one delivered in Chicago last week, M. Clemenceau insists that, although France does not desire to crush Germany, she has the best of reason to fear another attack on her by the Germans when, through alliance with soviet Russia and Turkey, they think themselves powerful enough to seek revenge. He called attention to 45 grave violations by Germany of the disarmament provisions of the treaty discovered by the allied authorities, mainly in the form of large hidden stores of war material. Clemenceau charged that Germany, in her efforts to evade her responsibilities, had bankrupted herself intentionally to keep from paying France; that the average tax in Germany is only $14 in contrast to an average of $45 in France. He denied again and again and at length that France is militaristic.

WHEN the ship subsidy measure came to a final vote in the house, late Wednesday, the administration forces were out in full strength and the bill was passed by a comfortable margin. During the several days given to its consideration many amendments were accepted by the Republican majority. One of them necessitates the authorization by congress each year of payments from the merchant marine fund to operators of American ships, this being generally viewed among members not only as doing away with a permanent appropriation, but also as affording a check on expenditures. Other amendments would exclude from receiving government aid concerns operating ships for their own benefit, except where they transported cargoes of other shippers; reduce from 1,000 to 500 gross tons the minimum tonnage for sailing vessels eligible for government aid, and eliminate the income tax credit to shipper equal to 5 per cent of amounts paid for the transportation of goods in American vessels.

IN THE senate the Democrats staged a determined and openly avowed filibuster to prevent the passage of the Dyer anti-lynching bill, which was passed by the house. Senator Underwood, their leader, warned the Republicans that all business, even the confirmation of presidential appointments, would be blocked until efforts to pass the measure were abandoned.

JAMES COUZENS, now mayor of Detroit, is to be the new senator from Michigan, succeeding Truman H. Newberry. He was appointed by Governor Groesbeck on Wednesday and wired his acceptance from New York, where he had gone to spend Thanksgiving day with his daughter. He will take his seat as soon as his Detroit affairs can be arranged. Governor Groesbeck said: "Mr. Couzens becomes senator with not a single string attached. He made no promises; I exacted none." Mr. Couzens, who was born in Ontario fifty years ago, began active life as a newsboy and between 1903 and 1916 he acquired a large fortune through association with Henry Ford in the manufacture of automobiles. As mayor of Detroit he gained prominence by his municipal railway venture.

UNCLE SAM is getting exceedingly annoyed by the prohibition enforcement question. Several recent occurrences have "got under his skin." President Harding's expressed opinion that liquor would long be a factor in politics was so misinterpreted that he felt the necessity of letting the country know he is and has been absolutely in favor of enforcing the Eighteenth amendment. Then came the orgy in Philadelphia, following the Army-Navy football game, in which the violation of the law was flagrant. Now the government has instructed federal authorities everywhere to co-operate closely with the prohibition enforcement agencies and the federal attorneys are told to push all pending liquor cases and, when proper, to urge the imposition of the heaviest penalties on conviction. Fifty new prohibition agents were added to the force in Philadelphia.

JAPAN moved out of the Shantung peninsula on December 1, according to her promise and after having made large concessions to the Chinese in the amount to be paid her. Next day China took over Kiaochow. Tsingtao at the same time became an open port and the municipality is autonomous under Chinese sovereignty. China will let the Japanese participate in public enterprises in Tsingtao.

THE Italian chamber of deputies, by a vote of 275 to 90, gave to Premier Mussolini full power to bring about economic reforms and carry out a rehabilitation of Italian finances. He is, in fact, in the position of receiver for a nearly bankrupt country. The extent of his support by the people is indicated by the fact that many labor organizations have offered to work one extra hour a day for the benefit of the government.

GOVERNOR SMALL of Illinois, guided by the dissenting opinion of Justice Carter of the state Supreme court rather than by the opinion of the rest of the court, has pardoned William Bross Lloyd and 15 of the other Communists who had just been put in the penitentiary and jail for violation of the state espionage law. Comment is unnecessary.

IN THE death of James R. Mann of Chicago the nation has lost one of its best informed, most courageous and most valuable congressmen. He had served in the lower house for 13 consecutive terms, or twenty-six years, and was re-elected last November. His knowledge of legislation, pending and past, was extraordinary and he was absolutely independent in his attitude toward measures in congress.

News of Minnesota

EVENTS of the week throughout the "State of Ten Thousand Lakes" told in brief form

Appleton—Mr. and Mrs. Albert Long, an aged couple living on a farm near here, were found dead in bed.

Minneapolis — Thirty-four women jurors will take part in municipal court sessions next week.

Waseca—The Waseca county election so far as county sheriff is concerned, is still in doubt.

Duluth—Farmers in the vicinity of Babbit, St. Louis county, will pay for their Red Cross membership with potatoes this year.

Austin—A daring thief stole the car of Mark Hamilton, motorcycle policeman on the local force, whose business is to enforce the traffic ordinance here.

Faribault—Valentine Webber, aged 42, an inmate of the state school, was suffocated when a slide of gravel from a sandbank near which he was working, buried him.

Hutchinson—The fair association cleared about $1,100 on its 1922 fair. New improvements this year will be a hog barn and complete fencing about the grounds.

Hutchinson—Education week is being sponsored in Hutchinson by the Women's club, the American Legion, Mayor E. L. Higgins, and the Parent-Teachers association.

Willmar—Resolutions adopted by the business and professional men of the city censure the city administration for its laxity in protecting the rights of all citizens.

Chaska—The county commissioners of Carver county adopted a resolution to call for bids for seven miles of road from the Hennepin county line west, on the short cut in Carver county.

Mankato—For the first time in the history of Mankato one of its banks was robbed, but the bandit who pulled off the job is no doubt cussing his luck for he got only $12 for his trouble.

Marshall—Fire, starting in a workshop, completely destroyed a garage here, together with all its contents, including 20 automobiles and trucks. The total loss is estimated at nearly $30,000.

Minneapolis—The Twin Cities will make their bid for the 1923 National Dairy exposition on December 8, when a delegation will meet with the board of directors of the National Dairy association in Chicago.

St. Paul—Contracts for about one hundred fifty miles of new graveling and other improvements under a winter work program on Minnesota trunk highways were awarded by Charles M. Babcock, state highway commissioner.

Lonsdale—Expert cracksmen forced their way into the State Bank of Lonsdale, used acetylene torches to gain entrance to the vault and safe and escaped with $25,000 in cash and securities without alarming the townspeople.

St. Paul—Support of the city of Minneapolis in any plan to divide power generated at the high dam evenly between Minneapolis and St. Paul was pledged at a meeting of the water power committee of the city council.

St. Paul—Efforts to amend the egg cold storage law will be made by producers and cold storage warehouse representatives, according to representatives who attended a conference with N. J. Holmberg, state commissioner of agriculture.

Slayton—Slayton's municipal waterworks which for a number of years has been running behind probably will pay its way in the future. Following an investigation it was determined that a majority of water meters are registering low.

Mankato—A new champion cow for Minnesota has been announced by the Holstein-Fresian Association of America in the 365-day division of the junior two-year-old class. She is Mankato Floa Ormsby Mercedes, owned by Marlow & Randall of Mankato, with a record of 21,486.1 pounds of milk and 841.22 pounds of butterfat, equivalent to 1,501.5 pounds of butter.

Minneapolis—President J. F. Reed of the State Farm Bureau Federation, Dr. E. C. Stakman, plant pathologist at the University of Minnesota and Harrison Fuller, director of the Conference for the Prevention of Grain Rust have returned from Washington where they appeared before Congressman Sydney Anderson's agricultural sub-committee in support of an appropriation of $500,000 for barberry eradication next year. The committee was told that a continuation of the campaign for the next two years would make possible the control of black stem rust of small grains. Members of the Minnesota delegation are confident that Congress will grant

Duluth—Despite unfavorable weather conditions which have somewhat affected movement of ships during the last few weeks, hard coal receipts in November are expected to amount to about 220,000 tons, which is a slight gain over October.

Owatonna—The December term of the Steele county district court will have the heaviest calendar in its history, according to present indications. The calendar now includes 126 civil cases and two criminal cases. A number of criminal cases are expected to be added through indictments made by the grand jury

Duluth—Six superheated moguls of the Duluth Iron Range railway, passed through Duluth enroute to their destination.

Balaton—Jens Bjorke, was instantly killed when he slipped and fell into the geering of a ditching machine.

Fairmont—More than 30 Martin county alumni of the University of Minnesota met here and organized a county association.

Waseca—The funeral services for John Moonan, prominent attorney and state Senator for eight years was held. Mr. Moonan died recently.

Detroit—The battle cry of the agricultural education service of the federal board for vocational training is not "back to the farm" but "stay on the farm."

Montevideo—The trial of Elsie Salisbury for the killing of her sweetheart, Oscar Erickson, in the Milwaukee railroad offices here last April began this week.

Minneapolis—William Kenney, bandit leader, who grimly refused to "peach on his pals" even though he knew his own end was near, died in the General hospital.

Duluth—Deputy collectors of the internal revenue office began delivery of 200 tax warrants on Duluthians who have failed to pay their September income tax assessments.

Duluth—Duluth police have been notified by Marquette (Michigan) authorities to be on the lookout for the 13 convicts who escaped from the Michigan state prison Sunday.

Minneapolis—Arthur Sorenson, who married a St. Paul girl and bought an automobile with a "dividend check" for $1,600 was arrested in Minneapolis on a charge of forgery.

Albert Lea—His clothing ignited when a two-gallon can of gasoline exploded, Hans Peter Jensen, blacksmith of Clarks Grove is in a hospital here at the point of death.

Winona—Elmer Otis, living near Rushford, died on his way to a local hospital from injuries suffered when he was crushed between a threshing machine and a separator which he was uncoupling.

Bemidji—Having completed the longest sawing season in the history of the plant which has been operating here for the past 20 years the plant of the Crookston Lumber company has closed down for the winter.

Moorhead—Right of S. O. Tang, recently elected superintendent of Clay county schools to hold office, will be tried out in courts of the county following filing of a contest by J. H. Huitzel of Hawley, his opponent.

Winona—Exactly one week after Edmund Herring, 8 years old, was injured by a freight train near his home here, his brother, Florian, 11 years old, suffered a broken arm when he jumped off an embankment here.

Marshall—Robbers made an unsuccessful attempt to break into the vault of the State Bank of Florence. Considerable damage was done to the building and vault, but the loot obtained by the robbers was small.

Brainerd—Slippery paving caused an automobile to leave the road between Deerwood and Crosby breaking a guardrail and running into a large tree. Henry Johnson of Tenstrike, Minn., is probably fatally injured.

Luverne—While she was attending the funeral of her husband, in this city, thieves raided the chicken yard of Mrs. Z. D. Snook on the farm in Magnolia township, and carried off 350 chickens from the valuable flock.

Duluth — Dutchland Aggie Tiny Prince II, the grand champion bull of the National Dairy exposition, was sold to George P. Grout by John B. Irwin of Richfield station, Minneapolis. The price was not made public.

Minneapolis—Earl Martineau, famous University of Minnesota halfback, undoubtedly will be the choice of his mates for the captaincy of the 1923 Gopher eleven when the lettermen hold their annual meeting next week.

Hibbing—The first case of its kind ever tried in northern Minnesota, whereby a clergyman attempted to collect for back salary was settled in district court. Rev. Father Schumak, former priest of the Russian Orthodox church in Chisholm, sued for $315.

Minneapolis—Judge Page Morris, entered into the last week's session of United States district court, with five liquor cases remaining on the Minneapolis calendar for trial. During the present term of Federal court Judge Morris has disposed of 250 liquor cases.

Red Wing—An outdoor picnic, including a river trip, in California would not be any stunt to mention, but in Minnesota at the end of November is something of a novelty. A party of Red Wing people participated in such a picnic, going up river by launch to the summer home of a Red Wing resident, in almost summer weather, and indulging in a picnic supper.

Hibbing—Starting with a mere handful of unemployed, a procession which gathered recruits as it progressed until several hundred men were in line, paraded the streets of the downtown district of Hibbing, in silent protest against the action of the village council in refusing to vacate streets and alleys in that section of old Hibbing sold to mining interests two years ago.

Minneapolis—All claims for refunds or credits on 1917 federal taxes must be made before March 1, 1923, according to Harry Harper, tax consultant, who returned to Minneapolis, from two weeks of conference with the bureau of internal revenue in Washington.

Crookston—The body of Anton L. Bakken, a farmer who disappeared from his home, 15 miles southeast of Crookston was found in a grove one mile from his home. The coroner said Bakken had shot himself through the chest. Worry over a farm debt was blamed

The Farmer's Own Page

Timely Comments on Agricultural Topics for Our Readers

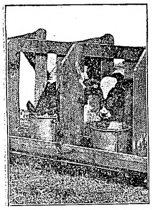
DAIRY FACTS

MUST KEEP HEIFER GROWING

Larger She Is Greater Will Be Her Capacity to Consume and Turn It Into Milk.

To get the best out of our dairy cattle we must grow the heifers out and develop them well, because the heifer of today is the cow of tomorrow, says J. P. LaMaster, chief of the dairy division, who states that the majority of the dairy heifers in South Carolina are undersized. The dairy heifer is a future milk producing machine, and the larger she is the greater will be her capacity to consume feed and therefore to produce milk, other things being equal.

The question often comes up in feeding heifers as to whether they are making a good growth, for their age. How big should a six-months-old heifer be? What should she weigh? Normal growth for Jerseys, Holsteins, Ayrshires and dairy Shorthorns have been worked out by the Missouri experiment station.



For Best Results Young Animals —Should Be Fed in Stanchions.

For instance, if a twelve-months old Jersey heifer weighs approximately 460 pounds, she is making normal growth; eighteen months old, 575 pounds. A Holstein heifer, on the other hand, should weigh about 560 pounds, and at eighteen months, 690 pounds.

The weight of an animal is not the whole story, however. The height at the withers is also an excellent indication. The normal Jersey heifer at six months should be about 37 inches, at the withers; at twelve months, 42½ inches, at eighteen months, 45½ inches, and at two years 47½ inches. Holsteins at the same age are higher—at six months, 39.7 inches; at twelve months, 44.8 inches; eighteen months, 47.9 inches; and at two years, 49.8 inches.

VALUE OF MILKING MACHINE

No Doubt of Important Part It Plays in Development of More Profitable Dairying.

There can be little doubt now of the value of the milking machine and the important part that it is playing in the development of more profitable dairying. The contention that milking machines are harmful to cows: that they tend to tear down the udder and render the cows useless, has proven to be generally untrue.

The recent improvements that have been made on the leading makes of milking machines have made it possible for the practical farmer to invest in one with a comparative certainty of securing beneficial results provided he gives the machine care.

The right use of the milking machine is just one more step toward more profitable dairying, more contented dairymen and more wholesome milk.—H. R. Lascelles, in Indiana Farm Guide.

Care at Calving Time

Separate the cow from the herd several days before calving date. In summer open pasture and in winter clean dry stall are ideal calving conditions.

Feed a bran mash for first four to six feeds after calving.

Feed a light grain mixture, such as equal parts oats and bran, until swelling is out of udder.

After udder is normal, start milk ration at four to five pounds daily, and increase gradually one pound every other day until natural milk flow is reached.

Continue feeding according to production.

PERTINENT POINTERS for MODERN FARMERS

Prepared Under Direction of North Dakota Agricultural College

COUNTY AGENTS FOR MARKETS, FINANCE

Marketing and farm finance activities have played a large part in the program of the county extension agents of North Dakota during the past year according to Gordon W. Randlett, director of the state extension division.

"For an agricultural college or a county agent to mix in cooperative marketing of farm products or farm financing a decade ago would have been considered heresy," declared Mr. Randlett.

"Developments of the past few years, however, bring out most emphatically that problems of production only do not make up a well-balanced program of extension work. Each of the 36 county extension agents in North Dakota is making a study of the particular local problem and with the cooperation of our state agents and of the farmers in the county is putting into operation as rapidly as possible a program calculated to bring about efficient production, economic marketing, and adequate financing. Full operation of such a program will result in a minimum price to the consumer with a maximum profit to the farmer, a happy condition for the public in general.

"Last spring the extension division and the North Dakota Agricultural college, together with the county extension agents, openly advocated a reduction in the acreage of wheat, due to the excessive carry-over from the 1921 crop and the indications from every quarter of a large crop this year, with a consequent flooding of the market and a small price per bushel for the crop this fall. Prices this fall justify the attitude taken by the extension agents last spring.

"'Go slow on potatoes,' was the advice from the extension staff to the farmers of the state last spring. Small acreages and thorough grading of the product before marketing were advised. Many farmers, influenced by the success of the neighbors with potatoes the previous year, plunged heavily, with the result that at the present time the potatoes which are not strictly graded are practically worthless.

"Our work has not been confined to calling attention to market and crop conditions. At all times we have furnished farmers with information regarding existing marketing agencies. County agents have held meetings at which they have presented the various cooperative plans for marketing wheat, such as the United States Grain Growers, Inc., the North Dakota Wheat Growers and the Equity. Farmers have not been advised to join any special agency, but they have received valuable information regarding the fundamental principles of successful cooperative marketing.

"One of the most successful marketing projects which was organized largely through the activities of the county extension agents is the North Dakota wool pool, which has just now closed out the 1922 wool clip at prices netting the growers an average of 35 cents per pound, or from five to ten cents more than was realized on the average by growers who sold through other sources.

"Scores of local potato marketing associations have been organized by county extension agents and plans are well under way for a state-wide potato marketing organization in cooperation with the Farm Bureau.

Nearly fifty livestock shipping organizations have been formed, and more than a dozen cooperative cream marketing associations. County agents were also instrumental in organizing a number of the seed marketing associations for such products as alfalfa, sweet clover, brome grass, etc. Within the last few months a full-time marketing specialist has entered the employ of the extension division, and it is planned to elaborate considerably on this type of work in the future.

"In the western part of the state, county agents have helped farmers to secure seed loans from the federal government, and in those counties employing agents more than twice as many loans were secured as in the counties that did not. Agents have also been active in organizing loan associations so that farmers could secure long time loans at reasonable rates from the federal farm land bank."

While the earth remaineth, seed time and harvest, and cold and heat, and summer and winter, and day and night shall not cease. Genesis: 8-22.

SURVIVAL OF FITTEST APPLIES TO DAIRYING

(By Max Morgan, North Dakota Agricultural College)

Dairy farming is a system of farming in which plans are first made for the cattle, the product of the farm, the crops and the market. It is a highly specialized business in which success and failure are determined by the old law of the survival of the fittest.

I was looking for a good purebred dairy bull last week to recommend to a group of farmers. This quest took me to many dairy farms. There were a great number of bulls for sale. Breeders are not taking advantage of the cheap bulls that are for sale and of the advantage of culling out the poor ones. The butcher has not been used to the best advantages or the poor individuals from untested dams would not have been on the farms.

The war prices on bulls are past, and if we will but wake up to the fact more bulls will sell and less expense will be encountered. Wouldn't it be good business to do as the merchant does when he finds his goods not moving to take what he can get for them to move them out? Why should a breeder start through the winter with six or eight yearling bulls, none of which are outstanding individuals and that are from untested dams, and costing from $300 to $500 each. The common faults found with most of the young bulls of today are that they are undersized and are slopers. Why not sell them at reasonable prices and not make a dissatisfied customer or discourage a beginner?

"The call to knives" should again be issued, for winter is here and bulls of the right kind and breeding are plentiful. A few breeders are unloading good bulls at reasonable prices. A letter recently received from a breeder stated that he had 24 calls for bulls in one week. His herd is culled out every month. He sells nothing but stock of quality and therefore, his reputation is good and he moves his surplus at an early age.

It takes judgment stick-to-it-iveness and knowledge to make a success of dairy farming and as it has been proved the world over in all business circles that "knowledge is power," the same should be applied to dairy farming when complaints are made about the difficulties which some farmers state are found in milking cows such as the long hours, the confining and hard work, poor prices, and so on.

These statements lead one to picture the usual scene as is so often found on a farm. A farm where such trouble is had one can draw a picture where there is no system of farming followed. The cows are milked as the last chore in the morning and the last chore at night. The grain crops are all seeded before the ground is plowed for the necessary dairy feed crops. The herd has at its head a grade bull or a purebred bull as poor as a grade sire. The cows are brindles, blacks and reds which would make the average dairy farmer of Holland believe he belonged to the rainbow division. Pints instead of quarts of milk are produced by cows with udders on them like a wet umbrella standing in a corner. In other words, this farmer is not trying dairying but is attempting to do everything but dairy farming and because he does not attend to his dairy first he has trouble and gives up milking in despair or turns it over to his wife. This type of dairy farmers had better give up milking dairy cows all together. There are less than one per cent of all dairy cows in the United States that have been tested for the production of butter fat. The farmer who has his cows in a cow testing association has the knowledge of dairy which the businessman and the banker has of his business. He therefore, makes it a successful and interesting life work.

A recent government survey shows that reading is the most important influence toward the use of purebred sires. The local paper usually has something in it that means money in the farmer's pocket.

* * *

One cook noted for her doughnuts drops a few whole cloves into the kettle of boiling fat she fries them in.

* * *

Nine-tenths of American farms, according to census reports, have no running water in the house.

* * *

If your local fair is a good one, support it. If it isn't a good one, help to make a good one out of it.

CHANGES IN BEEF PRODUCTION IN UNITED STATES SINCE 1850

(Prepared by the United States Department of Agriculture.)

Beef production in the United States has undergone marked changes since 1850, and chief among them is the difference in age to which animals destined for slaughter are kept on the farms. This is one of the many phases of the industry discussed in the 1921 Yearbook article, Our Beef Supply, prepared by live stock specialists and economists in the Department of Agriculture. This change is discussed in connection with variations in the demands of consumers and the per capita consumption of beef.

With a larger proportion of beef cows kept, and with cattle slaughtered at an earlier age, it is now possible to raise more beef each year than when there were more cattle in the country than at present. However, the system of using younger cattle for beef involves the use of more harvested feed per 100 pounds of beef produced, since a larger proportion of the gains in weight are made in the feed lot than was formerly the case when steers were carried four or five seasons on grass.

Situation Not Serious.

While the total number of cattle in the country has decreased in recent years, the situation is not as serious as might appear, since the number of cattle is greater now than in any year from 1896 to 1917. The census figures for 1900 and 1920 show that there has been an increase in the percentages of beef calves, heifers, cows and bulls, and a decrease in the percentage of steers, especially aged steers. The number of cattle in the country increased 10,200,000 from 1914 to 1919. During the last three years there has been a decrease of 2,000,000 head, but the greater proportion of cows at present makes it possible to grow more beef, especially if more of the calves, instead of being slaughtered, are fed out as yearlings.

That the country can readily respond to a quickened demand for beef was demonstrated during the war when production was so stimulated that during 1917 and 1918 combined more than 1,000,000,000 pounds of beef were exported, which was 7 per cent of our production and 22 per cent of the exports of the world during that period. Since about 1905 South America and Australia have been the chief sources of surplus beef.

Americans are eating less beef per capita than formerly, but the figures show that when demand and prices provide sufficient stimulus the supply can be increased at a surprisingly rapid rate. The consumption of beef and veal in the United States decreased from 87 pounds per person in 1907 to 60 pounds in 1915, a net variation of 27 pounds. Between the periods of 1907 to 1910 and 1911 to 1921 there has been a decrease in consumption amounting to approximately 20 per cent.

The article contains interesting information on the variations in demand for different kinds of beef in various cities and in the different sections of the country. High-class hotels in the larger cities want prime, fat and finished beef, while the average housewife wants beef involving less waste. In warm weather the principal demand is for steak and chops, while the winter trade demands more roasts and boiling beef. The orthodox Jewish trade uses only the forequarters, while Gentiles, as a rule, prefer hindquarter beef.

Beef Consumed in East.

A survey made in 1920 showed that at that time nearly 32 per cent of the beef was consumed in the North Atlantic states, which comprises New England, New York, Pennsylvania and New Jersey. The next largest amount, of 24 per cent, was consumed in the East-North-Central division. In other words, more than 55 per cent of the total consumption of beef and veal occurred in the territory east of the Mississippi and north of the Ohio river and Maryland. The smallest consumption occurred in the South Atlantic division, comprising the states of Delaware, Maryland, Virginia, North Carolina, South Carolina, Georgia and Florida. Per capita consumption varied from 83 pounds in the western division to 39 in the South Central. The North Atlantic division, which was first in total consumption, was second in per capita consumption.

A Bunch of Purebred Shorthorn Cows and Calves.

This survey of the beef-cattle situation, which includes, in addition to the discussion of consumption and present trend, information on various factors of production and marketing, leads to the conclusion that the period of liquidation is over, and that when industrial conditions and retail prices permit a normal consumption of beef, cattle producers should be prosperous again.

MEATSCRAP AID FOR LAYERS

Kentucky Experiment Station Obtains Big Increase in Production of Eggs.

For three years the Kentucky experiment station has been studying the effect of feeding various amounts of meatscraps on the egg production of white Wyandottes. The average annual egg production when 5 per cent of the ration consisted of scraps was 109.9 eggs; when it consisted of 15 per cent, 134.5 eggs; and when 20 per cent of scraps were fed, 141.6 eggs.

From the results the station concludes that the mash mixture should contain at least 20 per cent meatscrap to secure maximum production.

GRADING PAYS IN SHIPPING CROPS

Advantage of Standardization Is No Longer a Theory.

Shippers' and Producers' Organizations Which Have Adopted Federal Grades for Fruits and Vegetables Are Pleased.

(Prepared by the United States Department of Agriculture.)

"The advantage of standardization is no longer a theory but an accomplished fact. Our selling price was from 15 to 50 cents per bushel higher than the other houses in this district, and the greatest advantager of a standard grade and pack will, of course, be secured in coming seasons, provided we maintain our standards."

This is but one of the many letters being received by the bureau of agricultural economics, United States Department of Agriculture, from producers' and shippers' organizations which have adopted federal grades for fruits and vegetables. The letter is from a co-operative peach shippers' organization in Ohio.

"We packed out our entire crop on the United States grades," wrote the president of the organization. "All our members are well pleased, and, best of all, determined to begin in their own orchards at once to try to produce fruit of higher and better quality. We see no point at which the standards recommended by your department for peaches are not thoroughly practical, and another year we will doubtless eliminate the old markings entirely."

Best House for Poultry.

Makeshift poultry houses may partly answer, but for lasting economy and efficiency a good poultry house, properly equipped, is best.

Remember that plowing done now will not have to be done later when other work is pressing.

POULTRY

EGG PRODUCTION IN WINTER

Feeding a Well-Balanced Ration Is of First Importance—Greens and Exercise Needed.

(Prepared by the United States Department of Agriculture.)

The pullets that are expected to be doing their bit in the laying flock this winter should have been put in winter quarters early in November and fed the sort of ration that will supply plenty of material for egg production. Every attention that will tend to stimulate laying is demanded by the pullets at this time, for a good early start may help to establish the habit of laying through a long season, say the poultrymen of the United States Department of Agriculture.

Good rations, however, cannot be expected to keep a flock laying properly if health conditions are not what they should be. Dropping boards and nests need cleaning and disinfection occasionally, and it goes almost without saying that there must be frequent changes of litter and always an abundant supply of clean water. A sick hen is about as poor a piece of property as a man can own, and many experienced poultry raisers go so far as to say that a sick one is less desirable than a dead one.

If pullets are a little slow in coming into laying it is sometimes possible to stimulate them by some changes in the feeding schedule. If the quantity of scratch feed allowed in the morning is cut down by one-half, it will make the birds hungrier during the day and they will consume more of the dry mash, which will frequently start them laying a week earlier than otherwise would be the case.

Another help is to feed a little of the mash wet at noon, as even this little variation seems to whet their appetites. The use of buttermilk in mixing this moist mash is one of the best stimulants to help start egg production. If the poultry keeper feels that he does not want to force the birds too hard he may cut down on this moistened mash. It is possible that forcing too much on the feed may cause the fowls to be weakened in fertility, but few farmers and back-yard chicken raisers will be inclined to overdo this matter of feeding. A little stimulus in the beginning may have a great deal to do with getting the hens started in their work, and once on their way it is probable that they will keep on if well fed and cared for.

If the weather is mild it may be possible to feed the hens outside, and when this is done they will generally get plenty of exercise. When the birds must be kept in, feeding the grain in deep litter is the best way to get them to take the needed exercise. It is possible, however, to overdo such a good thing as exercise. Too much scratching and running around keeps the layers always hungry, and the demands of the body are so great that egg making may be interfered with. The hens should go to roost every night with a crop full of feed.

Cutting Green Feed Which Is Necessary for the Laying Flock in Fall and Winter.

Green feed is one of the essentials for laying hens and no good poultryman will neglect to supply it in some form or other. There is a great variety of this kind of feed, including cabbage, mangels, sprouted oats and cut green rye. It may be fed at noon, or such green stuff as cabbage and mangels may be nailed to the wall so that the birds may peck at it.

THE RED LAKE PROJECT.

The meeting scheduled for this city on Thursday, December 7th, when an effort will be made to put into effect a final determination in the matter of the Red Lake drainage project before the judges of the district court, holds much of interest to the people of this entire section. There is no dispute over the need of the relief mentioned in the various petitions of the Conservancy Board. The entire project as now proposed is the result of years of agitation on the part of those who have lived through perilous floods in the Red River Valley, the menace and the damages extending as far north as Winnipeg and affecting nearly every county and village in the section tributary to the Red River.

The deepening of Red Lake river has always been considered as of primary importance in relieving the congested condition which arises from the massing of huge areas of ice and water in the Red Lake basin. And so it was that in the early days of this discussion representatives from Winnipeg and the valley towns affected attended the various meetings held to discuss the matter. Congress, heeding the need of the people of the valley, appropriated money for preliminary expenses, and provided an enabling act under which the work could be started.

Since that time much of the expense money has been spent on the socalled Clearwater project, and the entire matter is now so thoroughly balled up and involved that none but a Philadelphia lawyer could recognize or untangle from the mess the child of the original promoters. Perhaps the Clearwater addition was a necessity, but if such is the case little effort has been made to explain and make it clear to the public what was in the minds of the prime movers within the Conservancy Board.

The important thing now is that after all these years of engineering around, an effort will be made to saddle the cost of the project principally on that small area of land tributary to the Red Lake river, and it is this unfairness which The Tribune will concern itself with. The settlers in the eight townships cited in the report of the viewers will receive no greater benefit from the deepening of the river than will those residing fifty miles north, or a hundred miles north for that matter, nor a hundred miles west. Under normal conditions these settlers are in no need of this drainage and when flood conditions arise they are damaged and periled only in the same ratio as their neighbors at Crookston, or Fisher, or a score of places in the Red River Valley.

Many of these settlers had no great trouble from the flood waters until the ditching projects farther north let the waters down upon them. They have neither asked nor received any redress for this condition, but now to further add to their burdens by imposing on them the immense cost of the Red Lake project, looks to us like the last traw of imposition.

No doubt the big power companies who have been lying around in the bushes with their expensive engineers, seeking power sites and acquiring land for future development, would be very happy to have the settlers pull this chestnut out of the fire, as they have in numerous other cases, but in this instance we believe the farmers are going to demand—and, what is more, receive—a square deal.

Regrettable as it is, we believe the only way out now is to throw the entire project into the discard and begin all over again on a foundation of equity and fairness, eliminating all the frills and furbelows and assessing the benefits over that wide area and to those interests which will actually be benefitted. Congressional action will not be difficult to obtain when the matter is fairly explained.

THE "STUNT" AVIATOR.

Public opinion will be swift to indorse the proposal to eliminate by a drastic law the itinerant aviator who makes a business of "barnstorming" state fairs, as suggested at the recent Aero congress in Detroit.

The casualty figures show that the "stunt" flyer, who does his loops and spins and wing walking for a fee over the heads of wondering crowds contributes heavily—as high as 40 per cent—to the accident lists. Recently a young girl was dragged to death, swinging from the wing of a machine in which she was taking her flight to qualify as a "stunt" flyer.

No one can forget the tragic end of Belvin Maynard, "the flying parson," who went to his death in a terrific crash at a Vermont fair.

There were three other deaths that afternoon at the same field. This is the slaughter that the American people tolerate to make themselves a holiday. Practice such as this cannot be too quickly or severely condemned.

HOME LOYALTY.

If you live and do business in a town, for Heaven's sake be loyal to it.

If this town furnishes you with food and shelter, speak well of it, stand by it and stand by the industries it represents.

If put to a pinch, an ounce of loyalty is worth a ton of clever knocking. If you must vilify, condemn and eternally disparage, pack your trunk, and when you are on the outside, knock to your heart's content.

But as long as you are a part of a community, be a real man; do not condemn it.

If you do, you are loosening the tendrils that hold you as a part of the community, and the first high wind that comes along—and we have lots of 'em come our way during the long winter—you will be uprooted and be blown far away.

And probably you will never know why.

Don't knock.

It's bad business!

REVOLT OF THE MALE.

It is claimed that 5,800 names of male students at Berkeley college have affixed to a petition for banishment of the coeds en masse to Mills college.

In substance, it is claimed that so long as coeds are allowed on the campus no useful work can be got out of the men. With one accord they hang around the muslin, pose and strut for effect like the gentleman turkey, and neglect their work.

Even the sacrosanct seniors' bench is desecrated by sophomoric spooners, while the pure air of the campus is vitiated by perfumes.

Wholly unable to resist temptation, the despairing males demand the expurgation of the coeds to save mankind from intellectual ruin. It is not stated to whom the petition is addressed, but doubtless to the people, for coedism is engrafted in the constitution.

THE EDITOR'S CHAIR.

A lawyer charges a man $10 for 10 minutes' conversation—the man insists on paying it.

A doctor charges $1 for a prescription and the patient says, "Oh, pshaw, is that enough?"

An undertaker conducts a funeral and charges $100 and he is just perfectly lovely with everybody inside and outside the family. A man buys a gold brick and apologizes for not having bitten sooner.

An editor walks a mile through a blizzard to get the facts of a sudden death, a marriage or a suicide, and spends three hours writing it up, and tells lies and praises people that don't deserve it, till he almost hates himself.

Then if he makes an insignificant omission or error or charges five cents straight for three extra copies, he is a stingy cuss who never gets anything right and charges four times the price of papers twice the size.

He is confounded most-any-old-thing and ought to be run out of town—or starved out.

Talk about the ice man!

How would you like to run a newspaper?

If farming is any tougher, we'll trade this newspaper for any old farm in the country!

ROOSEVELT WAS HONEST.

While riding the range with one of his own cowboys during his Dakota days, the late President Roosevelt came across an unbranded maverick which his cowboy caught, threw and was about to mark with the Roosevelt brand. Mr. Roosevelt thereupon discharged the boy, who protested that he was working in the interests of his boss, and received the reply:

"Yes, my friend, and if you will steal for me, you will steal from me."

The Princess Hermione of Reuss—wherever and whatever that is—has put the finishing touches to the work that the Allies set out to do, by marrying "Kaiser Bill." Wilhelm knows now, if he never knew before, that the days of his autocracy are gone to stay.

New conditions face every man and woman in this country, regardless of age or station. If we didn't have new conditions to face, living wouldn't be a joy any longer.

54 CENTS FOR EVERY DOLLAR!

A merchant in a neighboring town states his advertising thus far this year cost him 54 cents for every $100 worth of goods sold. He used half a page of his local paper each week for his business announcement and says that as long as people read newspapers, he will continue to advertise. There's a man possessed of a good head. Just as soon as merchants begin to look upon advertising as a branch of their business which requires as much care as any part of it, then will advertising pay. Honesty, force, originality and persistency in advertising make it a paying investment.

Advertising never drove any firm out of business.

The Banner can't say as much for non-advertisers!

From the earliest days of civilized man, until about a hundred years ago, the fastest traveling that could be done was at the speed of a horse at a gallop. Now we have speed maniacs who believe that "40 per" is too confounded slow even on a pleasure jaunt. How the world do change!

The Banner hopes that recent election results will put a little pep into a lot of time-killers down in Washingtno. They cannot dilly dally and play politics all the time without being punished. The people have spoken once and there is reason on earth why they can't again.

A woman down in Chicago, on the "outs" with her husband, chewed off his nose. We can't say we admire her taste.

Holland established herself as an independent state in 1609. There began the transition which had its fruition 40 years later when the common people of England did an unprecedented thing. They led their hereditary king to a scaffold outside his own palace and cut off his head. And ever since that time kings and queens nave been about as popular as a siege of the gout.

While you're reading these columns and enjoying the privilege, remember it costs money to provide it. A good way of showing your appreciation is to pay up your subscription—if you owe us anything. Don't make us believe that Santa Claus will pay it!

OBSERVING OLE.

"Some girls' faces ain't worth the skin they are painted on."

Mortgage Foreclosure Sale.

Whereas, Default has occurred in the conditions of that certain mortgage duly executed and delivered by M. O. Seavey and Rachael Seavey, his wife, Mortgagors, to Ole A. San, Mortgagee, bearing date the 1st day of July, 1921, and with a power of sale therein contained, duly recorded in the office of the Register of Deeds, in and for the county of Pennington and state of Minnesota on the 31st day of August, 1921, at eight o'clock A. M. in book 57 of Mortgages, on page 609, such default consisting in the nonpayment of the interest upon the principal sum of such mortgage, which interest to-wit: the sum of Two Hundred Eighty-six and 80-100 dollars ($286.80), became due and payable on July 1, 1922, and, whereas, the undersigned, Nick Bundhund, was on the 10th day of July 1922, duly appointed guardian of the estate of said Ole A. San by the Probate Court, of Pennington County, Minnesota, and a certified copy of the letters of guardianship issued to the undersigned as such guardian has been duly recorded in the office of the said Register of Deeds. And, whereas, the undersigned did on November 6, 1922, pay the interest then due upon a prior mortgage upon and against the premises hereinafter described, amounting to the sum of One Hundred Twenty-four and 42-100 dollars ($124.42). And, whereas, the undersigned, as guardian has declared and does hereby declare the whole sum secured by said Mortgage to be due and payable, and, whereas, there is now claimed to be due and is due at the date of this notice upon said mortgage the sum of Five Thousand Two Hundred Ninety-five and 92-100 dollars ($5,295.92), including the interest so paid on said prior mortgage, and no action or proceeding having been instituted at law or otherwise, to recover the debt secured by said Mortgage, or any part thereof.

NOW, THEREFORE, NOTICE IS HEREBY GIVEN, That by virtue of the power of sale contained in said mortgage, and pursuant to the statute in such case made and provided, the said mortgage will be foreclosed by a sale of the premises described in and conveyed by said mortgage, to-wit:

The west half of the Southwest quarter (W½ SW¼) of section fifteen (15), and the east half of the southeast quarter (E½ SE¼) of section sixteen (16), and the west half of the southeast quarter (W½ SE¼) of section sixteen (16), in township one hundred fifty-four (154), north of range forty (40), west of the fifth principal meredian, containing 240 acres, according to the Government survey thereof, in Pennington county, and state of Minnesota, with the hereditaments and appurtenances; which sale will be made by the sheriff of Pennington county, at the front door of the Court House, in the city of Thief River Falls, in said county and state, on the 6th day of January, 1923, at 10 o'clock A. M. of that day, at public vendue, to the highest bidder for cash, to pay said debt of Five thousand two hundred ninety five and 92-100 dollars ($5,295.92) and the interest, and taxes, if any, on said premises ,and Seventy-five dollars ($75.00) attorney's fees, as stipulated in and by said Mortgage in case of foreclosure, and the disbursements allowed by law; subject to redemption at any time within one year from the day of sale, as provided by law.

Dated November 16, 1922.

NICK BUNDHUND,
as Guardian of the Estate of Ole A. San, Incompetent, Mortgagee.
H. O. CHOMMIE,
Attorney for Mortgagee,
Thief River Falls, Minnesota.

A RIOT

SYNOPSIS.—The time is the late '60s or early '70s and the scene a steamboat on the Mississippi river. All the types of the period are present and the floating palace is distinguished by merriment, dancing and gallantry. There are the customary drinking and gambling, also. Virgil Drace, a young northern man, is on his way south on a mission of revenge. He meets an eccentric character in the person of one Liberty Shottle, who is constantly tempting the goddess of chance. They agree to a singular pact. Drace, seeing an opportunity to use Shottle, confides to him that his mission is to find a certain ex-guerrilla, Stepho la Vitte, who had murdered Drace's father. It is his determination to hang La Vitte as high as Haman. Drace falls in love with a striking young beauty on the boat. The steamer reaches New Orleans, at that time in the somewhat turbulent throes of carpetbag government. The young men attend the French ball and Drace unexpectedly meets the girl. She is accompanied by one Boyce, apparently her fiance. Shottle learns that the name of the girl is Nadine la Vitte. Drace passes an uneasy night torn by the suspicion that Nadine is the daughter of old Stepho la Vitte, now an admitted outlaw. Now, more than ever, is he resolved to find where the girl lives and to find Stepho.

CHAPTER IV—Continued.

—5—

They went to one, and from a stage box gazed through rented glasses at every face. Not there. They went out, walked a short distance, talking not of disappointment but of hope, and turned into a narrow and dimly lighted street. Suddenly there broke the noise of a rising tumult, yells and gunshots. And over walls and from dark recesses came pouring excited men. Drace and Shottle found themselves in the midst of a mob, surging toward another mob rushing into an open space where torches discovered a band of executioners hanging some poor wretch to the limb of a tree. Where there were no houses, the garden walls were too high to offer a means of escape, and as they could not fight their way back, Drace and Shottle were swept onward. Torches flared, and all sorts of weapons were revealed in the pitiful yellow light—old muskets, swords, pistols with brass barrels from ancient Spanish armories, clubs and pikes that might have served Cromwell. Some of the men looked respectable, others desperate; they were of many nationalities, all anger-smitten and excited.

"What's it all about?" Drace inquired of a bare-headed old man who panted beside him.

"The carpet-bag devils. They hang a citizen."

"We are on the right side, anyway," Shottle cried. "Give me a gun—give me something."

Some one gave him an old carbine, and another gave Drace a cavalry saber. The man from the North grasped it, feeling that he was to fight the scoundrels that cast discredit and reproach upon his native state.

At this time of man's madness nature could not restrain the introduction of her own grim humor. Dogs gathered in the open space between the bands of advancing rioters, and fought, howling, the victims of wounds without cause.

Not many shots were fired. The authorities made a criminal of the citizen who carried a gun or concealed it in his house. It was a hand-to-hand strife, the breaking of heads, the cutting of throats. A big, red-shirted negro with razor gleaming in the smoky light made a grab at Drace, who had just room enough to leap back and strike with his saber; but the agile negro dodged, the blow was caught by a brick wall and the blade was broken off at the handle. But with the hilt, a boxing glove of steel, Drace knocked the negro down and then passed over his body, striking right and left, pushing onward to the front, where the jagged ranks saw-toothed one into the other.

The struggle now was to save the hanging man, who, without fall enough to break his neck, was strung up to strangle. Drace was the first man to fight his way to him. He dropped his steel boxing glove, grabbed out his knife, leaped up, caught hold of the limb of the tree with one hand and cut the man down.

Catching up his weapon, he was about to mix in the fight again when the sharp scream of a woman caught and held him for a moment. He glanced hurriedly about; at various windows were lights and silhouetted figures of onlookers. But as if drawn by some lodestone instinct his eyes went to a second-story window just beyond the tree; and there, in the strong light of a lamp just behind her, he saw again the face of the barbaric rose maid, Nadine la Vitte.

Instantly he whirled and strove to fight his way to a gate which he saw in the wall before the house. But now came a new cry and a scramble for safety. A troop of United States cavalry came sweeping the thoroughfare from curb to curb, their drawn sabers flashing, the aroused anger of Uncle Sam rebuking a riot. Not to run was to be trampled to death, but Drace stood an instant to look about for Shottle. He could not find him, however, and he had to seek his own safety, for the cavalry were near, spreading out upon the sidewalk.

With divers others, he stood not upon the order of his going but ran back down the street and then hurried down a side street out of the path of the troopers. There he waited until the tumult had subsided—perhaps an hour. Then he made his way back to the scene of the riot.

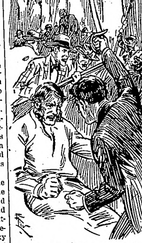
The house at the window of which he thought he had glimpsed the face of Nadine la Vitte was now dark. But in spite of the curious glances of sundry loiterers, Drace took a careful survey of it and of the three oak trees in front—even felt their bark to familiarize himself with them. At the corner he sought the name of the street, on the lamp, but the glass had been broken, leaving only a red "L" and the fragments and "e." But no matter—he would know where to turn, would know the house when abreast of it.

Now Drace hastened toward the St. Charles. The streets were quiet. But a wagon rattled by, and he saw that it was filled with wounded men. He thought of Shottle and his spirit was oppressed with sorrow. Shottle's escape must have been impossible, and tomorrow they would take his body, throw it into some oozy hole and cover it with mud.

In the lobby of the St. Charles men stood in groups, talking of the fall in the price of cotton. The riot, which to Drace had meant so much, was not even known, so accustomed was the town to scenes of violence. Drace asked the clerk if Shottle had come in. No; his key was in the box. Then Drace thought that surely Liberty must be dead or wounded, hauled away to suffer. He went forth again, to the department of police, to the cavalry barracks, but nothing could he learn. Then in his room he sat sorrowing over his friend and yet thrilled with a selfish happiness, for he had found the barbaric rosemaid. He went to bed, tossed, slept, dreamed in a mingling of distress and gladness, and awoke. Shottle was standing in the room.

"Thank the Lord!" cried Drace, and sprang out of bed.

"That's what I say, friend Virgil. But you will please address me as Colonel Shottle. I am a free man. Here!"



Some One Gave Him an Old Carbine and Another Gave Drace a Cavalry Saber.

He held forth an envelope; opening it, Drace took out a hundred-dollar banknote.

"What does this mean, Lib?"

"I am Colonel Shottle, sir, and not Lib."

"I beg your pardon, Colonel; but what does this mean?"

Shottle sat down and crossed his long legs. He took out a cigar and lighted it.

"Virgil, I fought as long as I thought it was of advantage. The old carbine I had wouldn't shoot, and I want to tell you that mauling darky heads with a piece of iron is hard work. I looked about for you but couldn't find you, and knowing that you knew how to take care of yourself, I began to sniff for a way to get out, found a hole in a wall, ducked through and scooted. That was all natural enough. Anybody could have done that. But now comes the inspirational part. I got around into Royal street and met a steamboat captain who asked me to have a drink, and I needed it, for I had been hard at work.

"So I went in with him. And then up I hops to a gambling house with the money you'd paid me for introducing you to Nadine la Vitte. The poker tables were full, so I nipped in modestly at the faro-bank. That's not a very swift game, but sometimes it is as sure as buying houses and lots, if you've got the patience. I invested cautiously till about daylight, cashed in exactly two hundred, and here I am as refreshed as a horse grazing on clover."

"Colonel, I congratulate you!" said Drace.

The two breakfasted together, and then Drace set out to find again the house at the scene of the riot—the house at the window of which he had seen the face of Nadine la Vitte. At length he found himself in the side street where he had taken refuge the night before, and turning out of this he came to the tree from the limb of which he had cut down the half-strangled victim of the mob. There opposite was the house and there was the window at which he had seen Nadine's face; but across the window, boards had been nailed! The other windows, too, and the doors, were nailed up; the place was deserted. Could that face at the window have been only a creature of his imagination?

An old negro in nondescript livery came down the walk from a house a few doors away. He might have been footman to a harlequin. But when Drace spoke to him, the dignified change in his countenance appeared to alter even the aspect of his attire; and now he might have been usher to a governor. This quick change had been brought about by his intuitive discovery that Drace was a man of consequence.

"Do you know anything about the people who lived across the street?" Drace asked.

"Wall, no sah; da wus po' folks, sah."

"Then you don't know where they went."

"No sah. My 'ployment is ter look after folks ob er higher 'dition, sah. An den ter preach on Sunday."

"Oh, you are a preacher."

"Called, sah, wid er blast from de trumpet."

"Does your church ever need money?" In a moment he lost his dignity.

"Look yeah, boss, whut's er nigger church fur ef it ain't ter need money? Co'se it need money. But what you gwine do erbout it?

"Yassuh," he said, when Drace had warmed him with a greenback, "I reckon dey done moved away. There was er kind of rumpus last night. And I reckon they-all thought it wasn't no place foh dem no mo'; dey lef' mighty sudden-like, uhly dis mawnin'."

And that was all Drace could learn; no one in the vicinity would admit that they knew them or their destination. Disliking to call too much attention to himself, Drace walked away heavy-hearted. For a long time he wandered the streets. He came to the levee, and the French market. He went into the old St. Louis cemetery, and looked upon the novel sight of bodies sepulchered in a wall with doors like a furnace. These compartments, he learned, were rented by the month to the poor; and a short tenantry it was for many a son and daughter of penury answering Eternity's call, for when the grim agent failed to collect the pittance promised by sorrow, the shrouded renter was evicted—an old Spanish custom, Drace was told.

Recalled by these grim surroundings to the purpose that had brought him to the South, Drace now determined to give himself wholly to his quest for Stepho la Vitte. He returned to the hotel, and found Shottle nervous in a cloud of smoke. The floor was covered with burned matches and the stubs of cigars.

"Lib, I'm crushed," announced Drace.

"So am I. But how does it happen that the dust-cart drove over you too?"

"Nadine is gone. The place is nailed up."

"That's tough, all right. But what are you going to do about it? Are you going to come to your puritanic senses and give the whole thing up, or do you expect—"

"I expect to fulfill my sacred mission. I must find Stepho la Vitte."

Shottle got up and shook hands with his friend. He swore that he would make the search the aim of his life. "Suppose you hire me by the day," he suggested. "A man does better work by the day. He always has fresh stimulus every time the sun rises."

"Very well—ten dollars a day."

"That's liberal, Virgil, and I'll take it. And let's get Old Josh to help us. He is more or less acquainted with Stepho's habits."

> "That case of wine was addressed to Stepho la Vitte at Farnum's Landing, Miss."

(TO BE CONTINUED.)

Singular Cortege.

The other day, along the Grand boulevard of Paris passed a singular funeral cortege. Behind a humble hearse the procession (all on foot) consisted of a woman with five children, a mere handful of soldiers, mostly blacks, and a general of the French army in full dress uniform. The general was General Mangin, and the deceased so singularly honored was the Soudanese who had been his orderly since 1914, and who, incidentally, had been cited in orders for extraordinary gallantry.—Independent, New York.

A Manager at Ninety.

Miss Charlotte Sherman, at the age of ninety, still actively manages the home for girl orphans she established in Southwark, London, some sixty years ago. Miss Sherman is far from old-fashioned. She personally types all her own letters and participates in the instruction of her 200 wards.—From the Argonaut.

RADIO

THINGS THE RADIO NOVICE WILL NEED

Tools and Materials He Should Keep on Hand—Advantages of Keeping a Log Book.

We are going to pause in explaining the theory of radio receivers and get down to practical things for today. There are many novices building their own sets, or making additional parts, who are in doubt as to just what tools and materials they will need.

Naturally there are tools and tools. Some cost more than others. Then, there are people and people. Some people need more tools than others. Some folks are just naturally handy with tools, and others find that tools won't behave and lead the user into all sorts of complications.

The tools and materials following are such as are necessary, and which will be useful at all times. No prices are given for the buyer will have to look to his pocketbook for guidance in this respect.

Tools that will come in handy; large, medium and small screwdrivers; flat, three-cornered and round file; hack saw, miter saw and box and cross-cut saw; a small plane, a vise, a bit and auger, pliers, a square and yardstick or tape rule, dividers and hammer, preferably a small one.

Materials that will be convenient to have on hand are as follows: Sandpaper, emery paper, wire of all gauges, round and flat-headed screws, a supply of brass nuts and washers, paraffine and sealing wax, bakelite, cardboard and fiber board, tinfoil, porcelain insulators, binding posts and terminals, sheet copper and sheet brass and adhesive tape.

Tape is possibly the most useful article in the whole layout, for it will be found to have many uses. It is in short a versatile piece of material in the electrician's kit.

Those of our readers who are building sets may find that it is good policy to keep all the odds and ends of wire, tape, copper, etc., that they may have. It seems that uses for these short bits are always to be found just when it is discovered that they have been thrown away. So, therefore, hoard all small pieces.

One thing we want to stress in building radio apparatus: Use care in your work, and put a good finish on your sets. Not only does it greatly add to the appearance of the set, but it also eliminates odd corners and stray ends of wire that catch dust or catch on surrounding objects and will hamper the efficiency of the set, either by shorting the circuit or causing it to be dragged off a pedestal and thrown on the floor. Those who have vacuum tube sets know that usually a fall means some new tubes.

To those radio novices who desire to go skipping blithely through the ether, picking out a station here and a station there, as fancy directs them, we recommend a log book. Just any sort of book will do, or rather any book will do in which one can jot down records of the evening's broadcasting.

The reason for the log book is that it prevents a lot of unnecessary fussing with the dials when a certain station is desired. Say for instance, KDKA was going nicely, but that there was a certain concert going on in New York at WUZ or WGY, or maybe WGI up in Boston. Let us make the problem even harder and say that there were two addresses in one evening, both especially good, and one of the addresses in New York was scheduled to start two minutes after the one in Pittsburgh was over. As soon as the one address is over, the enthusiast starts playing with his dials to catch New York. Sometimes it takes two minutes and sometimes it takes a great deal more time to catch the desired signal, and more often than not, the lecture is half over before it is tuned in correctly.

To assist the enthusiast to tune in quickly on any desired station is the mission of the log book. In this book should be entered the necessary data about all stations that have been picked up. Here should be noted down the exact position of the dials where the station was tuned in the best and other pertinent remarks. All these remarks should be entered, of course, the first time a new broadcasting station is picked up. With the information before him, the enthusiast needs but a glance at his book to tell him how he set his dials the last time he heard WBZ.

The oft heard remark to the effect that RNU was heard last night but cannot be heard tonight, should be a thing of the past if a log book is about, that is, providing one's set has range enough for the distance.

No directions are set down here for making a log book as it is thought that each one of the radio folk will have his own ideas on the subject. However, space should be left to inscribe even the minutest data about signal reception.

Two-Way Phone Plan.

By operating on two different wave lengths, one 450 meters and the other 350 meters, a two-way radio talk was successfully carried on between Portland, Ore., and Los Altos, Cal.

MEANING OF "FREQUENCIES"

Distinction Between "Audio" and "Radio" Must Be Learned Early by the Beginner.

A newcomer into radio experimenting ranks is often perplexed by the two terms called audio frequency and radio frequency.

The necessity of making a distinction in the frequencies in radio is important. It is generally known that vibrations of over 20,000 a second are inaudible to the human ear. The radio transmitters, depending upon their design, emit vibrations always running into tens or even hundreds of thousands, and are known as radio frequencies. In the reception of these waves it is necessary to reduce them to within the range of audibility of our ears.

Therefore, an arbitrary division has been made by radio engineers and designers to differentiate between the two frequencies. All frequencies above 10,000 are alluded to as radio frequencies and all below 10,000 as audio frequencies.

It must be remembered whenever the question of frequency is met with in the study of radio that radio frequency is that used in transmission, and that it must ultimately, by various methods, be reduced to audio frequency in order that the telephone receivers commonly used for the reception of signals may function.

This is analogous to the transmission of power over great distances by wire. It is generally carried at a high voltage over the greater distance, and, by means of step-down transformers, converted to a voltage of 110 volts, ordinarily used in our household scheme.

By means of detectors, either crystal or tube, which are really rectifiers, we convert radio frequencies to audio frequencies. These detectors lop off, as it were, one-half of the cycle, permitting only a flow in one direction, the other alternation being almost eliminated.

Radio Strange to Him.

The modern schoolboy knows wireless from A to Z and can rattle off the terms with a fluency that staggers the casual dabbler in the new art. In some sections of the country, however, only rumors of the wonders of wireless have seeped in and the native isn't quite sure what it is all about.

In Bleecker, a little hamlet outside of Gloversville, N. Y., a progressive farmer was erecting poles for his aerial the other day for the purpose of getting crop reports and weather forecasts. A neighbor happened along and learning that the work had something to do with wireless asked: "Which pole does that feller sing off of."

RADIO SPARKS

In Seattle an appeal has been broadcast to motorists for cooperation in preventing traffic accidents.

Doctor Marconi recently stated to an interviewer that he believed radio atmospheric disturbances came from the land and not from the sea.

Radio was first installed in China by the Germans some ten years ago, consisting of obsolete apparatus of a type that would now be scorned by an American boy enthusiast.

Some of the youngsters are getting the best of the landlord by erecting clothesline antennae, where aerials are forbidden on the housetops. It is found that even when the wire is hung with drying clothes good results are obtained through radio clotheslines.

The electric light socket aerial has appeared in France and is becoming popular. A French engineer has just turned out some of these devices, which are being purchased by the government for distribution to the farmers.

When a steady hum is heard in the receivers after wiring up a set, it may be understood that there is an open circuit somewhere. Trace out the wiring carefully and some little fault will present itself.

James H. Rogers, an inventor of Maryland, claims that he has received radio messages from distant stations through the ground by simply burying a wire. He says that not only do radio waves travel through the earth, but they meet with less resistance than when going through the air.

Hundreds of jewelers in Paris have installed radio sets for the purpose of setting their clocks by Greenwich time. Heretofore the official time was obtained by telephoning the observatory.

Radio has taken Argentina by storm. Many broadcasting stations have been opened and a multitude of shops for the sale of the equipment. French material has had the call up to this time, but the American manufacturers are now actively after business.

A writer says, "With radio, Robinson Crusoe would have had quite a 'jazzy' time." We have always thought that radio was one of the things that Professor Nemo had 3,000 leagues under the sea and that it was in daily use on the Mysterious Island, but that Verne failed to tell about it.

BEAR PRICES WIPED OUT

Steady Selling of May Wheat Causes Decline.

U. S. Bureau of Markets, Washington, D. C., for week ended Dec. 1, 1922.

GRAIN: Grain prices unsettled during the week and closed fractionally changed from a week ago. Good cash demand, big export business and bullish Argentine new caused buying, and weakness stock market and liquidation caused selling. Market unsettled but firm within narrow range on the first, but increased pressure toward close resulted in fractionally lower close. Australian crop officially estimated 105 million bushels, indicating 55 million bushels for export. Corn trade mixed with narrow price range. Cash corn market closed weaker. Closing prices in Chicago cash market: No. 2 red winter wheat $1.32; No. 2 hard winter wheat $1.22; No. 2 mixed corn 73c; No. 2 yellow corn 74c; No. 3 white oats 45c. Average farm prices: No. 2 mixed corn in central Iowa 61c; No. 1 dark northern wheat in central North Dakota $1.01; No. 2 hard winter wheat in central Kansas $1. Closing future prices: Chicago May wheat $1.16¾; Chicago May corn 70½c; Minneapolis May wheat $1.15⅞; Kansas City May wheat $1.08; Winnipeg May wheat $1.07⅞.

DAIRY PRODUCTS: Butter markets steady. Supplies light, demand good, but rumors of possible imports partly responsible for unsettled feeling especially at N. Y. where prices declined ½c today, the first declines to be registered since the markets began upward tendency in August. Small shipments of foreign butter already received. Storage butter moving well; fresh production showing decrease. Closing price 92 score butter: N. Y. 53; Chicago 54½. Cheese markets steady to firm but trading quiet following sharp advances averaging about 1½c on Wisconsin cheese boards Monday. These advances are supported to some extent by decreasing production and a fairly good demand even at the high prices. Cheese prices at Wisconsin primary markets Nov. 29th: Twins 26¾c; Daisies 27¼c; Double Daisies 27c; Longhorns 26¾c; Square Prints 27½c.

LIVESTOCK AND MEATS: Practically all classes of livestock at Chicago showed gains during the week. Hogs advanced from 45 to 60c; yearling steers and feeder were steady to 25c higher; butcher cows and heifers steady to 10c higher; veal calves ranged from 50c to $1.25 higher for the week. Fat lambs showed gains of from 25 to 85c; Yearlings 25c to $1.00; feeders were steady with ewes 25c lower. On December 1st hogs closed dull, losing early gain of 10 to 15c over Wednesday's average. Beef steers, stockers and feeders closed uneven about steady; butcher cows and heifers steady to 25c lower with canners and cutters showing most decline and bulls steady to weak. Fat lambs were strong to 15c higher, feeders closed strong to 25c higher sheep fully steady. Dec. 1st Chicago prices: Hogs, top, $8.55; bulk of sales $8.15-8.45; medium and good beef steers $7.25-13.50; butcher cows and heifers $3.60-10.75; feeder steers $5.25-7.75; light and medium weight veal calves $8.50-9.50; fat lambs $13.25-15.50; feeding lambs $12.25-14 25; yearlings $9.50-13.50; fat ewes $4.50-7.75. Stocker and feeder shipments from 12 important markets during the week ending November 24th were: Cattle and calves 138,489; hogs 20,794; sheep 135,098. In eastern wholesale fresh meat markets good beef was steady while medium grades were steady to $2 higher. Veal was steady to $1 higher; lamb $2 lower on better grades with others about steady; mutton ranged from $1 lower to $1 higher on better grades wtih medium grades steady, while pork was steady to $1 lower. December 1st prices good grade meats: Beef $14-17; veal $13-17; lamb $23-27; mutton $11-17; light pork loins $17-20; heavy loins $13-16.

South St. Paul Live Stock.

So. St. Paul—Steers, $4.00@5.60; veal calves, $2.50@$7.50; cows and heifers, $3.25@$9.00; hogs, $6.75@$8.00; sheep and lambs, $9.50@$14.25.

Minneapolis Closing Cash Prices.

Spring wheat—No. 1 dark northern, 1.20@1.25; No. 1 northern, 1.18@1.25; No. 1 dark hard, 1.22@1.28; No. 1 hard 1.15@1.18. No. 1 am. dur., 1.08@1.11. No. 1 durum, 93c@99c. Corn No. 2 yellow, 69c@70c. Oats No. 2 white, 38c@41c. Barley, choice to fancy, 59c @63c. Rye No. 2, 79c. Flaxseed No. 1, 2.41@2.48.

BUTTER—Extras, 51c; firsts, 47c; seconds, 42c; packing stock, fresh sweet, 26c; stale goods, 5c; grease, 1c; storage sweet extras, 45c.

EGGS—Country receipts, rots out, per case, $12.30; No. 1 candled, good extras, free from rots, small dirty and held stock, rots and leakers out, dozen 22c; checks, rots and leakers out, 21c; quotations on eggs include cases, fancy storage eggs, 30c.

Discuss New Butter Standard.

Chicago—Proposed revisions of laws governing fat and moisture standards in butter were discussed at a meeting of the American Association of Creamery Butter manufacturers.

Farmer Lodge Matched With Brennan.

St. Paul—The two Mikes, Gibbons and Collins, have accepted terms for Farmer Lodge to meet Bill Brennan, much mentioned among the heavyweight title contenders, at Grand Rapids, Mich., December 15.

DOCTOR ORDERED WOMAN OBEYED

Took Lydia E. Pinkham's Vegetable Compound and is Now Well

Chicago, Illinois.—"You surely gave women one good medicine when you put Lydia E. Pinkham's Vegetable Compound on the market. After I had my baby I was all run down and so nervous it kept me from gaining. My doctor did everything he could to build me up, then he ordered me to take Lydia E. Pinkham's Vegetable Compound with his medicine and I am now a new woman. I have had three children and they are all Lydia E. Pinkham babies. I have recommended your medicine to several friends and they speak highly of it. You are certainly doing good work in this world."—Mrs. ADRITH TOMSHECK, 10557 Wabash Ave., Chicago, Illinois.

There is nothing very strange about the doctor directing Mrs. Tomsheck to take Lydia E. Pinkham's Vegetable Compound. There are many physicians who do recommend it and highly appreciate its value.

Women who are nervous, run down, and suffering from women's ailments should give this well-known root and herb medicine a trial. Mrs. Tomsheck's experience should guide you towards health.

CARING FOR MEAT AT KILLING TIME

Cutting and Preparing Meat at Killing Time.

(Prepared by the United States Department of Agriculture.)

Taking care of the meat on the farm at killing time is one of the odd jobs a farmer's wife has to get in somehow among the ordinary tasks of the day. The following letter received by the United States Department of Agriculture from the "wife of a dirt farmer," as she calls herself, gives some idea of what this work involves. This woman lives on a Kansas ranch of 7,000 acres, many miles from a railroad, but her home is as modern in every respect and more convenient than many homes which are only a few feet from a railroad. This home was built for a particular family and the plan fits the life of the family. The routine of housekeeping is as simple as it could be on a big ranch, and the furnishings are simple but most effective. The wife is actively interested in farm bureau and especially in the home activities.

"Have finished my meat canning. I corned 51 pounds and canned 75 quarts of meat and stock. We like the meat better when it is browned well in the oven before canning. After it is browned, I slice it and pack into jars, adding salt and stock as usual and process. When I have sliced off all the pieces that cut to advantage, I cut the rest off and put it through the food chopper and season it, pack into jars with some stock and process. It is very good that way and for a change I add pork, onions, etc., and make a meat loaf when I open the chopped meat.

"After all the meat is used, I wash out the pressure canner, put the bones and about three gallons of water in, fasten and process at 15 pounds for about 40 minutes, take the bones which are almost blanched out, and can the stock for soup. It is very rich and goes a long way in making soup.

"I can headcheese, sausage, liver sausage, etc., in the canner and it is such a relief not to have so much fresh meat that must be used up quickly.

"I had about 30 pounds of soap made from tallow, uncooked process, and while it is a little hard, it makes a splendid suds and cleans well and has no scent."

DIFFERENT USES FOR JELLY IN HOUSEHOLD

Sandwiches Are Popular for the Children's Lunches.

No Remembrance Is More Universally Appreciated Than Glass of Pure Homemade Sweetmeat Perfect in Texture.

(Prepared by the United States Department of Agriculture.)

There are innumerable uses for jelly in every household, points out the United States Department of Agriculture. Not only when the jelly is firm and successful, but even when it has not "jelled" properly, may be utilized economically.

Bread and jelly or jelly sandwiches will of course be popular for children's lunches throughout the school year. Possibly this is the first thought in the mother's mind as she gradually fills her preserve shelves during the season. Her next thought will undoubtedly turn to jellies which accompany meat—the firm, transparent ones that dress up a meal so easily when guests come. Probably every housekeeper intends a certain proportion of her supply of tart dinner jellies to be used as holiday gifts for her friends, for no remembrance is more universally accepted than a glass of pure homemade jelly, perfect in texture and attractively packed.

A basket of six jellies, possibly made from different fruits, makes an ideal Christmas or anniversary present. Individual size jars or glasses are best when making a gift of jelly to a person who lives alone, who would enjoy a bit of jelly occasionally at a meal, but would have trouble using up a larger glass.

Firm tart jelly can be used in making jelly omelet, jelly muffins, jelly doughnuts, jelly tarts, or pastry squares covered with jelly. In making jelly muffins, part of the batter is dropped in the tin, a cube of jelly is put in the middle, and the rest of the batter is put on top.

Delicious confections can be made of cubes of over-stiff jelly. By using toothpicks to handle them they can be dipped into sweet chocolate melted over hot water and set on paraffin paper to harden. Special chocolate for candy-coating may be purchased in most grocery stores. Bright-colored firm jelly may be used as a garnish for cold meats or desserts, if cut in fancy shapes, and has the advantage of being not only decorative, but palatable. A bit of jelly on the top of each portion of "floating island" or other custard dessert adds to its attractiveness and food value.

Batter cakes of tender texture, light and thin, are excellent when spread with good jelly, rolled up and covered with powdered sugar. The cakes should be about the size of an ordinary saucer. A very delicious dessert in which jelly appears is made by paring and coring apples of some variety that will hold their shape well, and cooking them in a sugar sirup till tender. The sirup is made in the proportion of one cupful of sugar to two cupfuls of water, and is boiled a few minutes before the apples are put in. There should be enough sirup to cover the apples and the pan should be covered during cooking. When they are done they should be taken out and drained, and the core cavity is filled with jelly. The apples are served with "hard" sauce made of butter and sugar.

When a batch of jelly has for some reason failed to set as firmly as one would like, there are still many uses for it. A glassful of soft fruit jelly in a punch supplies both sweetening and fruit flavor. A few spoonfuls of soft tart jelly beaten into whipped cream gives a delicious flavor. Tarts filled with the jelly and baked are good for dessert. The jelly can be used as a sauce for blanc-mange, hot cakes or ice cream. It may be served with cream cheese or cottage cheese for lunch. With hot bread or in sandwiches the jelly is as useful as if it were firm, and for jelly roll or layer cake it is easier to spread than a stiff jelly. Mixed with coconut the jelly may be used to line a dessert mold, adding both to the flavor and appearance of the dish. The ingenious cook will think of many other ways of using her jellies to introduce variety into the menu.

POTATO SOUP QUICKLY MADE

Recipe Given for Dish That Is Easily Concocted and Served Hot at School for Lunch.

A good soup that can be quickly made and served hot at school for lunch is recommended by the United States Department of Agriculture and made as follows:

1 quart milk	2 teaspoonfuls butter or other fat
1 cupful grated potato	A few drops of onion juice
1½ teaspoonfuls of salt	

Add the potatoes to the milk. Bring to the boiling point, then add the fat, salt and onion juice. Serve with or without straining. This serves about six children with medium-sized portions, about a cupful each. Allow one and one-half cupfuls for large portions.

All Around the House

Save flour bags to put white clothes away in for the winter.

* * *

To make good tea never use water that has boiled a long time.

* * *

Spirits of nitre applied to a fever blister will check its development.

* * *

To remove chocolate or cocoa stains wash the part affected in cold water, then pour boiling water over.

* * *

Save the water potatoes, rice or macaroni has been cooked in. It is as good as milk for making gravy.

* * *

Allow 15 minutes for the roasting of each pound of beef if liked rare or 20 minutes for a well-cooked roast.

* * *

A man's striped silk shirt worn out just below the collar band and just above the cuffs, can be cut into an attractive blouse.

* * *

Plant the lemon seeds in a flower pot. They will grow quickly, and while this forms a pleasing decoration for the kitchen window the leaves will be found useful for flavoring sauces, etc.

Contractor Has Gained 30 Lbs. on Tanlac

"Tanlac fixed me up so I gained thirty pounds. I have never seen or heard of such a wonderful medicine in all the sixty-six years of my life," declared William Magee, well-known retired contractor, 3840 Lafayette Ave., St. Louis, Mo.

"About two years ago I had a severe bladder trouble that left me in an awfully run-down condition. My appetite went back on me and my stomach got so weak I could not eat and digest enough to give me any strength. I also had the worst sort of pains across the small of my back, and could not sleep.

"I began picking up soon after I started taking Tanlac, and now I have a fine appetite, sleep like a log and that tired, worn-out feeling has all left me. I could not do otherwise than recommend Tanlac."

Tanlac is sold by all good druggists.—Advertisement.

A man isn't necessarily bashful because he declines to meet his obligations.

MANY PROBLEMS IN TARIFF

Knotty Points Concerning Rates of Duty That Have to Be Dealt With Judiciously.

Cakes, folding pocket scissors, marble statuary, oriental rugs, pineapples in brine, and bibulous paper, alias "blotters," are a few of the articles with which the Court of Customs Appeals will have to struggle this winter, according to the calendar of cases it has issued. The tariff gives rise to many highly technical questions that are calculated to make the most judicial mind dizzy, and which have a real significance in dollars and cents to some one. An example is the pending question whether wheat screenings are dutiable at 10 per cent as a nonenumerated manufactured article or are free as wheat. What will happen when shipments of 23,000 pounds of goats' beards, reported as passing through the Panama canal, reaches the customs there is no telling. Only those who go down to the sea in ships and make land at the customs house have an adequate idea of the oddities of international trade and the problems they present.—The Nation's Business.

Amounted to Same Thing.

Two children were playing in a garden, and had just started a new game.

"I know a fine game," said Harold, suddenly. "Let's be admirals and command all the ships in the navy."

His playmate, a little girl, at once began imposing conditions.

"All right," she said. "Only I must be the highest admiral and give commands to you."

Harold didn't like the idea, and said so. The little girl thought for a moment.

"Then," she said, "let's play that I'm the admiral's wife. That will do just as well."

M. O. Seavey transacted business in Thief River Falls Wednesday.

Christ CVad was an electric car passenger to the county seat Wednesday.

Hans Nystul of Germantown was a shopper in Goodridge Wednesday.

Theodore Tandberg spent the weekend visiting friends and relatives at Thief River Falls.

Mr. and Mrs. G. C. Gulrud visited friends at Thief River Falls Saturday.

Nicolay Nelson returned Thanksgiving Day from Grand Forks, where he has been employed.

Tom Belland of Erie passed through Goodridge Wednesday morning en route to Thief River Falls.

Dr. Adkins of Thief River Falls stopped in at Goodridge a few minutes Monday morning.

H. O. Berve of Germantown passed through Goodridge Wednesday en route to Thief River Falls, where he attended to business matters.

Miss Dorothy Blockstad returned on Tuesday evening from Argyle, where she has been employed. She will spend an indefinite time at her home.

Bill Clark of Langdon, N. D., visited at the home of Mr. and Mrs. J. A. Sundquist during Thanksgiving. Mr. Clark is a brother of Mrs. Sundquist.

Miss Minnie Lindbloom returned on Monday evening from Moorhead, Minn., where she had spent Thanksgiving with her parents.

G. H. Hoyt, salesman for Wyman, Partridge & Co., was a visitor in this village Tuesday en route to Grygla, where he transacted business.

Miss Adeline Davids returned Tuesday morning after spending her Thanksgiving vacation with her parents at Bagley, Minn.

H. B. Rockne, cashier of the Farmers' State Bank, has been visiting at points in North Dakota the past week. He returned Monday morning.

Get your picture framing done at the Tvedt Lumber Company.—Adv.

Henry Becker and James Blaine attended to business matters in this village Friday.

Mrs. Henry Iverson was a visitor at Thief River Falls Thursday of last week.

Mr. and Mrs. A. T. Johnson of Germantown were shoppers in Goodridge Friday.

Carl Christianson was an electric car passenger to Thief River Falls Monday.

W. A. Kissow of Esplee attended to business matters in Goodridge Monday.

Mr. and Mrs. E. J. Erickson were visitors at Thief River Falls Saturday.

H. S. Dahlen, president of the Goodridge State Bank, transacted business in town Tuesday.

Ed Kivle returned Tuesday from Thief River Falls, where he had been visiting since Thanksgiving.

Misses Ida and Martha Bundlund returned Saturday from Thief River Falls, where they spent Thanksgiving with relatives.

Four-buckle overshoes, fur coats and mufflers made their appearance Monday on individuals who found it necessary to leave their fireside.

John Lindholm returned from Duluth Tuesday morning and continued on to Thorhult, where he will visit for a short time.

Daniel Payne returned to his teaching duties at District No. 98 after having spent the Thanksgiving holidays with his parents, Mr. and Mrs. Jay Payne.

Miss Thilda Ihle of Newfolden arrived here Monday. Miss Ihle will take the place in the local schol left by Miss Madga Nelson, who recently resigned.

Miss Madga Nelson, who has been teaching the seventh and eighth grade in the local school and who recently resigned, left Thursday for a short visit at Bemidji and other points.

Get your picture framing done by the Tvedt Lumber Company.—Adv.

Willie and Otto Kissow made a trip to the county seat Tuesday via the auto route.

Mr. and Mrs. W. L. Hall of Thief River Falls were entertained at the J. A. Sundquist home Thanksgiving Day.

Mrs. R. H. McDonald was a visitor at Thief River Falls between trains Tuesday.

Eddy Abbott passed through here Tuesday from Bemidji on his way to his home at Grygla.

Bennett Johnsrud returned Wednesday from Duluth, where he has been in search of employment.

Miss Pearl Bergeson returned Tuesday to resume her duties at the local school after spending her Thanksgiving vacation at her home in Lake Park Minn.

Mrs. H. Eliason returned from Clearwater, Ia., Tuesday morning, accompanied by her daughter, Mrs. Howard Yohn, who will visit here among old friends and relatives for an indefinite time.

Word has been received here that a baby daughter was born November 24 to Mr. and Mrs. C. G. Stephenson of Pelican Rapids. Mr. and Mrs. Stephenson were former residents of this village.

Miss Kathleen Lang, who teaches near Thief River Falls, arrived here Thursday and spent Thanksgiving with her mother. Miss Lang graduated with the 1922 class of the Goodridge high school.

ADVENT!

(By Rev. H. Lutz)

Text: "Behold Thy King cometh unto Thee; He is just, and having salvation." (Zechariah 9,9).

If the President of our country should inform us that he intended to pay us a visit and honor us with his presence, and that we need make no special preparations, that he would be willing to come into our home, humble and poor though it be, that he would bring with him all that he needed to make his stay with us pleasant and comfortable. In short, that we need only open the door of our home unto him and welcome him, who would not be glad and willing and feel highly honored to receive him?

If we were poor and in great need, unable to buy food and clothing and could find no way of making money, and a rich man should come to us and offer to give us all that we needed, and that out of pure grace and mercy, who of us would not be eager to accept such a kind offer?

If we were sick and suffering great pain, insomuch that we would be nearly unable to bear it, and a doctor came of whom we knew that he had cured many others, and who would offer to cure us free of charge, would we not be glad to give him a chance to try to heal us and restore us to health and happiness?

If we were condemned to die for some crime that we had not committed, the words of condemnation had been spoken, the preparations for our execution had been made, and everything ready for the hour on which we were to pay the penalty for our evil deeds, and then our enemy came and offered to die in our stead and insisted upon it, would we not feel our hearts drawn toward him in love and thankfulness, and remember and praise his good deed all our days?

If we owed a debt and were unable to pay it and on that account were in danger of losing our all, and just then someone came and paid our debt, would we thankfully accept this payment or would we insist on paying the debt again? Surely we would welcome the kindness of this person and reserve a goodly share of our thots and affections for him.

Yes, that is how we would act in earthly affairs. These are things that would help us only for a time, things that can benefit us only during the brief span of years which is allotted us in this world. But there are things of far greater importance, namely, the things of the Spirit, the things which concern the soul and eternity, those things which determine our fate in yonder world! How do we act concerning them? Alas, most people do just the opposite, they act foolishly.

In our text someone informs us, and all who hear His word, of His intention of coming unto them. And this "someone" is none else than the King of Kings, and Lord of Lords, the God of Heaven Himself. He wants to come to YOU. Are you willing to receive Him?

And He wants to help you. He says "Fear not, for I will help thee." (Is. 41,13). We are poor toward God, poor in good works, weak in faith. Our King wants to be our riches and our strength.

Our nature is sick and diseased, filled with sin and wickedness, causing us much trouble and agony. Our King says: "I am the Lord that healeth thee." (Ex. 15,26). And He can heal us not only from bodily ills, but especially also from the sickness of the soul—sin.

We are, according to God's righteousness, condemned to death and to damnation, for: "The soul that sinneth, it shall die" (Ezek. 18,20) and "cursed be he that confirmeth not all the words of this law to do them." (Deut. 27,26. He who would come to us and dwell in our hearts, has suffered all that we deserved for us. "He died for all" (1. Cor. 5,15). Christ hath redeemed us from the curse of the law, being made a curse for us."

We owe God and our neighbor a debt of love; we have not paid it; we will not pay it; we cannot pay it in full, for to do that we must love God more than all things, and our neighbor as ourselves. Our King and Savior paid this debt for us. He says: "I love the Father" (John 14,31), and St. Paul says of Him: "Even as Christ also hath loved us, and hath given Himself for us an offering." (Eph. 5,2)

Now, this King, and Lord, who is just, and has salvation, announces unto us in our text that he will come to us. He wants to bring us that which we need most—forgiveness of sins, life and salvation. He comes to us as often as we hear or read His word and use His sacraments. Oh, ought not we all welcome Him to our hearts as did the citizens of Jerusalem to their city, saying: "Hosanna to the Son of David?" Every true Christian does.

But alas; most people will not have Him come unto them. They refuse to hear or read His word. Or if they read or hear it, they will not take it to heart, believe it and do it. What wickedness! What folly!

Dear reader, are you one of these? If so, then listen: Right now, during this Advent season, right now as you read these words, the King, YOUR King, is making an earnest appeal to enter your heart, as your savior. Now He comes in grace to help you, to bring you to salvation. If you refuse Him entry, the next time He comes to you it may be in righteousness as your Judge! Then it will be too late!

You ask: "What, then, must I do to receive Him?" First of all, simply believe that He suffered and died to take away YOUR sins. Then read and hear and study His word — the Bible. There you will find all the instruction necessary.

Amen!

Good News for Creditors

The following story appeared in a recent bulleting of the Rochester Credit Men's Association:

"The doctor coughed gravely. 'I am sorry to tell you,' he said, looking down at the man in the bed, 'that there is no doubt you are suffering from smallpox.'

"The patient turned on his pillow and looked up at his wife.

"Julia,' he said in a faint voice, 'if any of my creditors call, tell them that at last I am in a position to give them something.'"

AUCTION SALE

At the Anstad Schoolhouse.

School District No. 110 of Marshall County, three miles north and two miles east of Goodridge, otherwise known as the old Anstad School, having consolidated with the Goodridge Consolidated Schools, will sell at Public Auction the following described property on

WEDNESDAY, DEC. 20TH

at 1 o'clock P. M.

School building, about 10 double seats, heating stove, bookcase, water cooler, some wood, and other articles too numerous to mention.

Order of School Board.

A resident of Brooklyn has burst forth in a poetic tribute to farming as the only healthful, moral, interesting and inciting life. He observes: "The sun which ripens every vegetable and fruit which is grown, filling those with succulent nutriment, also paints with beauty the violet and the rose." He is especially certain that farming gives most mental poise and bodily peace. But the actual farmer would like to know why it is that he can get about as much profit from the violet and the rose in these days, as he can from the "succulent nutriment" which he raises for the world.

DRAIN GE HEARING BRINGS OU HUNDREDS OF PROTESTS AGAINST RED RIVER PROJECT

Hearing Ends Suddenly on Friday Nighti Decision in a Month; Many Farmers From Here Testify at Important Hearing.

The hearing on the Red Lake drainage project came to a sudden end at Thief River Falls Friday evening when the testimony of a number of witnesses was agreed to by stipulation. A score of witnesses had been called when the attorney for the opponents of the project, W. J. Brown, well-known Thief River Falls attorney, asked that the names of a large number of witnesses be filed in court with the stipulation that their testimony would in substance be similar to that of those who had been called to the stand. This was agreed to by the petitioners and the hearing was thus materially shortened.

A number of farmers residing near Goodridge were among the witnesses who gave testimony, among them being: A. B. Mandt, Peter C. Wold, Nils F. Jorgenson, S. Kvale, W. H. Wilde, H. I. Finstad, Frank Race, J. A. McEnelly, Hans C. Solberg, C. O. Elg, J. J. Vorachek, John Gunderson, C. Hjelle, Alfred Hammerstein and C. J. Jacobson.

Engineer Meyer was on the stand a greater part of the two days and the tilts between this witness and Attorney Brown furnished the only diversion of the hearing. At one juncture directed to the witness with reference to the payments of the power companies being deferred into the "dim and distant future," brought a round of applause from the witnesses and spectators. The court rapped loudly for order.

The development of interest to the opponents was the direct testimony of Engineer Meyer to the effect that rentals from th increased flow of water in the river probably could not be expected to bring in more than $5,000 to $15,000 per annum, which is the amount estimated by the War Department as annual upkeep.

Indians from the Red Lake Reservation opposed the project as bitterly as did the settlers, asserting that their lands were being unfairly assessed.

Briefs will be filed by the attorneys in the case this week and it is expected that the decision will be handed down some time in January by Judges Stanton and Grindeland.

W. J. Brown of Thief River Falls and County Attorney Qualeh andled the case for the opponents, while Attorneys Boughton of Red Lake Falls and McDonald of Bemidji appeared for the petitioners.

LISTEN TO THIS!

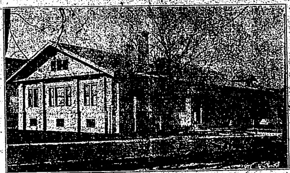
Snyder's Jazz Six, the peppiest and best, the craziest and sanest lot of music hashers that ever invaded the Palace of King Bolo of Afkar, is to appear at the Goodridge hall tonight and promise local terpsichorean steppers something to tuck away as a reminder of Happy Days that used to be. 'Tis said a special train over the electric line will bring 25 couples over to join with Goodridge young folks—and old—in a merry-making affair that may threaten the lives of Those Who Dwell in Peace and Quiet.

We're glad The Banner office is on upper Main Street today 'cause we don't want the shingles ripped off our roof by this lot of music cock-tail mixers from over County Seat Way!

If Snyder thinks we're afraid of the Noise of Horns and Saxaphones, Traps and Piano Maniacs, let him bring on Those Playing Devils we've heard so much about!

G. C. Gulrud was a Thief River Falls visitor Monday.

NEW SONS OF NORWAY HOME RECENTLY DEDICATED BY SNORRE LODGE AT T. R. F.



FORMER GOODRIDGE WOMAN MARRIES NEW YORK MAN

The many friends and acquaintances of Miss Ruth Cousins, formerly of Goodridge, will be pleasantly surprised to learn of her marriage November 27th to J. H. Dean of Clayton, N. Y.

Mrs. Dean is a sister of Mrs. V. C. McLeod of this place and has spent a number of years in Goodridge.

The newlyweds left December 15th for Florida where they will spend the winter, after which they will pay this village a visit before returning to a definite home-making in Clayton.

MAIL TRUCK CONTINUES TO TRAVEL DESPITE THE SNOW

Despite the severe weather and difficult travel, the mail truck operating between Goodridge and Grygla, driven by John Sund, continues to give the public the same good service as in the summer time. Mr. Sund is entitled to much commendation for his work, as there are few villages who are fortunate enough to have such good service.

ARNTZ TO ST. PAUL.

Albert Arntz, one of eastern Pennington county's successful farmers, left Friday evening for St. Paul, where he will spend a few days visiting. A brother, who makes his home in Canada, and who Mr. Arntz has not seen for a number of years, will be in St. Paul this week.

NAZARETH EVANGELICAL LUCHERAN CHURCH NEWS

The yearly meeting of the Norwegian Lutheran church was held last Tuesday afternoon. The reports indicate a successful year in all branches of the work. The following are now in office: Rev. V. O. Aaker, president; H. Halvorson, secretary; Melvin Stephenson, treasurer; George Wold, A. B. Mandt and G. Gunderson, trustees.

The Ladies' Aid has had a very successful year, both socially and financially, which has aided in the advancement of the church work. The debt on the church property has been diminished considerably.

The Sunday school has been and will be superintended by O. Ronken and has reached the enrollment of 60 pupils with the teaching staff of six teachers. The debt of over $60 has been paid and a few dollars left in the treasury.

The Luther League has grown in membership and has rendered good programs, which have attracted much interest.

Mrs. P. O. Tvedt was a visitor at Thief River Falls Saturday between trains.

BAD BLIZZARD AND SNOW STORM VISITS GOODRIDGE

Goodridge was visited Monday by the worst blizzard, assisted by a snow storm, that it has witnessed since the day of its origin. The falling snow, driven by a strong gale, made it at times impossible for one to see further than a few rods ahead, and made it a gambling proposition for anyone to attempt journeying.

As a result of the unusual storm, the large drifts of snow already accumulated became subject to a very visible augmentation. The storm had a telling effect on the roads and telephone lines throughout the country.

GRAVELLING COMPLETED ALONG NEW STATE ROAD

The gravelling of the strip of state road from Goodridge to the Marshall county line, which has been under conformation the past few weeks, was completed Wednesday.

The gravel was taken from a pit located southeast of Goodridge and was hauled by the yard to the state road. The work was rapidly completed, as a great many teams reported for work, there being at one time more than 60 employed.

SCHOOL NOTES

The prize winners in the spelldown given in the high school room Wednesday before Thanksgiving were Edith Schie and Alfred Anderson.

* * *

The Senior class rings arrived Tuesday. They are plain and neat looking rings. They bear the Goodridge high school monogram and class year '23.

* * *

The American history class have just completed their book for the first half semester and are going to take a short study of the World War preparatory to the examinations.

* * *

Miss Ille, the new teacher in the eighth grade room, arrived December 4 to take up the duties of Miss Nelson, who recently resigned.

* * *

Everybody is looking forward to the Christmas vacation, which starts December 23.

* * *

No Christmas program is to be given in the schoolhouse this year, so each separate room is planning an entertainment of their own.

* * *

The cooking class made their first attempt at making bread Tuesday.

O. N. Urdahl made a trip to Thief River Falls Thursday via the truck route.

Bert Tanem was a business visitor at the county seat Friday.

Polk County Pioneer Dies of Heart Failure

Hans Larson, Old Timer, Found Dead Last Thursday Morning North of Crookston in Automobile.

Hans Larson, one of the pioneer residents of Crookston and one of the oldest settlers of the Red River valley, was found dead at about nine o'clock Thursday morning in the rear seat of his Ford sedan car, in which he was making the trip from Angus to Crookston. Death was due to a sudden heart attack.

His body was discovered Thursday morning by a passerby, who reported the matter to County Coroner Dr. H. E. Nelson and other county officials, who immediately made the trip to the scene, about two miles north of that city on the King of Trails highway. The face, hands and legs of the man's body were frozen stiff from the exposure during the night. Death was believed to have occurred between 8 and 9 o'clock Wednesday night.

Mr. Larson left Crookston Wednesday for Angus, where he secured his car and started bak to Crookston early that evening. At a point about two miles north of Crookston it is thought that he may have become slightly ill. From tracks in the snw around the car, it is believed that Mr. Larson got out of the front seat and walked around the car. Later it is believed he got into the rear seat to rest while in the pains of the attack. County Coroner Nelson stated that death came very suddenly.

The deceased was one of the pioneers of this vicinity and was well known throughtout the northwest part of the state. He came to Polk county in the early eighties and had lived there ever since excepting for the past few months, which time he has mostly spent at his new home near Faunce, in the new county of the Lake of the Woods. Mr. Larson had been appointed to the county board of commissioners of the new county.

Besides his wife and two sons and two daughters, a number of brothers are left to mourn his death.

$3,500.00 TO START WITH.

Snyder believes in advertising! He paid us precisely $3,500.00 for a half page ad (Saturday Evening Post line rates) to advertise the mask ball and dance at the Goodridge hall. He's got to do some business to take care of his overhead. We can assure him The Banner is without question the best advertising mediu min this man's town.

FARM WOMEN ASKED TO BUREAU MEETING

Annual Convention of State Federation to Be Held in St. Paul on January 1, 2, 3 and 4.

Every farm woman in Minnesota is urged to attend the annual convention of the Minnesota Farm Bureau Federation, which will be held in St. Paul Jan. 2, 3 and 4. "Problems of the farm home," says J. F. Reed, president, "are going to be uppermost in the minds of the delegates and we want every farm housewife, who possibly can, to attend."

A special rate of fare and a third for the round trip has been arranged on all roads.

The opening program will be held at University Farm, in co-operation with those in charge of Farmers' and Home-Makers' week. Speakers will be J. W. Coverdale, national secretary, Mrs. Vera Schuttler, of Missouri, nationally known woman leader in Farm Bureau work, and in all probability, Henry Wallace, secretary of agriculture. Mr. Wallace will attend if he can arrange other engagements so as to permit the trip West.

The second day will be given over to reports of the various Farm Bureau committees, department heads and persons directing the grain, livestock, wool and dairy products terminal marketing agencies with which the Bureau is co-operating.

The Farm Bureau's Agricultural program for Minnesota in 1923 will be up for adoption.

The closing day will be devoted to the annual business session and election of officers for the coming year.

AN OVERSIGHT.

Mildred Jahr, teacher at the East Esplee school last week sent in an announcement to The Banner which was intended for publication last week, but because of too many pockets, the matter was overlooked. If it isn't too late The Banner announces this week that a program and ragball social will be given at the East Esplee school Saturday, December 16, at 7:30 P. M. Come and see "The Kansas Immigrants" or the "Great Exodus." Let's go! A good time guaranteed, says Miss Jahr, the teacher.

John Nelson Jr. of Highlanding returned Friday evening from a short stay at Thief River Falls. Mr. Nelson has until recently been employed at the Argyle creamery.

NEWS REVIEW OF CURRENT EVENTS

Allies Propose Plan for the Freedom and Control of the Dardanelles.

POSITION OF U. S. STATED

France Perfects Program for Occupation of the Ruhr—Irish Free State Formally Established—Daugherty and Mellon Hit Back at Critics.

By EDWARD W. PICKARD

> CHARGES against Attorney General Daugherty have been filed with the house committee on judiciary, and his impeachment is asked. What is your opinion of the attorney general and his official acts?

UNABLE to reach an agreement just yet concerning the Mosul oil fields and the Asiatic frontiers of Turkey, the delegates to the Lausanne conference devoted most of their time last week to the problem of the control of the Dardanelles. Here the Russians came in, and they did it in a way that almost disrupted the conference. M. Tchitcherin, head of the soviet delegation, went so far in apparently backing up the Turkish claims for sole control of the straits that even Ismet Pasha could not agree with him, and Lord Curzon was bitterly resentful. The Russians demanded the restoration of the 1914 regime giving Turkey full sovereignty over the straits with right to fortify them and the convention of prohibiting the passage of warships at any time. This plan would make of the Black sea a Russian lake, since it included the provision that Turkey must permit the passage of Russian warships except under exceptional circumstances.

For several days neither the allies nor the Turks could be persuaded to offer a definite plan, each side insisting the other should speak first. Ismet took what seemed like the consistent position that, as the straits are really Turkish territory, the allies ought to present their plan first. At last the British, French and Italians reached an agreement among themselves and submitted their proposals. Briefly, these provide for free passage through the straits for both merchant shipping and warships, both in peace and in war, excepting only when Turkey is a belligerent. They provide also for a demilitarization of the straits, comprising the Dardanelles and Gallipoli, of certain islands in the Aegean sea, of all islands in the Sea of Marmora and of both sides of the Bosporus with the exception of Constantinople, in which the Turks are to be allowed to hold 10,000 troops. No fortifications will be permitted in the areas affected and no battery emplacements allowed.

It is stipulated that the total tonnage of war vessels of any one foreign power in the Black sea must not exceed the naval strength of the most powerful Black sea power, and if the Black sea powers should carry out naval disarmament plans the allies would have the right to keep there three warships apiece. It is provided that control of the straits shall be vested in a military and naval commission representing the powers interested and invited, including the United States.

Ambassador Child now came forward with a detailed statement of the views of the United States government. He made it plain that America's chief purpose is to protect American citizens and insisted that American warships must have the right to follow American merchantmen and citizens anywhere. On the matter of keeping the straits open Child's statement thus supported the position of the allies, but he thought the freedom of those waters should rest upon agreement rather than force.

Turkey's plan was presented Friday. It did not differ radically from that of the allies, except that it provided for the passage through the straits of warships singly at intervals of not less than one month.

Rafet Pasha, military governor of Constantinople, had some more trouble with the British last week. His police confiscated the passports of a hundred Armenians as they were about to board a ship, on the ground that they were Turkish citizens and must not leave the country without Turkish passports. British troops thereupon took possession of the custom house, posted machine guns and protected the embarkation of the refugees. Rafet has refused to permit Greek vessels to take any more refugees from Asia Minor, and gave notice that within a few days all Christians remaining in Black sea coastal towns would be removed to the interior. Rafet insists the allies are not in occupation of Constantinople and have no right to interfere between him and native Christians.

COUNTING on the probable support of Belgium and the possible support of Great Britain, France has formulated a definite plan for obtaining the payment of reparations from Germany, and Premier Poincare was to lay it before the supreme council of the allies Saturday and Sunday in London. This plan, as obtained by a Paris correspondent, is:

First—Occupation of the entire Ruhr district by French troops as a guarantee. If necessary, eventually, the actual exploitation of coal mines by the French ministry of public works.

Second—Strict allied control of revenues and expenditures of the reichstag and all German states.

Third—Allied control of the reichsbank and absolute stoppage of the manufacture of German paper money.

Fourth—Collection of import and export duties under allied supervision to be devoted to reparations.

Fifth—Issuance of external loans as soon as the German financial situation is improved.

France's ministers of finance and foreign affairs and her reparations delegates collaborated in this.

Britain's objection to the plan as a whole is based on the facts that she is now selling great quantities of coal to France which would not be needed if the Ruhr is seized, and that it would demoralize Germany at a time when England is trying to sell that country more goods and provide work for some 1,500,000 unemployed men.

Chancellor Cuno, meanwhile, has devised a new scheme which he hopes will serve to prevent radical action by the French. He proposes an internal gold loan of between 20,000,000,000 and 30,000,000,000 gold marks to be used for stabilization and cash reparations payments, and he was expected to tell the allies that represented Germany's total capacity to pay.

Some days ago the allies notified Germany it must apologize and pay an indemnity for attacks on allied officers in two Bavarian towns. It was understood the Berlin government would remain passive in this matter.

QUIETLY and with almost entire lack of ceremony, the Irish Free State came into being on December 6—a historic date for the Emerald Isle. In the presence of President Cosgrave and his cabinet, Timothy Healy took the oath of governor general in his home in a suburb of Dublin. Then the Dail Eireann met and all its members, except two who remained away, swore allegiance to the king. President Cosgrave named seven of his ministry as members of the executive council and delivered an address in which he praised the British for their good faith in carrying out the terms of the treaty and argued for the inclusion of Ulster in the Free State. About the same time King George was holding a privy council in Buckingham palace and affixing his signature to the proclamation establishing the Irish Free State. It is said in London the king may go to Dublin to open the new parliament if the Irish so desire.

PRESIDENT HARDING is far from satisfied with the ship subsidy bill as it passed the house. It contains an amendment, proposed by Representative Madden, requiring annual appropriations to be made for the payment of subsidies. In a letter to Chairman Jones of the senate commerce committee the President said this provision would jeopardize the entire program for aiding the merchant marine because banking interests would not finance shipping companies under such conditions. He declared he would rather have the measure fail entirely than for congress to pass a bill "which will bring us to extreme disappointment because we have entered upon a program in a half-hearted and rather indifferent way."

Some members of the committee supported the Madden amendment, so a compromise was suggested eliminating the annual appropriation requirement but providing that no increases in the specified rate of compensation shall be made without the authorization of congress.

ATTORNEY GENERAL DAUGHERTY is getting "fed up" with the continual attacks made on him and his official acts and in his answer to the fourteen specifications filed with the house committee judiciary committee in support of the resolution proposing his impeachment he uses vigorous language. He denies seriatim every one of the charges of failure or refusal to enforce anti-trust and other laws, of unwarranted exercise of clemency in the cases of influential offenders, of neglect to prosecute war profiteers and of unconstitutional and unjust procedure in the railroad injunction case.

Mr. Daugherty says in his reply: "The attorney general cannot escape the conclusion that the sole object and purpose of this proceeding is not to remove him from office, but is in the nature of an attempt . . . to compel the publication and the disclosure in advance of the evidence upon which the government relies, and must rely, in the investigation and prosecution of important cases."

THE administration is out in the open to fight several items in the program adopted by the recent caucus of so-called progressives of the senate and house. For instance, President Harding has let it be known that he is opposed to the suggested constitutional amendment providing for the direct election of president and vice president and for convening a new congress immediately after election. He thinks the Constitution should not be continually tampered with.

Secretary of the Treasury Mellon was roused by the charges, made by Governor Blaine of Wisconsin at the progressive meeting, that he was protecting rich tax dodgers and permitting huge corporation surpluses to escape taxation. Denouncing this as "an appeal to class prejudice in a selfish effort to obtain some political capital," the secretary declared that income taxes are being assessed to the full extent permitted by law, and that if the government is to go further in that line, congress must enact new legislation.

IN HIS annual report Secretary Mellon recommends, among other changes:

Reduction in maximum surtax rates, which now reach 50 per cent, to not more than 25 per cent.

Placing of a limitation upon the amount of capital losses which may be applied as a deduction from net income in computing taxes.

Limitation of cases in which securities may be exchanged for other securities without the realization of taxable income to those cases where the exchange has a connection with the consolidation or merger of two or more corporations.

As for general conditions, the secretary says the volume of business has been mounting to higher levels, labor throughout the country is again fully employed, and the severe depression in agriculture has been relieved. Banking conditions generally are sound, he says, money rates are reasonable, and there is sufficient credit available to meet all legitimate demands.

COAL operators from fourteen states and representatives of the mine workers last week held their second futile conference in Chicago and adjourned to January 3. They were quite unable to come to an agreement on a wage scale and working conditions and many of them admitted that only government intervention will prevent another strike in the spring.

REPARATIONS PARLEY ENDS

Another Meeting is Scheduled for January 2nd, to be Held in Paris.

DIPLOMATS WORRIED

No Pact is Signed—England Believes Occupation of Ruhr Valley Would Precipitate Another European War.

London—The London conference on German reparations, generally described as the critical conference, ended in agreement only on another conference. The next link in the long chain of the allies' struggles to get together will be forged at Paris on January 2. There will be a fortnight then left for the allies to agree upon some program.

The moratorium granted the Germans expires January 15, and the next payment on account of reparations, which Germany protests she is unable to meet, will be due on that date.

Britain Opposes French Demands.

Another futile round table session of the diplomats would seem to mean only fulfillment of the French plan for independent action, which British opinion believes would spell calamity for the tottering edifice of European prosperity and sow the seeds for a future great war.

The agreement to disagree—only temporarily, the diplomats assert—was consummated in three days, embracing four meetings of the allied premiers. The rock on which harmony foundered was the British refusal formally to countenance the French project for partial occupation of the Ruhr and important German industries. The British cabinet met and registered its refusal to co-operate with France in such measures.

Premier Mussolini's proposals for a settlement were treated courteously, as was due the head of a powerful nation, but were not taken seriously as a panacea for the German sick man of Europe. The German note was rejected unanimously with the general comment that it meant merely sparring to gain time.

LAW BREAKERS HIT TWICE

Court Holds Both Federal and State Authorities Can Prosecute.

Washington—Two cases considered by the government of major importance in the enforcement of national prohibition have been decided by the supreme court. In one of them, coming from the State of Washington, the government scored a sweeping victory, the supreme court holding that both the federal and state government can prosecute and punish the same unlawful act in the manufacture, possession, transportation or sale of intoxicating liquors.

The other case coming from California the government lost in its contention that in the enforcement of national prohibition an executive officer can impose and collect as taxes the assessment and penalties imposed by those sections of the revised statutes, whic hremain unrepealed by the Volstead act and which became law while the manufacture and sale of intoxicating liquor was not prohibited.

Both Can Punish Same Offense.

The United States district court for western Washington dismissed a federal indictment charging manufacturing, transporting and possession of intoxicating liquors on the ground that the defendants had been tried and convicted in the state courts for the same offense. In reversing this action the supreme court held that "in the absence of special provision by congress, conviction and punishment in a state court under a state law for making, transporting and selling intoxicating liquors is not a bar to a prosecution in a court of the United States under the federal law for the same acts."

DEMS OPPOSE SUBSIDY BILL

Washington — The administration shipping bill was taken up by the senate and was subjected immediately to a baptism of fire at the hands of Democratic opponents.

Senator Jones proposed first that the senate proceed to immediate consideration of the ship bill but objection from the Democratic side blocked this until after the regular calendar had been disposed of. The commerce committee chairman next suggested that the senate meet an hour earlier, but withdrew the proposal in the face of objections.

Clara Phillips Thought Captured.

Casper, Wyo.—In the arrest of a woman who got off the Burlington passenger train from Billings, Mont., Capt. Clayton of the police department believes he has captured Mrs. Clara Philipis, convicted of the murder of Mrs. Alberta Meadows at Los Angeles. The woman, accompanied by a man, got off the train here and immediately entered a closed taxicab. The motorcycle officers followed her and made the arrest within two blocks. The police announced the description of the woman fits Mrs. Phillips closely.

HOGS DOWN TEN CENTS

Stock Prices Steady While Wheat Shows Small Recovery.

U. S. Bureau of Markets, Washington, D. C., for week ended Dec. 8, 1922.

LIVESTOCK AND MEATS: Chicago hog prices declined 10-15c for the week. Beef steers were 15-25c higher; butcher heifers 25-40c higher, while butcher cows ranged from 35c lower to 15c higher; feeder steers 25c net higher with veal calves steady to 50c up. Fat lambs and fat ewes steady with a week ago, feeding lambs 25-50c higher with yearlings steady to 25c up. On December 8th hogs strong to 10c higher than Thursday's average. Beef steers and butcher cows and heifers active, strong to 15c higher; veal calves steady to 25c lower, stockers and feeders about steady. Fat lambs strong to 15c higher, sheep steady. December 8th Chicago prices: Hogs, top, $8.40, bulk of sales $8-8.35; medium and good beef steers $7.40-12; butcher cows and heifers $3.25-11; feeder steers $5.50-8; light and medium weight veal calves $8.50-10; fat lambs $13.25-15.50; feeding lambs $12.50-14.75; yearlings $9.50-13.25; fat ewes $4.75-7.75. Stocker and feeder shipments from 12 important markets during the week ending December 1st were: Cattle and calves 102,738; hogs 18,891; sheep 90,772. In eastern wholesale fresh meat markets beef, lamb and better grade of mutton were unchanged from prices of a week ago; veal was $1 to $2 higher with cheaper cuts of mutton weak to $2 lower and light pork loins $1 and heavy loins $1 to $2 down for the week. Dec. 8th prices good grade meats: eBef $14-17; veal $14-19; lamb $23-27; mutton $11-17; light pork loins $16-19; heavy loins $12-16.

GRAIN: Grain prices declined during the first half of the week but then worked higher. Wheat showing a fractional net advance, and corn prices a slight decline. Declines were due to selling influenced by lower Liverpool market, weakness in stock market and absence of buying support. Advances resulted from oversold condition and bullish crop news from Argentina. Prices unsettled on the 8th but closed firm, influenced largely by expectancy that President Harding's message to congress would be bullish regarding agriculture. Closing prices in Chicago cash market: No. 2 red winter wheat $1.31; No. 2 hard winter wheat $1.22; No. 2 mixed corn 72c; No. 2 yellow corn 72c; No. 3 white oats 44c. Average farm prices: No. 2 mixed corn in central Iowa 60c; No. 1 Dark Northern wheat in central North Dakota $1; No. 2 hard winter wheat in central Kansas $1. Closing future prices: Chicago May wheat $1.17¼; Chicago May corn 70c; Minneapolis May wheat $1.16⅞; Kansas City May wheat $1.08¼; Winnipeg May wheat $1.08.

DAIRY PRODUCTS: Butter markets steady to firm although markets are out of line with each other. Demand very good despite high prices. Possibility of foreign imports regarded a disturbing factor. Some Danish butter has arrived; other shipments reported on way. Domestic productior holding steay for season. Closing prices 92 score butter: New York 54½c; Chicago 55½c. Cheese markets steady to firm but very quiet. Trading has been somewhat slow since further slight advances on Wisconsin cheese Boards Monday. Distributors appear confident but buyers are on market only for immediate needs. Cheese prices at Wisconsin primary markets December 7th: Twins 26½; Daisies 27¼; Longhorns 27¼; Square Prints and Young Americas 27½.

Minneapolis Closing Cash Prices.

Spring wheat—No. 1 dark northern, 1.25@1.31; No. 1 northern, 1.16@1.23; No. 1 dark hard, 1.19@1.24; No. 1 hard, 1.14@1.15; No. 1 amber durum, 1.06⅛ 1.09; No. 1 durum, 91c@97c. Corn No. 2 yellow, 67c@68c. Oats No. 2 white, 37c@40c. Barley, choice to fancy, 60c @63c. Rye No. 2, 78c. Flaxseed No. 1, 2.47@2.48.

South St. Paul Live Stock.

So. St. Paul—Steers, $4.50@$6.25; veal calves, $2.50@7.50; cows and heifers, $3.25@$7.85; hogs, $7.50@ $7.85; sheep and lambs, $9.50@$14.25.

BUTTER—Creameries, extras, 52c; firsts, 48c; seconds, 43c; packing stock, fresh sweet, 26c; stale goods, 5c; grease, 11c; storage, extras, 45c.

EGGS—Country receipts, rots out, per crate, $12.30; No. 1 candled, good cases, free from rots, small dirties and checks out, per dozen, 44c; seconds, small dirty and held stock, rots and leakers out, per doz., 22c; checks, rots and leakers out, per doz., 21c. Quotations on eggs include cases; fancy storage eggs, 30c.

Four Arrested in $3,000 Mail Theft.

Kansas City—Four men were arrested in connection with the robbing of a mail truck from the sub-station of the postoffice at the National Cloak and Suit company.

Paris Starts New Fad.

Paris—The bandanna kerchief movement is a new fad for the winter.

Iowa Wins Canning Demonstration.

Cihcago—Iowa captured the most coveted prize of all the junior club competitions of the year, when the judges at the International Live Stock exposition here gave their decision in the canning demonstration.

All Speeders Jailed in Indianapolis.

Indianapolis—A sanity test will be given all persons arrested for speeding, Mayor Samuel Lewis Shank announced. The mayor made this announcement after Judge Delbert O. Leith gave a number light fines

Timely Comments on Agricultural Topics for Our Readers

FEEDING AND FITTING NORTH DAKOTA HORSES FOR MARKET

On the farms of North Dakota it is quite necessary to use home grown feeds to a great extent for all livestock.

With the advent of alfalfa and sweet clover, the livestock industry of North Dakota promises to advance at a much greater pace than it has previously. Considerable of these legume feeds may be used to advantage, both as pasture and hay, for the growing of horses.

The following suggestions along the line of feeding and fitting North Dakota horses for market apply principally to geldings and to mares, not in foal, all between the ages of six and ten or twelve years. It is assumed also that good farm practice has been used and that the horses are in at least fair condition at the time the fall work is finished on the farm. They are then ready to be prepared for market.

Shelter and Exercise.

In most cases, the horses will need to be tied in barns and led out to water three times daily before feeding, and there will be but a few horses fed on each farm. In these cases, the horses should have daily exercise in a small yard, from one to two hours, depending upon the comfort and wishes of the horse. In bad weather, he should be out but a short time.

In cases where as many as a carload of horses are being fitted at one place, it is practical to keep them in a small, clean, dry yard. This yard should join a shed, barn, or other protected quarters, in which the horses may stay nights and when the weather is bad. Salt should be available at all times in a clean, dry, protected place, up off the ground. The barns and sheds should be well bedded with good clean dry straw, and the hay should be fed from good racks or mangers so as to eliminate as much waste as possible.

Plenty of clean drinking water must be provided.

The horse will fatten easier when given but a small amount of exercise but we do not want to injure his health or impair his usefulness by neglecting his daily exercise.

Keep the horse stables well ventilate, but avoid drafts.

Teeth.

Be sure that the horse's teeth are in good condition. It is best to have a competent veterinarian examine the horse's teeth and remove any sharp points and irregularities, so that the horse will have no trouble in chewing his food.

Feet.

The horse's hoofs should be properly trimmed, so as to allow him to travel with greater ease. With the hoofs well trimmed he will also present a much better appearance.

Currying.

Besides having the horse free from lice, mange, etc., he should be curried and brushed daily, so as to make his hair lay down well and have a glossy appearance.

Feeding.

Like fattening other farm animals, it is best to bring the horse up to full feed gradually; to feed him regularly; have a variety of feed, and to use some succulent feed such as roots. As we find it quite necessary to use the feeds we have at hand on the farms, let us produce feeds of high quality. Mouldy grain, musty hay, and spoiled silage are not as nutritious as good feed, they are, on the other hand, harmful and dangerous, both in their immediate and permanent effects upon the horse.

See that there are no holes in the feed boxes and that they are kept sanitary. If any feed is left, clean it out and let the box dry.

The following paragraph is quoted from "Feeds and Feeding" by Henry & Morrison:

"At the Illinois station, a ration of 8.6 pounds corn, 8.6 pounds oats 2.4 pounds wheat bran, 0.4 pounds oil meal and 13.7 pounds clover hay gave excellent results in fattening horses. A most successful ration for 1,450 pound horses at the Pennsylvania station was 12.3 pounds shelled corn, 1.4 pounds cottonseed meal, 16.9 pounds corn silage and 10.5 pounds mixed hay."

In feeding horses, a general rule as to the amount of feed to use daily for horses of different weights, either idle or doing various kinds of work, may be given as follows: Feed from 2 to 2½ pounds (grain and roughage) per 100 pounds live weight.

As the horse fattens, he will gradually consume less roughage and more grain; for example, a 1,400 pound horse will eat perhaps as high as 20 pounds roughage daily, and from 10 to 15 pounds grain at the beginning of the feeding period. When this same horse has been fed for 50 to 80 days, he may be eating as little as 10 to 12 pounds roughage and as high as 20 to 25 pounds of grain daily.

The principal part of the roughage fed to North Dakota horses should be alfalfa, sweet clover, clover or mixed hay. Prairie hay, corn fodder, stover, sugar cane, straw, and other roughages may also be used.

The chief grain feeds may be oats, corn and barley; feeding about the same amount of oats as of corn or barley, when using only corn or barley with the oats. When using both corn and barley in the ration with oats, use about as much oats by weight, as of the other two feeds together.

In addition to the above, about 2 to 2½ pounds wheat bran and 0.4 pounds of oil meal daily will make a good horse ration. A few roots, such as carrots and rutabagas add to the succulence of any ration.

Oats may be fed whole or ground. Corn may be fed on the ear, shelled, or ground. Barley should be ground. If screenings are used, they should always be ground. Ground barley is a good substitute for corn. One will have in mind that oats, clover and alfalfa hay tend to build up the muscles and general tissues of the body while corn, barley, timothy and prairie hay are more fattening.

Rather than outlining more specifically, definite daily rations for fattening horses for market on North Dakota farms, it would seem best to leave the choice of feeds with the above suggestions, to the man on the farm who is supplying the feed, and who will choose the feed as far as practicable from what he has at hand on the farm.

Fat Horses.

Have the horses fat before putting them on the market. Fat horses often sell fully 40 per cent higher than thin horses of the same quality.

Full Manes and Foretops.

The manes and foretops of the horses should be left full; the same applies in a general way to the hair of the tail.

Horses Well Broke.

It pays the seller well to have the horses well broke both double and single, as the buyer usually wishes to see them driven either in a team or singly.

Break the horses to back and to turn around freely in either direction. It might help in certain cases to break a horse to drive in the center in a three-horse team. In certain other cases it is well to have the horse broke to ride.

If a horse will allow one to handle his feet, lifting and holding each foot up, as in shoeing, it will help in selling him. Any other traits a horse may have which show kindness and intelligence, are usually valuable assets to the seller in the sale ring.

PEMBINA COUNTY BOY CARRIES ON CORN GROWING CONTEST

Victor Sturlaugson, of Svold, N. D., a student in the farm husbandry course at the North Dakota Agricultural college, and a member of the North Dakota Soil and Crop Movement society which was established two years ago, has just reported results of a trial on four kinds of corn grown at Svold, in Pembina county.

Mr. Sturlaugson planted four kinds of corn on May 16 on rather high sandy land. The corn was kept thoroughly clean throughout the summer and grew well, although it suffered from the drought somewhat in the latter part of the season.

Northwestern dent produced the largest amount of fodder, but Ivory King produced the largest amount of corn to the acre. Dakota White Flint matured on September 5 and yielded 39 bushels to the acre. Northwestern Dent matured September 12 and yielded 42 bushels; Ivory King, a soft flour corn, matured September 18 and yielded 48 bushels per acre. Assiniboine matured September 12 and yielded 38 bushels per acre.

These trials were conducted in co-operation with the Department of Agronomy of the North Dakota Agricultural Experiment Station. They have demonstrated that the earlier maturing varieties of corn grown from North Dakota grown and selected seed can be made to produce profitable crops in even some of our northernmost counties. Particular attention is now directed to the fact that Dakota White Flint matured on September 5. The average length of the growing season at Pembina in Pembina county during the period of 1898 to 1919 inclusive was 113.5 days. The Dakota White Flint corn matured in 112 days.

Hogs roughly handled get their revenge after death. Bruises and dislocations of carcasses, it is estimated, reduce the value of 15 per cent of the hogs that come to the Chicago stock yards.

* * *

George Chesbro and sons own seven cows that averaged 5964 pounds of milk and 191 pounds of fat each for the five months from March to June inclusive, with ordinary care and feeding.

* * *

Give 'em air! One authority estimates a thousand pounds of hens require 3401 cubic feet of air a day.

DAIRY HINTS

Reasons for Dairy Silo.

A. C. Baer, head of the dairy department at Oklahoma A. and M. college, gives as reasons for a silo on a dairy farm:

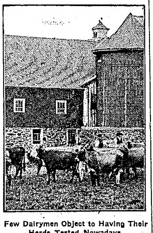
1. More feed can be stored in a given space in form of silage than in form of fodder or hay.
2. A smaller loss of food material when a crop is made into silage.
3. Corn silage is a better feed than corn fodder.
4. An acre of corn or kafir can be placed into a silo at less cost than the same area when husked and shredded.
5. Crops can be put in the silo during weather which could not be utilized for curing fodder or hay.
6. More stock can be kept on a given area of land when silage is the basis of a ration.
7. Less waste in feeding silage than fodder.
8. Silage is very palatable.
9. Silage, like other succulent feeds, has a beneficial effect upon the digestive organs.
10. Silage is the cheapest and best form in which a succulent feed can be provided in the winter.
11. Silage can be used for supplementary pasture more cheaply than can soiling crops, because it requires less labor and cattle like silage better.
12. Converting corn or kafir crops into silage clears the land and leaves it ready for another crop.

MISSOURI LEADS ALL STATES

Some Interesting Facts Reported From Various States on Tuberculosis Eradication.

(Prepared by the United States Department of Agriculture.)

Reports to the United States Department of Agriculture on tuberculosis eradication in the various states contain some interesting facts on the progress of the work. For example, it has been found that Missouri leads in testing on the co-operative plan, with a total of 18,967 herds, containing 197,979 cattle, tested during the last fiscal year.



Few Dairymen Object to Having Their Herds Tested Nowadays.

A federal veterinarian located in Iowa found more reactors during the year than any other co-operative veterinarian. He tested 7,747 cattle, and found 1,068 diseased animals.

The record for the largest number of cattle tested goes to an employee of the state of Missouri, who tested 14,512 cattle in 1,336 herds. Second on this list was a veterinarian hired by Shelby county, Iowa, who tested 722 herds, containing 1,120 animals.

A veterinarian of the bureau of animal industry in eight months and twenty days tested 11,828 cattle in 983 herds. This is a monthly average of 1,364 animals tested. The record is remarkable when it is known that the cost was only 18 cents a head. The cost per head for the animals tested by the entire force in Missouri was 28 cents. Area work has been done as low as 15 cents a head.

MORE PROFIT ON DAIRY FARM

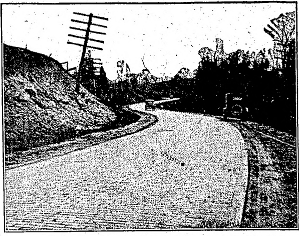
It May Take Few Years to Bring About Desired Results, but It Will Pay Well.

More cows, more cream, more skimmed milk, and more manure would mean more profit in farming on some farms. It may take a few years to raise enough cows, or to get enough, to make the farm richer and more profitable, but it will be worth while. Plans may be made and thus slowly but surely farmers may work toward this plan.

OUTLINE OF BIG ROAD-BUILDING PROGRAM FOR UNITED STATES

(Prepared by the United States Department of Agriculture.)

Fifteen to twenty years of building good roads lie ahead of the United States. Under the program which the country has adopted there will be built, during that time, 180,000 miles of improved highways which will constitute the federal-aid highway system and an equal or greater mileage of state and local roads. When the great job is done, the transportation facilities of the country will far exceed those of any other nation, past or present, in the world. The highways of the ancient Romans, whose fame has come down through the centuries, will pale by comparison.



An Improved Highway in Muskingum County, Ohio.

Details of this vast road-building program were placed before the Highway Education board at its recent conference in Washington by state highway engineers and officials of the bureau of public roads, United States Department of Agriculture, to whom has been entrusted the work of planning and supervising the construction of federal-aid highways. The plan was presented to enable the board to proceed authoritatively with its work of devising aids for schools and colleges to which road-builders of the country are turning for competent highway engineers.

Aggregate Cost $3,000,000,000.

Officials of the bureau place the aggregate cost of the federal-aid program alone at about $3,000,000,000, spread over the twenty-year period. They base this estimate on an average cost of $17,000 per mile. The average cost, in turn, takes into consideration all classes of improved roadways from the cheapest to the most expensive types. Approximately one-third of the proposed system, or 60,000 miles of improved highways, already are either built or building.

The program is a new one. Up to comparatively recent years, road-building in the United States had been conducted without special regard to a national system. Highways had been constructed where needed without considering whether they would link up in the most effective manner with the whole network of roads to be spread over the nation. Engineers had sought more to meet immediate and local demands than the broader requirements of the states and nation.

Roads Fit National System.

The present federal-aid road-building program, officials of the bureau state, will contemplate the construction of only such roads as fit into the national program and contribute to the national system. At the same time the roads will be so selected as to serve the most important local requirements. With marked modifications, the system adopted in building the railways of the country will be borne in mind in the construction of the country's new highways. There will be main lines of highway communication between centers and thousands of miles of feeder roads, reaching back into the more sparsely settled regions and into the rich agricultural sections, to tap areas whose population and products will flow over the new system.

New roads will be planned and built—thousands of miles of them—where they will fit in most advantageously with the entire program. The bureau is continuing its research work into most efficient methods of road building, including the character and wearing power of materials, resisting qualities of varying sub-soils, etc., and has amassed a considerable store of valuable information all of which will be available for the highway engineer of tomorrow, whom the board is seeking to have educated in practical and modern methods.

PLAN TO STORE VEGETABLES

Proper Arrangement Means Saving of Much Money for Farmer—Cleanliness Is First.

Proper storage of vegetables means a saving in expense for farmers and also for town people, but vegetables will not keep through the winter unless some attention is given to the way and place in which they are stored. The common storage is the house cellar.

The first consideration should be cleanliness when storing perishable foods, and all left-overs from the year before, rubbish and old sawdust should be removed and the cellar aired and scrubbed before putting in new vegetables. Roots or tubers are better when kept on slats placed a few inches above the basement floor as this allows the air to circulate freely and prevents early rot.

USEFUL GIFT FOR CHRISTMAS

Kansas Agriculturist Suggests Sled Load of Purebred Pigs, Calves and Chickens.

A Kansas agriculturist has suggested a new kind of Christmas present for farm boys and girls. He thinks it would be a good stunt for Santa Claus to bring a sled load of purebred pigs, calves and chickens and leave them for children along with the dolls, red trains, skates, drums and other toys. Purebred poultry farms are often started from a trio of chickens, and valuable herds of cattle from a calf.

MARKET HOME-GROWN FEEDS

Department of Agriculture Says One of Best Methods Is Through Good Dairy Cows.

One of the best methods of marketing home-grown feeds is through good dairy cows, says the United States Department of Agriculture. It displays in a convincing manner the results that come from giving the feed to different herds.

The results show that:

If you sell feeds to dairy cows you have a constant market.

If you sell feeds to high-producing dairy cows you have a good and constant market.

If you sell feeds to purebred, high-producing dairy cows you have a double market—a market for calves and a market for milk.

That it pays to know whether a cow is a good, poor, or high producer is shown by records of cow-testing associations. In one association the poorest cow produced in a year only enough income over cost of feed to buy a 2-cent stamp. To pay for labor and overhead expenses her owner had only the manure, skim milk, and calf. To get rid of such cows is one of the principal objects of cow-testing associations.

Save Steps on Farm.

Careful arrangement of buildings on the farm means the saving of many steps during the year. If you have to walk 100 yards extra distance in doing chores night and morning, it makes a total of more than 40 miles a year.

Care of Asparagus.

Cut off and destroy the tops of asparagus plants and apply barnyard manure. In this way you'll destroy insects and prepare the field for greater production.

Concrete Troughs Favored.

Concrete troughs, tanks and cisterns do not leak, last indefinitely and are easy to keep clean.

Protection for Farmer.

A permanent silo protects its owner against loss from fire, storm, drouth and crop failure.

POULTRY

REPLACING BUGS AND GREENS

Poultryman Must Provide Spring Substitutes in Order to Secure Eggs During Winter.

(Prepared by the United States Department of Agriculture.)

In the management of hens it has been found that the largest profits are obtained if a good proportion of the eggs are laid during the winter. If two extra eggs a week can be obtained from each hen, a good profit will be made, and if the product is increased by only one egg a week in winter this one egg will pay for all the feed the hen eats, say poultrymen of the United States Department of Agriculture. To get this greater production use young hens of a good laying breed and feed the right sort of ration.

Sprouted Oats Are an Excellent Winter Green Feed.

In the spring the production of eggs on the farm is easy. Chickens are usually on free range where they get all the green and animal feed they need to make a balanced ration. They also get plenty of exercise and fresh air. In order to produce eggs in the winter time, the feeder must provide substitutes for spring conditions. Green cut bone, meat scraps, animal meal, fish meal or tankage furnish good substitutes for the insects and worms. Cabbages, turnips, beets, potatoes and carrots furnish excellent green feed at little cost. Sprouted oats are also good, but require more care in preparation.

Grit is essential to the health of fowls and also to economy in feeding. Grit in a chicken's gizzard is like teeth in a person's mouth—it helps prepare the food for digestion. An open box of this material should be kept in every yard. An abundance of fresh water is also necessary and should be kept in sanitary containers.

WINTER HOUSE FOR POULTRY

Openings on South Side of Building Should Be Covered With Muslin or Burlap.

On stormy nights, windows or openings in the south side of the chicken house should be covered by a drop curtain. The curtain should be made of muslin or burlap. The floor of the house should be covered with a deep litter of straw in which the grain is scattered in order to make the hens work. Keep a mash mixture before the hens at all times. This can be composed of a mixture of bran, shorts, cornmeal, ground oats, etc. To this must be added a good grade of meat meal which should compose 20 per cent of the mixture.

POULTRY NOTES

Always feed good laying rations.

* * *

Stimulants and poultry tonics are of no value if a good laying ration is fed.

* * *

The flock that is healthy needs no doping.

* * *

The more room in the chicken house the easier it is to keep the house clean.

* * *

Treat every fowl on the farm for lice before they are housed for the winter.

* * *

Hens can stand cold weather, but dampness will soon undermine their vigor.

* * *

When feeding sunflower seed to the hens be sure and save a few of the largest and best-filled heads for seed.

* * *

There still are too many roosters in the average farm flock. Why keep up this useless expense?

EDITORIAL

AN UNSUNG HERO.

There are many heroes who don't get a Carnegie medal and whose names do not occur in the list of Pershing's One Hundred. They are plodding along without making much noise or attracting much attention, but they are made of real hero-stuff just the same. Frank Day's Fairmont Sentinel tells of one of them:

"A farmer was in the office Saturday night to pay his subscription. We asked him how he was getting along, and he had a reply that cheered up everybody and showed he was of the stock which has made America great.

"'Well,' he said, 'I have lost two farms and am cleaned out as the result of the boom. But the money I lost was made in a boom, so I suppose it might be worse. One fall after the war I sold my corn for $4,000 and other stuff for a couple of thousand more, and paid $2,500 down on two farms. I can't go through and must lose the money. But corn is getting around 60 now and hogs are fairly good, so I'll start over. I'm not ready to quit yet, if I am getting along in years.'"

That's the stuff. We have all had to take losses, but not many of us have the grit that this man shows.

THE "MATTER WITH" AMERICA.

What's the matter with America these days?

Too many diamonds, not enough alarm clocks.

Too many silk shirts, not enough blue flannel ones.

Too many pointed-toed shoes, and not enough square-toed ones.

Too many serge suits and not enough overalls.

Too much decolette and not enough aprons.

Too many satin-upholstered limousines and not enough cows.

Too many consumers and not enough producers.

Too much oil stock and not enough savings accounts.

Too much envy of the results of hard work and too little desire to emulate it.

Too many desiring short cuts to wealth and too few willing to pay the price.

Too much of the spirit of "get while the getting is good" and not enough old-fashioned Christianity.

Too much discontent that vents itself in mere complaining and too little real effort to remedy conditions.

Too much class consciousness and too little common democracy and love of humanity.—Ex.

SUCCESS ISN'T WORTH IT.

Here is Henry Ford's recipe for success:

"Take your business home with you: eat with it, think of it all the time: dream of it. That is the only way to succeed. The business man who forgets his business when he leaves his office or his plant, lays away his cares and does not think of them till the next day, has lost his prospects of progress and advance. There can be no eight-hour day for the business man or manager. He must be on the job all the time."

Probably that is sound advice—if you value the kind of success Mr. Ford is talking about above everything else in this world and the next.

But to win success in that way, there are countless riches that you must deliberately sacrifice, any one of which is worth more than all the merely material success in the world!

A man who goes after success in business like that has no time for beauty, no time for love, no time for plays or pictures or books, no time to keep his mental and physical machinery right by putting it in accord with the health-giving and life-giving out-of-doors, no time to keep the heart warm and glowing by contact with his human kind, no time to put his soul in tune with Infinite Harmony by contact with the things of the spirit, no time to live with his family and be a human being with them.

A man who follows that recipe for success will become a mere machine for making money. Doubtless he will make lots of it. He may make more money than he can possibly spend. He may rear a great fortune for his neglected children to ruin themselves with. He will get no good out of it himself, for he will have neither time nor the taste for enjoying what it will buy. His riches will be merely the counters that register his success—counters that he will never cash.

But he will miss life. He never will really live. He never will know what happiness is. A beggar with a full stomach, a care-free soul and a love for the rosebud by the wayside, is a prince beside him.

A man who follows Mr. Ford's recipe is almost sure of "success." Only plain stupidity can prevent it, and not even that always defeats such persistence. He will build up a successful business. And he will be its abject, hopeless, joyless slave.

"OVER THE HILL!"

The proposal to the Minnesota Legislature to authorize Sunset Homes for the care of aged citizens of the state should receive the whole-hearted support of everyone.

The problem before Minnesota is shown as a tremendous one by the fact that our population of age 65 or more is well over 100,000, of whom only 5,000 have means of their own upon which to live.

The years of humiliation ahead of them is indicated by the fact that a person 65 years of age can expect to live 11 years—one 70 years old can expect to live nine years. Can you imagine what it means to face such expectancies entirely dependent upon others?

Aside from the alms-houses, the only homes for the aged are operated by fraternal organizations and religious groups. Their capacity is shockingly insufficient. Their waiting-lists are astonishingly long. The number that they cannot help turning away is a disgrace to Minnesota. The few homes of this character are not conveniently distributed—and what a pity it is to take the old clear away from familiar scenes.

Obviously this is a state-wide problem deserving the attention of every citizen and immediate action.

THE KU KLUX KLAN.

Publicity is the true antidote for Ku Kluxism. It is simple, direct, efficient. The rapid spread of the Klan through the South and other parts of the country would have been impossible but for the mask of secrecy. Tear that mask away, turn on the searchlight of publicity, and the Klan with its nocturnal ceremonies, its romantic appeal to the unthinking, soon disintegrates.

Do your Christmas shopping early—but if you don't get around to do it early, do it anyway.

It looks to The Banner that the Red River project proponents would drain the country of more farmers than water.

NOVEMBER APPORTIONMENT

The Tribune herewith presents a list of the November school apportionment as well as a list of the state aid which was apportioned last week. The state aid is distributed on a basis of 74 per cent, the state appropriation being insufficient to pay the total. Several school districts will be seriously embarrassed by this reduction in their available funds.

THE LOST LITTLE BOYS

The little boys of Yesterday
Who walked in Childhood's path with me
Are lost upon some hidden way,
Their eyes I can no longer see;
The mists upon the twilight years
Have blotted out each laughing face
And left me lonely with the tears
That blur the morning's grace.
The little boys of Yesterday—
God, how I miss them every one!
I miss the frolic and the play
The hours of romping in the sun;
But one of all that vanished host
Brings the large sense of loss to me.
I miss them all—but I miss most
The boy I used to be!

Governor-elect Smith of New York says: "My duty to the man and woman who voted against me is as great as it is to you who voted for me." Fine and true, and worthy to be remembered by every man holding public office.

Our favorite pest today is the chap who insists on telling you how many miles the old boat does on a gallon of gas.

What would have been a very sad story to narrate came near taking place at the I. D. Toupin home here early yesterday morning when the family was almost completely overcome by coal gas from a defective hard coal heater just put in operation in their home. A timely comprehension of conditions enabled them to escape the full force of the deadly element but not without a siege of violent vomiting, severe headache and other very unpleasant experiences.—Oklee Herald.

RED CROWN GASOLINE

Your Guarantee of Service

Red Crown Is Fast Gas

It's real sport to speed up when your motor does it with little effort.

Your motor will hum with Red Crown in the tank. When you step on the accelerator you sense an eager responsiveness.

You wonder just how fast your car will go.

"Put your foot to the floorboard" and with Red Crown you will get every ounce of speed your car is capable of developing.

Red Crown is made to fit your car.

JUDGMENT!

By REV. H. LUTZ.

Text: "And these shall go away into everlasting punishment, but the righteous into life eternal." (Matth. 25,46.

The words just quoted are the closing words of the description of the final judgment, which was given by Christ Himself.

There will be a Judgment Day, on which day all men will be judged—all the quibble and prattle of wiseacres and would-be leaders and lights in knowledge and wisdom to the contrary notwithstanding. Christ, the Son of the Living God, He who came from the Great Beyond and who returned there, He who is with the Father in Heaven, and yet ever with us on earth, He who knows all things, He tells us that there will be a Day of Judgment, and every true Christian believes it.

And the Savior gave us certain signs by which we might know when the Day of Judgment is to be expected. There shall be earthquakes, wars and rumors of wars, false prophets, distress of nations and perplexity, iniquity shall abound and the love of many shall grow cold, and then shall the end come. The signs of the times clearly tell us that the Day of Judgment is at the door. We are living in the evening of this world.

But we do not know at what moment and on which day it will come. "Of that day and hour knoweth no man" (Matth. 24,36). It shall come as "a thief in the night."

And on that day "heaven and earth shall pass away" (see 2. Peter 3,10). So there will be no room and no time for a millennium, a thousand years of bliss on earth for the righteous. The Bible teaches that the world will be wicked until the end, and what is more, it will grow worse and worse as the end approaches—and then, suddenly, the end will come, Heaven and earth will be destroyed, and all people will be judged and "these (the wicked) shall go away into everlasting punishment, but the righteous into eternal life."

What is said in the Book of Revelation concerning the thousand years is expressed in prophetic language, and must be understood as such. To make it more clear: If the 1,000 years are to be taken literally, then there will bea real beast, the devil will be bound in actual chains, and a true lamb will be sitting on the throne. (Read Rev. 20 and 21.

So then, dear reader, remember that on that great day, when the time of your sojourn in this world shall have ended, when the day of grace shall have been spent, when the opportunity to "get right" with your God shall have been taken away, then you must appear before your Judge, that Judge who knows your life and conversation better than you do, who saw every deed you committed, heard every word you spoke, perceived every thought of your heart, who has on record all of your sinful, unchaste, covetous emotions and longings! Then you will be placed on the balance, and if found wanting, will be cast into "everlasting punishment" or if found righteous, taken into eternal life.

Which shall it be?

Each and every one of us will on that day face that court and there hear our final sentence—Hell or Heaven. Outside of these two there is no other place in eternity, in one or the other we will spend eternity.

Amen!

LUTHERAN CHURCH

STOP THIS WASTE

(Dr. Frank Crane.)

The other day the postmaster at Chicago had placards put on the motor vehicles operating in the postal service, reading as follows:

"Stop this waste! Twenty-five million pieces of mail annually are delayed or not delivered at all because they are incorrectly addressed or improperly packed."

The postal authorities call our attention to the fact that there are 25.-000,000 pieces of mail that they must handle three to seven times oftener than they would have to handle them if they had been properly prepared.

And even after they have exhausted every means of identification and salvage they succeed in delivering only slightly more than one-fifth of that amount.

And this does not include vast quantities of circulars and newspapers which are not properly addressed and which are destroyed because they can not be delivered.

In Chicago there is one building that is used as a storage place for mail of obvious value and for mail of first class which can not be delivered. Twice a year the contents are auctioned off because there is no way of finding the owners. In this building are bins of shoes, quantities of clothing, dress goods, automobile parts and tires, sporting goods, suit cases—everything from a bird cage to a mouse trap. These are lost to both the one who sent them and the one who should receive them, because somebody was careless in tying a knot or used flimsy wrapping paper, or put on a defective address.

Nearly 300 employes are engaged in correcting the common, preventable errors of the people. The only reason the postoffice can stand this drain of carelessness upon its resources is that the people pay the bill.

FARMERS VOTING IN INFORMATION QUEST

Farm Bureau members all over the state are voting on questions concerning state and national legislation of importance to agriculture. The questions were submitted early in the month by the state federation, in an effort to determine what its members desire from the law-making bodies. The referendum will be completed by Jan. 1.

Unusual interest is manifest in the questionnaire, according to F. L. French, secretary, who last week received scores of calls for blanks in addition to the regular supply sent to counties late in November.

DIST. NO. 8, RED LAKE CO.

Miss A. Kotlan, Teacher

The pound social given in Dist. No. 8 of Red Lake county was well attended and reported having a good time. The proceeds will go to making a Merry Christmas for the children of the district.

Mr. and Mrs. Nels Fore motored to Thief River Falls Monday. They shopped and attended to other business.

We cannot look out without letting others look in.

NOTICE FOR SEALED BIDS.

Sealed bids will be received at the office of the county auditor in the city of Thief River Falls up to 3 o'clock P. M. on January 2, 1923, for the publication of the Notice and the Delinquent Tax List for 1922 and for the Financial Statement and for all legal publications for Pennington County, Minnesota, for the year 1923.

The county board reserves the right to reject any or all bids.

Dated at Thief River Falls, Minnesota, December 11, 1922.

County Board for Pennington County,
By T. P. ANDERSON,
County Auditor.

Mortgage Foreclosure Sale.

Whereas, Default has occurred in the conditions of that certain mortgage duly executed and delivered by M. O. Seavey and Rachael Seavey, his wife, Mortgagors, to Ole A. San, Mortgagee, bearing date the 1st day of July, 1921, and with a power of sale therein contained, duly recorded in the office of the Register of Deeds, in and for the county of Pennington and state of Minnesota on the 31st day of August, 1921, at eight o'clock A. M. in book 57 of Mortgages, on page 609, such default consisting in the nonpayment of the interest upon the principal sum of such mortgage, which interest to-wit: the sum of Two Hundred Eighty-six and 80-100 dollars ($286.80), became due and payable on July 1, 1922, and, whereas, the undersigned, Nick Bundhund, was on the 10th day of July 1922, duly appointed guardian of the estate of said Ole A. San by the Probate Court, of Pennington County, Minnesota, and a certified copy of the letters of guardianship issued to the undersigned as such guardian has been duly recorded in the office of the said Register of Deeds. And, whereas, the undersigned did on November 6, 1922, pay the interest then due upon a prior mortgage upon and against the premises hereinafter described, amounting to the sum of One Hundred Twenty-four and 42-100 dollars ($124.42). And, whereas, the undersigned, as guardian has declared and does hereby declare the whole sum secured by said Mortgage to be due and payable, and, whereas, there is now claimed to be due and is due at the date of this notice upon said mortgage the sum of Five Thousand Two Hundred Ninety-five and 92-100 dollars ($5,295.92), including the interest so paid on said prior mortgage, and no action or proceeding having been instituted at law or otherwise, to recover the debt secured by said Mortgage, or any part thereof.

NOW, THEREFORE, NOTICE IS HEREBY GIVEN, That by virtue of the power of sale contained in said mortgage, and pursuant to the statute in such case made and provided, the said mortgage will be foreclosed by a sale of the premises described in and conveyed by said mortgage, to-wit:

The west half of the Southwest quarter (W½ SW¼) of section fifteen (15), and the east half of the southeast quarter (E½ SE¼) of section sixteen (16), and the west half of the southeast quarter (W½ SE¼) of section sixteen (16), in township one hundred fifty-four (154), north of range forty (40), west of the fifth principal meredian, containing 240 acres, according to the Government survey thereof, in Pennington county, and state of Minnesota, with the hereditaments and appurtenances; which sale will be made by the sheriff of Pennington county, at the front door of the Court House, in the city of Thief River Falls, in said county and state, on the 6th day of January, 1923, at 10 o'clock A. M. of that day, at public vendue, to the highest bidder for cash, to pay said debt of Five thousand two hundred ninety five and 92-100 dollars ($5,295.92) and the interest, and taxes, if any, on said premises and Seventy-five dollars ($75.00) attorney's fees, as stipulated in and by said Mortgage in case of foreclosure, and the disbursements allowed by law; subject to redemption at any time within one year from the day of sale, as provided by law.

Dated November 16, 1922.

NICK BUNDHUND,
as Guardian of the Estate of Ole A. San, Incompetent, Mortgagee.
H. O. CHOMMIE,
Attorney for Mortgagee,
Thief River Falls, Minnesota.

"FOUND HIM!"

SYNOPSIS.—The time is the late '60s or early '70s and the scene a steamboat on the Mississippi river. All the types of the period are present and the floating palace is distinguished by merriment, dancing and gallantry. There are the customary drinking and gambling, also. Virgil Drace, a young northern man, is on his way south on a mission of revenge. He meets an eccentric character in the person of one Liberty Shottle, who is constantly tempting the goddess of chance. They agree to a singular pact. Drace, seeing an opportunity to use Shottle, confides to him that his mission is to find a certain ex-guerrilla, Stepho la Vitte, who had murdered Drace's father. It is his determination to hang La Vitte as high as Haman. Drace falls in love with a striking young beauty on the boat. The steamer reaches New Orleans, at that time in the somewhat turbulent throes of carpetbag government. The young men attend the French ball and Drace unexpectedly meets the girl. She is accompanied by one Boyce, apparently her fiance. Shottle learns that the name of the girl is Nadine la Vitte. Drace passes an uneasy night torn by the suspicion that Nadine is the daughter of old Stepho la Vitte, now an admitted outlaw. Now, more than ever, is he resolved to find where the girl lives and to find Stepho. Drace and Shottle begin a search of the city. Drace takes a hand in a carpetbagger riot. He catches a glimpse of one he is sure is Nadine. Drace and Shottle get into bad standing with the authorities, and are given until the next day to board a steamer bound north. Returning to the house where he thought he had glimpsed the girl, Drace finds the place abandoned.

CHAPTER V

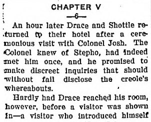
—6—

An hour later Drace and Shottle returned to their hotel after a ceremonious visit with Colonel Josh. The Colonel knew of Stepho, had indeed met him once, and he promised to make discreet inquiries that should without fail disclose the creole's whereabouts.

Hardly had Drace reached his room, however, before a visitor was shown in—a visitor who introduced himself as an agent of the New Orleans police department and who had a most distressing communication to make:

It was known that Mr. Drace and his friend had taken part in a recent riot. Mr. Drace was one of the leaders, had severely wounded more than one man, and without cause, being from the North, just arrived, and having no possible interest in the city. However, he was to be treated with more of lenity than would rhyme with his crime, for instead of punishment he was only to be banished, along with his friend. A steamboat, the Bumblebee, bound northward, would leave next morning. The chief of police would grieve if Mr. Drace and his friend failed to register among the passengers.

With scarcely twelve hours left in which to find Stepho la Vitte, Drace paced the streets in an agony of anxiety, making a hundred plans to find Stepho or to outwit the New Orleans officials and prolong his stay, but all in vain.



"Zat Is Ze Private Stock," He Snarled.

Colonel Josh did not appear, but he seemed to have embarked upon the quest, for when the distracted Drace called at his quarters about midnight the old fellow was still absent. Dawn brought Drace back again, for all his other endeavors had been unsuccessful, and but two hours remained before the Bumblebee's departure.

Routed out of bed, the Colonel kept Drace waiting a full half hour before he put in an appearance. Then, however, he offered a faint ray of hope. He had discovered that a certain Frenchman, a wine dealer, living at an address he produced scrawled on paper, was reported to be an intimate of Stepho. Possibly from him Mr. Drace might—

Drace hurriedly explained the decree which had banished him; then he "presented" the Colonel with a check on account, asked him to convey his respects to Miss Lucy and took his departure.

On his way to the Frenchman's he stopped at the hotel, where he found Shottle strapping up their baggage—and a police official paying an informal but suggestive call. An hour's grace remained. Drace paid his score at the desk, sent his baggage to the boat and then, summoning a cab, drove off with Shottle to the house of the Frenchman. It proved to be a mean abode, both wineshop and dwelling. Drace knocked eagerly. A small man, his mustache dyed, came to the door, blinking.

"I beg your pardon, sir, but I am a friend of Mr. la Vitte, and—"

"Pardon, monsieur, but you do not look like him, ze friend."

"But I am. And I came with word that will be of advantage to him. The police are after him—"

"Aw, he know zat. Monsieur would trouble himself for nothing. Good morning."

"Just a moment, please. You have no need to look on me with suspicion. I am his friend—and—"

"If you his friend," interrupted the man, "you know he gone—to Europe, on steamer to France."

Drace was about to abandon the man in despair when Shottle, who had been staring at a case of wine which stood by the door ticketed and sealed for shipment, suddenly interrupted.

"Ah," he cried, "can this be the famous Chateau Yquem?" And brushing past the Frenchman, he leaned over as if to examine the bottle. With a cry, the wine merchant shoved him rudely away. "Zat is ze private stock," he snarled. "He is not for sale. I am not yet open for business, sirs. Good morning."

Shottle grasped Drace's arm and drew him away. A cart had halted outside, and as they entered their cab they saw the carter shouldering the case of wine and bearing toward his vehicle.

As they turned the corner, a deep-throated blast from the Bumblebee sounded a warning. Shottle turned upon the disappointed Drace with a gleeful countenance. "Master," he said, "I'll thank you for that money again. I've found him."

"Found him!" exclaimed Drace. "How?"

"That case of wine was addressed to Stepho la Vitte at Farnum's Landing, Mississippi. That wine is going to Stepho on the Bumblebee. And so are we!"

An hour later Drace sat with Shottle on the deck of the Bumblebee, watching the ever-changing panorama of the Mississippi and musing upon the sudden shifting of his quest.

"Liberty," asked Drace presently, "how far up is this Farnum's Landing? Do you recall it?"

"Yes," said Liberty. "I know this river. Farnum's Landing is—by golly!" he exclaimed, breaking off, "Farnum's Landing is the next stop below Bethpage's Landing! And General Bethpage is my uncle! We'll go there."

"But," Drace said dubiously, "he's not my uncle, and I'm afraid it would be intruding somewhat on his hospitality to—"

"Nothing of the sort," averred Liberty. "Any friend of mine would be doubly welcome. You can't know much about the General. Taming, now, but he used to be the most remarkable character, in a quiet way, along the river. And when I tell you about him, Virgil, you'll laugh. Before the war he was professor at Newsome, a little college up in the scrub-oak country. He entered the army as a colonel and came out as a brigadier."

"I don't see anything to laugh at in that."

"No, but wait. He had considerable money, and at times used to come down to New Orleans to enjoy himself. On one occasion he lost all his money at roulette."

"Still nothing to laugh at."

"No? All the property he had with him was a bodyservant, a Guinea negro named Dip. So what does he do? He says to the proprietor of the gambling house: 'I wish to play this negro, sir.' 'All right; I'll take off the limit and let you play him. How much is he worth?' says the gambler. 'I don't want to play his value in money, but him, I tell you,' says the General. 'Say the word, and I'll bet him on one of these numbers.' He had been losing every bet, and the proprietor knew that it would be safe. So he says: 'All right, go ahead.'

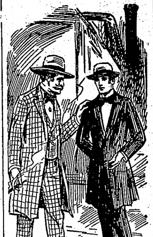
"The General wasn't sober, so he calls the darky and says: 'Dip, stand here with your forefingers on number twenty, right here.' The darky did so, and they turned the wheel, everybody laughing. Well, sir, if twenty didn't win, the world is a puffball! Won, and the owner of the place turned pale! He knew that he'd have to pay or close up his house. So he says: 'All right, get at his value, and I'll pay the bet.' 'Value!' cries the General. 'I didn't bet his value, but him. I want thirty-five Guinea negroes. Size them up to him.'"

"What a farce!" commented Drace.

"Was it? Well, I reckon not. They had to go out and buy thirty-five Guinea negroes. It took quite a while, but the General waited. And when they had all been sized up, the General went up the River, with his thirty-five Guinea negroes trailing after him."

Now Drace could see the picture of it, and he laughed. This was the man he was going to visit!

The Bumblebee was jointly owned and operated by Major Pewitt and a young fellow named William Hawkins. It was a fine steamer, but while it was cunningly masked as a public carrier, Shottle was quick to discover that it was in truth a nomad gambler, profuse in entertainment that taxed not the giver. But the entertainment sought by this pelican, as the gamesters termed Shottle, was not of wine from France, the fish-egg from Russia or venison from America's native woods, but spades, hearts, diamonds and clubs. And while the Bee still lay at the wharf, breathing low and blubberously through her nostrils, Shottle had put in operation a quickly contrived "touch," presenting himself to Major Pewitt before he had taken the time to introduce his friend to that well-known character.



The Major Cleared His Throat and Gently Laid His Hand on Drace's Shoulder.

Now, however, Major Pewitt strolled up; and Shottle, keen to get to the gaming table, introduced Pewitt to Drace and then a moment later himself slipped away.

"We are on our way to visit Shottle's uncle, General Bethpage," explained Drace.

"What, my old friend and fellow-soldier, Bethpage! Never a nobler man drew sword in defense of what he conceived to be right. If you like a genial atmosphere and a company that never tires, you will remain with him as long as possible and still too short a time. I earnestly hope that you may find inducement to settle among us."

"Possibly I may. I like the River. I like the study of character. In character there is all history, all philosophy, all—"

"Just so," the Major agreed. "And we have some remarkable characters here, sir, and some of the most beautiful women in the world; to some people it may appear a little singular, but interesting character among men always develops in an atmosphere producing beauty among women."

"And naturally, Major, you are acquainted with both characters and beauty. And by the way, did you ever meet an old fellow—let me see, what is his name? Oh, I think they call him Stepho — something. Oh, yes — La Vitte?"

The Major cleared his throat and gently laid his hand on Drace's shoulder.

"My young friend, they have told you about the most implacable and desperate of men, sir. I know the man, and while nature did not intend—and I beg your pardon for what might seem a want of modesty—that I should fear any human being, yet I confess to an occasional uneasiness in the presence of old Stepho la Vitte. I have never had any words with him—that is, strained words; but if I should, I'd await no move on his part but shoot him instantly. Ha, I wish you to meet my dear young friend and much esteemed partner, William Hawkins."

"Uncle, this is Virgil Drace, my best friend."

New Year Wishes

By CHRISTOPHER G. HAZARD

Copyright, 1922, Western Newspaper Union.

ASSURANCE

WHATE'ER the year may bring
Of things not understood,
We certain are that everything
Will have to serve our good.
We may go on with joyous tread
And not a single thing to dread.

SOMETHING NEW

AMID the false, amid the true,
Between the laurel and the yew,
Thank God for something young and new!

And may this new leaf of time's page,
This fair addition to our age,
Be filled with sunny wit and sage!

NINETEEN TWENTY-THREE

MAY the New Year be threaded through
With strands of blue and gold for you:
Things high and precious, far and fine,
To serve, inspire, delight and shine!

New Year's Eve

And here we stand to say "Good-by!"
Brief words—and yet we scarce known why,
They bring a moisture to the eye,
And to the heart some quakes and aches;
We speak them very tenderly,
With half a sob and half a sigh—
"Old Year, good-by! Old Year, good-by!"
—W. K. Burleigh.

HERE we stand again on the borderland of Welcome and Good-by. There is so little between them and so much either side of them.

When the great bell of time strikes the midnight hour, and 1922 passes into the land of long ago, there is one simple resolution that we can all make with pretty good surety that we can keep it till the next midnight chimes—that we will be a better man or woman in the next year than in the last.

That won't be a hard resolution to fulfill in some degree, and if everyone is even a little better, there will be a heap more goodness, kindness, success and love in the world when 1923 rings out that there is now.

The untried year brings with it another chance for all—a chance to make good where we have failed—a chance to benefit by what we have counted as failures in the year that is passing out.

The old year has been a difficult one for many. Some have lost heart. The new year, which gives promise of so much that is better, will bring new courage and hope to them.

If we can let the unhappy part of the past year go with it, and only remember the good, it will help toward all that is best in the new.

One of the best things that we can hope for the untried year is that it will be a busy one for everybody. Work is the best promoter of goodness and happiness, and the best cure for trouble and sorrow that there is.

When the solemn, happy bells "ring out across the snow," let them ring out with them the bad things and ring in all that is good and true and beautiful that is within the power of each one of us.

ANIMALS AND NEW YEAR'S DAY

Oxen, Cows, Sheep, Goats and Pigs Blessed in Churches of Italy, Spain and France.

IN ITALY, Spain and France more is made of New Year's day than Christmas and on St. Sylvester's eve as the last day of the year is called the atmost joyousness prevails. Even the animals are blessed in the churches. A correspondent who attended one of these quaint ceremonies, writes:

The priest lifted high the host and said some words of benediction at which the people fell on their knees with a response. An acolyte with a holy-water sprinkler passed through the columns of animals deftly throwing the sacred water upon them. The oxen and cows were thus blessed first, then the sheep and goats and lastly the pigs. A moon nearly full glittered high above the mountain stones and combined with the light from the candles revealed the long, polished horns and heaving sides and sleek coats of the oxen and cows and the white woolly skins of the sheep. The acolyte passing among them, incensed them and their bellowing, bleating and squealing arose to a tumult. But, high above all, the voice of the priest was heard, as he chanted these words:

"My children, God in his goodness sends me, his unworthy servant, here to bless your flocks, according to an ancient custom of our mountains, so that these animals by whose aid you live may join in our religious ceremonies which usher in the New Year. Let us then sing a loud hosanna of praise to the ever-merciful Lord so lenient to sinners."

NEW YEAR CALLS PASSE

The American custom of New Year day calls, so prevalent in the social life of this country in the Nineteenth century, in little practiced today.

YOUR "LITTLE NEW YEAR"

By MARTHA B. THOMAS

"THE Little New Year" is a very eager youngster. He pops into view overnight; in fact, one second's difference is the margin between his being nothing at all and then appearing as something very definite to reckon with. From the minute he claps his eyes on you, he belongs; he is your "Little New Year" and you've got to decide pretty quickly what to do with him. There is no possible way of escaping this parenthood. He's going to stick to you like a burr for 365 days, every minute, every hour. It's really quite alarming.

Are you going to bring up the little fellow on underdone resolutions?

Are you going to make him a present of malnutrition by feeding him on irregular meals of procrastination?

Are you going to ruin his character (and maybe your own) by rows and rows of pleasant fibs to prevent a feeling of discomfort about his growing up into a harum-scarum boy? Like human children, he needs watching and guiding and discipline. You'll never have the opportunity of "raising" this particular lad again. He will slip from your fingers on the night of December 31—your "Little New Year" grown into whatever manhood you've permitted him.

Let's send him out a fine, sturdy fellow!

(©, 1922, Western Newspaper Union.)

HOW JAPAN GREETS NEW YEAR

Custom of Oriental Countries Is to Give Special Performances in the Play Houses.

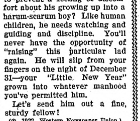
THE Oriental methods of greeting the New Year differ greatly from ours. In Japan, as well as in other Oriental countries, special performances are given in the theaters.

In the temples and shrines priests and attendants entertain the people with special dances. The Kagura, or Sacred Dance With Music, is the favorite, for while it is being given prayers are offered for the continued happiness of the nation during the coming year. This very old dance is performed by young girls, while the priests are the musicians. All are in appropriate costume.

Another ceremonial, which has been handed down for centuries, is the Shu-Sai, or Dance of the Ancestral Sanctuary. This is given within the palace by the imperial family on January 3, and it celebrates the founding of the imperial house, centuries ago.

A NEW YEAR'S CARD

Now what is here
A word of cheer
To herald in another year;
May all its days be free of blame—
A little nobler than your aim;
May all its labors be confest
A little better than your best,
And all the joys within its scope
A little brighter than your hope;
And may each year be found, when past,
A little dearer than the last.
—Arthur Guiterman in Woman's Home Companion.



1923
GREETING
The Lord bless thee and keep thee. The Lord make his face shine upon thee, and be gracious unto thee. The Lord lift up his countenance upon thee, and give thee peace.
—Numbers VI: 24-26.

Relic of Saxon Days

(©, 1922, Western Newspaper Union.)

THE New Year begins precisely at midnight, and almost everyone nowadays sees the New Year in by general festivities and many good resolutions, which are promptly forgotten on January 2.

The festivities marking this occasion, says Hereward Carrington, scientist and author, are very ancient, and in old Saxon days it was the custom to partake of a bowl of spiced ale, which was passed around with the expression "Wasshael," which meant "to your health!" Hence the origin of the Wassail, or Wassel bowl.

We now keep New Year on January the first; but the Chinese, Jews, Turks and many others do not observe it on this day. Even Christian countries have not always so observed it; the Romans began the year with the March equinox. The later Teutonic nations for a long time continued counting the beginning of the year from March 25.

It was only in 1563, by an edict of Charles IX, that France changed the time of the beginning of the year to January 1. In 1600 Scotland made the same change, and England only did so in 1752, when the Gregorian system was adopted there. It will thus be seen that the New Year, observed on January 1, is relatively new, though we are accustomed to think that it dates back from time immemorial.

It was Julius Caesar, in the year 46 B. C., who first reformed the calendar—aided by the Egyptian astronomer Sosigenes. He made it a few minutes too long, and a second correction was necessary. Pope Gregory made certain changes in 1582, A. D., and additional minor changes were made later on, from the "old style" to the "new style" calendar." We now employ the new style.

After the French revolution France decided to set up an entirely new order of things. A new calendar was made. The Christian era was wiped out, and was replaced by the new French era, beginning September 22, 1792. Instead of our week of seven days, a week of ten days was established—in accordance with the decimal system—the tenth day being set aside for rest.

Instead of the mythological names of the months, others deduced from the prevailing seasons of the year were substituted.

Everything was to be based upon reason! The Notre Dame was converted into a "Temple of Reason." Mme. Momero, the young and beautiful wife of a Jacobin printer, was chosen to represent "Reason." And so it went.

The months were chosen and given French names which were thought to be characteristic of them. Thus, autumn had a vintage month, a foggy month and a sleety month. Winter, a snowy month, a rainy month and a windy month. Spring, a budding month, a flowery month and a pasture month. Summer, a harvest month, a hot month and a fruit month.

Each month began somewhere between the 18th and the 22nd—according to our reckoning. Thus the first month of the autumn trio began on September 22, and lasted until October 21, etc.

With the restoration of a stable government in France, this calendar was repealed, and the usual one substituted. But for a time, as we have seen, New Year day did not begin on January 1, in France, so late as the last century, and it does not begin on that date in non-Christian countries even today!

Simple Home Remedy.

For matrimonial heartache: A lump of pride dissolved in a glass of common sense. Swallow immediately and settle with a kiss. Add a dose of wholesome compliments. Repeat as often as needed.—From Life.

All She Could Think Of.

One evening, at an entertainment, the mother of a boy in an algebra class I taught turned to me and said, "Well, how is the boy getting along?"

It was my home community and it happened that I was proud of a baby nephew then three weeks old, and I thought, of course, that she referred to him.

I answered, "Just fine; he gained a pound last week"

It didn't take me long to see that she referred to the progress of her son in algebra.

DYED HER BABY'S COAT, A SKIRT AND CURTAINS WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her old, worn, faded things new. Even if she has never dyed before, she can put a new, rich color into shabby skirts, dresses, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything. Buy Diamond Dyes—no other kind—then perfect home dyeing is guaranteed. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade or run.—Advertisement.

Good Opinion of Himself.

A neighbor was quite interested in the two brothers next door. She was particularly fond of Bobby, who was talkative and unusually bright.

One day she asked him: "How much older than you is your brother?"

"Oh," promptly flashed Bobby, "he's a year older, but I'm a year smarter."

Our idea of a modest man is the parent of a new-born son who admits that the mother was also present.

News of Minnesota

EVENTS of the week throughout the "State of Ten Thousand Lakes" told in brief form

Hastings—Thieves, using a truck to haul away their loot, ransacked the home of Captain Ernest Anthony.

Canby—Fire of unknown origin destroyed the residence of Helmer Anderson on his farm here.

Duluth—Two fires here damaged four store buildings causing a loss estimated at $7,000.

Duluth — Duluth's postal receipts showed a gain of 9.85 per cent, or $5,469, last month over November of last year.

Willmar—Displaying dazzling teamwork, the Willmar Legion basket ball team defeated Clara City by a score of 64 to 4.

Duluth—Henry Burley, aged 16, died 19 hours after his neck was broken in a collision between his automobile and a streetcar.

Luverne—E. A. Wurdeman, assistant cashier of the Security State Bank of Hardwick, charged with grand larceny, is at liberty on $2,000 bonds.

Luverne—John Carlson, a Suringwater township farmer, was shot in the back by an unknown person while returning home from town.

Virginia—A meeting has been called here, and it is expected range high schools in the Fifth district of the State Athletic board will form two conferences.

Minneapolis — Scores of letters, bearing many different addresses, but all directed to Santa Claus, have been received at the postoffice during the last few days.

Pipestone—The curfew ordinance, which has been a dead letter in Pipestone for several years, has been resurrected through the efforts of the Child Welfare board.

Fergus Falls—Peter Saetre, a garage man at Henning, this county, is dead in this city from injuries sustained when he attempted to light a fire with kerosene.

Faribault—Extension of the Lyndale avenue road from Lakeville to Faribault, a distance of approximately 23 miles, was unanimously approved by the Rice County commissioners.

Buffalo—Levi Cady Eckelberry, convicted in Wright county district court on a charge of abducting Lenora Balduc, 18 years old, was denied an appeal for a retrial by the state Supreme court.

Buffalo—Fred and Jesse Knox, brothers, of Minneapolis, charged with the murder of Marshal Rudolph Mauer of South Haven, Minn., several weeks ago, pleaded not guilty when arraigned.

Faribault—Dan Kong, alias Frank Wong, alias Alfred Lews, the first Chinaman ever incarcerated in the Faribault county jail, is held here on a charge of stealing a money bag containing $20.

Hibbing—A 10 per cent reduction in tax assessments on all structures in both north and south Hibbing has been approved by the Minnesota state tax commission, according to advices received here from St. Paul.

Minneapolis—Representatives of co-operative wheat marketing associations of ten states, meeting at the Curtis hotel perfected the organization of a single giant wheat marketing association in the United States.

Mankato—Miss Esther Martins of Adrian, a student at the Mankato Teachers college is at a Worthington hospital recovering from frosted feet and fingers following a wild ride on a passenger train out of Worthington.

Minneapolis—Seven taxpayers stopped proceedings in the payment of a stationery bill by Hennepin county when they filed a petition with the county attorney, declared the bills excessive and asking for an investigation.

St. Paul—Collapsing at the steering wheel as he started his automobile across the Wabasha and Fifth street intersection, Albert A. Schultz, died a few minutes later in the police ambulance, en route to the City hospital.

Red Wing—Police are searching for two Rochester men in connection with a collision between an automobile and a buggy between Zumbrota and Pine Island in Goodhue county in which four persons were injured, one seriously.

Minneapolis—Thirty thousand citizens who did not register at the last election will have a chance at jury duty if a plan suggested by Judge Horace D. Dickinson of the district court is approved by other judges. Another 26,000 citizens who registered but did not vote will be added to the list of prospective jurors.

St. Paul—Two Minneapolis women were injured, one of them seriously, when they jumped from a burning automobile in St. Paul.

Jasper—Farmers in this vicinity are having all their hogs marketed at Sioux Falls, transporting them by automobile trucks.

Hopkins—Joseph Peterson, 19 years old, was accidentally shot and killed in his home in Peaceful Valley, near Hopkins.

Duluth—Two factions in Fine Lakes township have begun a district court battle with the control of the schools in District No. 74 as the objective.

St. Paul—The state Legislature will be asked by state officials to enact legislation to provide proper insurance protection for state institutions.

Rochester—The annual convention of the Minnesota and North Dakota Catholic Hospital association opened here with 50 representatives from both states present.

Minneapolis — The Transportation Brotherhoods National bank, the sixth of its kind in America, will open for business in quarters of the Metropolitan Life building.

Jasper—Farmers and others living in this vicinity are still repairing damages caused by the Thanksgiving day wind, which wrecked many small buildings in this section.

Tracy—Joe Hooker post, Grand Army of the Republic, at Tracy, lost two of its members within 48 hours, John L. Craig, aged 86 years, and Charles A. Illian, aged 78.

Dodge Center—Dodge county farmers propose to ask the county commissioners to furnish funds to carry through the work of testing cattle of the entire county for tuberculosis.

St. Charles—Henry Persons, 30, a Winona county farmer, escaped with a few scratches about the face and head when the automobile he was driving was struck by a train at a crossing here.

Fergus Falls—The fall term of the district court opened here with the longest calendar in the history of Ottertail county. There are 120 civil cases and a large number of criminal cases to be tried.

Minneapolis—Racing abreast at 50 miles an hour two automobile loads of men engaged in a pistol duel, were pursued by a patrolman who commandeered a motorcab, but escaped when their machines outdistanced the cab.

Crookston—While Mrs. D. J. Rice, her mother and two children were sitting in the kitchen of the Rice home a stove exploded and dozens of flying pieces damaged the walls and furniture, yet not one of the four received a scratch.

Thief River Falls—If an attempt is made to push through the proposed Red Lake drainage project it will not be accomplished without strenuous protest from farmers residing in Pennington county, affected by the viewers' report.

Red Wing—In spite of an eleventh hour offer to compromise by the Wisconsin-Minnesota Light & Power company, the city council took formal action by adopting a resolution calling for the construction of a municipal electric light and power plant.

St. Cloud—After a chase of several miles Marshal Raymond Smith of Avon, captured Henry Bormas, Freeport, Minn., wanted for crashing into an automobile at Albany and injuring five persos. Smith fired six shots at Bormas, all of which took effect in his car.

Sleepy Eye—That chicken and hog thieves operating in this vicinity are directing gas attacks against their prey in order to silence them, is the report that comes to officials. Even the trusted dogs on the farm are made helpless by a squirt of the gas carried by the thieves.

Duluth—A hearing has been set for Dec. 11 at Baudette, Minn., by the United States war department, which has under consideration the application of the Minnesota highway department for the approval of plans submitted for the proposed bridge over the Rainy river connecting Baudette and Spooner.

Huntley—After a day's work with sledge hammers and crowbars, the vault door at the State Bank of Huntley, which was jammed into an immovable position by a blast placed in front of it by robbers, was removed. Bank officials reported that no money was missing, although the explosion had caused damage to valuable papers.

Olivia—The most important case to be tried at the present term of district court resulted in a verdict for the Milwaukee railroad company. John T. Smith of Milwaukee had brought action for injuries received while repairing a caboose, and asked for $50,000. The jury, composed of six men and six women, returned a verdict favoring the railroad company.

Rochester—"Boys, I'm done for. Hurry up and send word to mamma. Mother, mother,—" were the last words of Lawrence Wagner, 14 years old, after his gun had been accidentally discharged, the load of shot hitting him full in the breast. Young Wagner was a son of Mr. and Mrs. J. Wagner of Plainview, and was out hunting with four boy companions when the accident happened.

Sinews of Virtue.

Good company and good discourse are the very sinews of virtue.—Izaak Walton.

Avoid Exaggeration.

Exaggeration is a blood relative to falsehood and nearly as blamable.—Hosea Ballou.

A Kansas Standard.

A wise man never stands out in the rain or opens a milk bottle with his thumb.—Topeka Capital.

The Cat in Olden Times.

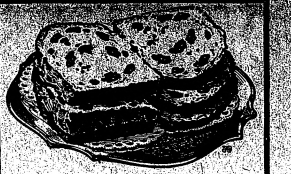
Cats are supposed to have been first domesticated by the Egyptians; but the Greeks and Romans do not seem to have cared much for them.

Jews Forbidden to Cut Beards.

Beards have been worn for centuries by the Jews, who were forbidden to "mar" their beards, 1490 B. C.

Company's Laundry Kept Busy.

One big ocean steamship company runs its own laundry, which handles 6,500,000 articles a year.



Why Bake At Home when you can buy bread like it, ready baked?

COUNT the raisins—at least eight big, plump, tender fruit-meats to the slice.

Taste it—see how the raisin flavor permeates the bread.

No need to bake at home when we've arranged with bakers in almost every town and city to bake this full-fruited raisin bread.

Just 'phone and they'll deliver it—all ready to surprise the family tonight.

It comes from master bakers' modern ovens in your city. And it's made with Sun-Maid Raisins.

That's another reason for its superiority. A rare combination of nutritious cereal and fruit—both good and good *for* you, so you should serve it at least twice a week.

Use Sun-Maid Raisins also in puddings, cakes and cookies. You may be offered other brands that you know less well than Sun-Maids, but the kind you want is the kind you know is good. Insist, therefore, on *Sun-Maid* brand. They cost no more than ordinary raisins.

Mail coupon for free book of tested Sun-Maid recipes.

SUN-MAID RAISINS
The Supreme Bread Raisin

Your retailer should sell you Sun-Maid Raisins for not more than the following prices:

Western Canada
Wonderful Stock Raising Country

Vast stretches of undeveloped fertile agricultural land of the highest productiveness await the settler in Western Canada. The land possesses the same character of soil as that which has produced the high quality of cereals that have carried off the world's premier honors so many times in the past ten years.

Native Grasses are Rich and Abundant

Cattle fatten upon them without any grain being fed.

Limited capital on high-priced lands is not a success, neither can the tenant burdened with high rents hope to succeed. The place to overcome these is in Western Canada—where *land is cheap* where a home may be made at low cost, and where *dairying, mixed farming and stock-raising give an assured profit.*

Land may be purchased from the Railway Companies or from responsible land companies or from private owners. **Free homestead of 160 acres** each are to be had in the more remote districts.

Local News

Missionary Eliason returned to Thief River Falls Friday evening after having spent a week delivery sermons at Goodridge and surrounding churches.

S. O. Basgaard of Esplee transacted business in Goodridge Friday.

Curtis A. Smith and Charley Dolson, farmers on the Reservation east of Goodridge, were shoppers here Saturday.

Miss Julia Johnson returned Saturday evening from Wilton, N. D., where she has been employed during the summer.

Miss Sarah Vaughan of Thief River Falls and her sister, Mrs. Charles Dobner of St. Paul, arrived here Saturday morning and spent the day visiting at the Morgan Vaughan home. They returned to Thief River Falls in the evening.

Jay Payne transacted business at Thief River Falls Saturday.

Raymond Jensen and Harry McDonald were visitors at the city to the west Saturday.

Ben Habedank made an automobile trip to Grygla Monday despite the severe weather.

Elev Aakre and son, Einer, returned Saturday from Thief River Falls, where they have been in attendance at the hearing on the Red Lake project.

The citizens of Goodridge have in their midst two ambitious gravel haulers who commenced Sunday night by the light of the Christmas moon and hauled two loads of gravel between 11 o'clock P. M. and 7 o'clock A. M.

Alice Swanson returned Saturday from Thief River Falls, where she has been employed.

Your sweetheart will never forgive you if you keep her away from the big dance tonight at the Goodridge hall. And you can't hardly blame her. Play safe and go!

Miss Annie Rossette spent a few days of the past week visiting at the home of her brother, Ludvig Rossette, near Germantown.

John T. Nelson of Highlanding returned from attendance at the Thief River project hearing.

Cross country hikes on skiis is the popular pastime among Goodridge young folk nowadays.

Reuben Gunderson spent Monday in Thief River Falls visiting with his brother, Harold, who is a patient at the Oakland sanatorium.

Theodore Tandberg spent the week-end at Thief River Falls visiting with friends and relatives.

Mrs. D. J. Evans passed through Goodridge Tuesday en route to her home near Four Towns after visiting for a month near Faribault, Minn.

Henry Rockne attended to business matters at the county seat Tuesday.

Rudolph and Eddie Kusmack were passengers to Thief River Falls, where Eddie consulted a doctor and returned in the evening, while Rudolph returned Tuesday morning.

Anton Lien was a business transactor in Thief River Falls Tuesday.

Mrs. J. P. Ferdinandsen attended to business matters in Thief River Falls Saturday.

"Dance and grow thin!" Mope and grow grouchy. Which will it be? So take in the big mask ball and dance tonight at the Goodridge hall. Let 'er buck.

Using snow shovels and decreasing the size of snowdrifts on the sidewalk was the unsought for pastime Tuesday morning.

Misses Esther Ronken and Ruth McDonald were visitors at Thief River Falls Saturday.

Miss Esther Ronken of Anstad spent the week-end at the R. H. McDonald home.

M. O. Seavey had the misfortune of having one of his horses die the first part of the week.

Mrs. Inez Everhart arrived here on Monday from Galesburg, Ill., to spend Christmas with her mother, Mrs. Martin Olson.

Kern Olson, traveling salesman for the Gamble Robinson company of Thief River Falls, called on the trade here Friday.

H. I. Freeberg, traveling salesman for the Standard Oil company, spent Tuesday in the village attending to business matters.

Misses Hilda Christianson and Delia Urdahl were passengers to Thief River Falls Wednesday evening. They returned Thursday morning.

Misses Susie Lindvick and Bessie Roller and Lars Lindvick returned on Thursday from a short visit at Strandquist.

Tuck this in your bonnet: Snyder's Happy, Jazzy, Crazy Six, far-famed as purveyors of harmony and ryhthm, is booked for the Goodridge hall tonight. Miss it and you might as well put yourself down as old and decrepit!

Do you love to dance? Come to the big mask ball and dance tonight at the Goodridge hall.

LUTHERAN LADIES' AID.

The Goodridge Lutheran Ladies' aid held its usual monthly meeting Thursday, December 7, at which time it was decided that all members donate one article each for the annual spring sale. Donations of any kind from men and women, young and old, both within and outside the congregation, will be appreciated. Kindly bring all donations to the next monthly meeting of the aid January 11.

Norwegian Lutheran Church.

Monday, December 17: Sunday school and Bible class at 10. All children welcome. Norwegian services at Erie at 11 A. M. and at Torgerson at 2:30 P. M. Sunday, December 24: Norwegian Christmas services at Erie at 11 A. M. and at Torgerson at 2:30 P. M. Christmas Day, Monday, Dec. 25: Christmas services in Norwegian at Goodridge at 10:30 A. M. and at Bethania at 2:30 P. M. Christmas program in Goodridge at 7:30 P. M.
V. O. Aaker, pastor.

Holy smoke! You'll sure regret it if you miss the big dance and mask ball at the Goodridge hall tonight! Snyder's Jazz Six of Thief River Falls will rip off something that will stick to you like a mustard plaster.

ERIE

Mrs. Hans Svarre and son John, of Pelican Rapids, have been enjoying an extended visit with relatives and friends in Star and Highlanding townships.

The Beltrami county coroner, accompanied by Sheriff LaBree of this county, were enroute via here last week to the place on the reservation on official duty removing remains of the unknown man which had been discovered by a hunting party not long since. In the opinion of the coroner, deceased had been an Indian, judging from form of skull and other parts of the skeleton.

G. Tharaldson has been making the rounds of the community buying furs and hides for the Singer Brothers of late.

The vote at the special election held in Star township last Tuesday stood 27 to 6 in favor of levying $300 for the purpose of hiring an attorney to fight the present proposition of the Red Lake Drainage and Conservancy project. Failure of sufficient notification or possible lack of interest by some, seems to account for the very light vote.

Iver and Gust Iverson, accompanied by Z. J. Hole, marketed rye at Goodridge Wednesday. Mr. Hole proceeded to Thief River Falls to attend to matters of business.

B. Rindal and H. Iverson called on L. B. Johnson Thursday on a combined business and social mission.

A party of young people gathered at the Berg brothers home last Saturday evening. A good time is reported, only in the play entitled "In the Chair of Mystery" some one of the cast got rather personal while posing as a phrenologist, another made a rather rapid exit for home as a result of the phenologist's inquisitiveness. Probably the offended one mistook it for a threatened "Third Degree."

The Erie Ladies' Aid met with Mrs. Otto Parnow Wednesday.

Mr. and Mrs. Albin Arveson of Neptune were pleasant callers at the home of Mr. and Mrs. H. A. Dahlen Tuesday of last week.

The North Star Debating club is scheduled to debate the question: "Resolved, That the Negro Has Suffered More at the Hands of the White Race Than the American Indian," on Saturday, Dec. 16. We expect a lively and spirited debate.

It is reported that the Nitzschke family have recently returned from Indiana to again take up their residence on their homestead two miles northwest of Neptune. The folks held an auction last spring, thence departing for Indiana to make their future home, but it seems, as it often happens, that people change their plans on leaving "Old Minn."

Farmers Are Grateful.

To the Citizens of Thief River Falls and of Goodridge:

The committee in charge of the opposition to the establishment of the proposed Red Lake improvement, the hearing whereof was held Dec. 7 and 8, wish to and do hereby extend the thanks and gratitude of the farmers proposed to be assessed in said matter, to the citizens and business institutions of Thief River Falls and also of Goodridge, for their material, unanimous and whole-hearted assistance and support in opposition to the project, and in opposition to placing upon the farming community of a burden we did not and do not consider just, reasonable or endurable. We will say that we represent every resident owner so far as can be ascertained in every township in Pennington and Marshall county assessed for benefits, except in town of Hickory, and that in all the said towns except the town of Hickory, the opposition is absolutely unanimous so far as this committee has been able to ascertain.

We ask further co-operation with you in this and other matters of mutual concern.

Dated December 9, 1922.

Committee in Charge:
TOM BELLAND, Erie.
JOHN P. ASP, Rhoda.
OLUF O. OMLID, Erie.
PETER C. WOLD, Kratka.
OLEANDER UGLEM, Goodridge.
L. O. KONGELF, T. R. Falls.

Scientists now assert that our prehistoric ancestors were ambidextrous, using both hands with equal facility. The art in our day does not exist except among those who collect interest.

The water power companies say they will probably (?) pay a part of the cost some time in 19——? That's some consolation.

CHRISTMAS TREE PF[illegible]RAM GIVEN

State Board of Health

Spler[illegible]rogram Delivered [illegible]arious Goodridge Talent.

The Christmas program and tree given at the Norwegian Lutheran Church last week was greeted with a packed house. A very fine program that surpassed any antecedent performance was delivered in a creditable manner and much encomium is due to the Sunday school instructors who strove so successfully to arrange the magnificent public exercise.

The church and tree were artistically and beautifully decorated with candles and appropriate decorations and tinsels. The following program was delivered:

Song, by Sunday school; reading of gospel lesson, Rev. V. O. Aaker; vocal solo, Myrtle Iverson; recitation, Esther Ronkin; Christmas gospel by confirmation class; song by Resan quintette; recitation, Irene Aaker; song, Iverson sisters; recitation, Margaret and Leona Bundhund; dialogue, Maurice Resan, Florence Halvorson, Hazel Thoreson and Edith Gunderson; recitation, Irene Halvorson and Adeline Stephenson; recitation, Alice Resan; song, Sunday school; recitation, Selmer Anderson; recitation, Hiram Halvorson; recitation, Joseph Mandt; song, Mable Rime; recitation, Roy Resan and Alvin Halvorson; recitation, Leland Mandt; reading by six boys; recitation, Dorothy Sund; song, Sunday school; recitation, Mable Rime; duet, Margaret and Leona Bundhund; recitation, Fernely Josephson; pantomine, Alice Stephenson; recitation by Oscar Johnson; recitation, George Resan; banner drill by six little girls; song by quartette; recitation, Wilfred Stephenson; recitation by Casper Jones; solo by Tena Gaudland; discourse, Rev. V. O. Aaker; song, "Good Night," by six little girls.

As a happy conclusion to the enjoyable evening the audience was treated to bags of peanuts and candy and apples, after which the Christmas presents were distributed to the various owners.

NEW YEAR'S DANCE.

There will be a New Year's dance at the Goodridge hall January 1. Music will be furnished by the Goodridge 5-piece orchestra and you are invited to come and enjoy yourself to the utmost. Tickets are 75 cents and supper will be served at the Stephenson Cafe.

CHRISTMAS DAY.

Monday was Christmas day, and it was a joyous and propitious day among the inhabitants of our little village. The day was observed with the usual Christmas day church services. Christmas day services were conducted by Rev. V. O. Aaker at the Norwegian Lutheran church in the forenoon and in the evening the Sunday school of the above mentioned church gave an appropriate and delightful program, of which an account will be found in another column.

LONGER DAYS.

December 22 was the shortest day in the year and from now on we will have a few more minutes of daylight for every day that comes aorund, and hence those who arise early will not find it necessary to burn a light so long.

HAZARDOUS CALLING.

Tramp A: "Things ain't what dey was."

Tramp B: "Now! Here lately a feller can't hardly ask fer work fer fear of gittin' it."

CAUTIOUS ULTIMATUM.

Mrs. Specksome: "John, you simply must stop mumbling in your sleep."

Mr. Specksome: "Don't be so blamed curious. I absolutely refuse to talk out loud. So there!"

MAY THE YEAR OF 1923 BE A HAPPY AND PROSPEROUS ONE TO ALL IS THE WISHES OF THE

Goodridge State Bank

We also want to thank our many patrons and friends for the goodwill and support tendered us during the past year, and we hope we can be at your service for the coming year. A hearty welcome is extended to all at all times.

Goodridge State Bank

You've Probably Passed This Farm a Hundred Times in Your Travels Throughout Pennington County!

Toad Mountain Tattle

(From "The Tightwad," in Frazee Press.)

The Inevitable—Clod Hopper, who was elected representative from the Pieplant Plains district, was taken to Fergus Falls yesterday.

* * *

History's Repeater—During the high wind and bitter cold wave Monday, Jim Rank strolled about town joshing the natives who were out putting on storm windows and doors. Jim leaves his on the year round.

* * *

Delays Are Dangerous—Col. Mutt, who several weeks ago announced his intention of going to Florida for the winter, fell from a step ladder Monday while putting on storm windows and the doctor says he will be at home in Toad Mountain all winter.

* * *

Something to Howl About—Bud Hilliker, first to arrive at the loafer's nest back of McNutt's stove nightly, and who is loudest in condemning the management of our national affairs, was among the belated storm window workers. He has ten windows at his ranch, carried out the ten storm sash, stacked them against the house and went in after the hammer. A gust of wind tipped them over, demolishing the glass in nine of them and Bud made it so hot about home that his wife had to open the doors.

* * *

At It Again—Sliver Finney is at work on a player attachment that works on the keyboard of pianos instead of storing the machinery inside the box where it is hard to get at in case repairs are needed. The rig turns with a crank and hammers take the place of fingers. While trying it out the other evening, the vacuum feed clogged and back fired into the treble cleff. This threw the attachment off balance and reared up, gathered up power from some unseen source and tore off the ornamental veneer from the case, cracked 14 keys and broke 11 strings. But Sliver claims to know where it was lame and will have it ready for the home talent entertainment next week.

Horse Drowned in Red River.

Roy Parr, son of Arthur Parr, of Fork, was driving a four-horse team hitched to a wagon, across the river at the Fork crossing last Friday when the ice suddenly gave way beneath the horses in midstream and one of the horses was drowned. His brother, Murray, had crossed just ahead of him with a four-horse team hauling a heavy load of coal, and it is thought the heavy load started a break in the ice that gave way when the second team came on. The boys by cutting the harness from the horses saved three of them, but the other drowen before they could rescue it.—Argyle Banner.

Job was a patient man — but he never had to listen to anyone orate about the "crime of '73."

Dream Awakens This Man

A certain New York man about town went to his club one evening in a bad frame of mind. Business was bad, stocks breaking wrong and the world seemed topsy-turvy with him. He found fault with his food, his favorite paper had been misplaced, his cigar tasted bad, as did the numerous potions he drank during the evening, and finally on being "jollied" by a number of lively fellows, roundly he cursed everybody, and remarked: "To hell with everybody—I want to be entirely alone."

Going into a less frequented part of the club he threw himself upon the divan and was soon asleep. And he dreamed! He was alone! The great city of New York was before him. Everything was quiet. He was absolutely alone! No one answered his bells for service. The taxies and cars were idle. The hotels and business places were deserted. He was the only soul in the great city of New York. The banks with their millions of gold were open to him. He sought food, but there was none prepared, and no to cook. Rusty tracks, sagging trolley and telephone wires, dark and dreary store fronts, idle busses and autoes testified to former activities. Yet he had gained his wish—he was thoroughly alone. Not a human soul could he find. Only huge rats and dogs, made wild with hunger, were moving about. They were a constant menace to his well-being. It was a continuous battle for supremacy, at the same time his hunger and rest were to be considered. Thrown constantly on the alert in self preservation, the fight for securing needed food and rest made him gaunt and his fast growing indifference to personal care arising from a positive demand for vigilance against hungry animal life, gave him an unkempt, slouchy appearance entirely at odds with his former well groomed self. Yes, he was alone! His wish had been gratified! What wouldn't he have given for a friend just then? Someone to talk to. Someone to fight the animals with him. How small a soul he was alone. In a great city of splendid opportunities. But of what good, alone? He could get millions in gold, but no one to spend it with.

Lots of public utilities, but no one to run them. No lights, no pleasures. How sadly alone! He now thoroughly realized the need of companionship. He realized for the first time in his life how utterly dependent he was upon his fellowman. He knew now that he was wrong and he only. It was the smallness of a mean man, the selfishness of an individual alone that divorced him from the pleasures of companionship. He was gnawing at the husks of discontent. He knew now that good fellowship and the little courtesies which we extend one to another are the things which make life worth while. His soul craved the companionship of a man. He was struggling in battle with the odds and of a morbid and selfish life. He was dreary and wanted fellowship. One cannot live alone. He awoke.

He went forth from his dream a better man. He had received the message, age old: "Love thy neighbor as thyself." He had learned, in truth, that each man is dependent upon his fellows; that it is only through cooperation and fellowship that the living of our lives is worth while; that homes, communities, cities and states are permanently built only upon the principles of each individual contributing his share to the joys and pleasures and assuming his share of the tears and sorrows of his fellowmen.

J. M. Bishop of Thief Rive Falls transacted business in Goodridge Friday evening. He returned on Saturday.

AUCTION SALE FINE.

The auction sale held at the Anstad schoolhouse Wednesday of last week was well attended and all property disposed of. The sale was held by the local school board. The building was bought by L. P. Poppenhagen and the school supplies and books were brot here and will be used in the local schools. The members of the school board from here attended the sale.

Local School Closes for Annual Holiday Period

The Goodridge Consolidated Schools closed Friday, December 22, for the usual Christmas vacation. No school Christmas tree and program was given this year, but each classroom had its individual program and the usual Christmas treat of candy, ets.

The vacation has arrived for the kiddies and teachers and each one is enjoying it to its fullest extent. The faculty left for different places to visit relatives and friends. Professor and Mrs. E. J. Erickson left for Hawley, Minn., and Miss Pearl Bergeson to Lake Park, Minn. Miss Minnie Lindbloom went to Moorhead, Minn., and Miss Thilda Ihle to Newfolden, Minn. Miss Adeline Davids went to Bagley, Minn.

Busy Days for Postoffice Gang During Christmas

The busiest days of the year for the local postoffice has been the past two weeks. The outgoing and incoming mail has been heavy with Christmas packages, and the mail truck to Grygla and other routes have been loaded to their capacity.

But under the efficient and systematic method of distribution under the supervision of Postmistress Payne the work has been wonderfully well handled.

Norwegiaan Lutheran Church

V. O. Aaker, pastor. Sunday, Dec. 31: English services in Goodridge at 11 A. M. Choir will sing. Ladies' Aid at Erie on Wednesday, January 3 and annual business meeting at the Erie church on Tuesday, Jan. 9.

HOME FOR CHRISTMAS.

The past week has been an excellent week for all passenger trains and liveries. Every day during the past 10 days the electric car from Thief River Falls has been crowded with people returning to spend the Christmas holidays at their homes.

THE OFFICERS AND DIRECTORS OF THIS INSTITUTION WISH YOU ALL

A Happy and Prosperous New Year

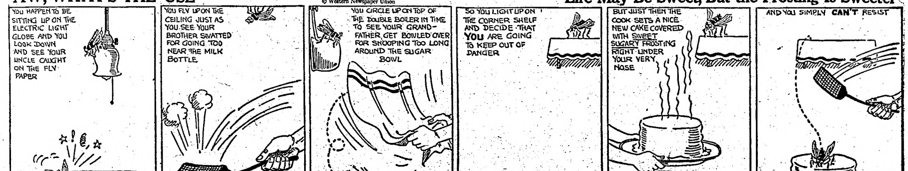
Life May Be Sweet, But the Frosting Is Sweeter



YOU HAPPEN TO BE SITTING UP ON THE ELECTRIC LIGHT GLOBE AND YOU LOOK DOWN AND SEE YOUR UNCLE CAUGHT ON THE FLY PAPER
YOU FLY UP ON THE CEILING JUST AS YOU SEE YOUR BROTHER SWATTED FOR GOING TOO NEAR THE MILK BOTTLE
YOU CIRCLE UP ON TOP OF THE DOUBLE BOILER IN TIME TO SEE YOUR GRAND-FATHER GET BOWLED OVER FOR SNOOPING TOO LONG AROUND THE SUGAR BOWL
SO YOU LIGHT UP ON THE CORNER SHELF AND DECIDE THAT YOU ARE GOING TO KEEP OUT OF DANGER
BUT JUST THEN THE COOK SETS A NICE NEW CAKE COVERED WITH SWEET SUGARY FROSTING RIGHT UNDER YOUR VERY NOSE
AND YOU SIMPLY CAN'T RESIST
VAN ZELM

MEXICO MAKES OIL CONCESSION

Americans Secure Rights To An Immense East Coast Section.

OBREGON HEADS DEAL

President of Southern Nation Said to Have Made Notable Grant to Huge Sum of United States Capital.

Los Angeles—A group of Los Angeles manufacturers, bankers, and oil operators, has obtained from the Mexican government "what amounts to a blanket concession on all government lands in the oil district of the east coast," according to announcement from the promoters.

"It is probably the most important deal of its kind in the world, for it involves 11,000,000 acres of land adjoining rich workings of the oldest established companies in the Tampico and Tuxpam districts," the announcement said.

Interview Mexican President.

It is announced the Los Angeles group will go into the Mexican oil district and operate according to the Mexican article 27 and and under a federal concession on the same royalty basis which established companies have declared confiscatory.

The announcement came after the return here from Mexico of W. W. Wilson, G. E. Moreland and George J. Bushmiller, who stated they had obtained the concession after an interview with President Obregon, who personally went into the details of the enterprise.

Covers Vast Area.

Mr. Wilson said the lands designated comprise virtually all federal oil lands extending along the gulf coast from a point north of Tampico to Tuxpam. The concession also includes the Island of Juan Ramirez, said to have been long sought by American companies.

The concession provides among other things that 40 per cent of the gross production goes to the Mexican government, and that the concessionaires pay five pesos a year a hectar for the lands they will exploit.

Two years are given for exploration and the concession runs for 20 years with provision for renewal.

The exploitation will be financed entirely by Los Angeles capital, it was announced.

DOCKAGE CLUTTERS UP CARS

Thousands More Needed for Shipping When Wheat Not Cleaned.

Washington—Shipment of clean wheat to market by farmers and country elevators would go a great way toward reducing car shortages and effect large savings in the cost of transportation of the grain, says Robert H. Black, in charge of the department of agriculture's grain cleaning investigations.

During the 1920-21 crop year dockage or foreign material in wheat shipped to market was so great, he declared, that more than 14,000 more freight cars were required to haul it to market than would have been necessary had clean wheat been shipped.

Minnesota grain inspection records show that last October Minneapolis received 11,332 cars of spring wheat containing an average of 4½ per cent dockage, or the equivalent of 450 cars capacity.

An educational campaign is being conducted among spring wheat growers looking toward the cleaning of wheat on the farms to reduce this economic loss.

KAISER SELLS WEDDING FOTO

Wilhelm Sells Wedding Picture.

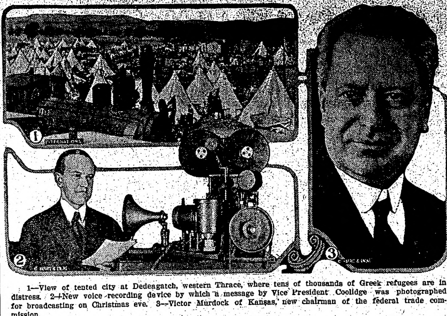
Doorn, Holland.—The former German emperor has sold to a London and New York company the world rights to what he describes as the first official photograph of his recent wedding. The price paid was $10,000.

The picture shows the former kaiser in the uniform of a field marshal. Princess Hermoine is wearing the famous diadem, the wedding gift of her husband.

It is understood that Wilhelm was considerably annoyed when he learned of the profits that had been made from the sale of his portrait by unofficial and unauthorized photographers, and this consideration, together with a desire to augment his own income, induced him to make the sale.

White House Christmas Quiet.

Washington—Christmas at the White House lacked much of the usual spirit because of Mrs. Harding's illness. There were no house guests and no Christmas tree. Neither the president nor Mrs. Harding made any holiday plans. She came downstairs in her wheelchair and presided at the table for Christmas dinner, but otherwise the day was like any other since she was taken ill. To add a little cheer the White House Yuletide wreaths hung in the windows, and there were a profusion of flowers.



1—View of tented city at Dedeagatch, western Thrace, where tens of thousands of Greek refugees are in distress. 2—New voice-recording device by which a message by Vice President Coolidge was photographed for broadcasting on Christmas eve. 3—Victor Murdock of Kansas, new chairman of the federal trade commission.

NEWS REVIEW OF CURRENT EVENTS

Governor Parker of Louisiana Calls Out State Troops in Case Involving Ku Klux.

CONFERENCE ON PROHIBITION

President Consults Fifteen Governors on Prohibition Enforcement—Ritchie of Maryland in Opposition—German Reparations and American Help for Europe.

By EDWARD W. PICKARD

> SECRETARY OF AGRICULTURE WALLACE says the farmers of the United States will get between $1,500,000,000 and $2,000,000,000 more for their crops this year than last, despite the fact that agricultural prices are lower relatively than prices of other things. Is this true of the farmers in your locality?

GOV. JOHN M. PARKER of Louisiana, who has promised to squelch the Ku Klux Klan in his state, took his first radical action in that line last week when he ordered a company of the National Guard to proceed to Mer Rouge and Bastrop, in Morehouse parish, to await his orders. That particular parish has been the field of much Klan activity and the organization was said to be connected with the celebrated Mer Rouge kidnaping case of last August, which the authorities have been entirely unable to solve. Five citizens of the town were kidnaped and two of them, Maj. Watt Daniels and Thomas Fletcher Richards, have not been seen since. The men who were released said the kidnapers "looked like what we know of the Ku Klux as they had hoods and robes." There was a rumor Wednesday that the bodies of the missing men had been found and that this accounted for the calling out of the troops. Another explanation of the governor's action was that residents of Jena, in La Salle parish adjoining Morehouse parish, had passed resolutions asking to be "relieved from the oppression of the Klan."

At the recent conference of governors in White Sulphur Springs, W. Va., Governor Parker sought to obtain assurance of co-operation from other executives in his war on the Klan, but he was rather disappointed in the result.

PRESIDENT HARDING played host for 15 of the governors at luncheon in the White House and discussed with them the problem of enforcing the prohibition law. Fourteen of them agreed with the President that measures must be adopted for rigid enforcement of the Volstead act. The other, Governor Ritchie of Maryland, denounced the law as an intolerable extension of paternalism in contravention of state rights.

"The great majority of people of Maryland believe the Volstead law simply cannot be enforced there," Governor Ritchie asserted. "Our people are imbued with a fine traditional respect for law and established order, and we were effectively solving the temperance question by local option. During that method, when the people of a community wanted prohibition they actually got it.

"The Volstead law changed all this. Our people, in the main, regard it as an unnecessary and drastic federal infringement of their state and personal rights. The lack of respect for law and the actual lawlessness which have resulted is deplorable. The only remedy I see is to recognize that the Volstead law is destructive of the rights of the states and to turn the whole question back to the states, so that each may settle it in accordance with the will of its own people."

These were cited as the chief defects in prohibition enforcement:

1. Federal prohibition officers, numbering 4,000, are not sufficiently numerous to cope with evasion of the law.
2. In many instances federal officers are political henchmen who wink at violations.
3. Until the national government stamps out interstate "rum running" state enforcement will be difficult.
4. State enforcement laws in many states are too lax.
5. Federal judges are too lenient.
6. The metropolitan press is too prone to treat prohibition enforcement with levity.

President Harding said he would call another conference next year, to include new governors, and that a program of federal and state co-operation would be mapped out.

SENATORS opposed to the ship subsidy measure continued the fight in the senate, some trying to force it aside for consideration of the Norris agricultural financing bill and others endeavoring to kill it entirely. Among the latter were McKellar of Tennessee, who introduced an amendment to eliminate the entire government aid section; and King of Utah, who introduced a bill proposing abolition of the shipping board and transfer of its functions to the Department of Commerce.

In the house further consideration of the Green resolution for an amendment to the Constitution prohibiting the issuance of tax-exempt securities, as urged by the President and Secretary Mellon, was postponed until after the holidays. Opponents of the resolution said it was beaten.

SENATOR LADD of North Dakota, Republican, has introduced a resolution calling for an investigation by the senate foreign affairs committee to ascertain the true state of affairs in Nicaragua, the facts concerning American occupation of that republic, in 1910; why American forces still are quartered there, and "the connection between certain New York commercial houses and the Chamorro Clan government of Nicaragua." The resolution set forth various criticisms of the American policy in Nicaragua, declaring that "no state of war exists between the United States and Nicaragua which would justify the permanent quartering of our military forces upon a territory of a friendly, neighborly nation"; that "the executive department has no constitutional powers to maintain such invasion without the consent of congress."

THE naval appropriation bill, carrying a total of $325,000,000, and providing for an enlisted personnel of 86,000 men, was passed by the house on Monday. It includes a request that the President negotiate with foreign powers relative to limiting construction of warcraft under 10,000 tons, though Representative Mondell told the house Mr. Harding needed no urging and would start the negotiations "when he deems it wise and practicable."

AMBASSADOR HARVEY is on his way home from England, having been called for a conference with the President and his advisers concerning the possibility of the United States' bringing about a settlement of the reparations question and thus helping to relieve the financial distress of Europe. The administration, it is understood, insists the reparations settlement must be made without a cancellation of the allied debts to this country. England and France appear to think this cannot or should not be done. Mr. Harvey's advice in the matter is regarded as valuable and necessary.

The European nations are skeptical concerning an American loan, and the French especially dislike the idea that is said to be under consideration, declaring it bears the stamp "Made in Germany." Thomas W. Lamont of J. P. Morgan & Co. asserted in New York that the American people have no intention of making a loan to Germany because that country is not in a position at the present time "to inspire our people with confidence to buy its bonds." At the same time Mr. Lamont stated conditions under which he believed a German loan might be floated in this country at some future time, not a large loan, but enough to enable Germany "to get over the hill." These conditions were, he said, the settlement of the reparations problem and the fixing of a definite sum so that Germany would be aware of her obligation. "Following on the fixation of this sum," he continued, "Germany must set out on a period of deflation. There may possibly come with that a scheme of the allies for the supervision of such deflation, including the administration of Germany's customs. Even if a loan is advanced I doubt if Germany will be lent a sum sufficient to discharge her reparations debt."

UNTIL the allied premiers gather in Paris on January 2 it will not be known what course France will pursue in regard to sanctions against Germany. At present Premier Poincare is standing firm. To American correspondents he said France would not accept any change in the treaty of Versailles calling for the evacuation of the Rhineland within less than the 15 years specified in it. He indicated that his government was strongly opposed to any solution of the reparations question which involved expensive French sacrifices, and that Germany must give new guarantees for future payments in order to obtain a moratorium.

One result of the rumors of American help was the sudden rise of the mark in Berlin. The people expected to find prices correspondingly reduced, but were fooled.

WHILE the experts at Lausanne were drafting the Near East peace treaty the conferees continued to wrangle over the plans for the control of the straits and certain other matters in dispute. Tchitcherin's proposals concerning the Dardanelles were turned down flatly by the allies, and the Russians threatened to take their dollrags and go home. The Turkish plan was greatly at variance with that of the allies, but Lord Curzon was vexed because it was so long delayed and insisted the allied scheme be taken as the basis for discussion. The Englishman used severe language to Ismet Pasha and that gentleman was considerably affronted and said Turkey would not submit to be thus dictated to. Ismet and his colleagues were worried by news from Angora to the effect that Premier Raouf Bey had told the national assembly the Turkish government would not yield to British attempts to run the "steam roller" over them and that it stood squarely on the Turkish nationalist pact. Ismet fears that if he yields too far any agreement he may make will be rejected by the assembly.

It was announced in Angora that the Chester project for railroad construction in eastern Anatolia and for mineral concessions has been accepted and the principal financial arrangements will soon be effected. This concern is largely financed by Americans.

GABRIEL NARUTOWICZ, the recently inaugurated president of Poland, paid the penalty of high position in a country where racial and religious animosities always have caused strife and bloodshed. He was murdered by an artist who is supposed to have been the tool of the faction led by General Haller. His opponents said he was elected by the votes of the Jews and Germans and that he did not represent the real Poles. Last week the national assembly was called together to choose his successor. Stanislaus Wojciechowski was elected to the perilous position. He is a friend of Paderewski and succeeded the pianist as acting prime minister.

DENVER was startled Monday, and the federal law forces throughout the country aroused, by the bold exploit of seven masked bandits who stole $200,000 in paper currency which was being transferred from the Denver mint to a reserve bank delivery truck. The robbers had a revolver battle with armed guards of the mint, one of whom they killed, and escaped in an automobile. Authorities are inclined to believe the band was led by Roy D. Sherrill, train robber, who escaped from the federal prison at Leavenworth in June, 1921.

News of Minnesota

EVENTS of the week throughout the "State of Ten Thousand Lakes" told in brief form

Hastings—Dedication of the new armory here will take place Dec. 22, it was announced.

Glenwood—Building of the large stock barn on the fair grounds here by the Pope County Fair association is nearing completion.

Wheaton—Accidentally shot by her 5-year-old son, Mrs. Emil Simonson, living west of here, is in a local hospital in a serious condition.

Rice—Eighteen tubs of butter weighing 60 pounds each, were stolen from the Farmers' Co-operative creamery here. Clues are scant.

Collegeville—St. Thomas college is to rank as a university when a college of law is added in time for enrollment of students in September, 1923.

Duluth—Edward Clark, 11 years old, was instantly killed near Duluth Heights when he fell from a school bus and was crushed under the wheels.

Minneapolis—Sales of forget-me-nots on downtown streets brought approximately $8,000 for the aid of disabled veterans and their families who are in need.

Two Harbors—More than 150 railroad trainmen attended the annual banquet of Stoneburner lodge, Brotherhood of Railway Trainmen, and ladies' auxiliary here.

St. Paul—Minnesota produced 30,700,000 tons of iron ore during the last year, of which 5,695,910 tons were dug from state-owned land, Ray D. Chase, state auditor, reported.

Minneapolis—A tuberculosis survey of Minneapolis to discover the actual prevalence of the disease in the city will be launched in 1923 by the Hennepin County Tuberculosis association.

Sherburn—With the intention of joining zealously in the state wide fight on tuberculosis among cattle, the Martin County Cow Testing association was organized at a meeting here.

Windom—Charles Hammel of Windom, who bought a pint of liquor from a stranger and retired to an alley, while in Minneapolis, to take a drink, was slugged and robbed of $150, he told police.

St. Paul—Courts have no jurisdiction under the corrupt practises act to determine election contests for members of the legislature, according to a ruling by District Judge J. C. Michael in St. Paul.

Fergus Falls—After seven years a silver dollar with the name of Raymond Aarvig of this city, chiseled upon it, has returned to the parents of the former owner, who was killed in action in France.

Barnesville—C. G. Dosland of Moorhead, defeated candidate for state senator from Clay and Wilkin counties, has instituted proceedings for a recount of the ballots cast in the November election.

Red Wing—Country and city residents will join in protest at the hearing before the state railroad and warehouse commission in the near future, when proposed increases in telephone rates are discussed.

Fergus Falls—United States District court opened here with Judge Andrew Miller of North Dakota occupying the bench in place of Judge Page Morris, who is busy handling liquor cases in St. Paul.

Minneapolis—Edward L. Maher was arrested and held in $10,000 bail on charges preferred by S. H. Holt of the Children's Protective society, which Mr. Holt said were based on a story told him by a girl, aged 13.

Winona—Alfred T. Stearns, 93 years old, one of the oldest residents of St. Charles, Minn., died at his home, slightly more than a week after he and his wife celebrated their sixty-eighth wedding anniversary.

Red Wing—The two platoon system will be inaugurated in the Red Wing fire department Jan. 1. Thereafter the men will put in 11 hours on one shift and 13 on the other, instead of being on duty 24 hours a day.

St. Cloud—About 30 alleged liquor law violators from Stearns county are hailing with joy the fact that they will escape the wrath of Judge Page Morris, when they are arraigned in federal court at Fergus Falls.

Redwood Falls—Recently the state supreme court reversed a decision of the district court of Redwood county which is said to be far-reaching in its importance. T. J. Frederick contracted to construct a county ditch, and during construction heavy rains washed sediment into the ditch, partly filling it. The contract was requested to clean out the ditch before the county would pay him the balance due, which he refused to do. The county won the case in the district court.

Buffalo—George and Jesse Knox of Minneapolis, who went on trial for the murder of Marshal Rudolph Mauer of South Haven, were acquitted by a jury in district court. Fifteen ballots, or nearly 24 hours of deliberation, were necessary before the verdict was agreed upon.

Thief River Falls—The Pennington County Poland-China Breeders' association, organized at a meeting of farmers here. Promotion of hog raising in Pennington county and the introduction of desirable and profitable breeds is the aim of the new organization

Aitkin—The county board is advertising for bids for the erection of a new courthouse.

Luverne—The subject of building a jail for the city of Luverne is now being considered.

Northfield—"Her Husband's Wife," the Carleton college play, was presented in the Grand theater before a full house.

Minneapolis—Two hundred University of Minnesota students were graduated at exercises conducted in the university armory.

Waseca—Directors of the Waseca county agricultural society plan to erect three new buildings at the county fair grounds here.

Minneapolis—Christmas trees—real fir trees from northern Minnesota—are the latest worry of parcel post clerks at the Minneapolis postoffice.

Albert Lea—No issue of the Albert Lea Examiner, Nonpartisan publication, appeared last week, and it is reported the paper will suspend publication.

Withrow—Fire of unknown origin, fanned by a high wind, destroyed the De Wolf feed mill here and for a time threatened the destruction of this entire village.

Duluth—To stimulate the tourist business railroads operating in Minnesota would be asked to set lower summer railroad fares to more points in Minnesota.

Owatonna—Plans have been completed for the holding of a Steele county community cooking institute for women to be held at the National Guard armory here.

Olivia—Judge Qvale in district court here dismissed the action wherein Theodore Bunker, defeated candidate for clerk of court, sought a recount of the ballots.

St. Paul—Ramsey county members-elect to the state Legislature were guests at a dinner at the St. Paul Athletic club given by members of the St. Paul city council.

Fergus Falls—The Fergus Falls American Legion basketball team lost its first game of the season when it went down before the Bemidji firemen by a score of 13 to 11.

Winona—Earl Gardner, near Chatfield, escaped severe burns when his father threw him into a water tank after his clothing had been set afire by an explosion of gasoline.

Barnesville—After trailing by 10 points in the first half of its game with Fergus Falls, the local basketball team took a decided brace and badly outscored the visitors.

Duluth—The only remaining boat on the schedule for arrival at this port before the season for navigation is a freighter, which is coming from Fort William with a load of grain.

Hastings—Fire completely destroyed the Mead Manufacturing company, manufacturers of envelopes and files, and damaged the stock of the Hastings Gazette Printing company.

Luverne—Cattle breaking through a plank floor led H. E. Linnell to locate a secret chamber under the basement of his barn. Moonshine had evidently been kept in the chamber at some previous time.

Montevideo—Elsie Salisbury is free. After three hours' deliberation the jury that has sat in judgment upon her for the shooting of Oscar Erickson, April 1,2 brought in a verdict of "not guilty."

Fergus Falls, Minn.—After seven years a silver dollar with the name of Raymond Aarvig of this city, chiseled upon it, has returned to the parents of the former owner, who was killed in action in France.

Fergus Falls—The Fergus Falls High school debating team won its first debate of the state series on the question of desirability of establishing Kansas type of industrial court in Minnesota. The locals took the negative.

Minneapolis—Responding to a call from neighbors who declared the place was being robbed, the police gun squad surrounded the drugstore of James H. Rosenthal, and captured a man and eight cases of liquor in the rear of the store.

Red Wing—Aleck Mitchell, aged 14 fugitive from the Red Wing training school, was reported in a serious condition at a hospital in Buffalo, N. Y., shot in attempting to escape from police who arrested him as a robbery suspect.

Hibbing—An intercity mitt mix, with Virginia putting her best against the pick of Hibbing's mitten slingers, is being planned by Pal Brown, local fight promoter, at the Hibbing auditorium shortly after the Christmas holidays.

Wayzata—That some justice courts in rural Hennepin county are "courts of revenue" rather than courts of justice, and that some justices of the peace get a larger income than a district judge, were assertions made by R. E. Wakefield of Wayzata, himself a justice of the peace.

Windom—A shipment of nine barrels of Minnesota turtles left here this week on their way to Philadelphia, where they will be prepared for the epicures who think turtle soup the greatest delicacy in the world. It is a new line of industry in these parts and this shipment was the second from this city to Philadelphia. The express alone on the nine barrels was $109.10, the shipment weighing 2,135 pounds.

Minneapolis—Eight children clad in nightclothes were driven into the streets in below-zero weather when a fire caused by an exploding moonshine still partially destroyed the home of Andrew Hebijinsky.

Waseca—The will of the late John A. Moonan, prominent local attorney and a figure of importance in state and district politics, filed in the local probate court, shows an estate totalling $223,000, of which $101,000 was in personal property and the remainder in real estate. The property was divided between his wife and children, according to the terms of the will

The Farmer's Own Page

Timely Comments on Agricultural Topics for Our Readers

FARMERS SAVE MEAT BILLS BY CURING PORK IN WINTER MONTHS

(By Dr. P. F. Trowbridge)
Director, State Experiment Station.

Now is the time to plan for the farm cured pork. Select the hogs you want to kill for your own meat. Do not plan to slaughter the old sows that are to be marketed unless you want a great deal of lard. For the best cured meats select the pigs that will weigh from 175 to 200 pounds at the time you expect to butcher. Do not let them get excessively fat. Thrifty growing hogs about two-thirds fat will make the best hams and bacon, but will not give the highest yield of lard. By giving attention to details it is possible to put up meat on the farm that will be superior to the packing house products.

With present high freight rates no farmer should consider using packing house cured meats. Save the freight on both the live hogs and the cured meats not only for the home needs but put up enough to supply the needs of the local market. By doing this some of the slack time of the winter can be converted into cash. In this series of short articles the writer purposes to give directions with sufficient detail so that the inexperienced may have no difficulty in producing a high quality of home cured pork.

Slaughtering.

The hogs to be killed should be off feed for twelve to twenty-four hours. Stomach and intestines nearly empty are easily handled and there is less bother with gas formation. Let the hogs have plenty of fresh water dnd they will not become to restless.

Tools.

Have plenty of tools all ready and plenty of hot water. An inverted wagon box or planks on the bob sleighs will serve the purpose. For scalding, a small galvanized iron watering trough is most convenient. A better job of scalding can be secured if the entire carcass can be in the water at once. If a barrel must be used it should be set at an angle with the scraping platform on a level with the top of the barrel. A shovel full of wood ashes, a pound of quick lime, two tablespoons full of washing soda, or one tablespoon full of lye should be used in scalding water to loosen the scurf.

Have two or three sharp butcher knives, straight or curved blades, a hog hook, gambrel for each hog to be killed, and scraping tools. If you do not have regular bell-shaped hog scrapers use dull knives, hoes, big spoons, or corn knives. You should have a thermometer for controlling the temperature of the water.

Bleeding.

The hog will bleed out better if you have block and tackle provisions so you can hoist by one foot before bleeding unless it is too wild or cross for handling. For ground sticking, if the hog is gentle enough, grasp the fore foot opposite and with a quick jerk toward you rool the hog on his back stand straddling the hog facing the head, holding both fore feet. The person sticking should stand in front of the hog. With the left hand on the lower jaw hold down the head. Make a short cut through the skin just in front of the breast bone. Set the point of the knife just in front of the breast bone with the blade of the knife toward the hog's head. Let the knife slant slightly toward the rear of the hog and push the knife in so as just to miss the breast bone. withdraw the knife with a slight forward cutting motion. Do not turn the knife in the throat, nor make a long slash. Be sure the cut is made in the middle line of the hog so as to avoid a shoulder stick. Just under the breast bone the arteries and viens from each side of the neck and shoulder join to connect with the heart. This sticking aims to sever both the artery and vien at this junction and will let the carcass bleed out rapidly. When the hog has been struck let it get on its feet if it will as it helps the bleeding. Before scalding wash off any blood clots with cold water. Clotted blood prevents a good scald. As soon as the hog is killed put the hot water in the tank or barrel with the lye or ashes and temper with cold water to about 150 degrees (not over 155 degrees). One who is experienced can test the temperature quite well with the hand, but it is better to use a thermometer. A hotter scald will set the hair unless the carcass is removed the instant the hair will slip. With the slow scald of 150 degrees there is no danger of setting the hair. If a tank is used lay a rope across the tank so the rope will be under the carcass in the water. By crossing the rope the carcass can be rolled in the water with but little effort. The rope can be used to pull the carcass on to the scraping platform. If a barrel is used put the hog hook in the lower jaw and keep the carcass moving, sousing and turning, as you will not get a good scald where the carcass rests continuously against the sides of the barrel. As soon as the hair slips easily, especially around the feet, pull out of the water and hook the hog hook in a gambrel slit in a hind foot. Scrape as rapidly as possible, first around the head and feet.

If you have convenient facilities for hoisting it will pay to hoist the hog head first, using hog hook in jaw. You can do a better and easier job cleaning and washing the head and shoulders. With a sharp knife shave the hair not removed by the scraping. Wash with hot water and then with cold water.

Expose the tendons in the hind feet by cutting a long lengthwise deep slit in each foot. Be sure to get the gambrel under both tendons. A single tendon will not support a heavy hog.

Opening the Carcass.

When the hog is thoroughly cleaned, and hanging head down, wash the hands and the knife ready for gutting. Stand squarely facing the belly of the hog and with the knife grasping for a strong downward cut open exactly in the middle between the hams to the pelvic bone. If you have cut exactly in the middle you can split the pelvic bone with the knife, otherwise you may be obliged to use the saw or hatchet. When you have split the pelvic bone cut on down the belly to the throat but not deep enough to expose the intestines. If you have a barrow dissect out the glandular tissue around the penis opening. Also dissect out the penis up to the hams but do not cut it off. On the breast cut deep enough to reach the breast bone.

Splitting the Breast Bone.

Stick a long bladed knife into the chest of the carcass through the opening made in sticking. With the point of the knife resting on the back bone for leverage, cut upwards through the breast bone. Be careful and do not cut up far enough to cut the stomach. Or open into the chest at the upper end of the breast bone just below the stomach; push a scythe blade through this opening down into the throat, pull on the blade so as to cut through the breast bone.

Cut out the Bung.

If you have a gilt or sow loosen the uterus up where it joins the rectum (bung). Grasp this (or the penis if a barrow) with the left hand and pull so as to give moderate tension on the bung. Hold the knife handle up and for cutting away from you. Cut backward alongside the bung until the knife strikes the backbone. Cut close to the bung, the tension helps keep from danger of cutting it. Now cut on the other side of the bung and turn the knife to cut the bung free from the backbone. Put the handle of the knife (blade out) into the belly and by protecting the guts with the thumb and forefinger cut down to the breast. Pull the bung forward and with the knife loosen from the back and kidney fat. Be very careful not to cut the small intestine where it makes a sharp bend close to the rectum (bung). Grasp the mass of intestines so the load balances in the left hand around the gillet close to the stomach. Cut the diaphragm clear through on both sides and take all the internal organs out at one time, cutting off the gullet and windpipe at base of the tongue. If you are gutting a heavy hog it will be easier to remove the intestines first.

Cleaning the Internal Organs.

The internal organs should be cleaned at once. Trim off all fat from the organs of the thorax (lung cavity) and from the stomach, using the knife. Split the stomach, turn wrong side out, and wash well with clean water. Scald at 150 degrees until the inner membrane can easily be removed. The meat thus cleaned makes excellent sausage stock. Or if the stomach is to be used for stuffing headcheese, make only split enough to get out contents and then turn inside out for cleaning and scalding. The lean meat of the gullet and the diaphragm makes good sausage meat. The inner lining of the gullet is a fine sausage casing.

Liver.

Look the liver over to see that it is free from hard lumps (abscesses). If wholesome, Carefully cut off the gall bladder and chill the liver in cold water. If the spleen is not wanted as an edible organ save it with the lungs for chicken feed.

To run the guts start at the stomach end. Hold the fatty tissue with the thumb and finger close to the gut and with the other hand pull the gut loose from the fat. Have the guts hang over the edge of the table so that the broken gut will not smear the fat. The fat should be chilled at once in cold water. Unless the hog is very fat it does not usually pay to run the big guts.

(Continued next week)

DAIRY FACTS

Some Good Dairy "Don'ts"

Don't forget to wipe the cow's udder and flanks before milking.

Don't milk with wet hands.

Don't run cold milk through the separator.

Don't forget to cool the cream immediately after separation is completed.

Don't mix warm and cool cream.

Don't put milk or cream into dirty vessels.

Don't forget to wash the separator after each separation.

Don't separate the milk without first straining it.

Don't fail to operate the separator according to directions.

Don't expect the cream can to reach destination unless it is plainly addressed.

Don't feed dusty hay or ill-smelling feeds just before milking.

Don't expect the milk or cream to be cooler than the surroundings where it is kept.

Don't skim too thin cream.

Don't expect to get top price for cream unless cows, stable, utensils, separator, and milkers are kept clean.

Don't forget that there is good money in dairying if it is properly done.

GIVE HERD BULL GOOD CARE

Animal Entitled to and Needs as Much Attention as Milking Herd—Feed Some Grain.

Cost must not play the important part in caring for the herd bull, which needs as much attention as does the milking herd. When six months old the bull calf should be separated from the heifer calves and fed a ration that will keep him growing rapidly. At this age from four to eight pounds of grain daily, depending on his size, is the amount recommended by dairy specialists of the New Jersey State Agricultural college.

Most dairymen prefer to feed bulls the same grain ration that is fed to the other growing stock. But in addition, a good leguminous roughage is necessary, the amount depending on the size of the animal. Mature bulls will often consume 15 pounds of hay daily. Silage may be fed to the growing bull in small amounts, and up to 15 pounds to a mature animal.

Herd Bull Needs as Much Care as Milkers.

A common grain ration for the mature bull after complete growth is:

Three parts cornmeal.
Three parts ground oats.
Three parts wheat bran.
One part linseed meal.

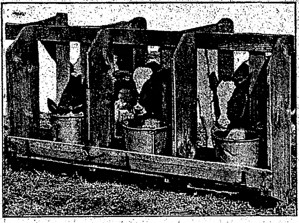
Along with this ration should be fed leguminous roughage and some corn fodder or stover. To keep the bull in excellent condition, but not fat, exercise is a factor that must not be forgotten. If the bull cannot have access to a yard at all times, he should at least be tied outdoors each day and allowed to go back and forth by a cable.

NEW DAIRY FARM INDUSTRY

Co-operative Shipment of Surplus Cream in Georgia County Makes Large Growth.

In the spring of 1921 seven farmers in a Georgia county were induced by the county extension agent to make a trial co-operative shipment of 20 pounds of surplus cream. In June, 1922, 14 months later, according to a report made to the United States Department of Agriculture, this new farm industry had grown to the extent of 10,000 pounds shipped from that county during the month.

GOOD CALF STANCHION EASILY MADE



Calf Stanchion Designed by the Dairy Division of the Department of Agriculture.

Farmers and dairymen are well acquainted with the disposition of young calves to upset pails of feed, and when several young members of the bovine family eat together their respective appetites are not easily regulated where the self-help or cafeteria plan of feeding prevails. Manufacturers of mechanical devices have capitalized this condition and there are on the market steel stanchions for inclosing calves at mealtimes. These appliances, however, entail an expenditure of money which the dairyman may object to in the event that makeshift arrangements are to be found.

May Be Built Cheaply.

K. E. Parks, dairy engineer of the dairy division, United States Department of Agriculture, has designed a calf stanchion that may be built by the farmer or dairyman at a cost of approximately $2. This home-made unit is in use at the experimental dairy farm at Beltsville, Md. The stanchion can be built singly or arranged in series so as to accommodate as many young animals as are maintained on the particular farm employing this convenient device.

Common pine lumber is used as the construction material, the unit at the government farm requiring about twenty board feet of lumber. A space of two feet is allowed for each stanchion where the arrangement is in series. When young calves are thus temporarily imprisoned, the feed pail is immune from the kicking tendencies of the future dairy cow and a group of these members of the bovine family may take luncheon together without there being an evidence of greediness of any calf to the displeasure of another. Calves from the time they are given access to the feed pail until three months of age may be caged in these stanchions when partaking of their meals. After the elapse of 90 days of their life, they can be placed in pens.

Blueprints of these stanchions may be had by addressing requests to the dairy division, United States Department of Agriculture, Washington. Already, in testimony to the remarkable cheapness and value of these home-made stanchions, there are hundreds of them in service, faithfully duplicating the structural outline of the dairy engineer of this federal department.

CUT-OVER WOODLOT IS FAVORED

Value Increased in After Years by Taking Out Defective and Undesirable Trees.

The owner of a farm woodlot who is looking to the future as well as to the present will prefer what is known as "an improvement cutting" to a less systematic harvesting of his timber crop, forestry specialists declare. They say that it will pay the farmer to leave standing a considerable percentage of those kinds of trees which he wants to encourage in his woodlot. These trees will seed the soil and fill up the gaps left by the cutting.

All logging operations should be made with the preservation and extension of the stand of young growth in mind.

It is considered a good practice at the first cutting to remove trees like the chestnut, aspen, ironwood and beech, since they are considered less desirable and satisfactory in New York woodlots.

Stag-headed, batt-injured and heavy foliaged, limby trees of every variety may likewise be disposed of at the first cutting.

White pine, white ash, basswood, red oak, hard maple, tulip, poplar, and in some cases even hemlock should be encouraged.

A special warning is given against making the first cutting too heavy. It is said to be better to make this first cutting most carefully and if desirable to go over the woodlot again in five or ten years. If the first cutting is too heavy, it may result in a tangle of brambles which will retard all development.

LIME REQUIRED IN GARDENS

Scatter Shovelful or Two of Material Into Compost Heap—Easy Way of Applying.

As the leaves, lawn clippings, vegetable leaves, and stalks are raked up and thrown into piles to be composted during the winter, scatter in a shovelful or two of lime. Lime is often needed in gardens more than fertilizer materials, and this is one of the easiest ways of applying it. Ground limestone may be bought at a low price at building material yards.

BURN RUBBISH FROM GARDEN

Excellent Plan to Destroy Injurious Insects and Prevent Many Plant Diseases.

Many plant diseases and injurious insects live over winter in the dead stalks of garden vegetables and other refuse left after the cropping season is over. The best plan is to rake all this material together, and when dry set a match to it. While some organic matter will be destroyed, much trouble for next year will be obviated.

DOES NOT CAUSE ANY SOUR SOILS

No Ground for Common Belief That Use of Acid Phosphate Will Prove Injurious.

Contrary to popular belief, the use of acid phosphate will not produce acidity in the soils, according to a statement made by the workers in the field of agronomy at the New York state college of agriculture at Ithaca.

The college long has advocated a greater use of acid phosphate with or without manure for fertilizing soils. Some farmers, however, have feared that to do this would mean that greatly increased quantities of limestone or lime would then be required for the growth of clover and alfalfa.

These fears, however, are groundless, it is stated. Indeed, experiments made at Rhode Island show that acid phosphate actually served to reduce soil acidity. Dr. Burgess, who made the test, declares positively that "there is no foundation for the statement that soils will become more acid from the continuous use of acid phosphate."

The soil specialists state, however, that sour soil should be limed in advance of the application of acid phosphate. "Do not fear soil acidity from the use of acid phosphate," conclude the workers at Cornell, who add that with legumes and manure about 200 pounds of acid phosphate a year, on an average, when used for grain and hay crops, give excellent results.

Treating Young Boar Pigs.

Boar pigs should be castrated shortly before weaning time, but if they are to be grown for breeding they should be separated from the sow pigs very shortly after weaning.

Young Bulls Underfed.

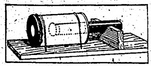
Many young growing bulls are underfed, whereas the aim should be to get early, steady and rapid growth that guarantees size, stamina and vitality for the mature animal.

POULTRY

SIMPLE ELECTRIC EGG TEST

Device Is Most Desirable Piece of Equipment for Dealer—Pays to Candle at Home.

The egg tester as a necessary or desirable piece of equipment is receiving more attention than ever before. It has always been a handy thing for the farmer and housewife, and an absolutely necessary thing for the egg dealer. With the passing of laws by states and the establishment of regulations by health departments, candling is becoming compulsory for all egg buyers. This means that the country store which formerly accepted at a flat price whatever the producer brought in is compelled to be more particular. It means that the producer who brings in eggs, will decide that it pays him to candle his eggs at home.



An Egg Tester From Flashlight and Can.

For the general farm producer, the tester shown, improvised from a flashlight of the familiar long, round type, is entirely satisfactory. It furnishes a good, intense light, making testing a task without undue eye strain. Moreover, the fact that the light is under control, and is only "on" intermittently, is a real advantage, as it prevents the testing device from becoming hot.

A quart tin can is used, in the bottom of which, centrally, is cut a round hole just large enough for the flashlight to enter. Over the open top end of the can is stretched tightly a piece of felt cut from an old felt hat. In the center of that felt piece is cut a one and one-fourth inch hole. This is the egg hole.

For the base an inch board several inches wider and longer than the tin can is obtained, and the tin can fastened to this with two pieces of light wire, as shown. Parallel with the bottom end of the can, an inch board as high as the center of the hole is attached crossways, and a slot cut in it where the flashlight, placed through the can hole to within an inch of the felt end, can rest.

It will be noted that the flashlight is not made an inseparable part of this egg tester. When not required for this purpose it can be used for any other.—J. T. Bartlett, in Farm Mechanics.

POTATOES AS CHICKEN FEED

Fed to Best Advantage When Boiled or Steamed—Should Be Supplied in Limited Quantities.

Potatoes should be boiled or steamed before being fed to fowls and are fed to best advantage when mixed with mash. Since potatoes are quite fattening, they should be fed in limited quantities, preferably to laying hens or growing chickens, and should be used in connection with other feeds. One hundred hens will consume about ten pounds of cooked potatoes daily, and these potatoes can be used to replace cornmeal in the poultry mash. If so used, an equal weight of potatoes and mash may be mixed together. A laying mash for this purpose may be made of: One part meat scrap, one part middlings, two parts bran, and four parts potatoes, by weight.—Extension Service Colorado Agricultural College.

Overcrowding Causes Roup.

When overcrowding conditions prevail, unless the house is exceptionally well ventilated, one of the most frequent results is an outbreak of roup.

POULTRY NOTES

The hen with capacity and vigor should be retained.

* * *

A good layer has a large, open, moist vent.

* * *

Movable, separate nest boxes are best.

* * *

Plowing or spading up runs is in order any time.

* * *

There are poor laying hens in all breeds.

* * *

A good layer has a large abdomen covered with soft pliable skin.

A BOY TO HIS FATHER.

Hey there, you boy in high school, what's that book under your arm?

English history?

Well, there's a story in it that every boy ought to read and remember if he forgets whether Lancaster roses were white or red or whether old Henry VII got married or lived single all his life.

In one of the old-time history books there was a picture, one of those old wood cuts which endeavored to depict the scene. Maybe there is one right here in the Goodridge schools. It was like this:

A boy about your age knelt before his father. He was a prince and his father a king. Both were in the armor of the period and armed with the weapons of the time. A great battle was toward. The fate of nations hung on the outcome. The boy kneeling before his father with bowed head was saying to his father:

"When this day is over my father shall not be ashamed of his son."

It was so. Thus he went into his first battle. The boy had been trained to arms and when arms was the business and profession of rulers. He went to his trial. And when the day was done his father was not ashamed of his son but proud beyond measure.

The untried lad had been tested in the heat of trial. He had borne the acid test. His warrior father was not ashamed of his son.

That was hundreds of years ago, but every father's son in Goodridge can read of it if they wish in our own libary at school. The father and the prince and all that array that met to victory or defeat that day are long since dust and the swords and armors have long since rusted away.

"Their swords are rust, their bodies dust, their souls are with the saints we trust," runs the old rythme. The very hills have changed since then; but something lives and shall always live when the last memory and record of that battle shall have been lost—the resolve of youth that it shall not shame its fathers and the pride and love of the fathers who know the worthiness of their sons.

Boy, there is always a battle forward, a fight to win or lose. The schools are simply the gymnasia of preparation for the big battle that lies ahead of you and all boys. Its dangers are as imminent as those that awaited the prince who knelt to pledge his father. Out there the battle joins under the rules of war and chivalry. What shall you say to your father?

When you buckle on your armor and go out to the fray keep in mind the young prince. Like him resolve that your father shall never be ashamed of his son. Keep the resolve. Perhaps a kingdom was won and lost that day amid the clashing of swords and shining lances and under the storm of archery; but the greatest thing that day was the lad beside his father making his vow—and keeping it—that: "My father shall not be ashamed of his son."

Make it, boy, make it—to your own father—and keep it as did the pirnce.

And let the father bear in mind that the pledge is from a prince to a king.

THE REVOLT OF THE FLAPPERS.

The world has seemingly joined tongues in one mighty clamor against the Flapper!

She has done for nations what all the Leagues couldn't accomplish—has cemented them together by giving them a common condition to denounce.

All the countries of the world are stirred today by the advance of young girls into perilous shoals, by the fact of their sudden importance. They are important members of society; otherwise they wouldn't make such a fuss about their doings—and this constantly holding them up to the limelight does nothing to make them more humble, either!

The young girls of today practically govern the household. Dad may fondly think he's boss, but nobody else is deluded; and he, too, finds out the truth when he attempts to coerce his clever, wilful daughter into what he considers the path of duty. She tells him what color of suit to buy, often selecting it for him; if she says wear yellow gloves, he'll make a terrific fuss about it—and step out next Sunday thus accoutered. She chooses the movies or other amusements for the family; the whole household is run to suit her comings and goings.

If you deny this, it's because you have no little Flapper flapping in your home! Those who have will groan—and admit the truth of The Banner's statement.

She does as she pretty well pleases!

For she is omnipresent; you can't miss her, if she's anywhere about. The girls are certainly making their mark.

Why, even brothers, who a few years ago viewed their existence with lofty disdain as a necessary evil, now are introducing them to their friends.

Think of that!

And isn't it better fo a girl to be taken about by her brother than to be snubbed by him and stay at home? Or perhaps find her fun—for find it she will, by fair means or foul—in some clandestine way?

A CERTAIN RICH MAN.

A rich man died a few weeks ago in honor and respect. And most of us will have to admit that its pretty hard for a man of wealth to leave this world that way.

Many business houses draped their doors with the insignia of mourning and regret. The press comment was invariably praise and appreciation of a good man gone whose work had been long continued and well done. Yet he had been a most successful garnerer of wealth.

It is worth the investigation of the younger men and their elders for the matter of that to learn something of the fundamentals upon which a man may build a highly successful business career and yet remain a friend of all the world and hold all men as his fiends. It is not infrequently otherwise in the cases of great financial success.

Hearken, then to the code of John Wanamaker.

On July 11 of this year, his 84th bithday, Mr. Wanamaker was asked for a message to the business men of the country.

"My message," he said, "would be to repeat what an old friend of mine said: 'Never look down, but look up; never look backward, but look forward; do not do much looking in, but look out.'"

On one occasion the Bridgeton, N. J., Young Men's Christian Association sent a letter to Mr. Wanamaker asking for a sketch of his life. He replied by telegram as follows:

"Thinking, trying, toiling and trusting in God is all of my biography."

Nothing elaborate about that, is there?

Wanamaker was known as the world's greatest advertisers, but The Banner does not essentially eulogize the man for this attribute, but rather because of his remarkable career as a thinker and a man.

A few of Wanamaker's aphorisms are:

"A great ship or a great store must just go on and do great things and get bigger by good service and never too big to correct its faults."

"We are not the mere automats of business. We are men and women reaching out hand and heart to make life easier and to make the world happier."

"I have tried to get as much land as I could and build the greatest building I could, but I have always been willing that every other man should do the same."

"Business, to my mind, is the means to exchange knowledge, labor or skill for a living."

"Service is not so much a thing to talk about as it is a thing to perform."

"Courtesy is a coin that we can never have too much of nor ever be stingy with."

"I can forgive a man who does me wrong, but not until he makes the utmost restitution possible."

"I believe it is true that every baby is born with a song in its mouth."

"I never look at the sunrise that it does not give me a sunrise feeling."

"The strength of men and stores and govenments must be in adherence to principle."

The Banner would call to mind the Soldiers' and Sailors' club maintained on the Rue la Madelaine in Paris as bearing out many of the creeds of Mr. Wanamaker. Here the atmosphere was ever permeated with a desire to do good, characteristic of the man who furnished the money to parcel out comfort to mud-soaked and heart-sick soldiers just back from the campaign.

There never was a soldier in the Expeditionary Forces who asked a favor from the matrons there that wasn't complied with.

The reason for it was Wanamaker and nobody else.

A skuttle of coal would have made a good Christmas present. But pretty

"Boston singer arrested!" But not for singing. A fur piece was missed.

The Banner don't much like the idea of the Ku Klux. Neither does it fancy moonshine. Really, we don't know!

If you're going to make any New Year's resolutions, don't make them too drastic—and they won't be so hard to keep.

"Is the earth getting hotter?" is a headline in an exchange. We think so now that we've soaked 50 bucks into an oil wildcat!

"Eighty-five pearls found in a single oyster," says a headline. We might have known his wife would have worn 'em were he married.

A real, honest to goodness Kentucky moonshiner who made whisky for the sole purpose of evading the revenue stampers wouldn't scald hogs in the stuff that flows in these parts.

Imagine a murdering moonshiner wishing you a Happy New Year and an ante-bellem nigger stealing from his master and you've got both extremes—very much alike.

There is not, after all, a great deal of difference during youth between an Edison and an Orie Coss. A fair comparison could more likely be made between a Brunswick and a Victor.

"The liquor licenses have a tendency towards lowering the profession." So says Dr. Head of Wheaton, Minn., as he surrendered his liquor prescription permit. "Doc" Head's a length, a neck and a head ahead of many of his kind.

A visitor to Thief River Falls on Christmas eve spent all but 80 cents of his money for moonshine, and his wife and kids went without their gifts. We'd hate to be that moonshine poison peddler after those kids get big enough to know a right uppercut from a cross-counter.

OUR EXCHANGES

School Girl Injured in Laboratory.

Aitkin Independent Age: Jessie Dennerly, daughter of Mr. and Mrs. William Dennerly, was painfully burned about the face, neck and chest on Wednesday morning in the chemical laboratory of the high school when two alcohol lamps were overturned and exploded. Jessie's eyebrows were singed and her hair caught fire. Otto Geyer, a student of the class, rushed to her assistance and extinguished the fire, which was also burning her middy blouse. She was taken home and a physician called and she is resting as easily as can be expected.

To Be Tried For Murder.

International Falls Press: The case against John Moe, alleged murderer of Coral Brown, will come up for trial at the present term of district court. According to testimony taken at the coroner's inquest, Moe had been living with and supporting Mrs. Beth Moe, the deserted wife of his brother, who left her about five years ago. Sometime near July 4, Brown met Mrs. Moe and becoming infatuated with her was to have married her on Wednesday following Sunday, July 9, the morning of which Moe is supposed to have shot Brown. Jealousy is the alleged cause.

Must Be Bad in Aitkin.

Aitkin Age: A law-enforcement meeting will be held in the court house assembly hall Wednesday evening, Dec. 30, at 8 o'clock. All the men and women of the county who stand for the enforcement of existing laws are urged to be present. The call is based on the assumption that the public is responsible for the enforcement of law as well as public officials. A general discussion of the situation that confronts Aitkin will be the order of the meeting. This meeting is called by the ministers of Aitkin.

Big Development Planned.

Cloquet Pine Knot: An outstanding feature of the news of northeastern Minnesota this week has been the announcement of the further development of the St. Louis river and its tributaries by the Great Northern Power company. Oscar Mitchell of Duluth, attorney for the power company, has just returned from New York, wheer he made the necessary arrangements for the financing of $50,000,000 of development work by the company.

THE CIGARETTE LAW.

The cigarette habit among school boys is rapidly spreading in spite of the efforts of school officers and parents to check the evil. A school boy who smokes is not only endangering his own health, but he is placing a tension upon his education and future activities which he can never hope to live down. Dealers who sell cigarets to school boys are reminded of the existence of a very stringent state law covering the subject, which is here appended:

"Any person under 18 years of age, any minor pupil, who shall smoke, or use cigarets, cigars, or tobacco in any form on any public highway, street, alley, park or other lands used for public purposes, or in any public place of business shall be arrested by an officer of the law, who may be cognizant of such offense; and further, it shall be the duty of all such officers to arrest on complaint of one citizen, to arrest such offenders and take them before the proper court. The court shall impose a punishment at its discretion in the sum of not to exceed $10, or imprisonment in the county jail not to exceed five days for each offense; provided, if said minor person shall give information which may lead to the arrest of the person or persons violating section two of this act, in giving or selling to, or in any way furnishing said minor person tobacco, and shall give evidence as a witness in such proceedings against said party or parties, the court shall have power to suspend such sentence against such minor person."

THE POWER OF FLATTERY.

"You seem able-bodied and healthy," she remarked coldly; "you ought to be strong enough to work."

"True enough, lady," he replied, "and you seem beautiful enough to be in the movies, but evidently you prefer the simple life."

Her cold look vanished and she gave him a good meal.

PRACTICE NEEDED.

There wasn't a much tougher outfit in the whole state of Wyoming than the Flying V, and it was with some surprise that the cowboys had gathered together and heard the boss proclaim:

"I want you fellers to get out yer guns and practice up a bit."

"What fer?" demanded the chorus.

"Well, we're goin' into Chicago with a train of cattle in a week or so, an' we wanta be able to at least hold our own."

NEW YEAR!

By REV. H. LUTZ.

Text: "Heaven and earth shall pass away, but My words shall not pass away." Matth. 24,35.

"Swift to its close
Ebbs out life's little day,
Earth's joys grow dim,
Its glories pass away;
Change and decay in all around I see
O, Thous, who changest not,
Abide with me."

In these simple yet eloquent words the poet expresses the thoughts which must come to every thoughtful person at the end of an old and the beginning of a new year. New Year—this means that another year has been added to the decades that are past, and that never will come again. It means that another 12 months of opportunity to do good are gone forever, that another 365 days of grace have been granted us by the merciful Father, and are now spent. It reminds us of change. The old year passes away, and the new year comes.

And thus it reminds us that everything in this world is changeable. Nothing lasts. We see this in our daily life. But since it is always before our eyes, we do not always keep it in mind, therefore it is good that at times we are more forcibly reminded of it than usual. Such a time is New Year.

Many a person labors and saves and gets together a fortune only to have it taken from him by some terrible catatrophe.

Another climbs slowly higher and higher up on the ladder of fame only to fall down into the mire of contempt and dishonor.

Today I think I have friends who will remain true to me, happen what will. Tomorrow they may have heard something bad about me, believed it whether it was true or untrue, and became enemies.

One day we are happy and carefree and full of joy and confidence, the next we may be despondent, worried, sorrowful.

Yea, as we behold and contemplate all things in this world, we cannot help but feel that this earth is an immense death chamber. All is moving clowly, but certainly, to its end. The fragrant flowers of spring become the dead and decayed substance of the fall. The rich family of this generation is the poor of the next, the poor boy develops into the millionaire, the sons of great men are hardly known. The flower of youth gives way to the trength of manhood, and it in turn must make room for the infirmity of old age. Today a house is built and is the pride of the town, in a few years others have been erected, which put it entirely into the shade. But why multiply instances. If we did not know it from experience and observation, we should know it from the Word of Truth, that all creatures will pass away. In our text we are told that even heaven and earth, the things which seem so firm and unchangeable, will pass away. On what, then, can we rest our trust and hope? Surely these things which last but a short time, and are not at all dependable, are not a good foundation on which to build the structure of our happiness and peace!

Thank God, in the midst of this changing, decaying, dying world there is one solid foundation on which to build, one everlasting element, one indestructible possession, and that according to the words quoted above is the word of God. This word and what it threatens and promises will not pass away, but will remain forever. Whoever, therefore, takes this word to heart, accepts and believes it, need not worry about the changes which take place; he need not worry about death which will claim him one day, too, for this word promises that all those who have forgiveness of sins in Jesus the Savior will live in glory forever.

Would to God that this new year become a new year also in this respect, that at least all who call themselves Christians give less attention and time and worry to the things of this changing, unstable world, money, honor, pleasure and wickedness, and more to the everlasting Word of God. Then it would be to them all what the writer wishes all his readers, namely, A BLESSED NEW YEAR.

Amen!

Heartiest
Greetings

TO ALL OUR FRIENDS AND CUSTOMERS WE WISH TO EXPRESS OUR SINCERE APPRECIATION OF YOUR PAST BUSINESS AND TO WISH YOU A VERY HAPPY AND PROSPEROUS NEW YEAR

G. C. GULRUD

GOOD ROADS PLANS TO FEATURE SESSION

Measures to Provide More Adequate Highways to Be Features m State Legislature of 1923.

Highway Commissioner Babcock has made the following recommendations to the 1923 road program:

Revision of motor vehicle taxes to remove inequalities without increasing average car tax above $18 or reducing revenue from that source.

Authorizations of first issues of trunk highway bonds of $10,000,000 each for 1923 and 1924 and to allow all counties equal benefits from reimbursement law.

Other laws to speed trunk highways improvements through paving of the streets in small towns willing to pay interest, to allow best and unrestricted uses of available funds, to require all vehicles on highways after dark to carry lights, to reduce numbers of tax exempt cars and to prevent traffic prosecutions for private gain.

Measures of immediate benefits to be gained from present outlays for better roads without any increase in taxation and of savings by automobile and truck owners of money which otherwise must go for extra gasoline, tires and car upkeep will be largely determined for the next two years by the Minnesota legislature which will open its session next Wednesday in the capitol at St. Paul. Special interest centers in the highway legislative program, according to reports from all parts of the state.

Expressing complete confidence in the plain, good business policies to be urged by the highway department and in the judgment of both senate and house members, Charles M. Babcock, state highway commissioner predicated favorable action on the good roads proposals.

"The legislators know the public demand for more adequate highways," said Commissioner Babcock, "and the highway department will undertake to show that they can be built on a bigger scale for use now and that they will pay for themselves many times over. The proposals are so simple and plain that a 10-year-old school boy can see the wisdom of adopting them.

"The bond plan will life the burden of paying in these times of high taxes the whole cost of road work which will serve for many years and will mean further reductions in road taxes. It will not make the past pay for roads which it should have built, but it will pass on to each future year its fair share of the cost of highway improvement. All this will be without increasing taxes or net costs of better roads."

The commissioner pointed to the official record of nearly $1,300,000 decrease in road taxes the first year after the new program transferred to the state and from the counties the big expense of main highway improvement and maintenance. It is additional evidence that the new plan is fulfilling every promise made for it and the purpose now is to obtain still greater and more immediate benefits from it, he said.

"Legislative delegations from the three large cities look with favor on the highway proposals at their preliminary meetings," continued Commissioner Babcock, "and when the localities paying most and receiving the least directly from the trunk highway program take that attitude, there is more reason to expect the full support of members from the country districts.

"St. Paul and Ramsey county are to seek legislation for bond issues of nearly $7,000,000 for street and highway betterments, only a small part of which can bring state reimbursements. Minneapolis and Hennepin county also place high value on adequate roads for all Minnesota. Although only 70 miles of the 7,000-mile trunk highway system are within Hennepin county, it pays nearly one-fifth of the total motor vehicle taxes of the state. They pay six times as much state highway aid as they receive, and the difference of nearly $300,000 also is used on roads in other counties.

Further, Hennepin county is transferring a part of its state aid to nearby counties and Minneapolis is helping privately to carry through other improvements on roads serving the city.

"The large centers taking that liberal stand," said Mr. Babcock, "the other parts of Minnesota cannot afford a don't-want-your-help attitude. Their members in the legislature when they correctly understand the plans, will make the most of the present advantage, knowing that every dollar used on the trunk highways brings nearer the improvement of every part of the system. And that accomplished, Minnesota will go forth with a highway program which will attract national attention despite the bigger bond and other funds available in some states."

The highway commissioner repeated that once understood, the highway proposals have claimed universal support and attributed to this his confidence that legislative action will be favorable.

FOR IMMEDIATE CONSIDERATION.

Within 60 days after the passage of those state laws made possible by the good roads amendment more than a thousand men with a thousand teams were patrolling Minnesota roads.

From that moment Minnesota roads began to improve and that improvement has continued until today they are the talk of the touring world.

It was quick action that brought these immediate results; quick action and good judgment in doing the thing first that would bring the necessary relief at once. The quick action was taken by C. M. Babcock, state highway commissioner.

Mr. Babcock now asks for some more quick action by the state legislature and the people of Minnesota. He asks for the sale of some of those road bonds authorized by the good roads amendment in order that improvements may be pushed with all speed and the program of trunk highway improvements may be fulfilled.

These are to be long-time bonds. They are to pass some of the expense of building Minnesota roads along to the coming generation which will reap far more benefit fro mthem than can ever be the portion of this generation.

Mr. Babcock is entitled to the immediate consideration of his suggestion and it ought to be adopted.

(From the Minneapolis News.)

"A Coming Artist—Hone Clement has received his new flaggolet from the mail order house and practice is already under way. Neighbors are plugging their windows on the Clement side and real estate in that vicinity has dropped 70 per cent.

NADINE LA VITTE

SYNOPSIS.—The time is the late 60s or early '70s and the scene a steamboat on the Mississippi river. All the types of the period are present and the floating palace is distinguished by merriment, dancing and gallantry. There are the customary drinking and gambling, also. Virgil Drace, a young northern man, is on his way south on a mission of revenge. He meets an eccentric character in the person of one Liberty Shottle, who is constantly tempting the goddess of chance. They agree to a singular pact. Drace, seeing an opportunity to use Shottle, confides to him that his mission is to find a certain ex-guerrilla, Stepho la Vitte, who had murdered Drace's father. It is his determination to hang La Vitte as high as Haman. Drace falls in love with a striking young beauty on the boat. The steamer reaches New Orleans, at that time in the somewhat turbulent throes of carpetbag government. The young men attend the French ball and Drace unexpectedly meets the girl. She is accompanied by one Boyce, apparently her fiance. Shottle learns that the name of the girl is Nadine la Vitte. Drace passes an uneasy night torn by the suspicion that Nadine is the daughter of old Stepho la Vitte, now an admitted outlaw. Now, more than ever, is he resolved to find where the girl lives and to find Stepho. Drace and Shottle begin a search of the city. Drace takes a hand in a carpetbagger riot. He catches a glimpse of one he is sure is Nadine. Drace and Shottle get into bad standing with the authorities, and are given until the next day to board a steamer bound north. Returning to the house where he thought he had glimpsed the girl, Drace finds the place abandoned. Shottle discovers that a case of wine on the steamer is addressed to Stepho la Vitte at Farnum's Landing, Mississippi. It is the next stop below Bethpage's Landing and General Bethpage is Liberty Shottle's uncle. They decide to visit him. Liberty goes broke again and swears off again on betting. They are cordially received by the General and his wife.

CHAPTER VI—Continued.

—8—

"Oh, not very much. I am fond of him too, and I believe he is going to be of much help to me."

"Well, I've lost five hundred this morning, but I can stand it. I have ordered the mules hitched up, and am going to drive with you about the plantation. I am going to show you a government here in the delta."

During the drive the old gentleman was talkative, sometimes with the school man's hesitating precision, but more often as the free companion, agreeable rather than discursive. Drace evinced in everything a keen interest, but it was not real. His heart was not with him. It was in New Orleans, in a narrow street where boards were nailed across a door.

From what he had been able to gather from the General and by talking in seeming idleness to boatmen and to men along the River, Drace confirmed the information snatched by Shottle from the label on the Frenchman's wine case—namely, that old Stepho had a haunt somewhere in the neighborhood. A shrewd old negro had said that the outlaw lived in the swamp, in a house built of periwinkle shells. On the opposite shore, and several miles below the General's home, there lay a great wood of cypress and a thick tangle of salt cedar, a sort of everglade, a marsh with hundreds of knoll-islands here and there rising among the bayous. Here was indeed an outlaw's paradise, for Drace was told that not nearly all its lanes and crooked byways of brown water had been explored. Herein he began his search for old Stepho, day after day penetrating farther and farther into this moss-hanging wild. He did not confide in General Bethpage, for his mission was sacred unto himself alone, and by himself alone must it be accomplished.

At his feet in the canoe lay a rope, one end of it a hangman's noose, and he smiled at it, grim and firm of faith. Sometimes his canoe would stall in the carpet of scum. But he forced his way through into a narrow and unobstructed channel. Now he paddled swiftly. In front of him a great alligator arose and sank, the canoe grazing his scaly back. With a shriek great birds flew, flapping low, their long legs stretched out behind them. Drace was armed with a revolver, but did not wish to fire it, caution warning him. When he ceased for a time to paddle, how still everything was!

The adventurer liked to feel that no one had ever been there before. But now suddenly something caught his eye. In the green tangle on a low bank he saw a pole with wires strung to it, a sort of gate. The wires were covered with vines, trained about them. But for what purpose, here in this brushy tangle? He caught hold of a weed and pulled the canoe up closer, took hold of the pole and now he found a lower slat to which the wires were also attached. Farther along he discovered a sort of hinge attached to a snag almost hidden by briers.

"I'll open this gate and see what lies beyond," he mused, drawing the canoe back to the other end. He pulled at the pole, and it yielded. The gate opened, and through the weeds that appeared to have been bent by the passing of a boat, he saw a narrow channel.

It was easy enough to shove through the weeds and to enter the new canal. Soon it broadened, winding about among the enormous cypress trees. Now he came upon a widening that looked like a millpond, except that in the midst of it arose an island of tall cane. It was an attractive sight, and he ceased paddling to look. Slowly he drifted toward the island's shore. He took hold of a cane root and pulled the nose of the canoe hard into the bank. Then he got out, parting the stiff and stubborn cane in a shade as dense as night. But now through this parting hallway he could see sunlight beyond, and knew that he was about to come into an open space. And out into it he looked with a start; for there, a few feet from the edge of the fringe of cane, stood a small house made of minute shells cemented—periwinkles. Its roof was of thatch, the long rushes gathered from the swamp; and about the door was a cypress vine, its red blooms dazzling in the sun. And then a bended cane Drace held was crushed in his hand, for through the door and out beneath the vine came the barbaric rose-maid, Nadine la Vitte.

CHAPTER VII

She did not take fright when she saw him. She was startled, but did not run into the house; she stood dazed, her marvelous eyes in wide stare. Slowly he came forward, gazing, his hat in his hand. He dropped the hat, stooped, caught it up, and now stood before her.

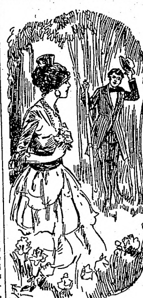
If she were agitated, he could not discover it. She stood where the red blooms brushed her brow. He held forth his hand, and slowly she shook her head.

"Monsieur, how foolish to come! If you do not go now, in a short time you will die. My father! He will shoot you. I should like it not to see you dead, you are so brave. My father, he will think you come for him."

"But I will tell him that I did not. I—"

He moved nearer, but with her hand raised, palm toward him, she motioned him away.

"You do not know what you talk. Nothing could you tell him, for the gun fire, and you will be no more. Please go away now."



Through the Door and Out Beneath the Vine Came the Barbaric Rose-Maid, Nadine La Vitte.

"Oh, it is because you want to get rid of me."

"No, no, no. It is not that. I like you much. You are so brave — and handsome. It is because I fear for you. My father would be angry to have me talk with a northern man. Go now, and for my sake, come no more."

"Mr. Boyce," said Drace then, "is not a northern man?"

She shot a sudden startled look at him. "Mr. Boyce—but he is my father's friend. My father expects me to marry Mr. Boyce. And if my father should come back and find me here talking with you, he would—Please, Mr. Drace, go at once, before it is too late. See, the sun is almost set. The stars come soon, and then through the cane he come. Oh, won't you please be kind to me and go at once!"

"Kind to you? God bless you, I would die for you."

"Oh, you make love soon! But won't you please go now! Quick, I hear something."

"You hear my heart. Let me stay ten minutes, and then I go."

"Ah, but why would you give me ten minutes of fear?"

He saw that her anxiety was real, and his heart smote him for cruelty to this dazzling creature whose father he would hang with a rope brought from the North.

"Yes, I will go. I wanted to tell you something, but my regret at going is so deep that I forget what it was. But I must come again when the sun is not so low. No, tell me please, when that shall be?"

"Never would a man before talk like this to me . . . But if you must come when I beg you no, let it be next Thursday. My father then will be in the hills to buy cattle."

"This is Friday, and that will be a week, lacking one day. You have set doomsday for my return."

"If you come before, you will not find me. And now it is the good-by."

She drew back quickly through the door, and down into the fringe of tall cane he went, parting his way to the canoe that lay nosing the mossy bank.

Only now that she was gone and night had come did he remember—remember that this girl who had bewitched the swift minutes with him was the daughter of his sworn enemy Stepho la Vitte.

A voice called him as he was cursing himself for a traitor to his father's memory. On a point of land he saw three men standing. One of them beckoned him, and he turned in toward them. One of them spoke:

"Would you be kind to set us across? The night he comes, and we would not be lost in the swamp. We will get to the river. Would you, please?"

"Yes, but I don't know that my canoe will hold four. We may get a ducking."

He pulled alongside and steadied the canoe while they got in. Now he paddled carefully. The man who had talked, and whom the other two addressed as Tonez, requested to be set on a bushy shore where the water was so shallow that the canoe was almost stuck in the ooze. With his paddle Drace propped his craft steady, for them to get out. Tonez got out—and with the quickness of a cat snatched a rope from beneath his coat and threw a noose about Drace's arms. Then the two men in the boat threw themselves upon him. There was a hard struggle in the canoe and then out into the water, but they brought him ashore, wound about with the rope.

Now they made haste to tie him securely. The canoe was dragged ashore; Drace stretched out in it, and now they took it on their shoulders and hastened through the tangled underbrush. He had fought hard, but had not cried out. But as he was carried along, he swore bitterly at himself for not looking at first with suspicion on the brutes who now had him in their power.

"Ah, you would steal about and spy," said Tonez. "But you steal about no more. The carpetbaggers, they say, 'You brave?' and you say, 'Yes, I am brave.' Then they say, 'You find old Stepho.' And you go to find him. He is not at home. But his men, they come just in time."

"You are liars. I was—"

"Ah, you come with the joke. Tomorrow, we will laugh. Will you? No, you will not laugh."

. . . .

Drace lay quietly tugging at the ropes that bound him. If he could spring out free, what a scattering he would make of them! They stopped, entering some sort of doorway, and rested the canoe on the ground. Tonez lighted a candle, and Drace saw that he was in an old cabin, almost ready to fall. They rolled him out on the floor, face down, and beneath his arms they passed the paddle of the canoe, so that he could not turn over. Then the others went out, leaving Tonez holding the candle.

"Does the kind gentleman know why they gone? They go to get the dry rushes and the dead bark. For why? To make the fire. It is not cold, no? But they will make the fire of the cabin, and when the morning come, there will be the ashes of the kind gentleman; and the people they will say: 'Ah, he lie down to sleep, and burn up.'"

Drace heard them piling their murderous fuel into a corner. Again he appealed to them, tried threats, told them that his friends would hang them; but they laughed, Tonez bending over him with the candle.

"In a few minutes I light the blaze and take the candle away . . . You talk of Stepho's daughter. Remember she may love me some, too."

"You Spanish devil!"

"The kind gentleman he come close. I'm Portuguese. But no matter. When Stepho come, we tell him what we do, and he pat us on the back and give us money. But the light would hurt the kind gentleman's eyes when he lie that way on his jaw. I will not stoop so low with the candle . . . Oh, what a fine pile they get! It will make the blaze beautiful. All ready, yes? I will touch it off."

Drace could not see him, but he heard the first crackle of the dried rushes, saw the flame dim the candle light. Now he cried aloud, the men laughing, the mounting flame crackling louder. Tonez came back to him.

"We leave you now. You will not need this candle to light you to bed; so I blow it out, see? And I take it with me."

They hastened out, and he heard them laughing as they ran through the underbrush. With all his harnessed might he strove to break the paddle so that he might roll toward the door, but it was strong, and he broke only the tip of the blade. A louder crackling told him that the dry boards above were catching. Soon the roof would fall in; great sparks would fly upward, fall and hiss in the water.

Why should he lie there, seeing all this in his mind, he wondered. He had read that men approaching death sometimes speak foolish words, and here he lay, with his mind on trivial things. Soon he would writhe in a furnace. How all about him glared! He wondered how long it would be before a tongue of flame should lick him with its agony . . .

"And then he spoke: 'God bless you, Nadine!'"

(TO BE CONTINUED.)

RADIO

DO NOT DESPISE CRYSTAL DETECTOR

It Is Dependable and Cheap and Every Amateur Receiving Set Should Have One.

There is considerable to know about the crystal, and a little knowledge will enable the operator to get better results and bring increased respect for this instrument. There are many reasons for the longing of the owner of a crystal receiving set for the vacuum tube outfit. However, he has a great many advantages which the owner of the more expensive outfit does not possess.

For instance, the crystal reproduction of the radiophone broadcasting is of the best possible quality. The action being only rectifying there is no chance of distortion. The tube receiver nearly always distorts to some extent. If maximum regeneration is used, even though the tube is not allowed to oscillate, distortion is bound to result. Transformer or choke coil coupling between amplifiers, no grid bias or wrong grid bias, poorly matched tubes and transformers or bad loud talker will all cause distortion. A combination of several of these often causes very great distortion.

When the crystal receiver is out of commission it does not take a genius to locate the trouble. The circuit and the adjustments are simple. A burned out tube means $5.00 or more for another. A bad crystal means a little trouble to clean it up or at the worst a dime for a new one. The crystal set does not go out of commission periodically as the tube set does, due to a worn out battery.

The crystal set is quiet in action, adding no noise of itself, as do many of the detector tubes. Reception through static is nearly always more easily accomplished with a crystal. The atmospherics seem to be brought in all out of proportion to the signal by the tube detectors, while the crystal seems to damp out the high voltage peaks of the static or strays to some extent, leaving the signals, which are strong enough for it to rectify audibly, very clear.

The crystal set has numerous disadvantages, of course, but so has the vacuum tube, and the good points of the former greatly overbalance its faults.

It is not very stable, a slight jar often being sufficient to "knock out" a good point. There is no way in which a crystal may be made to amplify and it does not give sufficient signal strength to use with a loud talker. It usually causes broad tuning, which makes it difficult to tune out interference. It is not as sensitive to faint signals as the vacuum tube, although it is surprisingly sensitive when properly adjusted. Adjusting the crystal is a tedious task, and it has become especially so since the labor-saving vacuum tubes have become so numerous.

A crystal detector should be included in every receiving set. It is dependable, cheap, and takes up little space. Even though you have a two-step amplifier and a loud talker with all the trimmings, you will admit that there are numerous times when your receiver is out of commission because of a bad A or B battery, dead tube or some trouble in one of a dozen pieces of your apparatus. During these periodic lapses there is usually some talk that you would like to have heard or a particular concert. A crystal detector will fill in these blanks very well, and you will be surprised at the quality of the music our broadcasting stations are sending out when you hear it via the crystal instead of at the noisy end of a two-step amplifier.

Many of the so-called disadvantages of the crystal detector can be partially overcome.

Crystal receivers usually tune broadly; that is, a small change in tuning does not cause a very great change in signal strength, and a station can be heard over quite a range of tuning. This means that if two stations are sending and their wave lengths are not very far apart it will be impossible to tune one in and exclude the other, whereas if the receiver tunes sharply, a station will be heard over a very narrow band of wave lengths. In other words, a very few degrees either way from the point where the best audibility is obtained will tune the station out. Then some selectivity can be had between two stations even if separated only by a few meters with a sharply tuned receiving set.

The crystal in the usual hookups introduces a resistance into the oscillating circuit, causing that circuit to be somewhat aperiodic. That is, it will respond to more than one wave length.

It is rather hard to tune sharply with a crystal and a single tuning coil. In this case the crystal must be shunted across at least a part of the inductance and there is no way of keeping it entirely out of any of the circuits which may be used. In order to keep it as sharply tuned as possible, it is best to reduce the number of turns shunted by the detector circuit as low as possible without sacrificing too much signal strength. If the circuit shown in Fig. 1 is used, the number of turns between slider 2 and ground should be kept less than a third of the number between slider 1 and ground. This will allow the antenna circuit to oscillate much more freely at its natural period. If using a single variometer better tuning may be had by tapping off the detector circuit, as in Fig. 2, about three-fourths of the stationary coil of the variometer, instead of hooking it across the entire variometer.

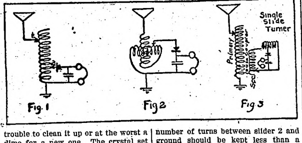


Fig. 1 Fig 2 Fig 3

The loose coupler is very much to be preferred over either of these two tuning schemes. The two circuits are loosely coupled to each other by induction and both circuits will have a higher resistance to any but the wave length to which they are tuned, each tending to damp out the undesired signal. The crystal is causing rather broad tuning in the secondary circuit, but the antenna circuit with it is rather broad in low resistance, is left to oscillate freely, and will be sharply tuned. This will exclude to a great extent signals on any but the desired wave length. These signals, if induced into the secondary at all, will be greatly weakened. The secondary, though broadly tuned, will still have a greater resistance to any signals not on its own natural wave length.

The secondary circuit can be made still more selective by carrying out the same scheme as in the first two figures; that is, by connecting the crystal across only a part of the circuit.

Sharp tuning cannot be obtained with any ordinary outfit between local station even with a vacuum tube detector; it is almost impossible with a crystal, but can be done with a tube outfit by using very loose coupling to the antenna circuit or by using a loop to pick up the signals.

RADIO SYSTEM FOR JAPAN

Power Company of Nagoya Seeks Government Permission for Plant.

Application for government sanction to establish a wireless telephone system has been made by the Daido Electric Power company of Nagoya, Japan, according to advices received by the Department of Commerce.

The company proposes to operate this wireless system primarily for its own convenience in connecting the various stations with its electric light and power system, but its use may be extended eventually to the general public if sufficient demand should arise.

As at present planned the system will start from Okuwa in Nagano prefecture on the Central Japan railway line, from which point communication will be established through Nagoya and as far as Osaka, a distance of about 150 miles.

Value of Good Receivers.

Because the energy that a receiver set picks up is extremely small and every possible means must be used to convert this energy, the best results are obtained when receivers of high quality are employed. A great mistake is made by spending much time upon the construction of a tuner, detector, etc., but giving thought only to the price, and not the quality of the receivers.

RADIO FLASHES

Montclair, N. J., has installed on its high school an aerial equal in size to some of the broadcasting stations. The receiving set is in the physics department and many of the pupils are licensed operators.

High-powered radio stations will be in operation in 1923 at Bogota bay, Cuba, and Buenos Aires. This will make possible relaying messages to Buenos Aires by way of Cuba and Bogota.

Commander Tosi of Italy, a noted inventor in the radio field, states that the land of Marconi is far behind in installing radio broadcasting and that future prospects are far from promising.

One hundred thousand persons heard the bride and groom make their nuptial vows in a recently broadcast marriage service. Quite an impressive number of witnesses if a divorce should ever be sought.

It required the erection of 11 aerials before radio could be successfully operated at Camp Curry, in the Yosemite valley. Rock walls rear thousands of feet above the valley in which the camp is situated.

Merchant Now Eats Anything on Table

"By the help of Tanlac I have overcome a case of nervous indigestion I had suffered from for ten or twelve years," is the emphatic statement of Norman W. Brown, well-known wall paper and paint dealer, of 218 N. Cedar St., Charlotte, N. C.

"My stomach was always out of fix and everything disagreed with me. I was troubled with heartburn and dizziness, and at times there was a pressure of gas around my heart that almost cut off my breath.

"Since taking Tanlac my digestion is fine. My appetite is a wonder and I eat just anything I want. In fact, my stomach acts and feels just like a new one and my nerves are as steady as a die. To put it all in a few words, I am just the same as a new man. It's a pleasure for me to tell my friends about Tanlac."

Tanlac is sold by all good druggists. —Advertisement.

Great Fishing Preserve.

Our greatest fishing preserve is a reputation that is assured to the Yellowstone park, for the park service, aided by the bureau of fisheries, last season restocked its lakes and streams on a larger scale than ever before. Eggs of native trout collected in the park numbered 5,996,000; 2,871,000 of these, developed to the stage of eyed eggs and fry, were returned to the waters there; to these were added from outside hatcheries sufficient to bring the total planting to 4,051,000, or double the number planted in 1920.—Scientific American.

Watch Cuticura Improve Your Skin. On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. It is wonderful what Cuticura will do for poor complexions, dandruff, itching and red rough hands.—Advertisement.

It's a Favored Spot.

Some years ago a Cleveland, Ohio, woman and her four-year-old daughter were visiting relatives in Kansas. The little girl, Doris, never having been in the country before, was much impressed by the strange appearance of things.

"Who made all this grass, and who made these chickens that are running around with so many feathers on?" she asked her mother, excitedly, who replied:

"Why, God made them, of course." Whereupon Doris, in much astonishment, exclaimed:

"God—Have they got a God out here in Kansas?"—Foresight.

Trick of the Trade.

"Pop, what's a spectacle?"

"What a producer and costumer cover up the lack of a story with."—New York Star.

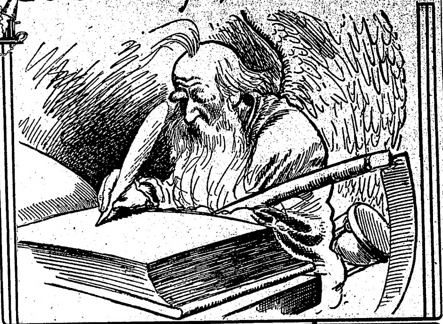
Look to Your Eyes

Beautiful Eyes, like fine Teeth, are the result of Constant Care. The daily use of Murine makes Eyes Clear and Radiant. Enjoyable. Harmless. Sold and Recommended by All Druggists.

MURINE FOR YOUR EYES

"Good-Bye, Old Year!"



GOOD-BYE, Old Year!—the fickle World
Pursues another Flame,
And Time—the ruthless, changing Time—
Will now erase your name.

And yet your younger rival with
His aspect bright and new
Is but an unread version of
The hopes we had in you.

The apple-blossoms of his Spring,
The little seeds that lie
Deep buried in the Heart of Earth,
Will live again—and die.

He, too, will give the warmth of Sun,
And days of slanting rain,
As he deals out our yearly share
Of happiness and pain.

The big round moon and silver stars
That lighted up your skies
Will shine upon as many loves
In just as many eyes.

And he will bring the fragrant June
When crimson roses nod,
And hurry through the Summertime
To flaunt the goldenrod.

The painted pathway of his Fall
Will be with clouds o'ercast,
Because his Winter footsteps reach
The Portal you have passed.

Good-bye, Old Year!—we loved you well;
We found your treasures dear,
But you have died as monarchs die—
And so—Long live the Year!

—Nan Terrell Reed, in N. Y. Times

NEW YEAR'S EVE

Customs and Their Origin; Happenings of Long Ago.

All Peoples Have Ways of Amusing Themselves on Special Occasions and at Fixed Seasons.

AN OLD philosopher, who was none the less a philosopher for his constant and close observation of men, remarked that we can best judge men's temperament and ideals by watching them at their work and at their play. A keen observer would have very little difficulty in judging Americans by their work. One such has aptly called this country "The Land of the Strenuous Life." Even our sports partake so much of this strenuosity that the medical profession is beginning to warn us of overindulgence in the more violent forms of athletics.

But all peoples have ways of amusing themselves on special occasions and at fixed seasons after a manner so well established that it has come to be regarded a kind of ritual, says the New York Herald. This has come down to us from the ages when our forebears first pushed their way out of the dry tablelands of civilization. Even the mighty power of the churches has not been able to brush aside some practices that have their roots deep in paganism.

Old Customs That Continue.

Probably after Halloween and Christmas there is no festival of the year so girt about with long-established customs as New Year's day. Among the best known of these are the auguries drawn from what was called the "Candlemas bull." In Scotland and other northern countries the term Candlemas, given to this season of the year, is supposed to have had its origin in religious ceremonies performed by candle light. The candles used were very large and highly ornamented, and were brought in at the midnight hour to the assembled guests, who, since the falling of dusk, had been drinking freely of the wassail bowl. Then, in procession, they marched out into the night, and to their imaginations the passing clouds assumed the shape of a bull. From the rise and fall and general motions of these clouds the seer foretold good or bad weather. Sometimes, too, auguries for the future were gathered from the state of the atmosphere on New Year's Eve, and also from the force and character of the wind.

In the imagination of most primitive peoples, especially those of the North, who were forced to battle against the elements of nature for life and sustenance, the eves of great feasts were considered occasions when the spirits of good and evil were in deadly conflict. The moment of midnight on New Year's Eve was always considered a time of special activity for the spirits of evil. In order to overcome them holier and more powerful influences had to be invoked. The evil spirits, or genii, as can be gathered from the Icelandic and Anglo-Saxon folklore, and even from words in their dialect, could be overcome by an appeal to the good genii, the hoghmen, or hillmen.

Probably imported from Italy was the superstition that on New Year's Eve the "evil eye" was all the more malignant. Then, too, there was a widespread practice of the "setting of mete or drynke by nights on the benche to fede Allholde or Goblyn." In some of the dialogues of the famous medieval morality play, "Dives and Pauper," we find mention of this and many other New Year's customs intended to counteract the activities of the forces of evil.

Christmas Cheer Continued.

Perhaps what contributed most to this general fear of sinister influences was the deep drinking among the people, which continued almost uninterruptedly from Christmas until New Year's day. Up to the Ninth century, except in the Syrian and Coptic churches, New Year's was not celebrated as a special feast day, but was looked upon as merely the octave of Christmas. Therefore the Christmas cheer was continued throughout the entire octave without abatement. It flickered up for the last time on New Year's day, as is clear from the one hundred and ninety-eighth sermon of Augustine, bishop of Hippe.

In England on New Year's Eve the young women went about carrying the "wassail bowl" and singing from door to door certain verses—a custom which had much in common with the hogmanay practice in Scotland. Het pint, the strange brew which in that country was carried about in the streets at midnight, was composed of ale, spirits, sugar, nutmeg or cinnamon. It was a powerful potion, the effects of which were almost immediately evident. Ritson in a collection of ancient songs gives us a few sung to the quaffings of this "prince of liquors, old or new." One such is:

A jolly wassel bowl,
A wassel of good ale,
Well fare the butler's soul
That setteth this to sale;
Out jolly wassel!

Notwithstanding the opposition which it has met since the year 1811, when many abuses were discovered in the practice, the custom of hurrying first across the threshold of his sweetheart has been practiced by many a young lad in Anglo-Saxon countries. The young lady listened attentively from the time the midnight bells ceased to ring to catch the first footfall on the floor.

The welfare of the family, particularly the fairer portion of it, was supposed to depend upon the character of the first comer after the midnight hour had sounded. Great care was taken to exclude all improper persons, especially as the midnight intruder enjoyed the privilege of imprinting a "hearty kiss" on the lips of the expectant lassie.

Bestowing Gifts.

The custom of bestowing gifts has become so inextricably linked with the New Year's celebrations in Paris that New Year's day is still called the Jour d'Estrennes. This custom seems to have had its rise in the conduct of the nobles of the late Middle ages, who were in the habit of bestowing gifts upon their sovereign. Naturally the ruler, not wishing to remain under obligations to them, returned the gift in a princely fashion. In England, however, especially in the time of Queen Elizabeth, this custom became so burdensome that it occasioned general protest among the nobles. "Good Queen Bess" was not slow to indicate just what kind of gifts she expected, or rather exacted. She let it be known also what consequences would follow the withholding of the jewels and the silks which she looked for at the hands of her subjects. She was so niggardly in her own gifts that we can understand how the custom fell into disuse and in the time of George IV was abandoned.

The giving of gifts was also very common among the people. On Christmas, and often on St. Stephen's day, employers, parents and masters presented Christmas boxes to their dependents. It was a form of Christmas charity. On New Year's day, however, gifts were exchanged between friends and acquaintances as a sign of good will. This custom, perhaps, had its origin in the box which was taken aboard every vessel that sailed out of port during the octave of Christmas and which was not to be opened until the return of the vessel. Contributions were to be dropped into this box, large or small, according as the day had been propitious or otherwise. The person to whom the contents of the box were given was supposed to have a mass said for the mariners who had made the gift. Hence the name of "Christmas boxes," which were given up to and including New Year's day. Each one of these days became known as "boxing day."

JANUARY FIRST DRAWS NEAR.

The light and airy manner
He had some weeks ago
Has passed from him completely.
His heart is filled with woe,
For that day is approaching
He great dreads to see,
When Friend Wife will remind him
Of promises that he
Has made—those resolutions
That will be hard to keep,
Requiring such an effort,
'Twould make an angel weep.

BROADWAY AN INDIAN TRAIL

Present Famous "Bright Light" Pathway Used as Artery of Trade by the Aborigines.

Weckquaesgkew Path is the Indian title which was given to the road through Manhattan island now known as Broadway. The long, curious name is that of a tribe which once occupied the upper end of the island, and it signifies "People-of-the-Birch-Bark."

So well was the street planned that centuries later modern engineers discovered that it was almost impossible to improve upon the original Weckquaesgkew path, which followed the easiest grades through the hills of upper Manhattan. Broadway, however, was not laid out as a warpath. It was a regular artery of trade, and was used by the Indians for generations.

Some of the Indian homes in caves on the side of the Inwood hills and similar ones on the north side of Harlem river are still in existence. Large quantities of oyster shells were found in the caves, and these oysters must have been brought from many miles away.

The Whole Story.

"What are the salient details of this domestic 'triangle'?"

"The husband who didn't understand is suing for divorce from the wife, who wasn't understood."

"I see."

"And he has named as co-respondent the man who didn't understand, either, but thought he did."—Birmingham Age-Herald.

Left-handedness is common to only 2 to 4 per cent of the people.

Foolish Advice.

The man had skidded on the slippery bridge and gone over into the river, crashing through the ice. A passerby noticed him floundering around in the chilly water and shouted:

"Keep cool and I'll save you!"

"Well," chattered the victim, "if I was as sure of your being able to save me as I am of my keeping cool I would quit saying my prayers this minute."

Father Was Ready.

He—Do you think your father would be willing to help me in the future.

Henry Hjelle, who is attending high school at Warren, arrived home Friday morning to spend his Christmas vacation with his parents near Highlanding.

Miss Agnes Vaughan, who is attending the St. James Academy at Grand Forks, arrived home Friday morning to spend the holidays with her parents, Mr. and Mrs. Morgan Vaughan.

John Anderson and daughter, Agnes, of Thorhult, drove down Sunday and spent the evening and Monday in Goodridge. Miss Agnes continued on to Bemidji, where she is teaching a rural school.

BRASS TACKS AND GAS TAX.

(From the St. Peter Herald.)

There is a growing sentiment in favor of a nominal tax on gasoline used by motorists. In the last year the fame of Minnesota's highway system has spread over the entire country, and thousands of tourists have been attracted from other states. They enjoy the use of Minnesota roads, and would willingly pay a small tax to aid in their maintenance and upkeep. It is regarded as certain that the next legislature will provide some form of tax on gasoline consumeod.

One day recently the United States Senate passed 165 bills in one session—or at the rate of a bill a minute. But the senators did not have to pay the bills.

BEWARE OF CANCER!

During the Great War the United States lost about 80,000 soldiers. During the same two years 180,000 persons died of cancer in this country. Cancer is now killing one out of every 10 persons over 40 years of age.

Many of these deaths are preventable, since cancer is frequently curable if recognized and properly treated in its early stages.

Cancer begins as a small local growth which can often be entirely removed by competent surgical treatment, or in certain extreme external forms by using radium, X-ray or other methods.

Cancer is not a constitutional or "blood" disease; there should be no thought of disgrace or of "hereditary taint" about it.

Cancer is not a communicable disease. It is not possible to "catch" cancer from one who has it.

Cancer is not inherited. It is not certain even that a tendency to the disease is inherited. Cancer is so frequent that simply by the law of chance there may be cases in some families, and this gives rise to much needless worry about inheriting the disease.

The beginning of cancer is usually painless; for this reason its insidious onset is frequently overlooked, and is too easily neglected. Other danger signals must be recognized and competent medical advice obtained at once.

Every persisting lump in the breast is a warning sign. All such lumps are by no means cancer, but even innocent tumors of the breast may turn into cancer if neglected.

In women continued unusual discharge or bleeding requires the immediate advice of a competent doctor. The normal change of life is not accompanied by increasing flowing which is always suspicious. The return of flowing after it has once stopped should also be considered suspicious. In men any reddish color in the urine is very suspicious of cancer in the bladder or kidney; though it is also seen sometimes with stone of the bladder or kidney. Do not expect the doctor to tell you what the matter is without making a careful physical examination.

Any sore that does not heal, particularly about the mouth, lips or tongue is a danger signal. Picking and irritating such sores, cracks, ulcerations, etc., or treating these skin conditions by home remedies, pastes, poultices, caustics, etc., is playing with fire. Warty growths, moles or other birthmarks, especially those subject to constant irritation, should be attended to immediately if they change color or appearance or start to grow. Avoidance of chronic irritation and removal of just such seemingly insignificant danger spots may prevent cancer.

Persistent indigestion in middle life with loss of weight, change of color, or with pain, vomiting, or diarrhoea, call for thorough and competent medical advice as to the possibility of internal cancer.

Radium is a useful and promising means of treatment for some kinds of cancer, in the hands of the few skillful surgeons and hospitals possessing sufficient quantity of this rare and very expensive substance; it must not be thought of as a cure-all for every form of cancer. No medicine will cure cancer. Doctors and institutes which advertise "cures without the knife" play upon the patient's fear of operation in a way that leads too often to the loss of precious time, and fatal delay in seeking competent treatment. Go first to your family physician.

Open warfare by open discussion will mean the prevention of many needless deaths from cancer. The common belief that cancer is a hopeless malady is partly due to the fact that cases of successful treatment are frequently concealed by the patient and his family, while cases of failure (too often resulting from delay) are apt to become common knowledge.

The chief of police of Des Moines announces that he will take a picture of every drunk brought before him in the future, presenting each drunk with a picture of himself when he reaches the sober stage. That ought to keep some of them sober for quite a while, but say, if some of the drunks could only hear themselves talk, what a reformation there would be. Never again!

Miss Tvedt Hostess at Progressive Whist

Miss Eunice Tvedt was hostess at a progressive whist party given at her home Saturday evening. The following of Miss Tvedt's friends were present: Misses Mable Graff, Gretta Gulrud, Agnes Vaughan, Ida Anderson and Emma Graff and Messrs. Roy Olson, Maynard Halvorson, Stuart Ferdinandsen, Daniel Payne, Alvin Halvorson and Joseph Christianson. At 11 o'clock refreshments were served after which the guests again ensued in the friendly attempt to get the most number of games.

As a conclusion of the enjoyable affair the prizes were given. Miss Gretta Gulrud received the prize for having won the most games and Alvin Halvorson received the consolation prize.

Wedding Dance Success.

The wedding dance given by Mr. and Mrs. Ole Geving Jr. and Mr. and Mrs. Arthur Helgeson at the Goodridge hall Friday evening, December 29, drew the biggest crowd ever seen at the local hall. Music was furnished by the Zimipsky orchestra of Highlanding. The four newlyweds were presented with a purse as a token of friendship and a wish for a long and happy married life.

Mild Weather.

The exceptionally mild weather that has prevailed since before the Christmas holidays came to a close on Saturday noon when a light snow commenced to fall, which gradually increased and before night resulted in the heaviest snow and coldest blizzard of the year. As a result numerous large snowdrifts were piled up around the corners.

EPIPHANY!

By REV. H. LUTZ.

Text: *"Behold, there came men from the east to Jerusalem, to worship Him."* Matth. 2, 1.. and 2.

Two weeks ago, at Christmas time, our eyes were fixed upon the child in Bethlehem's manger. A week ago we were again directed to him as the only stay and foundation for our faith and hope. And today again our thoughts are led to the same child, Jesus, the occasion being His Epiphany, or His being shown as the Savior of the World, not only of the Jews, or a select few, but of all; also the Gentiles.

In the early Christian church the custom of celebrating Epiphany was established. Just this truth, that Jesus came to save the heathen also, was stressed, and in consequence the Christians were reminded of their duty, and encouraged themselves to bring the gospel of Jesus to the heathen, in other words to do mission work. And the Scripture lesson picked for this occasion is that concerning the wise men from the east.

The sum of this gospel lesson is briefly this: God led these wise men from the east to the cradle of their Savior by means of a star. That these men were not Jews, but Gentiles, is generally conceded. So God here showed by an outward act that He was in earnest when He gave the command: "Go and preach the gospel unto all creatures." In other words, God wants us to do mission work. He wants us to bring the gospel unto those who have it not. If we fail to do this, we are neglecting our duty. It is well for us Christians to remember this. And, that is the aim and purpose of the Epiphany text.

If you put kindling into the stove and light it, you do not merely want the kindling to burn away, but you want it to set fire to the other fuel which you put into the stove with it. And thus you wish to warm your home and prepare your meals. Just so God has kindled a spark of faith in your heart, not merely that you should be saved—of course, that is the first and foremost purpose—but also that through you He might kindle faith also in the hearts of others, so that finally the light of the gospel might shine in all the world and warm the hearts of men and prepare them for the great wedding feast in Heaven.

But when we speak of doing mission work, we mean not only this that one eaves home and fatherland and goes to the heathen lands to preach the gospel. That, of course, is the noblest and best work a person can do. And therefore let us honor these people, pray for them and support them willingly with our earthly goods.

But mission work includes also this that we spread the gospel at home in our own community. There are many about us, who are not Christians and who might be won for the Lord. As long as we have not tried, we have not done our duty toward them.

So then, dear reader, think it over. What are you going to talk about when you meet your friends? Are you going to spend all the time slandering some one or complaining about something, or are you going to take every opportunity to preach Christ crucified to your fellowmen?

There is joy before the angels of Heaven over every sinner that repenteth. You can help to cause such joy. Do it!

Amen!

Poem by UNCLE JOHN

AUTOCASTER

JANUARY

Though she's fickle and contrary, there's a charm in Janooary, to the feller that's accustomed to her curves. . . . With her north wind skallyhootin' and her temperature pirootin' in among a feller's sensitory nerves! And, when she fights a duel with the little jag-o-fuel, that's waitin' out-o'-doors to keep ye warm,—O, it takes a cheerful giver, and an optimistic liver, to demonstrate old Janooary's charm. . . .

But—when the neighbors gather in defiance of the weather—to taste the joys of settin' by the fire, there's an institute of learnin' where the home-fires is a-burnin'—where patriotism is parent of desire! Then we find in Janooary, not a bandit gaunt an' bleary, but a bosom friend beneath the wintry vest. . . . Where we find congenial labor, swappin' ideas with our neighbor, and adoptin' the conclusion which is best. . . .

While her breath is mighty searchin' where the naked trees is lurchin' and there aint no hint of mercy in her grip,—yet the maple-sap flows sweeter, and the spring shall dawn completer, at the final crack of Janooary's whip. . . . Then, rally all ye merry, to the call of Janooary,—Awake, an' taste the real joys of life,—No season more entrancin' with fiddlin' an' dancin'—Brace up, an' get acquainted with yer wife!

Yr. own Uncle John.

VOL XVI. NO. 42. FRIDAY, JANUARY 5, 1923. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA $1.50 PER YEAR

Miss Tvedt Hostess at Progressive Whist

Miss Eunice Tvedt was hostess at a progressive whist party given at her home Saturday evening. The following of Miss Tvedt's friends were present: Misses Mable Graff, Gretta Gulrud, Agnes Vaughan, Ida Anderson and Emma Graff and Messrs. Roy Olson, Maynard Halvorson, Stuart Ferdinandsen, Daniel Payne, Alvin Halvorson and Joseph Christianson. At 11 o'clock refreshments were served after which the guests again ensued in the friendly attempt to get the most number of games.

As a conclusion of the enjoyable affair the prizes were given. Miss Gretta Gulrud received the prize for having won the most games and Alvin Halvorson received the consolation prize.

Wedding Dance Success.

The wedding dance given by Mr. and Mrs. Ole Geving Jr. and Mr. and Mrs. Arthur Helgeson at the Goodridge hall Friday evening, December 29, drew the biggest crowd ever seen at the local hall. Music was furnished by the Ziminsky orchestra of Highlanding. The four newlyweds were presented with a purse as a token of friendship and a wish for a long and happy married life.

Mild Weather.

The exceptionally mild weather that has prevailed since before the Christmas holidays came to a close on Saturday noon when a light snow commenced to fall, which gradually increased and before night resulted in the heaviest snow and coldest blizzard of the year. As a result numerous large snowdrifts were piled up around the corners.

EPIPHANY!

By REV. H. LUTZ.

Text: *"Behold, there came men from the east to Jerusalem, to worship Him."* Matth. 2, 1. and 2.

Two weeks ago, at Christmas time, our eyes were fixed upon the child in Bethlehem's manger. A week ago we were again directed to him as the only stay and foundation for our faith and hope. And today again our thoughts are led to the same child, Jesus, the occasion being His Epiphany, or His being shown as the Savior of the World, not only of the Jews, or a select few, but of all; also the Gentiles.

In the early Christian church the custom of celebrating Epiphany was established. Just this truth, that Jesus came to save the heathen also, was stressed, and in consequence the Christians were reminded of their duty, and encouraged themselves to bring the gospel of Jesus to the heathen, in other words to do mission work. And the Scripture lesson picked for this occasion is that concerning the wise men from the east.

The sum of this gospel lesson is briefly this: God led these wise men from the east to the cradle of their Savior by means of a star. That these men were not Jews, but Gentiles, is generally conceded. So God here showed by an outward act that He was in earnest when He gave the command: "Go and preach the gospel unto all creatures." In other words, God wants us to do mission work. He wants us to bring the gospel unto those who have it not. If we fail to do this, we are neglecting our duty. It is well for us Christians to remember this. And, that is the aim and purpose of the Epiphany text.

If you put kindling into the stove and light it, you do not merely want the kindling to burn away, but you want it to set fire to the other fuel which you put into the stove with it. And thus you wish to warm your home and prepare your meals. Just so God has kindled a spark of faith in your heart, not merely that you should be saved—of course, that is the first and foremost purpose—but also that through you He might kindle faith also in the hearts of others, so that finally the light of the gospel might shine in all the world and warm the hearts of men and prepare them for the great wedding feast in Heaven.

But when we speak of doing mission work, we mean not only this that one eaves home and fatherland and goes to the heathen lands to preach the gospel. That, of course, is the noblest and best work a person can do. And therefore let us honor these people, pray for them and support them willingly with our earthly goods.

But mission work includes also this that we spread the gospel at home in our own community. There are many about us, who are not Christians and who might be won for the Lord. As long as we have not tried, we have not done our duty toward them.

So then, dear reader, think it over. What are you going to talk about when you meet your friends? Are you going to spend all the time slandering some one or complaining about something, or are you going to take every opportunity to preach Christ crucified to your fellowmen?

There is joy before the angels of Heaven over every sinner that repenteth. You can help to cause such joy. Do it!

Amen!

poem by UNCLE JOHN

AUTOCASTER

JANUARY

Though she's fickle and contrary, there's a charm in Janooary, to the feller that's accustomed to her curves. . . . With her north wind skallyhootin' and her temperature pirootin' in among a feller's sensitory nerves! And, when she fights a duel with the little jag-o-fuel, that's waitin' out-o'-doors to keep ye warm,—O, it takes a cheerful giver, and an optimistic liver, to demonstrate old Janooary's charm. . . .

But—when the neighbors gather in defiance of the weather—to taste the joys of settin' by the fire, there's an institute of learnin' where the home-fires is a-burnin'—where patriotism is parent of desire! Then we find in Janooary, not a bandit gaunt an' bleary, but a bosom friend beneath the wintry vest. . . . Where we find congenial labor, swappin' ideas with our neighbor, and adoptin' the conclusion which is best. . . .

While her breath is mighty searchin' where the naked trees is lurchin' and there aint no hint of mercy in her grip,—yet the maple-sap flows sweeter, and the spring shall dawn completer, at the final crack of Janooary's whip. . . . Then, rally all ye merry, to the call of Janooary, —Awake, an' taste the real joys of life,—No season more entrancin' with fiddlin' an' dancin' —Brace up, an' get acquainted with yer wife!

Yr. own Uncle John.

Miss Urdahl Goes to Thief River Falls

Miss Della Urdahl, who has until recently been employed at the H. Christianson & Son merchandise store, left Monday evening for Thief River Falls, where she has secured employment with the J. C. Penney store. Miss Urdahl is an ambitious and likeable business woman and her many friends and acquaintances of Goodridge and vicinity wish her the best of success in her new position.

NORWEGIAN LUTH. CHURCH.

V. O. Aaker, Pastor.

Sunday, January 7: Sunday school and Bible class at 10 A. M. Services in Jelle at 11 A. M. The Luther league in Goodridge meets Wednesday evening, January 10. Erie congregation holds annual business meeting Tuesday, January 9, at 2 P. M. and the Torgerson congregation holds annual business meeting Monday, January 15 at 2 P. M. All members are requested to be present.

LUTHERAN CHURCH

(Missouri Synod.)

Sunday, January 7: English services and business meeting at Big Grove beginning at 10:30 A. M.; and English services in the parsonage in Goodridge at 8 P. M. Sunday, January 14: English services at Erie at 10 A. M. and at Neptune at 3 P. M. In the new year also the words of Paul shall be our motto: *"I determined not to know anything among you, save Jesus Christ, and Him crucified."* 1. Cor. 2,2. H. Lutz, pastor.

NOTICE!

The fire department will hold its annual meeting at the Winton Nichols Lumber yard at 8 o'clock Wednesday, January 10, for the purpose of electing officers for the ensuing year. All members are urged to be present. An oyster supper will also be served to the members immediately after the meeting.

G. C. GULRUD,
Fire Chief.

It's commencing to look like the palmy days of the moonshiner are numbered. Fines, jail sentences and rough treatment is making the going rather strenuous for these gangrenous growths in our midst.

NOTICE FOR BIDS.

Notice is hereby given that the Board of Directors of the Goodridge Co-Operative Creamery Association will receive sealed bids up to noon on Saturday, January 13, 1923, for the filling of the ice house at the creamery.

For any further information apply to the secretary.

The Board reserves the right to reject any or all bids.

GOODRIDGE CO-OPERATIVE
CREAMERY ASSOCIATION.
Stuart McLeod, Secretary.

We Crave the News

Do you like to see your name in print?

If you do, give us the news about yourself or your relatives or friends.

If you go on a visit, tell us.

If someone is visiting you, tell us.

In fact, tell us anything in the line of news; it will be appreciated.

After reading that passengers on an Atlantic liner saw a whistling grampus, a shovel-nosed whale and a bottle-faced dugong, it hardly seems as if even an 18-mile booze limit is far enough from shore.

What we want in Congress is more men that use their brains and spend less time with their ears to the ground.

"YOU SCORPION!"

SYNOPSIS.—The time is the late '60s or early '70s and the scene a steamboat on the Mississippi river. All the types of the period are present and the floating palace is distinguished by merriment, dancing and gallantry. There are the customary drinking and gambling, also. Virgil Drace, a young northern man, is on his way south on a mission of revenge. He meets an eccentric character in the person of one Liberty Shottle, who is constantly tempting the goddess of chance. They agree to a singular pact. Drace, seeing an opportunity to use Shottle, confides to him that his mission is to find a certain ex-guerrilla, Stepho la Vitte, who had murdered Drace's father. It is his determination to hang La Vitte as high as Haman. Drace falls in love with a striking young beauty on the boat. The steamer reaches New Orleans, at that time in the somewhat turbulent throes of carpetbag government. The young men attend the French ball and Drace unexpectedly meets the girl. She is accompanied by one Boyce, apparently her fiance. Shottle learns that the name of the girl is Nadine la Vitte. Drace passes an uneasy night torn by the suspicion that Nadine is the daughter of old Stepho la Vitte, now an admitted outlaw. Now, more than ever, is he resolved to find where the girl lives and to find Stepho. Drace and Shottle begin a search of the city. Drace takes a hand in a carpetbagger riot. He catches a glimpse of one he is sure is Nadine. Drace and Shottle get into bad standing with the authorities, and are given until the next day to board a steamer bound north. Returning to the house where he thought he had glimpsed the girl, Drace finds the place abandoned. Shottle discovers that a case of wine on the steamer is addressed to Stepho la Vitte at Farnum's Landing, Mississippi. It is the next stop below Bethpage's Landing and General Bethpage is Liberty Shottle's uncle. They decide to visit him. Liberty goes broke again and swears off again on betting. They are cordially received by the General and his wife. Drace penetrates into the wilderness, discovers Periwinkle House and finds Nadine alone. She is much alarmed and warns him her father will shoot him. He makes love to her and to get him to go she agrees to meet him again the following Thursday. On his way home Drace is accosted by three men who ask to be set across the river. They overpower him and bind him with ropes. Led by Tony they throw Drace into an old cabin. Tony taunts Drace and avows his love for Nadine, while the others collect fuel. Tony sets fire to the cabin and the three go off laughing.

CHAPTER VII—Continued.

—9—

And then something touched his hand, something cold and swift. A knife cut the ropes that bound him; and in his great and sudden joy Drace almost lost his reason. But he did not cry out; no word was spoken. Just one look, and then he screened her from the flames as they fled through the door, out through the light, into the shadow of the trees. And then he spoke: "God bless you, Nadine!"

He had held her hand, leading her as they ran, but now in the shadow safe from danger, she withdrew it from him, and when he reached again to take it, she shook her head.

"No, it must not be. I told you to go quick, but you did not go quick enough. Then Tonez, he see your boat, and with the others, he wait for you. I run around and I watch him, with the knife to stab him if he hurt my brave friend. Then in dim light I see them carry the boat, and I think they have killed you; and I steal along to stab, but then I know you are in the boat. All I do then was to watch till they go, and then I go in. It was not hard to do. No."

"You are an angel."

She laughed, shaking her head.

"Angels do not go into the fire. They do not belong there . . . Now, I tell you. I show you the crooked way, through the woods and out to the river. The moon has come, and we can see. If you know the way, you are safe; but if you do not, you mire down and die in the ooze, and not in the flame. You would please follow me now."

He followed her, hoping that she might be slow, to prolong the joy of his being with her, but she was agile, walking swiftly. Sometimes she would turn slightly about to warn him of a dangerous place, and once she smiled, the moon full in her face. "Tell me," he inquired then: "What has passed tonight, I hope, does not change what was set for Thursday."

The land was beginning to rise, and she was walking faster.

"Thursday you may come."

She halted in an open space and pointed toward the river.

"The bird, I hear him sing now. The magnolia trees are over there. And now it was again good-night."

She gave him no chance to detain her, for in an instant she was running; and he stood looking till in the deep shade her form was lost.

* * *

Old Stepho had not come home when the Creole girl reached the house in the swamp. She sat down to think and to listen to his footstep. He did not come; and undressing, she lay down, mused a long time and slept . . . A knocking on the door and Stepho's voice called her:

"The sun he was high, but the leetle gel she sleep."

Soon she came out, and he drew her to him and pressed his sandpaper cheek against the coil of her hair.

They sat where the house threw its cool shade. Slowly he rocked in his big chair, looking up at the cane that hid his home.

"This air, he good. He comes through salt marsh from the Gulf, with not the malaria. You bloom always like the flower."

"But, Father, when do we leave here? It must not be that we are here to live all the time?"

"Ha! The little bird wish to leave the nest, to try her wings? That is the way of birds and women. Soon, I suppose, you will wish to marry some fine man and leave your old father."

"No—it is not that. I love you . . . But it is lonely here, and—"

"Mr. Boyce, he is a fine young man. If you marry him, you would not so much leave me. I see him often. He buy from me the mules and cattle which I bring down from the hills. Why you no wish to marry him?"

"But I do not love him."

"You would soon learn; he is a fine young man. I owe him much; and he know much about my business that he would keep quiet about it—if he was of the family. And he would take you often to the city and give you rich dresses and diamonds."

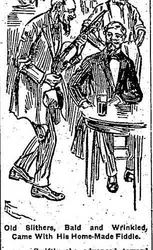
"My dresses they are fine enough. I have the diamonds, too. But you must know that I get lonesome here. I cannot play with the book all the time . . . You are going again to buy cattle in the hills, are you not?"

"I will buy them, yes."

"And you must on Thursday go to the hills?"

"Yes, on the Thursday, I will go."

He fell asleep, for he was tired; and when the sun came about, she drew his chair into the shade. He opened his eyes, patted her hand and slept again. She heard a slight sound, and looking, saw Tonez coming through the cane. Swiftly she advanced toward him, with hand upraised, cautioning him.



Old Slithers, Bald and Wrinkled, Came With His Home-Made Fiddle.

"You must make no noise. He is asleep."

"But I have come to tell him that the carpetbagger spy he gone to come back not again."

"Go away, and you can come back and tell him."

"No, I stay and talk to you."

Stepho's voice called out. "Tonez, come. I am here."

She did not wish to hear them talk. She looked at the Portuguese and mused as she walked away: "You do not know, you scorpion, how close you come to the stab. Your time will come, and I watch you."

CHAPTER VIII

It was a long time before Drace found a boat to set him over to the opposite shore. It was so late when he reached the Bethpage place that he did not go up to his room. The house was so quiet, the hounds themselves asleep, that he stole into the garden to pass the remainder of the night on a couch in the summer house. The air was heavy with roses breathing in through the lattice, and as he straightened out, grateful for repose, this thought came to him:

"Pale they call death, but to me it will ever be red. And I have looked into its red countenance, and was not afraid. I thank God that He gave me that strength. . . . But what a melodrama!"

At the breakfast table, Tycie, with mother tenderness, upbraided Drace for sleeping out for fear of arousing the house. Afterward Drace and the General strolled out under the trees.

"By the way," the General said presently. "I have an engagement to deliver an address before a teachers' meeting in Natchez, and I should much like to have you bear me company. We can leave this evening on the Black Hawk, and reach there early in the morning."

"I'd like very much to go," answered Drace. "But can we get back before Thursday?"

"Easily, by Wednesday morning. Anything important for Thursday?"

"Oh, no. An old fellow down at the ferry wants me to go fishing with him Thursday, and I gave him my word that I'd be on hand. Most remarkable old man, full of fun; quite a character."

"You must mean old Spence. But are you sure it is not that pretty daughter of his that attracts you? You'll have to be a little careful, my son. We may associate with men out of our social running, but not with women. . . . Ah, Tycie! Mr. Drace has just consented to give me his company to Natchez."

* * *

The Black Hawk's band played a welcome, and the captain came down the plank to conduct the General on board. From a quiet, lazy and almost deserted landing the place leaped into the full throb of life. Negroes and shiftless whites came from their hovels to gaze upon the magic splendor of this journeying palace, and the three-shell man stepped ashore to gather up dollars.

Dinner was a state occasion, and after it, the ball. Then their staterooms—then morning, and Natchez.

The address was to be delivered in the afternoon, and when the time came the General led him over to the hall to hear the speech, imprisoned him without bail in a corner, and there he had to sit. The address was long, academic and dull, and the sufferer mused:

"I don't see why Shottle ever called you a remarkable character."

Everybody came about the General to take his hand. Young women told him that they had never been so thrilled. Drace lied to him, too, swore him an orator.

"Let us walk off alone," said the General.

Slowly they walked at first, but after a time the old gentleman struck a brisker pace, toward the River.

"Now, my boy, as we've got through with those beaters of dust out of old carpets, we'll have some fun. Old Colonel Pemberton wanted me to go home with him, and he has a delightful house, a gracious wife and handsome daughter, but I had to decline. I've stood about as much now as I can. We'll go down to old Tobe Mason's tavern, under the hill. Tobe is a gentle old fellow, never killed but three men."

The tavern was as tough a place as river men could make it. Built of logs, bricks, stone and clapboards, it looked like an architectural stagger, trying to climb the hill. In the main room was the bar.

"Well, I'll be knocked in the head for a steer!" old Tobe cried out, stumping toward the General. "I haven't seed you since the River tuck fire. Well, well! Thinkin' about you the other day. . . . Glad to shake your hand, Mr. Drace. Set right down."

"Tobe, I'm glad to see you," said the General. "And fetch us about two quarts of that summer-grape wine. Let me tell you about it, Drace. We have a wild grape here that gets ripe along in August. It's much larger and is not sour like the fox-grape, and its vine likes to climb about a sassafras sapling. And then you see an umbrella of grapes. Now don't say a word till you've had a good taste of it. Tobe makes it himself, and he'll fetch us some that's at least twenty-five years old. Here we are."

The wine was as red as blood, cool and yet warm. Its flavor was the ripened sweetness of the spirit of autumn, it was as mellow as the scent of the apple at harvest time.

"What do you think of it, hey?"

"Uncle Howard, are you sure that this was not made by Bacchus instead of Tobe?"

"Good, my boy! Enjoying yourself?"

"Yes, I'm doing fine, General. You see, I can't express myself as well as you can. I haven't as much to draw from. You've not only book-knowledge but experience, worth more socially than all the libraries in the world."

"You hit it off well. But what is better than it all? Moral freedom. This table here is rough, with one rheumatic leg slightly drawn; these chairs we sit in, bottomed with strips of hickory bark, would be scorned at a sheriff's sale; but sir, Mark Antony, in his first triumph, his chariot drawn by lions, was not more regal than we are at this moment, enthroned and sceptered with moral freedom. Pour out; for as that same Antony said: 'Scant not my cups.'—Tobe, where's that old scoundrel who used to play 'The Arkansaw Traveler'?"

Tobe stumped his way over from the bar.

"You mean old Slithers?"

"That's the man. What's become of him?"

"Nothin'. And I reckon he's playin' right now down at Cadman's joint, that ought to be wiped off the earth. Want him?"

"Need him, Tobias. Send a boy after him."

Old Slithers, bald and wrinkled, came with his home-made fiddle. The General greeted him warmly, introduced him to Drace; and the most comfortable chair in the house provided him, he sat down to play the famous old tune and to recite the dialogue, improvising where his memory failed him.

"That, my dear Drace, was Stepho la Vitte."

(TO BE CONTINUED.)

THIS C. & O. CONDUCTOR GAINS 35 LBS.

"I enjoyed Christmas this time with more pleasure than I had in years," remarked W. L. Mahone, 410 Charlottesville, Va., the other day, in telling of the benefits he has derived from the use of Tanlac. Mr. Mahone has been a railroad conductor for nineteen years. He runs on the Chesapeake & Ohio from Charlottesville to Washington, D. C., and Richmond, Va.

"My stomach and digestion had been bad so long that I can hardly remember the time I could eat without suffering afterwards. I gradually grew weaker until I was often having to lay off from my run. In this run-down condition I contracted pneumonia in both lungs and came near losing my life.

"After this spell my stomach troubled me worse than ever and I remained almost as weak and helpless as a baby. While sitting around reading the papers I was attracted by the statements about Tanlac, which had such a sincere ring that I was led to believe the medicine might help me up the hill, and it pulled me clean up to the top. My appetite never fails, stomach misery is all gone, and I have gained thirty-five pounds in weight. Tanlac keeps me feeling 'spick and span,' too, so I can make my runs and still feel fine."

Tanlac is sold by all good druggists. Over 35 million bottles sold.—Advertisement.

CROWDED OUT, AS IT WERE

Under the Circumstances, Batter's Complaint Did Seem Just a Little Bit Unreasonable.

An Englishman was persuaded to act as umpire in a ball game between an American and an Australian team in France. In the first inning, with three men on bases, the star batter of the American team stepped up to the plate.

"One ball," called the umpire.

"Two balls," called the umpire.

"Three balls," called the umpire.

"Four balls, batter out," called the umpire, who was immediately mobbed by the members of the American team.

"What d'ye mean by ruling me out, you big boob," shouted the irate victim of the ruling.

"But, my dear fellow," explained the Englishman, "can't you see I have no place for you?"

A Baseball Fool.

A young lady whose knowledge of baseball was not large sat watching a game which was proving very disastrous to the home team. Finally she turned to her escort and exclaimed:

"Isn't our pitcher grand? He hits their bats no matter where they hold them."—Everybody's Magazine.

Ma's Method.

Ma was putting the poor relations near the head of the table and pa wondered why.

"I love 'em and respect 'em, and all that," ma said, "but you know they don't wear expensive clothes."

"Well?"

"And the way you carve, pa, nobody knows which way the stuffing is going to squirt."

Sad Result.

"I thought she married that young millionaire to reform him."

"She did, but it worked the other way. Now even his fortune is dissipated."

A woman gets as many airs out of a milliner's box as she does out of a phonograph.

CREATED A BAD IMPRESSION

Visitor's Remark, to Say the Least, Did Seem a Little Out of Place.

I was visiting friends with whom I was not well acquainted, writes a correspondent of the Chicago Tribune. They insisted upon my staying overnight. I had an important engagement for the following evening and wanted to look my best, so I really was anxious to get away, but upon thinking it over I finally consented to stay.

That being settled, we went down town to pass the evening, and while two of the girls were in the middle of what ought to have been an interesting conversation to me I, thinking of all I had to do before the following evening and not having concentrated on what they were saying, blurted out: "What time does the first train leave in the morning?"

They both looked at me in great surprise, naturally thinking I was extremely anxious to get away from the town and them, too. In view of our short acquaintance, words failed me, and try as I would I could not make them understand.

SHE DYED A SWEATER, SKIRT AND CHILD'S COAT WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her worn, shabby dresses, skirts, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is sure because Diamond Dyes are guaranteed not to spot, fade, streak, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.—Advertisement.

The Busy Toothpick.

The Woman was seeing a friend off at the Northwestern station. Nearby was a man saying good-by to his wife, for their domestic conversation was in no sense whispered.

As the husband talked the Woman watched, quite fascinated, his toothpick as it moved up and down in his mouth.

The gate was being opened. The travelers were passing through. The Woman wondered what would happen to the almost animated toothpick while the man said good-by to his wife.

Surely he would remove it. But no—with a move of his lips he had shifted it to a corner and proceeded to kiss his wife. No wonder wives read "The Sheik" and such. One would have to do something to make up for dividing a kiss with a toothpick.—Chicago Journal.

Sufficient Cause.

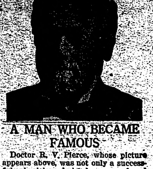
"How did you happen to quit sparking Miss Tootsie Bender?" asked an acquaintance.

"I didn't like music; that's why!" disgruntledly replied an Ozark swain. "Every night I was over there just as soon as I got seated old man Bender would come in, take down his infernal fiddle and begin to play. The longer he'd play the tireder I'd get, and then finally when only about 'leven o'clock he'd begin to saw off 'Home, Sweet Home.' I couldn't stand any more of it and lit out. And I hain't going back there, neither!"—Kansas City Star.

Practical Mind.

The approach of Christmas brought the usual problem to an Alameda (Cal.) man—what to give his wife. She had everything he could think of and there seemed nothing more to bestow. "My dear," he said, "I wish to give you a present to cost about $20, but I can't think what. Can you?" The lady pondered it seriously, and said: "I am thinking of my roses. I wish you would give me $20 worth of manure."—San Francisco Argonaut.

A laugh is the most magnetic thing on earth.



A MAN WHO BECAME FAMOUS

Doctor R. V. Pierce, whose picture appears above, was not only a successful physician, but also a profound student of the medicinal qualities of Nature's remedies, roots and herbs, and by close observation of the methods used by the Indians, he discovered their great remedial qualities, especially for weaknesses of women, and after careful preparation succeeded in giving to the world a remedy which has been used by women with the best results for half a century. Dr. Pierce's Favorite Prescription is still in great demand, while many other so called "cure-alls" have come and gone. The reason for its phenomenal success is because of its absolute purity, and Dr. Pierce's high standing as an honored citizen of Buffalo is a guarantee of all that is claimed for the Favorite Prescription as a regulator for the ills peculiar to women.

Send 10c for trial pkg. to Dr. Pierce's Invalids Hotel, Buffalo, N. Y.

NO DEAD LEVEL IN NATURE

Gardener Seemingly Made Point in Discussion With the Soap Box Sage.

The gardener was trimming the front hedge and the soap box sage paused to converse with his acquaintance wielding the shears. The orator soon had his favorite theme going. The gardener was something of a philosopher himself and ventured to put a question.

"Then you think humanity should be kept trimmed to a dead level like this hedge?"

"Put it that way if you wish," said the orator.

The gardener pointed to the side of the yard.

"Ah, but I trimmed that hedge only last week. Now look at it. So far as we can see every branch had the same opportunity. Yet some are higher than the rest. You can't keep 'em down, friend, you can't keep 'em down."—Chicago Daily News.

Sympathy Astray.

It was Saturday night.

In the gutter stood a large, red-faced woman. On her ample form was displayed a card, bearing the words: "Disabled Policeman."

Passers-by, stopping to read the card and drop coppers into the woman's outstretched hand, soon formed quite a small crowd, and at last the inevitable man-in-blue appeared on the scene.

"What is this?" he asked the woman, pointing to the card.

"It's all right, guv'nor," replied the woman. "I disabled him last night, so I'm just collecting the fine!"—London Answers.

Comedy and Tragedy.

Comedian—Drop into my place and let us see your face occasionally, old man.

Tragedian—But, laddie, your good wife likes me not.

Comedian—Oh, that's all right—it amuses the children.—London Tit-Bits.

Something to think about

When lying awake at night, stop counting imaginary sheep and think what is probably the cause of your sleeplessness.

Both coffee and tea contain a drug element that irritates a sensitive nervous system, often causing restless nights and drowsy, irritable days.

A delicious, hot cup of Postum contains nothing that can deprive you of restful sleep at night, or hamper your days. But it *does* supply all the warmth, comfort and satisfaction that can be desired in the mealtime beverage.

Your grocer sells Postum in two forms: Instant Postum (in tins) prepared instantly in the cup by the addition of boiling water. Postum Cereal (in packages) for those who prefer to make the drink while the meal is being prepared; made by boiling fully 20 minutes.

Postum FOR HEALTH

"There's a Reason"

MRS. G. W. HALL SICK FOR YEARS

Wants Women to Know How She Was Made Well by Lydia E. Pinkham's Vegetable Compound

Lima, Ohio.—"Indeed, your medicine is all you say it is! I had very severe troubles such as women often have, and could do no heavy work. I was sick for several years, and from reading your ads. I finally decided to take Lydia E. Pinkham's Vegetable Compound. I am now doing my own washing, which I haven't done for several years, and can walk long distances without those dragging pains and weak feelings. The Vegetable Compound is fine, and I never forget to say a good word for it to other women when they say they need something."—Mrs. G. W. HALL, 539 Hazel Avenue, Lima, Ohio.

There are many women who find their household duties almost unbearable owing to some weakness or derangement. The trouble may be slight, yet cause such annoying symptoms as dragging pains, weakness and a run-down feeling.

Lydia E. Pinkham's Vegetable Compound is a splendid medicine for such conditions. It has in many cases relieved those symptoms by removing the cause of them. Mrs. Hall's experience is but one of many.

Stop Laxatives

Which Only Aggravate Constipation

Nujol is a lubricant—not a medicine or laxative—so cannot gripe.

When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus replaces it. Try it today.

Nujol
REG. U.S. PAT. OFF.
A LUBRICANT—NOT A LAXATIVE

New Hair to replace old, should be growing all the time. It will if you use Q-Ban Hair Tonic—Don't get bald, get Q-Ban today—It's much more pleasant. At all good druggists, 75c, or direct from HESSIG-ELLIS, Chemists, Memphis, Tenn.

The Source of Supply.

Miss Yvonne, a clever English actress, tells a story of an actress friend of hers whose little four-year-old daughter one day inquired of her: "Why do you go to the theater, mummy?" "Oh, to get bread and butter," she was told. Next day she had tea with the landlady. "So you've been to the theater, have you?" she inquired in her knowing little way. "No. Why?" asked the woman. "Then how did you get this bread and butter?"

Don't Forget Cuticura Talcum

When adding to your toilet requisites. An exquisite face, skin, baby and dusting powder and perfume, rendering other perfumes superfluous. You may rely on it because one of the Cuticura Trio (Soap, Ointment and Talcum). 25c each everywhere.—Advertisement.

Getting Ready.

"Girls!"

The matron of the dormitory screamed whisperingly down the sleeping aisles.

"Get up quick! There's a burglar in the house!"

And with one accord twenty excited damsels leaned out and cried in unison:

"Where's my powder puff?"—Richmond Times-Dispatch.

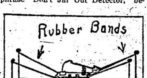
RADIO

CRYSTAL JARRING CAN BE PREVENTED

Simple Shock Absorber That Was Devised by Operator on a Transoceanic Vessel.

One of the worst irritations suffered by the crystal detector operator is the frequent jarring out of good adjustment. Often the slightest vibration caused by a heavy footfall, slamming of a door or someone brushing against the table is sufficient to disturb the good point. The process of the readjustment has to be gone through again. This happens with such regularity that numerous schemes to avoid jarring the detector stand have been devised. Most of these were failures, and the phrase "Don't Jar Out Detector," became a standard joke. There is one scheme which will protect the adjustment from almost anything short of an earthquake.



This idea was first encountered on a shipping board vessel. The vibration on a ship is great, and for this reason galena cannot ordinarily be kept in adjustment, and is rarely used. However, on a vessel in transoceanic service the crystal, unless the very best possible, will not bring in a signal for days at a time when the ship is near mid-ocean, far from any land stations. This operator had rigged up a shock absorber for his galena detector as shown in the figure. Little explanation is necessary. A block of wood a foot square or smaller supports four large nails or wood posts between which are stretched rubber bands as shown. These bands support the detector stand. If the stand is heavy with a small base it will be top heavy; and the stand had better be mounted on a larger base. The rubbers should be only heavy enough to keep the stand from touching the block, so that there is plenty of flexibility to absorb all vibration.

Use a flexible cord for connecting the detector into the circuit so that it can be taken off the shock absorber and adjusted on the table. When a good adjustment is obtained, carefully replace the detector on the shock absorber and it will stay in adjustment almost indefinitely unless of course disturbed by the heavy signals or static.

In the case mentioned the detector would hold an adjustment through an entire watch, though the vibration from the engine was pronounced and in a heavy sea there were strong tremors and jumps. This ship rolled considerably, but although the detector stand sometimes almost stood on end during the bad rolls, unless the adjustment was particularly erratic no trouble was had.

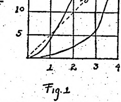


Fig. 1

It will repay anyone who has had trouble with keeping a good adjustment to construct this simple jar absorber.

The detector is used to rectify alternating current of radio frequency. Oscillations of radio frequency are inaudible, the ear being able to distinguish only up to a frequency of 10,000 per second at the very highest. The longest radio frequency waves are about 20,000 meters wave length, or 15,000 oscillations per second, which is well above audibility, and also above the frequency range of the telephone diaphragm. The frequency of the present short broadcasting wave length is many times as high as this. The audible frequencies that we hear are impressed upon the carrier wave in variations in amplitude of the carrier wave.

If only a tuning device and phones were used at the receiving station without some kind of rectifier this wave modulated by the audible frequencies would have no effect whatever on the diaphragms of the headset, because regardless of the strength of the oscillations or the percent of modulation the positive half is always equal and opposite to the negative half, and they will exactly neutralize each other. When rectified either the positive or the negative side of the carrier wave is cut off, leaving the other half free to affect the diaphragms without the counteraction of the opposite half of the wave.

The more perfect the rectification the louder the signal will be in the phones, because the resultant audible current is the difference between the two halves of the cycle. The crystal is not a perfect rectifier. It is merely a resistance which does not follow Ohm's law. It offers more resistance to a current flowing in one direction than the other. Suppose the positive half of the current is to be utilized, partially neutralize the positive current, reducing the strength of the signal.

A curve for a galena crystal is shown as curve No. 1, in Fig. 1. The curve will vary for every adjustment on the crystal. This graph represents a very good adjustment. The best signal will be obtained when the sharpest bend in the curve is at the working point. In the case of the galena crystal this point would be at zero potential. At this point the rectification will be the highest.

Some crystals require a local battery and potentiometer to bring the working point to the proper point on the curve. Curve No. 2 is for a carborundum crystal. To work this crystal most effectively the potentiometer would have to be adjusted to give a positive potential of about three volts. The dotted line for No. 3 is for an ordinary and is a straight line.

Longer Life for Your Tubes.

For storage battery economy and longer life of the vacuum tube, it is always best to employ the minimum filament brilliancy consistent with adequate audibility of the signals being received. Nothing is gained by burning the filament above the temperature necessary for maximum regeneration, and white heat is seldom necessary to accomplish this, according to Radio Broadcast. By resorting to a two-stage amplifier in receiving from distant broadcasting stations, ample audibility can be obtained without excessive filament brilliancy. As a matter of fact, signal strength may well be sacrificed to purity of tone in voice and music, for after all it is faithful reproduction of sound rather than maximum noise which makes radiophone reception enjoyable.

Radio School for Army Flyers.

A new army radio school for training air service radio operators and electricians has been established at Chanute Field, Illinois. The school was removed from Post Field, Oklahoma, and new classes for radio instruction are being formed. It will be equipped with all the latest radio devices, including apparatus for aerial work in both heavier and lighter-than-air craft. Enlistments for training in radio for the army air service are now being accepted at Chanute Field.

Vatican Uses Radio to U. S.

The first use of radio by the Vatican was the recent transmission to the United States of a message from Pope Pius XI., through Mgr. F. Morgongini Daca, papal pro-secretary of Extraordinary ecclesiastical affairs, to James A. Flaherty of Philadelphia, supreme knight of the Knights of Columbus. The radio carried the formal approbation of Pope Pius of the Knights of Columbus, million-dollar American welfare campaign in Italy.

Big Chinese Program.

The new radio program in China calls for the construction of four wireless stations. One in Shanghai is to be larger than any now in existence in this country. Completion of this station will mean direct communication between the United States and China.

RADIO FLASHES

A good safety-first slogan for the radio fan might be "Live wire? Dead man!"

A couple married by radio a short time ago already are seeking a divorce, a report says. Sort of a loose coupling.

It is said that information broadcast from South America to manufacturers of motorcars in the United States resulted in large foreign orders.

A Western minister broadcast a talk upon the value of the right atmosphere in home life. The home life, like radio, often has static in its atmosphere.

Members of the regular army, organized reserves and National Guard in San Francisco will have the opportunity to buy some of the 10,000 army receiving sets at $7.50 each. These sets were declared surplus stock and cost $1,000,000. Buyers are limited to military men only.

A small piece of hollow brass tubing, such as often used for curtain rods, will make a good shaft for the rotor in a variocoupler. The two connections for the revolving coil are made by wires running through the hollow tube to the center, then through a hole to the windings. This connection will do away with sliding contacts in the variocoupler.

It often is difficult to make dials or knobs hold firmly in place on such instruments as variometers, rheostats, etc., because the shafts are too smooth. This may be overcome easily by filing one side of the shaft slightly, making a flat surface. Place the tightening screw over this flat space. Adjust it firmly, and the dials will be held in place.

Every Picture Tells a Story

Is Winter Time Your Backache Time?

Does Your Back Foretell Every Change of the Weather? Do You Feel Old and Stiff and Suffer Sharp, Rheumatic Pains? Then Look to Your Kidneys!

ARE winter months your backache months? Does every cold, chill or attack of grip leave you lame, achy and all worn out? Does your back throb and ache until it seems you just can't keep going another day?

Then look to your kidneys! Grip, colds and chills throw a heavy strain on the kidneys. They overload the blood with poisons and impurities that the kidneys have to filter off. The kidneys weaken under this rush of new work; become congested and inflamed.

It's little wonder, then, that every cold finds you suffering with torturing backache, rheumatic pains, headaches, dizziness and annoying bladder irregularities.

Don't wait! Delay may lead to serious or chronic kidney sickness. Realize that your kidneys have weakened in fighting the cold-created poisons and give them the help they need. Begin using *Doan's Kidney Pills* today. *Doan's* have helped thousands at such times and should help you. *Ask your neighbor!*

"Use Doan's," Say These Good Folks:

M. A. RIVETT, 1108 Cheyenne Ave., Grand Forks, N. Dak., says: "I take Doan's Kidney Pills whenever I have attacks of backache and they are all that is claimed for them for such trouble. I have to do a good deal of lifting, and being exposed to all kinds of weather I frequently take cold. This settles in my kidneys and causes a severe lameness in my back. I become so lame I can hardly stoop or lift, but Doan's Kidney Pills never fail to rid me of this trouble."

MRS. E. GRAHAM, 411 Third Ave., N. Jamestown, N. D., says: "I took cold after doing a heavy washing and it settled on my kidneys. I suffered so with backache it interfered with my housework. Twinges of rheumatic pain affected my left shoulder and made it painful. I was so bad I couldn't lift. My kidneys acted too frequently, and as a member of the family had used Doan's Kidney Pills, I got some and took them. Doan's cured me and I haven't had a sign of the trouble since."

Fatal Artillery Practice.

While a battery of Swiss artillery was at practice near Sursec, north of Lucerne, a shell richochetting from the ground struck the house of a peasant. The peasant's wife, who was having dinner with her daughters, and a workman, was killed, but the others were not harmed. The shell entered through the kitchen and buried itself in a loft without exploding.

Aspirin

Say "Bayer" and Insist!

BAYER

Genuine

Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer product prescribed by physicians over twenty-two years and proved safe by millions for

Colds	Headache

CARTER'S LITTLE LIVER PILLS

Small Pill. Small Dose. Small Price.

Wonderful Japanese Towers.

The tallest reinforced concrete tower in the world has recently been completed in Tokyo, Japan, and will be used to support the aerial of a wireless station. It is 672 feet in height. The lofty structure, as described in Popular Mechanics Magazine, is built in the form of a chimney, having an inside diameter at the base of 55 feet, and tapering to 3 feet 6 inches at the top. A spiral steel stairway winds up through the interior, landings being located approximately every 150 feet, these connecting to exterior balconies, from which sightseers can view the surrounding country. Engineers are said to be preparing plans for two similar towers, which, however, will be almost twice as high.

A Heavy Hand.

Prof. Barrett Wendell, Yale's brilliant and famous critic, was talking at a tea about a new novelist.

"He has a heavy, awkward hand," said Professor Wendell. "When he wants to be impressive he reminds me of the divine who went to jail to administer the last comforting rites of the church to a murderer.

"'Dugald, mon,' he said—for he was a Scot—'Dugald, mon, the gallows is ready, the rope's ready, the hangman is ready—Dugald, are you ready?'"—Exchange.

Though we travel the world over to find the beautiful, we must carry it with us or we find it not.—Emerson.

EDITORIAL

THE BIBLE.

The Bible is the only book that has withstood the wear and tear of the centuries. After all these years it stands untarnished. It has resisted every attack of the Atheist. It is not only the finest specimen of beautiful thought, exquisite language, unparalleled metaphor, but it is the infallible rule of faith and practice.

Rai at it as they may, the ungodly can do nothing with it. It emerges from every attack shining more brightly than ever, a beacon light to guide man into the safe harbor of heavenly rest.

In his weekly letters in the Minneapolis Journal, W. J. Bryan says a number of fine things, but none finer than what he said last week about the Bible. In the course of that article Mr. Bryan said:

"Let the Atheists and the materialists produce a better Bible than ours, if they can.

"Let them collect the best of their school to be found among the graduates of universities—as many as they please and from every land.

"Let the members of this selected group travel where they will, consult such libraries as they like and employ every modern means of swift communication.

"Let them glean in the fields of geology, botany, astronomy, biology zoology, and then let them roam at will wherever science has opened a way.

"Let them take advantage of all the progress in art and in literature, in oratory and in history—let them use to the full every instrumentality that is employed in modern civilization.

"And when they have exhausted every source, let them embody the results of their best intelligence in a book and offer it to the world as a substitute for this Bible of ours.

"Have they the confidence that the prophets of Baal had in their god?

"Will they try?

"If not, what excuse will they give?"

FOR-GET-ME-NOT!

Sixty thousand for-get-me-nots were made by disabled war veterans and sold in the twin cities a couple of weeks ago. The purpose was to raise funds with which to help disabled soldiers.

In Heaven's name, must the men who fought this country's battles in the World War resort to such means to help one another?

It is more than four years since the war ended. Are these men who saw service then still uncared for by the government?

We guess they are.

Red tape is responsible for many crimes and maybe this is another to be charged to it.

Surely the government has had ample time to do all the "looking into" such cases that the most leisurely might require.

If there are any disabled veterans of the war who have not yet had all the care and attention which they need, it is high time that people demand the reason why.

Let's not have the disgrace of disabled soldiers driven to selling paper flowers in order to gain the aid they need. That is a condition of affairs which there can now be no possible excuse.

It's nigh unto painful to think of Uncle Sam's defenders being compelled to sell *paper forget-me-nots* on the streets of a large city in order to keep body and soul together!

Yet that's what they're doing.

Every town has a few youngsters who seem to think it makes them manly and noble to appear tough. Now and then a "grownup" assumes the same attitude. If you are really tough and hard-boiled, people will find it out without any effort on your part.

Many a church has been split wide open by a wedge no thicker than a human tongue. Many a home has been wrecked by the same unruly member. Many a struggling young person has his hopes blasted by this same important organ in the head of an unsympathetic neighbor. Many a heartache has resulted through careless words spoken, though with no evil intent. Then why not speak well of a person, if we speak at all? And if we cannot utter words other than those of discouragement to one struggling to better his condition in life, let our tongues ever remain silent.—North Branch Review.

If a man had a $50 pup he would look after it carefully and not let it run all over town. But if he has a boy it is different. He is turned loose at a tender age and let go to the devil. The people wonder where the great army of dead-beats, tramps, loafers, and sots come from each decade. They are germinated from the pure seed and are gathered from our homes and are sown broadcast upon our streets and alleys. It may be your boy who is making a growth in that direction. At all events the boys ought to be given an equal show with the bull pup.

And now comes a woman who wants a divorce because her husband hit her with an axe. Has the nineteenth amendment completely spoiled the women folks?

AMATEUR BOOZE.

It was certainly a nightmarish picture af amateur brewing and distilling that Major Haynes, federal prohibition commissioner, drew recently in a message to the American Public Health Association.

He had found iodine, a deadly poison, used to color "bootleg" liquor and give it a "kick." He has found many stills operating on garbage, with half rotten banana skins, watermelon rinds, potato peelings, etc., appearing in the mash.

And the home distilling is not much better than that done for profit. Ignorance of proper practice and inability on the part of amateurs to keep their stills at a proper temperature result in the production of ether, fusel oil and other highly poisonous liquids instead of alcohol.

Often there is produced an aldehyde which "pickles" the drunkard's digestive apparatus.

Some doctors say that the drinking of that stuff now being made and distributed is producing an alarming crop of diabetes.

The surroundings of the illicit still are nauseating, too. Some stills have been hidden under hog pens. Nearly all the bootleg stills are filthy as well as unscientific. Some of them use lead pipes instead of copper, thus adding another poison to their devil's brew.

Brewing and distilling, whether alcoholic or otherwise, are complicated arts, requiring experience, skill and honesty. The only safe way to do is to accept no amateur or illicit brew or distillation of any kind.—Wadena Pioneer Journal.

THE PRIZEFIGHT GAME.

This is how one Minnesota editor views the legalized fight game, the appended article being taken from the Fairmont Sentinel:

"The beetlebrows of the prize ring revelled in a saturnalia of brutality the other night. The affair was pulled off in the St. Paul auditorium in the presence of 7,000 fight fans who yelled their heads off as the thugs pummelled each other till they were more dead than alive. Some of the refined incidents of the sensational encounters are graphically described in a page or so telling the blood-spilling details. Let us quote a few choice ones: "Giving away 13½ pounds, Gibbons gave Miske a boxing lesson. Twice Billy wobbled and looked as if he would go down, but Tommy could not put the finishing blow across. Nearly 7,000 fans yelled wildly for a knockout. Miske landed one blow that probably enabled him to go the route. It was a glancing left in the fifth round that closed Tommy's left eye in the sixth. With only one good eye, Tommy slowed up in the seventh and the round was even. Through the eighth, ninth and tenth Gibbons tore into him with the speed of a bantam, showering his townsman with lefts and rights. Miske's face at the finish was a mass of blood, swollen and battered from the terrific hammering he took."

The Sioux Indian inhabited this country a little over a half century ago. Do you suppose they staged anything more brutalizing than the modern prize ring scenes, protected by law and promoted by men who make pretensions, of respectability? We doubt.

Then again, here is another view of the same fight by Fred Hadley of Winnebago, who was probably at the ringside, and thought the fight only a physical culture contest:

"A delegation from here attended the Miske-Gibbons physical culture exhibition at St. Paul last Friday night. Gibbons won all the way."

What has become of the old fashioned man who used to boast that his word was as good as his bond?

Job was a patient man—but he never had to go to a high-toned piano concert with his wife.

ROB FARMER

Somebody somewhere is robbing the farmer of his legitimate profits to the detriment of the nation as a whole.

With the improved methods of agriculture, and the consequent increase in production, the farmer's profits should be far in excess of what they are today.

From one end of the country to the other the consumer continues to pay high prices for farm products, only a portion of which as a rule goes to the farmer.

Who gets the difference? Who is lining his pockets at the expense of both the farmer and consumer?

Many official investigations have been started, but still are to be heard from.

Many promises have been made, but are yet to be kept.

Many people are wondering how long the condition will continue, but they will keep on wondering.

Because, as a matter of fact, there appears to be no one with moral, physical and POLITICAL courage enough to unearth the robbers and give them their just deserts.— Carlton County Vidette.

"THE WORLD'S RICHEST COMMUNITY."

Steele county, Minnesota, is known in that part of the state as "the world's richest community." And the reason is dairying. There is one cow to every inhabitant of the county. Butter making for the year is estimated at five million pounds, worth $2,500,000. The county has 23 creameries in full blast and the bank deposits in Steele county amount to $400 for every man, woman and child. Dairying is the gold mine of the western farmer, year in and year out.

If Congress has nerve enough to beat the annual appropriation of $360,000 for free seeds, perhaps they will brace up and beat some of the other steals of annual custom, timeworn and frayed, and which never served any good public purpose, but which were designed years ago to help someone get rid of something which they could not sell. The big seed concerns may have to dump a few carloads of non-germinating seeds into the river as a result, but the government will be rid of a useless expense and the people back home will be saved the annoyance of annual failure with government furnished seed.

Sometimes we all talk best on subjects in which we have had the least experience. The man who wrote "Home, Sweet Home" never had a home. "The Old Oaken Bucket" was a booze fighter, while the young man who wrote "I Never Raised My Boy to be a Soldier," never had a son. This should comfort the politician who has to make a speech on a subject he doesn't know much about.—Waseca Journal.

The Moonshine Toll

The Tribune clipped the following items at random from one of the dailies published the day after Christmas:

Boston—More than fifty persons are in hospitals here suffering from alcohol poisoning as a result of drinking liquors obtained during the holidays. Two deaths were due to this cause. Eighteen of the patients were listed as in a critical condition.

New York—Eight deaths were attributed to drinking poisonous liquor over Christmas. A score or more of victims were confined to hospitals. Of the eight persons who died two were women. A Brooklyn woman was arrested as the seller of whiskey which caused the death of one of the women.

Detroit—Poisonous liquor obtained over the Christmas holidays was declared by the police to have been responsible for one death and the illness of more than a score of persons here. From Saturday until Monday morning 23 persons declared to have partaken of poisonous whiskey were admitted to the hospital. Four were discharged after a short stay in the hospitals, but the others are reported to be in a serious condition.

Shelby, Ohio—For five minutes Phil Weiganott and Lester Elston stood at the bier of Robert Longley today and tearfully gazed on the body of Longley, who died after drinking "moonshine" they admit they made. Police permitted them to gaze on the body of Longley as a "moral example." Elston and Weiganott are held on charges of murder. Two other men who drank some of the same liquor are blind.

Big Event Slated—Toad Mountain home talent will have another fling next Tuesday night when half the town will assemble in the hall to see and hear what the other half has to do and say. The marshal has sworn in several deputies who will be present incog. and every effort will be made to keep order. The fire department has been notified to be in readiness for a hurry call. A complete obituary will appear next week.

A smile is one contagious thing that you shouldn't be afarid of.

FARMERS' ILLS DUE TO FAULTY MARKETS BUREAU CHIEF SAYS

Co-operation Held Remedy by J. F. Reed in Address Before Annual Convention.

Higher prices, which can be obtained through better marketing and distribution, rather than increased production is the great need in agriculture today, said J. F. Reed, president of the Minnesota Farm Bureau Federation in his annual address before the fourth annual convention of that organization, held this week at St. Paul.

Co-operation, he held, offers the best solution for the problem, and said "producers' organizations are going forward, in spite of all obstacles." He urged government agencies "supposedly instituted to be of service to the farmers" to give more consideration to the marketing problem.

"We have," he said, "rather than over-production, a lack of proper facilities to market and distribute our products. Millions of people improperly nourished and clothed prove this statement.

"There is no disposition on the part of farmers to belittle the efforts of those who have taken over the distribution and marketing of farm products, but we do feel that those who have engaged in such work have obtained greater remuneration than the men who produce the product. Such being the case, it is clear to me that our marketing system has failed to carry its share of the burden. Continued production on the present quantity basis is a liability to agriculture."

Farmers, Mr. Reed said, must learn to yield a degree of their independence of action and more truly adjust themselves to their neighbors' needs, if cooperative marketing is to accomplish the greatest possible results.

Gray Silver, Washington representative of the American Farm Bureau, told the convention that Farm Bureau activities at the national capitol had saved farmers more than 80 times the money paid in dues to the national organization. "Farmers are holding their congressional representatives to strictest accountability," he said.

J. W. Coverdale, secretary of the national organization, discussing the Farm Bureau's job asid the first problem is to keep the movement from following unsound policies that have led to the destruction of many promising farmer organizations.

Women's interest in the program centered around an address by Mrs. Charles Schuttler of Farmington, Mo., who talked on the importance of the farm home in the movement.

Reports were given by department heads: F. L. French, secreaary; V. E. Anderson, treasurer; J. S. Jones, organization; and S. E. Elliottt, news service.

The convention heard reports from all farmer-owned terminal sales agencies in the state with which the Farm Bureau is co-operating.

EXCHANGE ECHOES

Everybody is hollering for less work and more money. The working man wants his family to educate themselves—at the movies. The fellow with a small business wants a twin six. The fellow with lots of money wants his tax removed. Nobody seems to want to work harder and produce more and live a life of sanity—such as father and mother used to live.—Dodge County Repubilcan.

* * *

During the last two years fraudulent promoters have fleeced the "suckers" out of $1,000,000,000, according to the computations of the U. S. treasury officials at Washington. However we do not imagine that the crop of suckers is entirely depleted despite the severe two-year epidemic, as the best authorities on suckers gave out the information not long ago that one is born every minute.—North Branch Review.

,000 HIKING CLUBS IN GREATER NEW YORK

They Swing Along Highways and Through Woods in Groups of Varying Size.

New York.—One must walk nowadays to be in the swim. Statistics gleaned from the out-door departments of the newspapers, from the Boy Scout and Campfire Girls' organizations, from the Y. M. C. A. branches and kindred bodies, from scores of amateur athletic clubs and from the leading dealers in sporting goods, indicate that today there are no less than 8,000 hiking clubs in Greater New York, with a total membership of more than a quarter of a million men and women, who are keeping themselves in the pink of condition and experiencing the real joy of living by getting regularly out into the open country with no other means of locomotion than their God-given legs.

"Best Walkers Make Best Citizens," Says Mayor of New York.

The city of New York has taken official notice of the movement. On three occasions recently Mayor Hylan has congratulated the boys and girls of the public schools upon their enthusiasm in taking up the new sport of hiking. In his dedication of the great new public playground in the Bronx the other day Mayor Hylan extolled the athletic tendencies of the boys and girls and impressed upon them that there was no better or more profitable way in which they could pass their vacations and utilize their holidays than by the excursions into field and forest of their walking clubs. He gave the same message to the Amateur Athletic Union of Brooklyn a few days later, and when a club of East Side boys and girls visited him at city hall preparatory to a hike to the tomb of Roosevelt at Oyster Bay he assured them that the best walkers among them would make the best citizens.

Walk and Be Well

No less enthusiastic a champion of the walking game is Dr. Royal Copeland, city health commissioner. "The benefit to health and the safeguard to morals to be found in long walks," said Dr. Copeland in an interview, "are too apparent to speak of them. If one takes long walks alone it is well, for he walks the road of health, but if he takes long walks in company it is better for he adds the tonic of companionship to his exercise. Walking is the one form of exercise in which there is the minimum risk of overdoing it. In short, I consider walking the most beneficial of all exercises and it is never out of season."

"Never in my life-time," said Edward R. Wilbur, manager of a nationally known sporting goods store, "have I known such a demand as now for outdoor garments and shoes and stockings and appliances for the tourist's luncheon box. The rapid spread and tremendous popularity of the walking-club idea has no parallel in our experience.

"The hiker can make his requisite just what he feels like spending. Really, there are only two or three articles indispensable to hiking—thick walking shoes that allow lots of room, thick woolen socks and clothing that will give freedom of limb. He should have a canvas or leather musette bag, such as the soldiers used in France.

The Cow in the Knapsack

"To get the real benefit and joy out of hiking luncheon should be carried and prepared and eaten in the open. Bread and cheese, a few slices of bacon, some coffee, a can of condensed milk, and a cake of chocolate furnish high-powered fuel for the hiker and are readily and happily assimilated even by those who in their pre-hiking days were afflicted with digestive apparatus so feeble as to balk at crackers and milk. Fortunately for the hiker, he can replenish his simple larder at any cross-roads store and provide himself with the most nutritious and appetizing food in a form that can be conveniently carried.

"No single development in the problem of food transportation for the hunter, fisherman, hiker and all lovers of the out-of-doors can compare with the gift bestowed by the man who first found the way to make condensed milk, thereby putting a dairy in every man's knapsack. Before long there will be a national association of hikers, and Gail Borden will be its patron saint. Such an association could do much to encourage the spread of the most beneficial and universal of all outdoor pastimes, map out interesting routes, secure the establishment of shelters, rest-stations, and camp sites at suitable locations, and insure the rights of pedestrians on country roads."

WITH THE FUNNY MEN

A DISAPPOINTMENT.

"I'm disappointed in that man."

"Why?"

"I borrowed $10 from him the other day."

"Where's the disappointment in that?"

"He actually asked me to return it today. I thought he was a man who could afford to lend me that much indefinitely."

All at Sea.

"That new family next door will soon be getting on Mrs. Jibway's nerves."

"Are they disagreeable?"

"No, but she can't find out what their income is."

"That's nothing to worry about."

"You don't understand. She's bound to have a talking point."

It Pays to Advertise.

A western evangelist makes a practice of painting religious lines on rocks and fences along public highways. One ran: "What will you do when you die?"

Came an advertising man and painted under it:

"Use Delta oil. Good for burns."—American Legion Weekly.

Footprints.

"The poet says great men leave footprints in the sands of time."

"There are different kinds of footprints," rejoined Senator Sorghum, thoughtfully. "Some we observe in the hope to follow them, and others we inspect like detectives looking for clues."

In This Age.

Young Woman (entering office)—Father, dear, can't you come over to have dinner with me and my husband?

Papa—Your husband? Are you married?

Young Lady—Why, yes. Don't you read the paper, papa.—London Mail.

The Laws and the Lawyers.

"Do you think that constantly making more laws improves men's morals?"

"I don't undertake to say as to morals," replied Senator Sorghum; "but it sharpens their minds. The more laws we make the smarter the lawyers appear to become."

[illegible] EED FOR ONCE

Mrs. [illegible]—In matters of importance the wisest men are the best men.

Her Husband—Sure! I've noticed it at weddings the best man is the wisest guy.

Very True.

The surest road
To fame and wealth
Is keeping on
The road to health.

Such Luck.

Doctor (to messenger)—Why didn't you give me that message before? Now it's too late.

Messenger Boy—Why? Did the patient die?

Doctor—No, he got well again.

Probably a Dry Discourse.

Professor (to student)—You disturbed me yesterday by talking out loud during my lecture.

Student—Impossible, professor! Impossible! I must have been talking in my sleep, then.

A Mere Nothing!

First Film Star—Got anything special on today, Cyrus?

Second Ditto—Nope—only a race against death and a leap for life.—London Bystander.

Not on Oath.

Miss Oldun—I know that age is beginning to tell on me.

Miss Pert—Yes, dear, but you needn't mind so very much. It isn't telling the whole truth.

Speeding Up.

"John, did you kill that roach?"

"No, he was too speedy for me."

"Why, he was just poking around."

"But it didn't take him long to change gears."

A Business Failure.

Alice—Did Gladys make a successful stenographer?

Virginia—No, indeed. She has been at it three years now and is still unmarried.

Jutifies Its Existence.

Mr. Pstunge—Did that correspondence course on "Success in Business" ever help any one to prosperity?

Mr. Pstinger—Sure! I'm making a pretty good thing out of it.

The Village Philosopher

How Suspicious of Them!

"Why do you go on the balcony when I sing? Don't you like to hear me?"

"It isn't that. I want the neighbors to see that I'm not beating my wife."—Passing Show.

Considering that he is supposed to pray for everybody, it is not surprising that the preacher sometimes prays with a slack enthusiasm.

The kids are all back in school now, and the teachers have a chance to estimate just what it must mean to

Burbank's spineless cactus is a good thing—but a spineless man is a good for nothing.

Strange as it may seem, there are still those who believe in the fairy tales of the fortune tellers.

If there were not so many optimists, there wouldn't be so much oil stock for sale.

RED CROWN GASOLINE

Your Guarantee of Service

A Purring Motor in Winter

There is no more thrilling winter sport than motoring. If your motor purrs along ready and eager for a hard pull or a quick spurt you are thrilled. And this is dependent upon the gasoline you use. There is no commodity you can buy that gives you so much for your money as a good gasoline. It is your faithful servant, ready to do your bidding in fair weather or foul.

But be sure you get the best.

Use Red Crown

The High Grade Winter Gasoline

It starts easily, even in severely cold weather. It responds instantly when you touch the accelerator. It delivers all the smooth, rhythmic power your engine is capable of developing. It gives you racing speed if you want it. It burns clean and vaporizes to the last drop.

It gives maximum mileage and you can get it everywhere and everywhere the same.

RUSS MAKE PLEA FOR RECOGNITION

M. Tchitcherin, Soviet Minister, Addresses Delegates at Lausanne.

SPECIAL PARLEY ASKED

Declares Powers Continue Domination and Seek to Make Straits Basis of Attack Against Black Sea Countries.

Lausanne—M. Tchitcherin, the Russian Soviet foreign minister, made an appeal for recognition of the Soviet Federation in a statement to the Associated Press:

"The Soviet republic," he said, "earnestly hopes that the beginning of the new year will bring us into closer collaboration with the American people for productive work and for the opening of our natural resources to mankind.

For Universal Disarmament.

"Our most earnest desire is universal naval disarmament, as well as disarmament on land, peace and productive work. The Soviet republic is strong enough to resist aggression, but we must regret that the scheme which has prevailed at Lausanne will compel us to arm and fortify our south coast and will divert us from our fundamental aim—production."

The entire Soviet delegation delivered a New Year's sermon to the powers, taking as a text, "Russia's Sympathy for Oppressed Peoples."

M. Tchitcherin distributed to all the delegations at Lausanne a memorandum declaring that a solution of the Near East problem "is possible only by abandonment of the policy of conquest and intervention toward Turkey."

"Turkey Saved."

"Happily," the memorandum continues, "the Soviet's advent to power in Russia has saved Turkey from total disintegration.

"Unhappily, however, at Lausanne, according to the memorandum, the great powers continue their old policy of domination and expansion and seek to settle the straits problem so that it can be used as a basis of attack against the Black Sea countries.

The memorandum warmly takes sides with Turkey in her struggle for sovereign freedom and insists that imperialistic nations must cease to consider Moslems as inferiors.

Special Parley Asked.

In behalf of the Moscow government, M. Tchitcherin recommends the calling of a special conference to examine into the status of the minorities of all countries and declares that the only way to establish peace in the valley of the Danube and in the Balkans is the formation of a confederation by the people of those regions, each state retaining its autonomy.

Optimists found hope in the fact that the Turks have agreed to meet the British experts and discuss the Mosul frontier, and in the announcement that further progress had been made in the solution of the straits problem. But it is generally admitted that no change for the better or the worse can come until Ismet Pasha has heard from Angora and until the trend of the Paris reparations conference can be noted.

KIDNAPPERS RETURN GIRL

Hostage Returned as Father Reports $20,000 Demand to Police.

Detroit, Mich.—Eight-year-old Mary Giovannangeli, kidnapped from in front of her home and held for a ransom of $20,000, was returned to her home in less than 12 hours after her father, Nicola Giovannangeli, East Side banker, had reported her disappearance to the police.

The child's return was almost as daring as her seizure more than a week ago. Despite a police guard stationed at her father's bank and home to block any attempted reprisals for his action in reporting the demand for ransom, she was brought to within half a block of her home. There a man helped her from an automobile and directed her to "hurry home and don't be afraid of the dark."

RAILROADS MAKE RECORDS

Washington—In spite of car shortage and strike conditions which railroads encountered, they were able to move more agricultural products during 1922 than ever before in their history, according to a statement given out by the car service division of the American Railway association.

Chicago Building Breaks Records.

Chicago—All Chicago's building records had been smashed when Charles C. Bostrom, building commissioner, closed his books for 1922. The value of new structures for which permits were issued totaled $227,742,010. The previous record was that of 1921 when permits were issued for buildings to the value of $124,028,010. December of this year was the greatest of any month in Chicago's history for buildings, records showed, when permits were issued for buildings valued at $34,702,200.

NEWS REVIEW OF CURRENT EVENTS

Placing Germany in Voluntary Default Is Big Victory for France's Policy.

PREMIERS IN SESSION AGAIN

Berlin Suggests Four-Power Agreement for European Peace—Borah's Plan for World Conference—Mosul Oil Lands Question May Disrupt Lausanne Parley.

By EDWARD W. PICKARD

SENATOR BORAH, heading a group of mild reservationists and Democrats, has offered an amendment to the naval appropriations bill requesting the President to call a world conference to discuss economic questions and further limitation of armament. What is your opinion of the advisability of this action?

GERMANY has been declared, by the reparations commission, to be in voluntary default in part of her reparations payments, namely the wood deliveries due in 1922. This in itself doesn't seem to be of great importance, but the action of the commission represents a decided victory for France, which has contended for a long time that Germany could be placed in voluntary default by a majority vote of the commission. Great Britain, holding the opposing view, had been supported by Belgium and Italy, but is now deserted by them on this issue and her representative cast the only vote against the action. Mussolini appears to have swung to the French side in the reparations dispute, and it may be that in the session of the allied premiers in Paris this week he and Theunis of Belgium will stand with Poincare, leaving Bonar Law alone in his effort to restrain the French from taking radical steps to collect from Germany.

More than 60 per cent of Germany's wood deliveries were made, but she said she could do no more and that the deliveries for 1923 must be greatly reduced. She also announces she cannot deliver the 60,000 tons of pure nitrogen due on reparations account because the German production of this commodity is already far below domestic requirements.

France, according to semi-official statements, feels that unless she exacts forfeits from Germany she faces absolute ruin, and consequently she intends to get the forfeits, even if payment in full cannot be obtained. However, M. Poincare does not now intend to seize the Ruhr valley by force of arms. His present plan is to send in customs officials to collect revenues and in this way wring reparations from Stinnes and the other rich industrialists whose resources the German government has so far refused to draw upon. These magnates have steadily opposed all plans for payment of war obligations, and at the same time have been piling up vast fortunes in a country that claims to be poverty stricken and starving. Naturally the French are bitter against them, and naturally, too, France cannot stomach the British policy which calls mainly for gentle treatment of Germany so that British trade may benefit.

While Poincare's program does not involve a military invasion of the Ruhr, it provides for the use of the army to protect the civilian officials to be sent into that region. Judging by the past, such protection will be necessary.

GERMANY has just made a suggestion to the United States which may possibly meet with the approval of President Harding. It is that our government sound the European powers as to their disposition to enter into a four-power agreement to preserve the peace, similar to the Pacific treaty. The four nations would be Great Britain, France, Italy and Germany, and the United States would be only an intermediary. The peace term for Europe might be set at thirty years. It is argued this agreement would guarantee France against aggression by Germany and enable her to reduce her big standing army, and also would guarantee Germany against further seizure of territory by the French.

President Harding and Secretary of State Hughes are disposed to move very carefully in matters relating to Europe, but it is known that Mr. Harding believes some such pact, by which the nations will agree to consult one another before resorting to war, will prevent warfare more surely than will any league to preserve peace.

SENATOR BORAH'S resolution for a world conference on economics and armaments, alluded to at the head of the column, not only has caused a lot of discussion in Washington, but also has disrupted the young alliance between the farm and radical blocs in congress. The Idaho senator has seemingly broken away from the group of "Irreconcilables" and Johnson of California already has loudly announced his opposition to the Borah plan. He says: "An economic parley, of necessity, must consider not only present conditions in Europe but the debts due to us, and, of course, the reparations due from Germany. Were we to invite the interested nations to discuss these subjects in order to arrive at understandings and agreements, with a mental reservation to take no part in the ultimate solution, we would be guilty of a species of bad faith, of which America has never been guilty and which Americans never can tolerate.

"If we bring the nations of the earth here to Washington for such a conference we'll dump into America's lap the economic ills of Europe and the reparations muddle. If, officially, we sit down with the other nations who meet at our invitation, and reach an understanding and agreement, we are in honor bound to carry out and execute that agreement, and the very instant we undertake to carry out an agreement to enforce reparations, that instant we abandon the traditional policy of America. We become a part of the European scheme of things and we enter upon that course from which we have so recently escaped and which our people so overwhelmingly repudiated."

Mr. Borah insists there is nothing inconsistent in his program, maintaining that it is up to the United States to point a way to stability and peace in Europe but that it is not necessary for this nation to enter into pledges to carry out agreements.

Because the Borah plan looks to the restoration of the European market for American agricultural products, it is regarded with favor by the members of the farm bloc.

CONTROL of the Mosul oil fields may yet wreck the Lausanne peace conference. Ismet Pasha notified the British delegates that Turkey would maintain her claim to ownership of the Mosul vilayet and could not accept the British contention that it is a part of Iraq and therefore of Mesopotamia over which there is a British mandate. In reply Marquis Curzon informed the Turks that Great Britain never would abandon the Mosul vilayet and that no prolongation of the conference would influence the British government to recede from its position in this matter. Lord Curzon said the British had expelled the Turks from the Mosul region and had occupied and administered it; that they had promised to free the Arabs from Turkish rule and to establish the government of Iraq, and had given their solemn pledge that no foreign power should be allowed to take any of this territory. To these pledges, he said, Britain would steadfastly adhere. Lord Curzon, however, agreed to have British experts meet with Turkish experts to define the northern boundary of Iraq.

This statement by Marquis Curzon is too flat to be taken as a bluff, and it seems certain that if the Turks do not wish to have the conference break up they must yield.

The Turks have agreed that the non-Moslem minorities in Turkey shall enjoy freedom under Turkish laws without distinction as to nationality, religion or language. They are also willing to allow the Greek patriarch to remain in Constantinople, but purely in a religious capacity. The straits question, it is believed, will be settled on the basis of an international commission that will supervise the passage of ships but will have no control over the fortified zones.

LOUISIANA'S great sensation—the murder of two men by a masked mob, the finding of their decapitated bodies and the arrest of a former deputy sheriff and a former mayor of the town of Mer Rouge—begins to look like a tempest in a teapot. So far no evidence has been made public that proves the crime was committed by the Ku Klux Klan, and though the Klan is strong in that part of the state, there does not appear, at this distance, to be any real need of the state troops which were called out by Governor Parker. The bodies were brought to the surface of Lake La Fourche by a mysterious dynamite explosion whose authors have been sought by state and federal authorities. The former mayor of Mer Rouge, Dr. B. M. McKoin, was arrested in Baltimore and charged with murder. He denies guilty knowledge of the crime and also denies having been a member of the Klan, though he defends its activities in his town. Both McKoin and the Klan were avowed enemies of the bootleggers and moonshiners who flourished in that part of Louisiana, and this fact explains much of the row.

PROHIBITION and other reform movements, some of which have been classed as obnoxious puritanism, have lost one of their staunchest workers in the death of Rev. Dr. Wilbur F. Crafts, who for twenty-eight years has been superintendent of the International Reform bureau in Washington. With almost fanatical zeal he fought the liquor and narcotic evils, Sunday amusements, prize fights and other things he thought subversive of morals, and he was a familiar figure in legislative lobbies and committee rooms in the national capital. More liberal-minded persons objected to him as a paid reformer and to his apparent influence on congress, but he always fought back at them with vigor and frequently with success. Doctor Crafts, who was seventy-three years old, succumbed to pneumonia.

SENATOR CAPPER, head of the farm bloc, says the ship subsidy bill, if enacted into law, will lead to raids on the treasury by all sorts of industries. "The losses a ship subsidy in all probability would bring on this country cannot be figured," he says, "but I cannot see how the subsidy can do anything more than to pile up a lot of costs against the government and start an international subsidy war with circles of international subsidies and a very harmful series of raids, or attempted raids, on the treasury by industries here at home. Why throw good money after bad? Haven't we lost more than $3,000,000,000 of public money in a merchant marine that cannot operate? It seems to me some other way out must be found."

THE Workers' Party of America has just held its second annual convention, in New York, in the course of which it declared for "the dictatorship of the proletariat and the supplanting of the existing capitalist government with a soviet government." They did not at this time accept openly and unqualifiedly the principles of the communist internationale at Moscow and its program of armed revolution, but the speakers made it quite plain that this was due not to lack of full sympathy with the internationale but to fear of prosecution and suppression by the federal government. The convention sent a message to the Moscow internationale reporting that it had "devoted itself to the constructive work of building a powerful revolutionary movement in America." Resolutions adopted urged all workers in this country to join in a movement to compel the government of the United States to recognize soviet Russia and grant a long-term loan for Russia's reconstruction, attacked the Ku Klux Klan and the American Legion and indorsed the Russian-American Industrial corporation.

Minnesota
Events of the week throughout the "State of Ten Thousand Lakes" told in brief form

Redwood Falls—At a meeting of citizens of the city, candidates were selected for the coming municipal election.

St. Paul—County and district agricultural societies will receive $140,104.38 in state aid, according to R. P. Chase, state auditor.

Marble—Much suffering will be caused at Marble unless coal can be obtained, C. H. Dockeray has written the state fuel commissioner.

Winona—Joseph Rostanka was given a suspended sentence of 15 days in the county jail when he pleaded guilty in municipal court to a charge of wife beating.

Duluth—Rudolph M. Olson, on trial for the third time on a charge of second degree arson, was found guilty after a district court jury had deliberated for almost 66 hours.

St. Paul—Establishment of a state constabulary in some form, functioning on the basis of similar institutions in other states, is favored by the Minnesota crime commission.

St. Paul—Pierce Butler, who leaves to take up his duties as associate justice of the United States supreme court was the guest of honor at luncheon given by the Ramsey County Bar association.

Minneapolis—Abolishment of the grand jury system in Hennepin county is sought in a bill prepared by A. L. Lennon, senator-elect of the Twenty-eight district, for early introduction in the Legislature.

Minneapolis—William L. Martin, vicepresident in charge of traffic for the Soo line, has resigned and will retire Jan. 1, after having been continuously in the service of the company since 1886.

Waverly—Fire destroyed the Codden Mercantile store and the O'Rourke poolroom here, causing a loss of approximately $30,000. The blaze is believed to have started from a defective chimney or furnace.

Minneapolis—The Civic and Commerce association is co-operating with officials of the Minneapolis branch of the Veterans of Foreign Wars to bring the national headquarters of the soldier organization to this city.

Ruthton—A special election soon will be conducted here for the purpose of taking action on the issuing of bonds for the erection of a new schoolhouse. It is proposed to erect a structure of five or six rooms.

Duluth—Construction of four new rural schools in St. Louis county will be completed within the next week and the buildings made ready for occupancy when school is resumed January 8, county school authorities announced.

Moorhead—Recount of the senatorial vote cast in the November 7 election was completed and the returns virtually assure A. Haagenson of Barnesville, Farmer-Labor candidate, his seat in the state Senate from the Forty-ninth district.

St. Paul—Suit has been filed by the state of Minnesota against R. L. Heer, Minneapolis, in the Ramsey county district court, for $19,000 alleged to be due for timber sold to Mr. Horr in 1912. The timber tracts were in Koochiching county.

Montevideo—Evidence has been taken in the proceedings where Emil H. Nelson asked that he be declared the duly selected register of deeds of Chippewa county, notwithstanding the fact that official returns show Mrs. Ruth B. Bullard as having been elected.

St. Paul—Encouragement of industry by establishment of a department that would compile data on existing manufacturies and be able to point out business opportunities, will be recommended to the legislature in the report of the state immigration commissioner.

Fergus Falls—Fines aggregating $5,785 have been collected here thus far under sentences imposed by Judge Andrew Miller in liquor cases. There are still a number of fines to be collected, prisoners having been sentenced to a term in jail and to pay a fine at the expiration of the term.

Morris—A meeting of the bankers, business men and farmers of the 48th legislative district, comprising Grant, Stevens, Traverse and Big Stone counties, will be conducted in Morris to hear the report of Senator Cliff, who was sent to Washington by the bankers of this district to urge legislation that would relieve the present unsatisfactory marketing conditions among the agricultural producers of the northwest.

Madison—One woman was killed and two men are in a local hospital with severe bruises as the result of an automobile in which they were riding overturning in a ditch when an attempt was made to pass another car on the road.

Duluth—Work will be started at once on a new $1,000,000 grain elevator to be constructed on Rice's Point for the Russell-Miller Milling company of Minneapolis. The elevator will have a capacity of approximately 1,000,000 bushels. The structure will cover an area of 287 feet wide by 1,[illegible] feet long.

[illegible] suffered from a [illegible] of Christmas trees.

St. Paul—Fifty-eight aliens were given citizenship papers by Judge William Louis Kelly in the Ramsey county district court.

Pipestone—Horace H. Gilmore, aged 76, veteran of the Civil war and a resident of Pipestone county since 1878, died at his home in this city.

Crookston—Preceding the scattering of the students of the Northwest Farm school to their homes, a gettogether dinner was conducted at the school.

Mankato—Judge W. L. Comstock in the Blue Earth county district court issued an order dismissing the petition of the Mankato charter commission.

Winona—Consumers of gas in this city will pay $1.80 per thousand cubic feet during the four months' period beginning January 1, it was announced.

Lake Benton—Fire originating from an oil stove burned on the roof of the Larson Brothers' root cellar, causing a loss of 400 bushels of potatoes.

Grand Meadow—Otto Skaran, a bachelor living on his farm five miles north of here, was found dead this morning by neighbors who called at his place.

Red Wing—This city has at least one robin that missed the "Robin Special" when it left for the south last fall and seems determined to spend the winter in Red Wing.

Hanover—Armed citizens rallied from their beds by Miss Leona Haefer, night telephone operator, opened fire on four bandits and balked a raid on the Hanover State bank.

Moorhead—A. A. Haagenson of Barnesville, victorious farmer-labor candidate for the state senate, maintained his lead in Wilkins county, according to results of the recount.

Park Rapids—Mrs. Catherine Vogtman is dead at her home here. She was one of the earliest settlers of Hubbard county and one of the last survivors of the New Ulm massacre.

Minneapolis—"The Road Program for 1923" was the subject of a talk by Charles M. Babcock, state highway commissioner, at a luncheon of the Minneapolis Society of Engineers and

Chatfield—Fire destroyed the large barn of the John Cravach farm near here, together with 30 head of cattle, 5 horses, 20 hogs and a large amount of grain. The loss is estimated at $8,000.

Duluth—A verdict against the United States railroad administration was returned by a district court jury here in what is considered a test case involving millions of dollars of property destroyed by forest fires October 12, 1918.

St. James—Strong protest against the reappearance on the screen at this time of the "Fatty" Arbuckle pictures was voiced by the second district Minnesota Federation of Women's clubs.

Mankato—Miss Pietertje Burke, has just completed a year's record with 1,200 pounds of butter and between 27,000 and 28,000 pounds of milk. This is the butter record for Blue Earth county.

St. Paul—Two men appeared before Federal Judge Page Morris in St. Paul, admitted that they were addicted to the use of narcotic drugs and asked to be given terms in the federal penitentiary.

St. Paul—Erection of a $2,500,000 technology institute in St. Paul, to provide all modern facilities for vocational teaching to disabled veterans, is being planned by a group of ex-service men.

Hastings—Completion of the recount of votes cast at the last election for Dakota county coroner yesterday showed Otto Englebert in the lead over Dr. George Ernest of South St. Paul by four votes.

Minneapolis—Minnesota grain inspection records show that last October Minneapolis received 11,332 cars of spring wheat containing an average of 4½ per cent dockage, or the equivalent of 450 cars capacity.

St. Paul—The State Board of Investment authorized the payment of $25,000 to the State Board of Relief funds to be given to the Winona Teachers' college, which was destroyed by fire a short time ago.

Fergus Falls—Theodore Johnson of Amor has tamed a muskrat that he caught young. The animal makes its home in the barn and plays with the cats at times. Mr. Johnson says the animal is an unfailing weather indicator.

Windom—Robbers made a $400 haul of merchandise at the store of A. B. Becker here. After securing the loot they drove to the Standard Oil filling station where they broke a lock on the pump and obtained a supply of gasoline for their car.

Winona—Damage estimated at $7,000 was caused by fire which destroyed the West Prairie, Wis., flour and feed mill eight miles from here. The loss is not covered by insurance. One thousand bushels of grain were consumed by the flames.

St. Paul—Judges of the Ramsey county district court will prepare a bill to be submitted to the legislature to provide them with more court reporters. The present staff of shorthand experts is declared insufficient to handle the work.

Janesville—Attorney R. R. Brown of this city has been appointed judge of probate for Waseca county to fill the unexpired term of Judge Senn who on Jan. 1, assumes the duties of his office as district judge.

Duluth—A Lake Superior gale is still a cyclone as far as the federal court is concerned, Judge Page Morris refusing to set aside his ruling of last August, when he directed a verdict for the plaintiff in the case of John Cedergren, administrator of the estate of Magnus Peterson, in his suit against the Massachusetts Bonding and Insurance company

Timely Comments on Agricultural Topics for Our Readers

POULTRY

LITTLE LAMP WARMS WATER

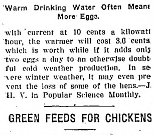
Operating 24 Hours Daily With Current at Ten Cents a Kilowatt Hour Is Cheap.

Not only should drinking water intended for poultry be kept from freezing so that the hens can drink at all times, but, according to scientific poultry raisers, it should also not be cold enough to chill the birds. Both requisites may be provided for by the use of this inexpensive electric water warmer.

An ordinary pail or pan may be used with the addition of a large tin can or small pail for the heating unit. If made of galvanized iron, the parts will last longer. Arms riveted to the can extend over the edge of the water pail. Care must be taken to solder around the rivet holes on the outside, for the lamp container must be water-tight.

An ordinary metal lamp socket is soldered or crimped into a tin dish large enough to cover the container. This cover must be either a tight-fitting lid or be made to fasten with a spring or catch.

In all but the coldest weather a 15-watt lamp will warm a ten-quart pail sufficiently. Operating 24 hours a day with current at 10 cents a kilowatt hour, the warmer will cost 3.6 cents, which is worth while if it adds only two eggs a day to an otherwise doubtful cold weather production. In severe winter weather, it may even prevent the loss of some of the hens.—J. H. V. in Popular Science Monthly.



Warm Drinking Water Often Means More Eggs.

GREEN FEEDS FOR CHICKENS

Where Fowls Have Unlimited Range in Summer There Is No Difficulty —Different in Winter.

(Prepared by the United States Department of Agriculture.)

If the best results are to be obtained with poultry, they must be furnished with a plentiful supply of green feed. Where fowls have unlimited range on a farm they will secure green feed during the spring and summer, but during the winter it must be supplied for them.

The question of how to supply the best feed at the least cost is one that each poultry keeper must decide largely for himself. It will probably make but little difference what kind of green feed is supplied provided it is relished by the fowls. Cabbages, turnips, beets, potatoes, etc., are suitable for this purpose. The larger roots and the cabbages may be suspended by means of a wire or string or they may be placed on the floor, in which case it would be well to split the turnips or beets lengthwise with a large knife. Potatoes and turnips should be fed cooked.

Cut clover, soaked in boiling water, fed alone or with the mash, is good, say poultry specialists of the United States Department of Agriculture. Clover meal and ground alfalfa make very good feeds for this purpose. Where the fowls are yarded and not enough green feed is furnished by the yards, a small patch of clover, alfalfa, or rape may be sown. Any one of these, if frequently mowed, will furnish a great quantity of green feed in a form relished by the fowls. Canada field peas may also be sown for this purpose, and when fed in a tender, crisp condition are eaten readily.

GOOD REMEDY FOR SOREHEAD

Slits of Canvas Well Greased With Antiseptic Hung Over Feed Hopper Is Favored.

Here is a new method for keeping sorehead out of the chicken flock: Hang a piece of canvas over the opening of the feed hopper. Cut slits in this canvas, and keep the slits well greased with an antiseptic salve. In feeding, the birds get the salve on their heads, and this means no sorehead.

PERTINENT POINTERS for MODERN FARMERS

Prepared Under Direction of North Dakota Agricultural College

FARMERS SAVE MEAT BILLS BY CURING PORK IN WINTER MONTHS

(Continued from last week)

Wash the carcass with cold water. Remove the leaf fat with the kidneys. Be very careful not to loosen a layer of lean meat with the leaf fat. Work this loose with the half clenched fist.

To remove the head, cut in at the back just at the base of the skull. Cut a finger hold in the skin of the head. Cut the cheek meat free from the jaw on each side so as to leave the jowls on the carcass. By pulling down on the head it can be unjointed at the first (atlas) joint, and the skull removed. Remove the tongue, wash with cold water. Split the base of the ear and gouge out the waxy portion. With a sharp narrow bladed knife take out the eyes with the lids. Cut down each side of the base of the jaw and turn out the lower jaw bone. Split the skull with a saw and take out the brains. The teeth should be cleaned with a stiff brush and water, or chopped out. The head is now in good shape for the housewife to clean for headcheese.

With a saw split the carcass through the middle of the backbone. Face the hams by cutting off the excess fat from the inside of the hams. This exposes more of the lean surface and facilitates the cooling of the carcass. carcass.

Allow the carcass to hang from 24 to 48 hours where it will freeze before it is cut up for curing.

Cutting up the Pork.

The well chilled carcass may be cut up in any manner the owner sees fit. The cutting does not effect the digestibility of the products. The value of any surplus offered for sale is materially affected by the manner in which it has been cut up and cured. In many parts of the country it is not the practice to split the carcass, but after chilling the carcass is split on each side of the backbone. A much heavier piece of bacon is obtained by this means, but the commercial value of the pork loin is lost.

The Hams.

The ham should be cut from the loin about two inches forward of the coupling bone and the cut should be made at approximately right angles to the direction of the hind foot. This will cut through the pelvic bone at its smallest diameter and will give the ham the appearance of containing a small amount of bone. As you cut through the heavy loin muscle to the flank let the knife curve slightly backwards as you cut through the flank. Trim out the small piece of the tail bone and remove the excess fat from the rump of the ham. In removing the piece of the flank let the knife follow the slant of the lean muscle. You have left the front of the ham square so that the first slice of the cured ham will be marketable. A larger ham can be made by cutting at right angles to the back bone and a little further forward at the front end of the pelvic bone, but the ham has a big bone appearance and the first slice is not a marketable slice. On the inner face of the ham will always be some of the pelvic fat which should always be removed, as it will become rancid much soner than the other fat meat of the ham.

Cut off the foot at the hock joint just so as to expose the marrow.

The Shoulders.

Separate the shoulder from the middle, leaving about three ribs on the shoulder Let the cut be at right angles to the back. Remove the three ribs and the neck bone. Be careful not to haggle the shoulder. Let the edge of the knife rest against the bone all the time. A neat job lets you leave more meat on the shoulder. Cut off the jowl parallel to the back side of the shoulder and close up to the shoulder.

Picnic shoulder and Boston butt.

Cut across the shoulder about midway. Cut about a half inch nearer to the lower end. Object is to cut across the blade bone at its smallest diameter. Trim off the brisket and remove any loose or bloody pieces from the inner surface. Give the shoulder a slightly rounded appearance and cut off a wedge shape of fat from the upper end so that in the cured shoulder the fat will not hang below the lean and make the shoulder look fatter than it is. Cut off the foot so as to remove about one-third of the fore leg. The upper end of the shoulder is known as the butt. The skin and fat removed in a single piece is known as a clear plate, and the lean portion containing the piece of the blade bone is known as the Boston butt. If the cut is made so as to leave the blade bone and the piece of lean with the fat we have a regular plate and the lean portion is known as a boneless butt. The butt is usually sold or used fresh and the plate cured for salt pork. The clear plate may go into the lard stock.

The Long Shoulder.

Instead of making a short picnic shoulder and a butt the whole piece is used as a long or regular shoulder. Trim off the brisket, cut off the excess fat at the upper end, cut off the foot, and remove any pieces of lean from the inner surface. A considerable piece of lean lies between the blade bone and the exterior fat. The cure does not readily reach this lean and for this reason regular shoulders are very hard to cure uniformly. The packers do not put up regular shoulders except on special order.

The Jowl and Neck Pieces.

The piece cut from the front of the shoulder may be trimmed out for sausage and lard if desired. A square of bacon may be cut from the jowl. A portion of the glandular meat should be cut from the inner surface to give the piece uniform thickness. A neck piece of from one-half to three-fourths pound may be cured for boiling with beans or greens.

The Loin.

Saw across the ribs close to the thick loin muscle. Cut through with the knife, cutting the middle into the two pieces. The upper piece consists of the loin and the back fat. Trim off the back fat. If taken off carefully the thick back fat is cured as clear backs. It is usually used as lard stock. The loin should be trimmed close. It should be used fresh for roasts, chops, or sausage. Rarely the loins are boned out and given a mild cure.

The Bacon.

From the belly piece trim out the spare ribs. Be sure and make them spare. Meat left on the spare ribs lessens the value of the bacon. Let the edge of the knife rub on the rib bones and cut through the gristle, leaving the ends in the bacon. Avoid making jagger cuts into the bacon. With very heavy hogs no further trimming is done to the belly pieces. It is salt cured and sold as heavy bellies. Lighter pieces are trimmed to a neat looking piece and are graded for curing according to weight and quality. In trimming first remove the belly edge. With a barrow or young gilt it is only necessary to square up this edge. With older gilts and sows it is necessary to trim up far enough to remove the milk glands, as these glands make dark spots in the cured bacon. The back edge should be trimmed parallel to the lower edge. The more you trim the higher the quality of the remaining portion. The flank end is trimmed square and parallel with the front end which should not need much trimming. If you want a large piece of bacon, do not remove much of the flank end for sausage trimmings. In medium hogs a strip five inches wide may be cut from the front end and cured as a separate piece, leaving the remainder as a lighter and better quality of bacon.

All the trimmings should be carefully looked over and the bone, gristle, skin and clear fat pieces separated from the sausage stock. The best lard is made if the skins are removed from the fat. Cut up the fat into small pieces or pass them through a grinder for lard stock.

The farmer deals with the earth with his hands tied.—Liberty Hyde Bailey.

* * *

To avoid trouble with the weevil and bran bug make sure that the grain bins are clean before filling with the new crop.

* * *

There's no use building a silo tight unless you pack it tight at filling time.

Select seed corn now from standing ripening corn.

MAKE UNPROFITABLE ORCHARDS PAY

(Prepared by the United States Department of Agriculture.)

Measured by the abundance and regularity of the crops of high-grade fruit produced, there are many apple orchards of bearing age that are not successful. Because a large number of these unprofitable orchards can be made to yield good crops of high-quality fruit by special treatment, the United States Department of Agriculture has prepared Farmers' Bulletin 1284, Apple-Orchard Renovation, by H. P. Gould, which discusses the principal practices found useful in bringing neglected trees back into profit-producing condition.

Orchards in need of renovating are found only in sections where the home orchard or fruit garden is the prevailing type of fruit growing, and in regions where orchards of considerable size occur only occasionally, but also in the recognized commerical apple-growing districts. Some orchards are many commerical plantings much damage may be done by insect pests and diseases that have their source in badly infected trees. In some states a neglected orchard is practically declared by law to be a public nuisance and is treated accordingly. If the owner will not clean it up, public officials do it and the expense becomes a lien on the property until paid.

As a rule, says the author of the bulletin, a much-neglected orchard does not justify its existence. If an orchard is worth keeping it is worth giving good attention; otherwise, the trees merely encumber the ground and interfere with its use for other purposes. If an apple tree is not of value for fruit production it may be worth converting into tool handles, plane blocks, and other useful things.

Persons interested in renovating orchards or those who wish to decide whether or not a certain orchard is worth the attempt should get the bulletin, which may be obtained without cost from the Department of Agriculture, Washington, D. C.

Pruning Peach Trees During Dormant Season.

are not worth the time and expense necessary to renovate them. In deciding what is to be done the following factors need to be considered: The orchard must be on a good site with no rock ledges or hardpan near the surface, well drained and without unusual danger from frosts; the trees must have good vitality, without decayed trunks, cankers that girdle the limbs, or weakness that would make good growth impossible; and, finally, the varieties must be good unless it is practicable to top-graft the trees.

A Well-Cared for Cherry Orchard In Bloom.

A neglected orchard is always a menace to other orchards in the neighborhood and in sections where there

In working over neglected apple orchards, the trees will be of such varying types that it will be impossible to work toward any particular form of top, but it is well for the orchard owner to have in mind a certain desirable form; inexperienced persons will find it worth while to study some well-formed trees or pictures of them such as are used to illustrate the bulletin. The right sort of top has a large bearing surface, is low-headed, and has a fairly open top that will permit light to enter to the interior of the tree.

Big Things Needed.

Soil renovation, pruning, and spraying are some of the principal things needed in practically any orchard that is being brought back into producing condition. Just what is to be done depends on the age and vigor of the trees, the condition of the soil and other local factors. Various conditions and the necessary treatment are discussed in the bulletin, and the tools and other equipment are described.

When trees are otherwise good, but the varieties are not desirable, it sometimes pays to top-graft the trees. This work is not difficult, but must be done carefully. As a rule the cleft method of grafting is best suited to old apple orchards. Details of this method are to be found in Farmers' Bulletin 157, The Propagation of Plants. The time to do the work is in the spring just before growth starts or just as it is starting. The scions, however, must be perfectly dormant.

COW-TESTING ASSOCIATIONS

Over 194,000 Animals Entered Last Year to Determine Standing as Producers.

Farmers last year entered over 194,000 cows in cow-testing associations to determine their standing as butterfat producers through demonstrations by agricultural extension workers, according to reports to the United States Department of Agricultural.

DESTROY GARDEN BUG PESTS

After Crops Have Been Harvested Rake Up All the Old Stalks and Burn Them.

After the garden crops are harvested it often pays to rake up the old stalks and burn them. This may destroy insect pests and fungous spores which would cause losses next year. If any weeds have developed seeds they can also be burned.

The term "wireworm" is applied to numerous forms of elongated wire-like creatures, the larvae of snapping or click beetles and the name was given to them on account of their firm texture, which is much different from that of most insect larvae.

It is a well-known fact that the lady-bird beetles are very beneficial, and this is proven in many ways. One scientist records where these insects have eaten 50 to 60 aphis in a single day and there are several records where they have eaten a hundred in the same length of time.

Butter Produced in 1921.

Nearly two-thirds of the butter produced in the United States in 1921 was made in creameries, according to a report to the United States Department of Agriculture.

Potato Storage House.

A good potato storage house should protect potatoes from extremes of heat and cold, shut out light, provide good ventilation and drainage, and furnish enough moisture to prevent wilting.

Where Bees Prosper.

Bees prosper wherever sweet clover grows.

DAIRY

TO INCREASE DAIRY PROFITS

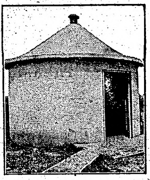
Wideawake Dairy Farmers Have Seen Larger Demand and Are Acting Accordingly.

Campaigns by large dairy companies urging the public to drink more milk increase trade channels from the farm to the city immeasurably. With this increased demand, however, has come an increased vigilance by health societies to safeguard the consumer.

Accordingly, wideawake dairy farmers have foreseen this condition and have provided for marketing their milk in a sanitary manner. Milk is probably more readily susceptible to contamination than any other food product.

In order that milk may be delivered in a sweet, clean sanitary condition, it is essential that it be isolated in a cool, modernly equipped building in its progression from the cow to the market.

A good milk house is an invaluable aid in the production of high-quality milk. Concrete construction, either monolithic or block, is ideal because it is permanent, vermin-proof and highly sanitary. Such a structure should be located with regard to convenience, but it is better that it be separated from the stables to prevent the milk from being tainted by stable odors.



Milk House of Lisle Coleman, Located Near Wayne, Ill.

A very serviceable milk house is a type that can be constructed with the use of circular monolithic silo forms, similar to the one shown in the illustration. A foundation which extends two or three feet into the ground or to the limit of frost is the first step. The silo forms are used just as in making a silo, except that boards must be set in the forms to cut out portions of the wall which are to form doorways or windows. Heavy reinforcement is not necessary, ⅜-inch rods 20 inches on the center extending in both directions being amply sufficient. A conical roof can also be constructed similar to the type that is employed in silo construction. A small ventilator in the peak of the roof with a damper that can be opened or closed, is a desirable aid in getting a good circulation of fresh air.

Every milk house should be provided with a concrete cooling tank, the depth of which is governed by the height of the cans; it is desirable to have the cans stand submerged as much as possible. Circulating water through the tank and around the cans will keep the milk cool. To lighten the labor of lifting and moving cans in and out of the tank, part of its depth should be below floor level, and for the same reason, the width of the tank should be limited to convenient arm's reach, which is about that of the diameter of two cans. The remainder of the floor should be covered with concrete made in a single layer four inches thick and troweled to a smooth surface that will not harbor dirt.

The concrete used throughout should be of a mixture of one part of cement to two parts of well-graded sand to four parts of pebbles or broken stone, with the exception of the cooling tank which has a 1:1½:3 mixture to insure its being watertight.

For Better Dairying.

1. Use purebred sires.
2. Test all of the cows and eliminate the poor ones.
3. Keep only the heifers from the best cows.
4. Feed well so as to secure economical results.
5. Test for tuberculosis.
6. Produce a clean product.
7. Curry, don't curse.
8. Talk consumption of dairy products.
9. Be up to date.
10. Work.—Harold R. Lascelles Fieldman, Colorado State Dairy Commission.

Gust Thompson of Kratka attended the New Year's dance Monday evening.

Nate Harris, traveling salesman for Griggs Cooper & Co., transacted business in this village Saturday.

George Asper attended to business matters at Thief River Falls Saturday between trains.

Nick Bundhund transacted business at Thief River Falls Thursday evening. He returned Friday morning.

J. A. McEnelly, one of our many stock buyers, shipped a carload of cattle Saturday morning.

Joseph and Albert Poppenhagen left Saturday morning for Holt, and will visit there for an indefinite time.

Mr. and Mrs. Albert Halvorson were visitors at Thief River Falls New Year's day.

T. M. Thorson of Highlanding returned Tuesday evening from Thief River Falls, where he attended to business matters.

Erling Dahlen of Thief River Falls visited at the J. P. Jensen home from Friday evening until Saturday evening.

Ole Ostby, salesman for the Thief River Grocery company, transacted business in this village Friday afternoon of last week.

Bernett Larson of Alvarado, Minn. arrived here Friday morning for a short visit at the George Josephson home.

Vivian Thoreson was a passenger to Thief River Falls Saturday, where she spent the day visiting friends and relatives.

William Paskewitz of Grygla passed through here Friday en route to Thief River Falls, where he was going to attend to business matters.

Bert Tanem was a passenger to Thief River Falls Wednesday morning, where he transacted business. He returned in the evening.

Julius Stephenson left Monday for Barnesville, Minn., where he will attend the funeral of his younger brother, who died recently.

Elmer and Arthur Johnson of Germantown left Monday evening for Hibbing, Minn., where they will be employed.

Ruth and Harry McDonald skiied out to the Otis Ronkin home Friday evening, where they visited until Saturday morning, when they returned.

Mr. and Mrs. Helmer Helgeson of Thief River Falls were in town Friday and attended the double wedding dance.

Miss Susie Lindvick returned to her duties at the O. K. Restaurant Friday after visiting for a short time with her parents near Germantown.

Daniel Payne left Tuesday morning for a visit with his brother-in-law who farms near Germantown. He will return Saturday.

Mrs. Elev Aakre and son, Einer, of Reiner returned Saturday morning from a short visit at Thief River Falls.

Elev Aakre of Reiner township attended to business matters at Thief River Falls Friday. He returned on Friday evening.

Miss Mae Smedberg arrived on Thursday of last week from Evansville, Minn., where she is employed. She will visit with her mother, Mrs. Fred McWayne, for a short time.

Mrs. Theodore Tandberg and little daughter returned home Friday evening from Thief River Falls. Miss Esther Tandberg accompanied them and will remain for a few days' visit.

Miss Lillian Erickson of Thief River Falls has been visiting at the George Josephson home the past week. Miss Erickson was at one time employed at the Stephenson cafe.

Miss Maggie Johnson of Highlanding has been visiting at the Mrs. Ellen Iverson home the past week. She returned Saturday evening to Thief River Falls, where she is employed.

H. S. Dahlen of Thief River Falls transacted business here last Wednesday.

Bert Walker of Thief River Falls passed through here Monday morning en route to his farm north of town. Mr. Walker at one time ran a barber shop here.

Mr. and Mrs. Nick Bundhund and daughters, Margaret, Leona and Adeline, spent the week-end visiting at Thief River Falls. They returned Monday evening.

Mr. and Mrs. Gilbert Gunderson left Monday morning to visit with their son, Harold, who is at the Oakland Sanitorium at Thief River Falls. They returned Tuesday evening.

Miss Anne Rossette, who has been visiting at her parental home at St. Hilaire the past week, returned to her duties at the Stephenson Cafe Friday afternoon.

Dr. Adkins of Grygla passed thru Goodridge Saturday morning enroute to Thief River Falls. Dr. Adkins recently moved his practice from the county seat to Grygla.

J. R. Olson, the merchant of Four Towns, passed through here Friday en route to his home after spending a short time at Thief River Falls attending to busines smatters.

Carl Erickson of Thief River Falls was a visitor in Goodridge Tuesday. Mr. Erickson removed to Thief River Falls this sprin, having until then tilled a farm near Esplee.

Miss Agnes Vaughan returned on Tuesday morning to the St. James Academy at Grand Forks after having spent the Christmas holidays at her home south of town.

Miss Carrie Urdahl and her brother, Nicolay, left Friday for Thorhult, where Miss Urdahl will remain for an indefinite time and visit with Mr. and Mrs. Ole Prestebak. Mr. Urdahl returned Sunday.

Mrs. C. Habedank and daughter, Luella of Mavie, arrived here Monday and have been visiting at the Henry Tollefson and Nick Bundhund homes. They returned Tuesday evening.

Mr. and Mrs. Otto Haack and son and daughter, passed through here Saturday evening on their return to their home at Warren after visiting for a short time with friends at Grygla, Minn.

Miss Gunda Tweeton, who is employed at Crookston and who has been visiting at her home near Grygla, isited at the George Josephson home Friday night on her return trip to Crookston.

Miss Clara Ferdinandsen returned Saturday morning from a week's visit with Mr. and Mrs. C. G. Stephenson of Pelican Rapids, Minn. Miss Ferdinandsen is a sister of Mrs. Stephenson.

Edseth's Entertain.

Mr. and Mrs. Carl Edseth entertained a number of friends at a six o'clock dinner and social gathering Sunday evening. The evening was enjoyably spent in music and conversation. The following guests were present: Mr. and Mrs. O. S. Kirklie, Mr. and Mrs. C. O. Stephenson, Mr. and Mrs. M. O. Seavey, Mr. and Mrs. Albert Halvorson, Mrs. Inez Everhart, Mrs. Martin Olson and George Asper.

PENNIN GRAIN W E EXHIBITED

Sh nd Program at State Farm School February 5th to 9th.

Pennington county grain growers are looking forward to sending their grain, corn and potato exhibits to the combined state and Red River Valley crop shows to be held at Crookston February 5-9, in conjunction with the Red River Valley winter shows.

The biggest and best farm crops exhibit ever held in the valley will be shown. The valley growers will have an opportunity to compete against the best growers in the state, to meet a large number of men in the grain growing business, to hear the ablest speakers, and to see ho wthe valley exhibits compare with other sections.

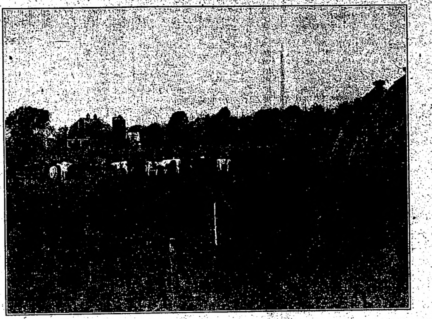
Tuesday, February 6, will be Farm Crops day at the Northwest School Farmers' Week meetings. Speakers of authority will make addresses and lead discussions. Some of the best-known speakers on problems confronting grain growers will make addresses and farmers are urged to be in attendance.

The annual business meeting of the Minnesota Crop Improvement Association will be held at noon and an association dinner will be given. A. J. Glover, editor of Hoard's Dairyman, and Dean W. C. Coffey and others will speak.

ENTERTAIN.

Mrs. M. Olson and Mrs. Inez Everhart were hostesses at a 6 o'clock dinner party given at the former's home Sunday evening. The following were present: Mr. and Mrs. Nick Bundhund, Mr. and Mrs. Carl Edseth and daughter, Violet, and Mr. and Mrs. H. Christianson and Mrs. O. S. Kirklie.

Cattle and Grain That Count in Pennington County



MAN INJURED.

Angus McLeod, an elderly gentleman farming west of Goodridge, was painfully injured in the back Tuesday when in coming into the barn with two pails of water and while passing close to the horses, one reared and backed up against Mr. McLeod with such force he was knocked over. Although somewhat painful, Mr. McLeod is fast improving.

FOUND.

GRIMLEY-ERICKSON MARRIAGE JAN. 2ND

Both Are Residents of Reiner Township and Are Well Known.

Tuesday, January 2, occurred the marriage of Miss Emma Grimley, the daughter of Mr. and Mrs. Evan Grimley, to John A. Erickson, son of Mr. and Mrs. John Erickson.

The ceremony was performed at Thief River Falls, Judge Lars Backe performing the ceremony.

Mr. and Mrs. George Vraa acted as witnesses to the ceremony. The two young people are well and favorably known in Goodridge and surrounding country, having resided at their homes in Reiner township for some years past.

The newlyweds will for the present make their home with the groom's parents. Their numerous friends and acquaintances join in extending them a wish for a long and happy wedded life.

Local Postoffice Cashes Many War Savings Stamps

The local postoffice has been handling a large number of 1918 war savings stamps the past two weeks. The stamps have ranged all the way from $5 up to $100 in value.

The present sale of stamps at their full value comes as a great help to many people who had their money tied up in these stamps and who did not feel inclined to sell at less than the value promised January 1, 1923.

An opportunity to invest in Government securities was also given, but as far as we have learned few have taken advantage of it.

OLE FIGURED IT 50-50.

"Ole," said the preacher, "do you take Hilda Sorgerson for your lawful wedded wife, for better or for worse?" "Oh, well," replied Ole gloomily, "Aye 'spose 'Aye get a little of each."—Reformatory Pillar.

SCHOOL NOTES.

Mr. Erickson gave a very interesting talk to the high school Monday morning on rules for high school study.

The domestic science and commercial arithmetic classes have begun their review preparatory to the final examinations.

The seventh and eighth grades have been divided into two classes, A and B. We have found that the eighth grade girls are the only pupils that can keep up in class A.

Violette Josephson is absent this week due to illness.

Olga Grimley has not yet returned to chool after the holidays.

Alvin Halvorson entertained the high school Tuesday morning by reading jokes.

The seventh grade pupils have written compositions on "How I spent my Christmas Vacation."

There will be a debate held at the schoolhouse Friday afternoon, January 2, the question being, "Resolved, That the Movies Are Detrimental to the Morals of Youth." Ruby Thompson and Angeline Swobodny uphold the negative side and Eunice Tvedt and Harry McDonald uphold the affirmative. The public is welcome.

A LESSON IN LOYALTY.

If you don't believe in this country and hate to say it in the American language, say it by being absent from the Community club meeting to be held Friday evening.

If every able-bodied man and woman of Goodridge and within a radius of five miles is not present, we will all realize there are individuals who do not appreciate the splendid opportunities and invigorating climate that we enjoy in this part of Pennington county.

The Banner wouldn't miss being there for a king's ransom.

Mr. and Mrs. Oscar Rambeck were visitors Wednesday in Goodridge.

AMERICAN LEGION HAS BUSINESS MEET

To Conduct Drive for Members—May Have Ladies' Auxiliary Branch.

Henry Svare Post, No. 440, of the American Legion, of Goodridge, held its meeting Thursday, January 4. The session was held for the purpose of electing officers for the coming year. The offices filled are as follows: Commander, Bennie Johnson; vice commander, Ellard Iverson; adjutant, Ellard Wiseth; treasurer, Theo. Tandberg; service officer, Victor McLeod.

It was also decided to put on a membership drive to be carried on by the members, who will be divided into two teams and in order to spur the teams to greater effort it was agreed that the losing team would act as hosts to the winning team at a "feed" to be given January 18.

The organization of a Legion Auxiliary also came under discussion at the meeting and attempts in this line will be made in the near future.

Attend the Community Club Meeting; Be Sure!

The next meeting of the Community club will be held Friday. While the pogram has not as yet been announced, it's a foregone conclusion it will be good. Take a friend with you, maybe two, or three, and enjoy the evening among your friends and business associates.

Sure thing! Come over to the meeting and see the fun!

COMMUNITY CLUB TO MEET FRIDAY, JAN. 19

No Program Announced So Far, but There'll Be a Good One.

The Community club of Goodridge has arranged for a meeting to be held Friday, January 19. No definite program has as yet been arranged (up to Wednesday), so it will be impossible for The Banner to inform its readers as to the entertainment.

However, The Banner can expose the names of the program committee which will no doubt facilitate a cognizance on your part to make yourself manifest at the school auditorium, the place of meeting. The committee in discussion is composed completely of femininity, namely, Miss Clenora Urdahl, Gretta Gulrud and Pearl Bergeson. An attempt is being made to secure a speaker for the evening.

Agitation for Home Talent Play Started in Goodridge

Goodridge still has a few wideawake individuals, which was demonstrated when a few started the agitation not to drop the tradition of the annual home talent play.

A certain capable man has promised to act as coach and all that remains is to get a suitable play and the caste. If nothing unlooked for turns up to break up the contemplated efforts, The Banner hopes to tell you more about it next week.

"NADINE!"

SYNOPSIS.—The time is the late '60s or early '70s and the scene a steamboat on the Mississippi river. All the types of the period are present and the floating palace is distinguished by merriment, dancing and gallantry. There are the customary drinking and gambling, also. Virgil Drace, a young northern man, is on his way south on a mission of revenge. He meets an eccentric character in the person of one Liberty Shottle, who is constantly tempting the goddess of chance. They agree to a singular pact. Drace, seeing an opportunity to use Shottle, confides to him that his mission is to find a certain ex-guerrilla, Stepho la Vitte, who had murdered Drace's father. It is his determination to hang La Vitte as high as Haman. Drace falls in love with a striking young beauty on the boat. The steamer reaches New Orleans, at that time in the somewhat turbulent throes of carpetbag government. The young men attend the French ball and Drace unexpectedly meets the girl. She is accompanied by one Boyce, apparently her fiance. Shottle learns that the name of the girl is Nadine la Vitte. Drace passes an uneasy night torn by the suspicion that Nadine is the daughter of old Stepho la Vitte, now an admitted outlaw. Now, more than ever, is he resolved to find where the girl lives and to find Stepho. Drace and Shottle begin a search of the city. Drace takes a hand in a carpetbagger riot. He catches a glimpse of one he is sure is Nadine. Drace and Shottle get into bad standing with the authorities, and are given until the next day to board a steamer bound north. Returning to the house where he thought he had glimpsed the girl, Drace finds the place abandoned. Shottle discovers that a case of wine on the steamer is addressed to Stepho la Vitte at Farnum's Landing, Mississippi. It is the next stop below Bethpage's Landing and General Bethpage is Liberty Shottle's uncle. They decide to visit him. Liberty goes broke again and swears off again on betting. They are cordially received by the General and his wife. Drace penetrates into the wilderness, discovers Periwinkle House and finds Nadine alone. She is much alarmed and warns him her father will shoot him. He makes love to her and to get him to go she agrees to meet him again the following Thursday. On his way home Drace is accosted by three men who ask to be set across the river. They overpower him and bind him with ropes. Led by Tony they throw Drace into an old cabin. Tony taunts Drace and avows his love for Nadine, while the others collect fuel. Tony sets fire to the cabin and the three go off laughing. Nadine rescues him and agrees to meet him again.

CHAPTER VIII—Continued.

—10—

The General roared his delight, said that he would go on the stand to swear against Sour Socrates in favor of the fiddler's dialogue. "Tobe," he shouted, "fetch in the buck-and-wing dancers."

Tobe went to the door, yelled as if calling hogs; and in came two big negroes, a throng of idlers following them. At it they went, shaking the house, and when weariness threatened to seize them, for refreshment they drew off, and leaping, butted their heads together like goats. After a time the General gave them a dollar apiece, dismissed them—gave the fiddler five, with an order to play that old tune again. Old Tobe was now lighting his evening lamps. The General called to him.

"Toby, what have you for supper?"

The old fellow closed one eye.

"'What have I got?' he says. Ah, that's it. An' I'll tell you. I've got hoe-cake and roasted doves."

"No, you don't mean it!"

"Hoe-cake and roasted doves, I said."

"Good, by Gideon's Band. Fetch us, Tobias. And mark you, along with it all bring about a trowel full of that wild plum jelly.

The doves and the strips of bacon and the hoe-cake and the jelly came on, and arising the General saluted the repast.

"Talk about quail! Quail, sir, is insipid, white, dry and tasteless compared with the dark richness of the dove. And look at this bread, made of mealed pearl. You never tasted any bacon like that, my son, fed on acorns showered down from Olympus. . . . The sweet of the night!"

They had finished the meal and were sitting back, smoking, sipping wine, when Drace noticed a sudden change in the General's countenance, a tightening, a grimness; and turning about, he saw standing against the wall a strange figure—a man not tall, but broad of shoulder, his body sloping lithely down to feet expressively of sinewy restlessness. His mass of hair was like tangled flax straw, dark and yet gray. Like the bristles of a wild boar, his short mustache stuck out and his heavy eyebrows looked like great hairy caterpillars crawling across his lower forehead. In his dress there was a wild touch, a barbaric aspect. Slowly he came forward. . .

"This is General Bethpage, heh?"

"That is my name, yes. What do you want with me?"

"Whut I want; heh? I come to 'pologize to think them mule be mine."

"Well, go on away. I don't want any apology from you."

"No? You put pistol at me. That was in Louisiana. This is Mississip'. An' I tell you here you haf turn' carpetbagger."

"What! If General Andrew Jackson should arise out of his grave and tell me that, do you know what I would say to him?"

"You would beg hees pardon as you will mine, heh?"

"I would say to him as I now say to you: You are an infamous liar."

Drace sprang between them and seized the man by the wrist; a dirk fell from his hand.

"Stand back, General," cried Drace. "There is not going to be a fight here. Stand back, Tobe!"

The dark-faced man looked Drace in the eye.

"Monsieur was ver' strong. But—I see him some other day."

Turning, the fellow made off.

"Now, who the devil was that?" asked Drace.

"That, my dear Drace," replied the General, "was the fellow you asked about the other day—Stepho la Vitte."

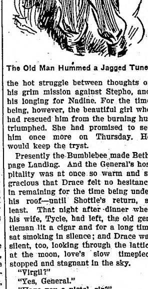
To Drace this encounter with Stepho la Vitte, the father of the girl he loved—and the outlaw upon whom he had sworn to wreak vengeance—was disturbing indeed. The General, however, was not at all upset by the fact that he had been barely saved from Stepho's knife, and when a short time later they boarded the Bumblebee on their return, he gripped Major Pewitt's hand and said:

"Major, Mr. Drace and I have in our precious possession three quarts of old Tobe's wild grape."

"Ha—which is as much as to say that you have three quarts stewed out of the heart of Venus. I'll find Hawkins and the four of us will gather in the Texas and—and flatter the stars, by gad! But Tobe lied—said he didn't have any of the old stock left."

"And a liar's wine is sweet, my dear Major. Come, Virgil, my boy, put all brooding out of your mind. Brooding is for the poet when the nag is tired, and not for us. We'll have a night of it, and then we'll return to respectable servitude and slow moral decay. My dear Major, lead on. We follow."

The remainder of the trip back to Bethpage was a matter of moral freedom at the gaming table for the General. For Drace it was occupied with the hot struggle between thoughts of his grim mission against Stepho, and his longing for Nadine. For the time being, however, the beautiful girl who had rescued him from the burning hut triumphed. She had promised to see him once more on Thursday. He would keep the tryst.



The Old Man Hummed a Jagged Tune.

Presently the Bumblebee made Bethpage Landing. And the General's hospitality was at once so warm and so gracious that Drace felt no hesitancy in remaining for the time being under his roof—until Shottle's return, at least. That night after dinner when his wife, Tycie, had left, the old gentleman lit a cigar and for a long time sat smoking in silence; and Drace was silent, too, looking through the lattice at the moon, love's slow timepiece stopped and stagnant in the sky.

"Virgil?"

"Yes, General."

"Have you a pistol, sir?"

"No; I had one, but I lost it."

"Well, provide yourself with another. In saving me from a deadly assault you have mortally offended old La Vitte. He is in no wise afraid; but neither is he gallant, and would shoot you without warning. You told me, you remember, of your appointment to meet old Spence tomorrow. I haven't any too much confidence in him; he might play you into the hands of Stepho, and I advise you not to go fishing with him."

"Spence. No that's not the name of the old fellow I'm going with. His name is—Spillers, I think."

"I don't know a man of that name in the neighborhood. But, anyway, arm yourself and keep a sharp lookout."

And then they sat and smoked in silence, inhaling the dewy breath of the night.

CHAPTER IX

With the first gleam of Thursday's light Nadine arose and stood looking out from the window. Her father had come in late and was to depart again early for the hills, but she was afraid lest he might have changed his mind. She heard him moving about, but she waited a long time before she went to meet him, so sweet it was to stand there at the window to catch the first ray of the sun.

The old man hummed a jagged tune; in a garden of melody it would have been a briar. Nadine came out, and gallantly he kissed her hand, laughing softly; and then as was his wont, he kissed her hair.

Her duties about the house were light, but he helped her, and when their queer assortment of plates and dishes, gold-rimmed china, crockery, stoneware and tin plate had been washed and put away, they sat in the shade of the house, the girl anxious and wondering.

"I have sent Tony back to the ceety, as I tell you I will," he said to her. "He does the good work to burn the spy, the carpetbaggair. Now he have spree, with the red wine an' the white. When the time come, he be back. I have need of heem with the cattle that I buy. He drive them . . . . Up to the town Natchez I have trouble. The ol' scoun'rel Bethpage! I go in the tav', an' he is there, sing, laugh, eat an' look at the darky dance. I wait. Then I go up. We have words. He jump up. Then the young man, big, he grab my wrist like this. He squeeze. I say: 'Monsieur you was ver' strong, I see you again.' An' when I do, I keel heem. I hear old Bethpage call him Vergeel. The old man I keel too, eh?"

"Oh, no—no!" she cried . . . . "Let us go away somewhere. They will never let you alone. It will be better to be in the city than here."

"Just a little while longer we stay in this place, eh? Then we meet Monsieur Boyce in Memphis, an' you marry him, an' he take you away for the honeymoon, per'aps to France. An' he buy you the silk dresses, an' many beautiful things. An' then I come and join you, an' we all live happy—eh?"

"But—but I do not like Monsieur Boyce!"

"Ha! You learn soon. He is a fine man. Wait till we see him in Memphis an' you know him better. You will love him then, an' be happy. . . . I go now. Au revoir, ma p'tite."

Stepho went down to his boat, feeling that he had outwitted her impatience of the swamp, and she ran back to her room to gaze through the window. But soon she came out with a big leatherbound book of plays and put it on the ground beneath the oaks. Then with a broom made of stiff twigs she swept the ground, unstrung a caterpillar swinging down and carried it away out of the range of her stage. From the house she brought a narrow strip of rush matting, spread it beneath a tree, raising one edge as if to form of it a sort of back, a sofa. From the house she brought a box, to serve for a table, and from out beyond the palisade of cane she gathered lilies, plucking from the bank a great bloom that looked like a trumpet. These she hung on the low-swaying branches of her playhouse trees, or with sharp thorns pinned them to the rugged back, a curtain to drape the wall above her "pretend-like" divan. She sat down and waited a long time. The cane stirred, and she seized her book, opened where a lily-stem marked her favorite play, and made herself believe that she was reading.

It was only a breeze that rustled in the cane. She could hear it now, lisping amid the glossy leaves above her. Why should she be impatient? She could wait. Had she not waited night after night for her father's footstep? Had she not sat in the house, alone and not afraid, when the storm tangled the tops of the cypress trees and lashed the bayou mad? . . . She had not heard a sound, but looking by chance, she saw Drace coming through the cane, and she sprang up to meet him, the play-book pressed against her bosom.

"Nadine."

"Monsieur!"

"Don't call me 'Monsieur.' Call me Virgil."

She dropped her book. He bent to pick it up, but she snatched it from beneath his reaching hand and stood back from him.

"Oh, it was you, then! It was you the so strong man that would break my father's wrist. It was you!"

"Nadine, it was not to hurt him. With a knife he would have killed an old man; and then they would have hanged him. Nadine, my other hand held yours, to protect you."

"It must be true. I will believe you —Virgil. I know you brave and not wish to hurt an old man. No, you could not do that. You will forgive me, yes?"

She held forth her hand and taking it tenderly, he touched it with his lips; and like a princess she accepted the homage due her rank and her beauty.

"Come, now, we play," she said, sweetly laughing. "And it must be free, like the boy and the girl. But first, you sit down here and tell me."

> "And do you know what I said to myself? I said: 'You are to be my wife.'"

(TO BE CONTINUED.)

An old grouch is as good as a new one if you are looking for trouble.

DAIRY POINTS

Rules for Dairyman.

Always weigh the feed. Don't guess.

Avoid overfeeding. Overfeeding is sure to result in scours.

Be scrupulously clean. Clean pens, clean bedding and clean feed fed in vessels that are washed and sterilized daily are absolutely necessary.

Give the calves plenty of clean water to drink.

In feeding milk or gruel, use a thermometer; don't guess at the temperature.

Watch the condition of the calf's bowels. At the first appearance of scouring or offensive odor, reduce the feed and treat for scours.

Be regular in the various operations performed in caring for the calves.

Tie the calves up so they can be fed separately.

Give them as much exercise as possible.

GIVE CARE AT CALVING TIME

Few Precautions and Suggestions for Treating Animals During Delicate Period.

Even a poor cow is too valuable to be given careless treatment at calving time. A few precautions and suggestions for treating animals during this delicate period are offered by specialists from the dairy department of the New Jersey State Agricultural college:

In order to allow a cow a sufficient rest and a chance to put on flesh before calving, it is a good practice to have her become dry about six weeks before freshening. This seems to be nature's way of preparing her for the labor of lactation. A few days previous to calving if she is confined in the barn she should be given access to a well-bedded box stall.

During the last week if the cow is in the barn the grain mixture should be laxative in nature. A mixture of wheat bran and oats, equal parts, being excellent at that time. If the owner is able to calculate the exact day on which the cow is to calve, nothing is better as a feed than a bran mash. On calving day the cow will probably not eat much feed, but this need cause no alarm.

This Cow Won Three First and a Special Prize at a Recent English Agricultural Show.

Although it is not necessary for the attendant to be present at calving time, he should be nearby to judge whether she needs assistance or not. Immediately after freshening the cow should be offered lukewarm water and a warm bran mash. The attendant should keep close watch of the cow after she freshens to be sure that the afterbirth is not retained. Should she still retain it 24 hours after freshening, an inexperienced man should call in a veterinarian.

Because the vitality of the cow is lowest at calving time she must be kept away from drafts. The ration for the first few days should be light, and if there is any inflammation in the udder, it is usually a good rule to take two weeks getting her on to full feed.

COWS IN HEALTHY CONDITION

When Freshening They Are Better Fitted for Year's Work in Production of Milk.

Cows that are in good condition when they freshen are best fitted to do their year's work in milk production. They start with a greater milk flow and milk longer than those starting their lactation period in poor condition.

COWS NEED FEED REGULARLY

Good Practice to Put Grain Portion of Ration on Silage—Cows Won't Eat Too Fast.

Cows not only require plenty of feed but they should be fed regularly for best results. In feeding, it has been found a good practice to put the grain part of the ration on the silage and this will keep the cow from eating too rapidly.

Grains for Poultry.

The principal grains fed to poultry are corn, wheat, oats and barley. Corn and wheat are the most popular, and both are well relished by fowls.

Lime Corrects Acidity.

Why lime the soil? Because it corrects soil acidity and enables clover, alfalfa and other legumes to grow better.

Cooling Tank Is Essential.

Every farmer who milks cows should have a cooling tank.

LOS ANGELES MAN SAYS IT NEVER FAILS

"Tanlac is my stand-by, and I wouldn't think of being without it. It has set me on my feet more than once when I had such bad spells of stomach trouble. I thought I couldn't get well." This emphatic statement was made recently by W. C. Wallace, 820 N. Normandy Place, Los Angeles, Calif.

"An acid stomach and indigestion caused me indescribable suffering for more than four years," he said. "Awful pains would strike me soon after eating, and I would be almost doubled up in agony. Often I had to take to my bed, and I would lose much weight with every spell. I was told I had ulcers, enlarged stomach and other ailments, but all my efforts to get relief failed. I kept getting worse, and figured I would have to get something to help me or I couldn't keep going much longer.

"I read in the papers where Tanlac was helping others with stomach troubles, so I began taking it. It never failed to straighten me out, and I gained back my lost weight, too. I am more grateful than I can say for the good this medicine has done me, and I do not hesitate to give it my fullest recommendation."

Tanlac is sold by all good druggists. Over 35 million bottles sold.—Advertisement.

Relative Rewards.

"Do you know," said the earnest person, "that there are men renowned in literature, art and science whose annual incomes are not large enough to give them the ordinary comforts of life?"

"I don't doubt it," said Mr. Gawker, "but if nature gave them sound bodies to start with and they've enjoyed reasonably good health, it seems to me that it's their own fault if they haven't gone in for athletics and acquired proficiency with a pair of eight-ounce gloves."—Birmingham Age-Herald.

DYED HER DRAPERIES, SKIRT AND A SWEATER WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple that any woman can dye or tint faded, shabby skirts, dresses, waists, coats, sweaters, stockings, hangings, draperies, everything like new. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is guaranteed, even if you have never dyed before. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run. So easy to use.—Advertisement.

Call for Assistance.

"Maw?"

"What is it, Tommy?"

"Mrs. Gadder says will you lend her an armful of books?"

"What kind of books?"

"She says any kind of books. She told me to tell you she has an author comin' to dinner, an' she wants her house to look literary."—Birmingham Age-Herald.

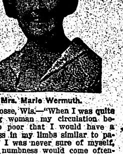
Stop the Pain.

The hurt of a burn or a cut stops when Cole's Carbolisalve is applied. It heals quickly without scars. 30c and 60c by all druggists, or send 30c to The J. W. Cole Co., Rockford, Ill.—Advertisement.

Conceding His Defects.

"Your handwriting is very bad indeed," said a man to a young college friend who was more addicted to sport than study; "you really ought to learn to write better."

"Yes," returned the young man, "it's all very well for you to tell me that; but if I were to write better people would be finding out how I spell."—London Answers.



Mrs. Marie Wermuth.

La Crosse, Wis.—"When I was quite a young woman my circulation became so poor that I would have a numbness in my limbs similar to paralysis. I was never sure of myself, for the numbness would come oftentimes in both limbs at the same time. Dr. Pierce's Golden Medical Discovery not only gave me immediate relief, but it eventually cured me of this condition. I have not had such a spell in over twenty years but have been in the very best of health, thanks to Dr. Pierce's Golden Medical Discovery." Mrs. Marie Wermuth, 925 Pine St.

All druggists. Tablets or liquid. Send 10c to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for trial pkg. or write for free medical advice.

Laxatives Replaced

By the Use of Nujol

Nujol is a lubricant—not a medicine or laxative—so cannot gripe.

When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus replaces it. Try

FRENCH TROOPS MOVE ON ESSEN

Many Troops Have Already Passed Coblenz and Are Nearing Objective.

PARIS APPROVES MOVE

French Plan to Collect Tax on Coal and Impose Export Duty in Territory—First Move May Be Last.

Coblenz—Four trainloads of French and Colonial troops from Mayence have passed through Coblenz on the way to a concentration center on the outskirts of Dusseldorf, where it is estimated 60,000 troops already have been assembled.

Seven more troops trains are reported to be following closely on the heels of the first.

Military trains also are forming at Herbesthal and leaving for the new reparations front.

Duisberg dispatches say the Belgians are concentrating there, ready for an advance.

The workers here have spread the rumor that the mines are to be flooded when the troops enter the Ruhr, and that a general strike will be declared in protest against the invasion.

The 230th French field artillery and the 156th infantry may move but their commanders are reticent as to their plans.

No special instructions have been received from Washington at American headquarters here, and the occupational duties in the American area are going on as usual.

Berlin—Fifteen hundred fresh French troops have arrived at Dusseldorf and demanded accommodations, the mayor of the city has notified the government. Three hundred automobiles were commandeered by the troops. Two schools and part of the bureau of finance were demanded as quarters for the 300 officers, the mayor of the town reported.

German officials believe the troops will be sent forward to Essen immediately.

France Approves.

Paris—The soldiers of France will soon be marching into Essen. This long talked of occupation is now accepted as an almost accomplished fact, and government officials, business men, even the bankers, worried by the exchange problem, are regarding it calmly. They displayed a reasonable amount of confidence in the results as evidenced by the resistance of the franc to the reported bear movement in prospect from London.

There is expectation in certain circles close to the premier that the first phase of the Ruhr action will have been carried out when the premier takes the floor in the chamber of deputies to make his statement before the house. This phase is expected to be the occupation of Essen by a small joint force of French and Belgians as a guard for the technical forces and notification to the local authorities and mine employers there that the allies until further notice will collect a coal tax and impose an export duty on shipments from the district.

Essen, which is the first objective in the Ruhr plan, may be the last, if the Germans take the operation seriously and show a desire to offer France such guarantees as M. Poincare can take to parliament and say:

"Here is sufficient collateral for the present."

WILL GIVE TURKS A CHANCE

Peace Terms Not to Be Forced on Them, Allies Announce.

London—Confirmation of the report trated in western Thrace has been retrated in western Thrace hase been received in London, but the move is not regarded as of great importance. The Greek government has assured the allies that the step was taken merely as a precautional measure.

Lausanne—When the allies' conception of what the Lausanne treaty should be, is drafted, there is no intention and will be no disposition to take it to the Turks and say:

"Now will you sign it—yes or no."

That the allied spokesmen made clear in discussing the document which the treaty experts are compiling.

The allies say they will permit free discussion of the disputed points in meetings of the full commissions.

These assurances of the allies put forth to lessen the tension, probably influenced Riza Nur Bey to adopt a more conciliatory attitude today on the question of international supervision of Turkey's sanitary arrangements.

Clan Is Murder Suspect.

Birmingham, Ala.—Police investigating the slaying of J. R. Turner, 25, and serious injury of Lillie B. Bell, a negress, declared they had discovered evidence that an organized band is at work in this community and that they believe the band is composed of negroes. The man and woman were found injured, just outside the door of the woman's home. The hands and arms of the victims had been securely tied, the police inquiry disclosed, and each had been beaten with a light axe or heavy hatchet.

Odd African Tribe.

The El Molo ("Poor Devil") are a small and little-known tribe, dwelling on islands close to the east shore of Lake Rudolf, in East Africa. They are now a community of about 70 souls under the leadership of a blind chief.

They construct the poorest type of shelter from leaves of the Dom palm. Their sole food is fish, which they occasionally spear, but more often catch in coarse-meshed fiber nets; their only drink is the vile soda-impregnated water of the lake.

The El Moro are almost amphibious, and are apparently unable to go for more than an hour without water, for after that time their lips swell up and start bleeding. They have their own language.

Nothing to Eat.

My most embarrassing moment came when I had dinner with a friend who put out a most beautifully served and appointed meal, with gorgeous service and artistic settings, but with little food. I was duly impressed with the beauty of the meal, but equally depressed by the lack of food, and with both these feelings in mind I blurted out to the hostess on leaving: "You must come and dine with us soon. I can't promise you a more artistic dinner than yours was, my dear, but you may be sure it will be more substantial."—Chicago Tribune.

Cuticura Comforts Baby's Skin

SERGEANT USES HIS BRAINS

Has Made, Discovery That Weather Can Be Utilized as an Aid in Recruiting.

"Studying weather forecasts, that's how I land 'em. Thus one of the regular army's most proficient recruiters explains the success which has made him one of the "aces" of Uncle Sam's recruiting forces.

When winter blasts blow around his "Uncle Sam Wants You" sign, the sergeant hangs out alluring pictures of a field artillery column at rest on the side of a Hawaiian island road shaded with palm trees. When the city sizzles in the summer he extracts from his supply of posters a persuading "Spend Your Summer in Cool Alaska With the Infantry" sign.

"And you ought to see 'em flock in," gloats the sergeant. "Give me a week of rain and I'll land 'em for my post on the Mexican border, 50 miles away from a river. Come around and see me this winter. I can fill a division for the Philippines any day there's snow on the ground. But Alaska or the Canadian border, not a chance!"

Sentimental.

"I sorter hate to cut down that there old tree," admitted Gap Johnson of Rumpus Ridge. "Kinda seems like one of the family, so to say."

"Hallered memories, and all such, hanging around it, as it were?" inquired a visitor.

"Eh-yah! That's whur we tied our children, one after another, as they got big enough and put their first shoes onto 'em."—Kansas City Star.

Paris Strewn With Shells.

Unexploded shells, bombs and similar war souvenirs to the number of 6,600 have been picked up in Paris streets since the beginning of this year. The authorities believe that the owners of these dangerous articles are "dumping" them to get rid of them.

Beauty.

Many of the smartest beauty shops are adding courses in physical culture and have instructors who provide reducing exercises. The theory is that a woman must have a slender figure as a foundation for all beauty.

SAW 3 PRESIDENTS SLAIN

Robert T. Lincoln Probably Only Man in America to Witness Chain of Tragedies.

Robert T. Lincoln, son of President Lincoln, and now in his eightieth year, was in the army and stationed in Virginia when he received an order to report at Washington. He got into the theater just in time to see his father receive his fatal wound.

Robert T. Lincoln was secretary of war under Garfield. He was asked by the President to meet him at the station, and he reached there just as Garfield was assassinated. Mr. Lincoln received an invitation to attend the formal opening of the Pan-American exposition at Buffalo, and accompanied by his family got there just in time to see President McKinley shot by Czolgosz.

Mr. Lincoln related this eerie experience recently to a friend, says Forbes' Magazine, and, so far as he knows, says the writer, it had never before been published.

Spreading the News.

"I hope that you won't object to my guests knowing that I paid you $1,000 to entertain them this evening?" remarked Mrs. Gawker.

"Not at all, ma'am," replied the tenor, in sarcastic tones. "Would you like me to pin the check on my coat lapel just before I sing?"—Birmingham Age-Herald.

An Expert.

She—"Do you like to dance?" He—"Not particularly." She—"Oh, well, no one dances that way nowadays."—American Legion Weekly.

FEMALE VICTIMS OF PLAGUE

Figures Show That Tuberculosis Is Spreading, Chiefly Among Women Active in Industrial World.

The death rate from tuberculosis among women is on the increase. In spite of the increase in active cases among women the death rate for males is still higher than that for females by almost one-third. "The sudden influx of women into industry during the war may, in a measure, be responsible for this increase," says a statement from the National Tuberculosis association. "This does not mean that there is any real basis for the assertion that women are not as well fitted for industrial work as men are. It is a fact, however, that many women who work in industry also look after their household duties and bring up large families of children. Consequently, insufficient rest, improperly cooked food and lack of fresh air so undermine the constitution that they readily become victims of the tubercle bacillus."

Massachusetts Long In Lead.

THE GAME LAW.

One matter that should be taken up by the present Legislature is the season for shooting deer. The one-buck law is very unsatisfactory.

The average hunter for deer will shoot just as soon as he sees the animal and in any event no hunter is able to tell the difference between a buck and a doe looking through brush for a distance of 200 of 300 yards.

Not one hunter in a thousand—now that game is becoming scarce—will hold the trigger long enough to find out whether or not he is within the law.

What should be done is to have the season open every second year and permit the shooting of either buck or doe. A hunter under the present law shoots a doe and is forced to leave the carcass on the ground. He has violated the law but is forced to waste the meat or bring the evidence back with him.

This, of course, will mean that there will be no big game license money on the off years, but the preservation of game is certainly worth much more.

And then send us up a game warden to help us keep what few deer we have left!

If a lot of the theorists who are trying to solve the problems of the farmer would go to work and quit theorizing and pay their bills, the farmer would get along a lot better. One of the things from which farmers have been suffering is too much fool advice. —Anoka Union.

It takes 64 muscles of your face to look cranky and only 14 muscles work when you smile. Yet there's a lot of people who exert themselves and use all the unnecessary muscles.

BAD DOG COSTS $1,500.

Owners of dogs, good, bad and near bad, will be interested in a case recently tried in Roberts county circuit court at Sisseton. In this case a man named Nulle, living a few miles out of town, maintained a shepherd dog which some time last August ran out of the yard, barking and snarling at Mrs. Lina Norby, a lady 62 years of age, who was walking along the road.

Mrs. Norby was frightened and she screamed for help to the members of the Nulle family, but they evidently considered it a good joke on the old lady and made no effort to help her, and she was badly frightened and bitten on the arms.

Their idea of a good time may have changed to some extent since the jury awarded Mrs. Norby $1,500 damages at the session of court at Sisseton last week.—Graceville Enterprise.

Listen, you agents of publicity, and let this serve as a notice to you to drop The Banner off your mailing list. Your cheap propaganda has filled our waste basket and we have to walk clear out around the front door to dump it.

Not all the marks are in Germany. For instance the goofs who pay five bucks a quart for rotten moonshine.

THE LAW!

By REV. H. LUTZ.

Text: "Thou shalt——!" (Genesis 20,3.

This world is literally filled with laws, some good, some not so good, and some no good at all. We can hardly turn without coming into contact with some law of nature, of the land, or of God.

Concerning laws in general, let us remember this: The laws of nature are very good, for they are given and controlled by God. Therefore we do well to observe them. Eat, drink, sleep, work, and enjoy ourselves as much as—but not more—than nature permits.

The laws of our land, whether they suit our fancy or not, are made to be kept. No doubt it would be better if we had less laws, and those were kept, or stringently enforced, but as it is, a Christian and a loyal citizen has no choice but to abide by the laws.

But we wish to devote our attention this time to the written law of God, more particularly to the Ten Commandments.

This law was given through Moses to the Children of Israel at Mt. Sinai, when God had led this people out of the bondage of Egypt and was leading it to the promised land—Canaan.

In this law God tells His people what, according to His will, they should do and not do, and how they should be.

Briefly, the sum of the Law is LOVE—thou shalt love the Lord, thy God with all thy heart and with all thy soul, and with all thy mind, and thou shalt love thy neighbor as thyself. "Thou shalt be holy." "Be ye therefore perfect."

And this law has stood the test of the ages. It is in force today as it was when it was given. Centuries have rolled by, human law codes have been made and unmade, have been patched up and augmented, cancelled and modified, but this Law of God still stands unchanged and is the basis of all good and just laws among men today.

And if we keep this Law of God, we will be saved, or rather we will be taken into heaven when we die. For if we keep the law, heaven is open unto us, we need not be saved. A person need be saved from drowning, only then, when he is in deep water and cannot swim. We need to be saved only then, when we have broken the law, are in danger of hell and cannot come up to the requirement of the law. "Be ye perfect."

But, in order to be saved by the law, we must keep it entirely, fully, perfectly. The Master says: "This DO, and thou shalt live." He does not say: "Try to do it, do the best you can, then your mistakes will be overlooked." Let us not overlook this important fact.

But there is also another important truth which we must bear in mind. The tiniest transgression of the law brings with it God's wrath and displeasure and, if not atoned for, eternal death and damnation. "The soul that sinneth, it shall die." Human laws sometimes may be transgressed without suffering the punishment, but God's laws never. If a sin is committed before God it will be punished. God is often long-suffering, but He is not slack concerning His threats and promises.

Now the question is: Can we keep the law; have we kept it? We will probably be better able to answer this question after we have considered each commandment individually, that we intend to do during the coming weeks, by the grace of God.

For the time being, let us keep in mind that the Ten Commandments are God's law, that He is in earnest with them, that He wants us to keep them. And that, since we have not kept them they are to be a schoolmaster to lead us to Christ (Gal. 3,24), whom God sent into the world to "redee mus from the curse of the law." (Gal. 3,13.

Then, and then only, will the law be a blessing to us.

Amen!

Laziness in a man doesn't seem to have any effect in reducing the size of his family.

An eastern woman who shot three times at her husband and missed was freed by a jury. "They decided to give her another chance," adds an exchange.

If you don't want an undertaker to pump embalming fluid into your gizzard, you better stay away from this poison stuff being shot at you in the form of "moon."

The "wets" aren't paying any attention to the open door policy. It's the swinging door they want—Beaudette Region.

Come on, Mr. Reader, let's be fair. How can you expect The Banner to pay its debts with nothing but debts to pay them with?

WE CAN NEVER REPAY THEM.

Civil War veterans and widows of veterans will receive an increase in their pensions under the provisions of the pension bill which has just recently passed Congress.

The ranks of the veterans, who fought to preserve the Union, have dwindled tremendously in the last few years. In a short while those who still remain will have gone on to join their comrades over there.

The government has been kind to these men who underwent the hardships of the four years of bitter struggle in which a nation was divided against itself.

But the people of America realize that they can never repay them for their patriotism. They cannot be repaid with dollars. But a grateful government does well to remember them, in their declining years, with increased pensions, which, in a small way at least, is recognition of the country's obligation to the Boys in Blue.—Fargo Forum.

Ford to Erect Great Industrial Plant in Twin Cities in Spring

Henry Ford has purchased 167½ of land adjacent to the federal high dam on the St. Paul side of the Mississippi river for $315,000 and will begin the construction of a $10,000,000 manufacturing plant there this winter, R. E. Hilton, secretary of the St. Paul association, announced today.

The plant will be built, according to the announcement, regardless of the outcome of Mr. Ford's application for the rights to develop the power of the federal high dam.

The actual purchase of the property was carried out between the Greater St. Paul committee, of which L. H. Brittin was special representative, and the Ford Motor company.

Work on the construction of the plant, according to the announcement, will begin before spring. A construction program of several years is planned and when the project reaches its maximum, a $10,000,000 plant will be employing between 14,000 and 15,000 men, with an annual payroll estimated at $27,000,000.

MOONSHINE JUDGES

The time has come for plain speaking with reference to judges who contribute to the crime of moonshining by dealing leniently with the offenders against the liquor laws of the country. How can enforcement officials be expected to bring the culprits to the bar of justice time after time when they know in advance that chicken hearted judges will let them off with a light fine, or a minimum jail sentence. Last week three Red Lake Falls men were fined $50 apiece in the Federal court at Fergus Falls, after their guilt had been fully established. Is there any sense to a performance of that kind?

Moonshining is a profitable business or there would not be so many men engaged in it, and the imposition of a light fine for such offenses hearkens back to the old days when authorities connived with the keepers of disorderly houses by permitting them to run under a system of weekly or monthly fines. The judges have it in their power to put the fear of God into the men who are defying the law, and the sooner they wake up to the fact the sooner will the evil be abated.

Alleged Accomplice In Marie Wick Murder Goes to Jail; Selling Liquor

Figured Prominently in Sensational Trial at Valley City, N. D., Over a Year Ago.

Andy Brown, who was held as an accomplice for the murder of Marie Wick of Grygla, the brutal crime for which William Gummer was convicted and sentenced to life imprisonment at Bismarck, N. D., pleaded guilty last Saturday to a charge of bootlegging and was sentenced to 90 days in pail and fined $200 by Judge A. T. Cole of Fargo.

According to Fargo newspapers, Brown has been closely watched by police of that city and has been suspected of transporting and selling liquor over a period of several months although up to last week he has been successful in eluding capture for his crime. Last week, however, he was caught with the goods and his arrest and sentence speedily followed.

Brown figured prominently in the trial of William Gummer for the murder of the Grygla woman, perpetrated at a Fargo hotel when she spent the night there with the intention of catching a train the next morning for points in North Dakota. Brown was completely cleared at the trial and had intermittently been making Fargo his headquarters since that time.

Sandstone Marshal Shot in Row Over Liquor Deal

William Peroy, marshal of the village of Sandstone, was shot in the upper left arm and Charles Sukola received a bullet wound in the left thigh while wrestling for the possession of a gun drawn by Peroy, who was attempting to arrest Sukola. According to Peroy, Sukola was resisting arrest. Both men are in the hospital. It is believed that the affair resulted from a six months feud between the two.

About that time Peroy was shot in the leg and beaten into unconsciousness when he attempted to arrest Sukola on a warrant for selling moonshine liquor. He was searching Sukola's home at the time of the first altercation.

In spite of the noise that is being made in certain quarters about the evil of tax exempt securities, yet the states, counties, cities, villages and districts issued about a billion and a third dollars worth of such securities last year, the total now outstanding being estimated as between $14,000,000,000 and $20,000,000,000. Perhaps a good way to stop the drain of these tax exempt securities would be for the states and municipalities to stop issuing them.—Morris Tribune.

RED CROWN GASOLINE

Your Guarantee of Service

Red Crown Gasoline Causes Less Carbon——

That's the signed statement of the pilot of the new Mitchell F-50, who ran 10,000 miles with a sealed hood and used Red Crown Gasoline throughout the trip.

He says the spark plugs were as clean as new, the valves sharp and bright, carbon deposit on cylinder head and piston tops was negligible. That's the answer to using a gasoline that burns clean and gives perfect combustion.

USE RED CROWN

The High-Grade Winter Gasoline

It is made to fit your car no matter where you are. It never varies in quality. It starts easily, even in severely cold weather. It causes your engine to get away with a quick, snappy response, and it delivers an abundance of smooth, rhythmic power—steam-engine-like, sustained, pulling power.

There is no slapping piston stroke and jerky power with Red Crown in the tank.

Red Crown is the best gasoline you can buy.

Mortgage Foreclosure Sale.

Whereas, Default has occurred in the conditions of that certain mortgage duly executed and delivered by M. O. Seavey and Rachael Seavey, his wife, Mortgagors, to Ole A. San, Mortgagee, bearing date the 1st day of July, 1921, and with a power of sale therein contained, duly recorded in the office of the Register of Deeds, in and for the county of Pennington and state of Minnesota, on the 31st day of August, 1921, at eight o'clock A. M. in book 57 of Mortgages, on page 609, such default consisting in the non-payment of the interest upon the principal sum of such mortgage, which interest to-wit: the sum of Two Hundred Eighty-six and 80-100 Dollar ($286.80), became due and payable on July 1, 1922, and, whereas, the undersigned, Nick Bundhund, was on the 10th day of July, 1922, duly appointed guardian of the estate of said Ole A. San by the Probate Court, of Pennington County, Minnesota, and a certified copy of the letters of guardianship issued to the undersigned as such guardian has been duly recorded in the office of the said Register of Deeds.

And, whereas, the undersigned did on November 6, 1922, pay the interest then due upon a prior mortgage upon and against the premises hereinafter described, amounting to the sum of One Hundred Twenty-four and 42-100 dollars ($124.42). And, whereas, the undersigned, as guardian has declared and does hereby declare the whole sum secured by said Mortgage to be due and payable, and, whereas, there is now claimed to be due and is due at the date of this notice upon said mortgage the sum of Five Thousand Two Hundred Ninety-five and 92-100 dollars ($5,295.92), including the interest so paid on said prior mortgage, and no action or proceeding having been instituted at law or otherwise, to recover the debt secured by said Mortgage, or any part thereof.

NOW, THEREFORE, NOTICE IS HEREBY GIVEN, That by virtue of the power of sale contained in said mortgage, and pursuant to the statute in such case made and provided, the said mortgage will be foreclosed by a sale of the premises described in and conveyed by said mortgage, to-wit:

The west half of the Southwest quarter (W½ SW¼ of section fifteen (15), and the east half of the southeast quarter (E½ SE¼) of section sixteen (16), and the west half of the southeast quarter (W½ SE¼) of section sixteen (16), in township one hundred fifty-four (154), north of range forty (40), west of the fifth principal meredian, containing 240 acres, according to the Government survey thereof, in Pennington county, and state of Minnesota, with the hereditaments and appurtenances; which sale will be made by the sheriff of Pennington county, at the front door of the Court House, in the city of Thief River Falls, in said county and state, on the 6th day of January, 1923 at 10 o'clock A. M. of that day, at public vendue, to the highest bidder for cash, to pay said debt of Five thousand two hundred ninety-five and 92-100 dollars ($5,295.92) and the interest, and taxes, if any, on said premises, and Seventy-five dollars ($75.00) attorney's fees, as stipulated in and by said Mortgage in case of foreclosure, and the disbursements allowed by law; subject to redemption at any time within one year from the day of sale ,as provided by law.

Dated November 16, 1922.

NICK BUNDHUND.
as Guardian of the Estate of Ole A.
San. Incompetent, Mortgagee.
H. O. CHOMMIE,
Attorney for Mortgagee,
Thief River Falls, Minnesota.

Notice of Postponement.

Notice is hereby given that the sale mentioned in the above notice is postponed to the 20th day of January, 1923 at ten o'clock A. M., and that in all respects save time it will take place as stated in such notice.

Dated January 6, 1923.

NICK BUNDHUND.
as Guardian of the Estate of Ole A.
San, Incompetent, Mortgagee.
H. O. CHOMMIE,
Attorney.

J-12-19

Nineteen Members of Agricultural Committee Are Real "Dirt" Farmers.

Committee assignments announced Monday by Speaker W. I. Nolan indicate that he has kept his promise with the farmer members of the 1923 session of the Legislature, the important agricultural committee containing the names of 19 farmers, with Carl M. Swenson of Ashby, Minn., as chairman. Five minority members of the House are recognized with chairmanships in the assignments to standing committees announced by Speaker Nolan when the body convened late Monday. Old members of the Legislature head each of the 44 committees of the House.

Theodore Christianson, Dawson editor, is head of the committee on appropriations. Women members of the legislature fared particularly well at the hands of Speaker Nolan and each were given excellent committee appointments.

Marius Waldal, member from this district, also was handed several good appointments and, although he did not land on the committee on agriculture, he was elected to serve on the committee on grains and markets. His name also appears on several other committees, including that of railroads.

Minority members have fared better than they expected. Carl M. Iverson of Ashby, who was the minority candidate for speaker, heads the important committee on agriculture. Erling Swenson of Minneapolis, leader of their city contingent and candidate for speaker two years ago, is chairman of corporations. A. C. Welch of Glencoe, the oldest leaguer in years of service, is chairman of public buildings, an important new committee. B. M. Benson of Crookston is chairman of university and schools. Bert Walworth of Winona, who was elected with endorsement of the league but voted for Nolan for speaker, is chairman of the labor committee.

When elected speaker last week, Mr. Nolan announced no committees would be packed, except committees dealing with questions of interest to the farmer, which would be "packed with farmers." He made this pledge good Monday. The committee on agriculture has 19 farmer members out of 21. Dairy products and livestock has 24 farmers out of 25, and 17 of the 19 on grain and warehouse are farmers. The committee on markets and marketing, which will handle rural credits bills and measures to improve the market conditions for farm products, has 22 farmer members out of 31.

Only a few house members head the same committees as two years ago. Those continued in former chairmanships are Theodore Christianson, appropriations; L. O. Teigen, civil administration; commerce, manufactures and retail trade, George W. Rodenberg; education, R. W. Hitchcock; grain and warehouse, C. M. Bendixen; insurance, J. N. Jacobson; public highways, Oscar A. Swenson; rules, W. I. Norton, and soldiers home and soldiers bonus, John B. Hompe.

John B. Pattison succeeds the late Ralph J. Parker as chairman of judiciary; Thomas H. Girling becomes chairman of taxes, and Guy E. Dilley succeeds him as chairman of general legislation. R. A. Wilkinson succeeds Elias Nordgren as chairman of markets and marketing and is replaced as chairman of dairy products and livestock by S. B. Shonyo. F. A. Green goes to the committee on motor vehicles, which will have the automobile tax bills. Dr. M. B. Cullum is chairman of cities, and Dr. A. B. Cole, former senator, succeeds him as chairman of public health and hospitals. Charles T. Murphy is chairman of banks, and Daniel DeLury replaces him on public domain. W. L. Bernard of Duluth, who opposed the street railway act two years ago, heads public utilities.

And it simmers down to something like this: There are some mighty big troubles in mighty small towns."

SUGAR BEETS IN THIS SECTION OF STATE WILL PAY

Red River Valley Produces Dependable Crop; Promising New Industry.

(By T. J. McCall, Horticultuirst, Northwest Experiment Station.)

It has long been know that sugar beets and other root crops grow to a high state of perfection in the Red River Valley. The acreage, however, has been limited to the need of roots for live stock feeding. Since 1919, from one to two thousand acres have been grown and marketed through a Minnesota sugar refining company. The future development of the sugar beet industry in Northwestern Minnesota is dependent upon the acreage needs of the present sugar refining company, and the establishment of other factories in or contiguous to this region.

Dependable Crop.

The sugar beet crop has proved very dependable in yield during the seven years of trial at the Northwest Experiment Statoin, averaging a little more than ten tons per acre. The average yield from farms growing sugar beets during 1922 was somewhat less than the Experiment Station yield, however, 12 and 15 ton yields have been reported.

High Sugar Content.

The sugar content of beets grown in the Red River Valley is quite high, averaging from 15 to 17 per cent. Analysis made in 1913 from beets grown from commercial seed averaged less than 14 per cent. However, the fact is established that beets from good seed strains average higher in sugar content in northern Minnesota than in regions farther south.

Grower Enters Contract.

A grower, to find a market for his sugar beets, must make a contract with the sugar refining company for his acreage. The contract is mutually beneficial to both parties, for the grower is assured an outlet for his product at a fixed price and the company is assured a quantity of product that will enable it to operate.

The acreage contracted for by a grower should depend upon several factors, namely: amount of land suitable for the crop, competition of other crops or other far moperations with the beet crop for labor, and the facilities and equipment for growing, handling and disposing of the crop.

Beets Need Good Soil Condition.

Sugar beets will grow on any soil capable of producing other agricultural crops. However, they do best on the heavier soils which are slightly alkaline, which are in good tilth and a high state of fertility. Any field for sugar beets should be reasonably free from serious weeds, and if annual weeds are numerous the cultivation practices should be such as will control them at a minimum of expense. Early fall plowing of the heavy soils of the Red River Valley proves beneficial not only in weed eradication, but also in the fact that the soil pulverizes better and is gotten in shape for seeding with less trouble than spring plowed land. A beet grower is running risks; in planting beets on very foul land, in case of wet weather at blocking or thinning time for a rank growth of weeds at that season sets back the crops greatly.

How to Grow Sugar Beets.

Beet soils should be plowed to a depth of six inches or more for the best results. Spring plowing may be resorted to on sandy loam soil types. The best system of management would be to have the beet crop take a place in a regular crop rotation in which some of the legumes, such as clovers and alfalfa are grown. The land would be manured once in the rotation period. The seed bed for sugar beets should be well firmed and levelled previous to planting. A sub-surface packer is an excellent implement to use in firming the soil, while plankers, levelers or floats may be used for finishing the land previous to planting. The depth of seeding and stand will be more uniform on leveled or smooth soil than on land left rough.

Seeding is generally done with four row beet drills; the rows are then uniformly spaced 28 inches apart. The crop is easily cultivated with the two or four row type of cultivator if the four shoe drill is used. A heavy seeding is considered necessary to guarantee a good stand; 12 to 15 pounds of seed per acre is recommended.

Seed Beets in May.

The soil should be made ready for seeding about the middle of May, while the crop can be planted at a later date, yet the crop should be coming strong before the first hot days of June.

The blocking, weeding and thinning operations must be done timely or a loss of crop will result. This early season hand work can generally be most economically done by using "contract labor." Most sugar refining companies assist their growers in getting families to do the hand labor under contract at definite costs per acre. The majority of workmen who go out under contract are very proficient in doing the hand work and can do it more cheaply than local inexperienced labor. Whatever kind of labor is used at thinning time is immaterial, however, the work should be done before the plants get too large and the weeds get a start.

Cultivation.

The two row type of cultivator with cultivator teeth and duck foot shovel attachments is the most popular type of cultivator used for sugar beets in this district. The cultivation should start just as soon as the rows are visible, care being taken not to cover the young seedlings. The cultivations should be frequent, often enough to preserve a dust mulch and keep the weeds well under control, from three to five cultivations are given during the season.

Harvesting.

Harvesting should start early in October. Sometimes the date of harvesting is specified in the contract with the sugar company, but growers should in average years plan to get the roots out of the ground before October 20th. The grower should limit his acreage to an amount that can be handled with dispatch and in season. The digger or root lifter that is mounted on a wheel truck, which is horse drawn and lifts one row at a time, has proved most satisfactory. "Contract labor" proves best at harvesting time for northern Minnesota, for the grower is assured of help at a time there is generally a great demand for men. The "contract laborer" tops and poles the roots as the final task of his contract.

Cost of Growing Sugar Beets.

The cost of growing sugar beets depends greatly upon the distance a grower is from market or loading point, the amount of work required to get the land in shape for the crop, the cultivations required and the timeliness of the work. The actual cash outlay is about the same for all locations. The cash expense includes seed, "contract labor," housing or quarters for laborers and labor furnished by the grower for all team operations, loading and hauling. Much of the team labor is generally done by the grower and is not included in the cash expense, but must of necessity be charged to the crop. Contract labor costs $18 to $20 per acre, various percentages of which are to be paid by the grower during the season, the balance to be paid when the crop is harvested. In many cases the company guarantees the final payment for labor out of the receipts of the crop.

The returns per ton have generally exceeded the contract price per ton, in that the grower may be paid a bonus on sugar contents or beets or be given a bonus if the wholesale price of sugar exceeds a certain figure. The bonus to Red River Valley growers during the past few years has amounted to from $2 to $4 per ton.

Beet Tops Make Good Feed.

Sugar beet growers get an added profit from the crop when they can utilize the beet tops for feed. Beet tops make excellent feed for cattle or sheep; the tops can either be pastured or fed in racks. There is a great deal of waste in pasturing, hence many growers haul in the tops and state that they are well repaid for the time and trouble. In some instances beet growers have used the tops for ensilage and report that a good quality of ensilage is produced. Whether the tops are utilized for feed or not, the fact remains that beet growers, to get the greatest returns from their land, must have live stock to consume the roughage and cheap feeds produced in the necessary rotation for the sugar beets.

Real Harmony Exists in North Dakota Legislature

Real Work of Session Begins—Making Boards Non-Political in Nature Is Sought.

The North Dakota legislature entered the second week of the 1923 session with harmony still existing between the independents and the nonpartisans, and with leaders on both sides asserting that in the main this harmony will continue throughout the session. The differences in prospects, as gathered from conversations with members, does not indicate anything like the uproarious sessions of the last few years in North Dakota when the nonpartisans were in power in both or one house.

The real work of the session began Monday. A committee is at work on the recommendation submitted by Gov. R. A. Nestos to the legislature, with a view of presenting what will be called the "independent program." The nonpartisans thus far are without a program, being in the minority. The independent program will embrace the important recommendations of the governor calling for the appointment of non-political boards to take over the management of the state industries, particularly the state mill and elevator at Grand Forks.

Speaker Johnson had completed his list of committees, giving liberal representation to the nonpartisans, as was done by Lieutenant Governor F. H. Hyland in appointing the senate standing committees.

Governor Nestos had announced that with respect to consideration of the affairs of the state industries, that all of the avenues of information of the state would gladly be opened to [illegible] the committee of the legislature. Officials of the Bank of North Dakota have started preparing their report for the year of 1922, with a view of having the report available for the legislators within two weeks.

PYRAMIDING PUBLIC DEBT.

In the near future taxes will become confiscatory unless a halt is ordered on the present method of issuing bonds. Here in Milan 20 years ago we voted bonds for waterworks and yet not a penny has been paid on the principal. Bond issues for the erection of a school house in the early infancy of the village remain unpaid, although the building itself was condemned as unfit for school purposes and wrecked several years ago. Our record is not any worse than that of the average village or city. If this practice of piling up indebtedness is continued, there will come a day of reckoning. Our legislature should take steps to forbid the issuing of bonds unless provisions are made for a sinking fund to take care of the principal when bonds become due. Perhaps it would be still better if all bonds were made payable on the amortization plan, a small sum applying on the principal each year in addition to the interest. In 20 or 30 years the indebtedness would be paid. In the past the people have mortgaged the future too much, and we are beginning to feel the effect of it.—Milan Standard.

Land Office Makes Record.

The Crookston U. S. Land Office did more business in 1922 than the other two offices in the state, located at Duluth and Cass Lake, combined, but had the lowest expense account of the three offices. There are about 200,000 acres of unpatented lands in the land district yet, of which about 120,000 acres are unentered.

You never knew that Corn Flakes could be so wonderful as Kellogg's

COMIZARY DEPT.

"Say, Captain, let the enemy come on! We can hold out a long, long time with this big box of Kellogg's Corn Flakes! Wish it was time to eat now!"

Kellogg's are a revelation, not only in Corn Flakes, but in cereals! Such delicious flavor, such crispy crunchiness never before was believed possible in corn flakes! Kellogg's are a revelation to your taste!

You have a great treat awaiting you the very first time you sit down before a generous bowlful of Kellogg's Corn Flakes and a pitcher of milk or cream—and fresh fruit, if it's handy!

It isn't fair to yourself and your family not to share in the pleasures that Kellogg's Corn Flakes so generously spread over the nation—and the world! You are missing a taste-thrill! So, tomorrow morning, serve Kellogg's Corn Flakes for breakfast, or for lunch—or for between-meals nibbles! They're wonderful—and never tough or leathery or hard to eat!

Insist upon your grocer supplying KELLOGG'S Corn Flakes—the delicious kind in the RED and GREEN package that bears the well-known signature of W. K. Kellogg, originator of Corn Flakes. NONE ARE GENUINE WITHOUT IT!

NEWS REVIEW OF CURRENT EVENTS

Allied Premiers Cannot Agree on Reparations and the Entente Is Smashed.

FRANCE FREE TO ACT ALONE

Lausanne Conference Also Is Likely to Fail—Industry and Agriculture Ask Relaxation of Immigration Restriction Law—President Vetoes Bursum Pension Bill.

By EDWARD W. PICKARD

> PRESIDENT HARDING has vetoed the Bursum bill, which provided increased pensions for veterans of the Civil and Mexican wars and their widows, mainly on the ground of economy. Is this action in accord with sentiment in your neighborhood?

PREMIERS of the allied nations, in session in Paris last week, absolutely failed to reach an agreement on adjustment of the German reparations, and on Thursday the conference broke up, leaving France to act alone as she may see fit in the matter of enforcing payment from Germany.

Bonar Law and Poincare submitted their respective plans, and after two days of heated controversy each declared the program of the other was unacceptable. The British prime minister was the more emphatic in this declaration and it was he who abruptly created the final rupture, stating that it was useless to continue the discussions. The British delegation left for London Friday morning. Thus the entente cordiale was finally smashed.

Premier Poincare immediately called Marshal Foch, General Weygand and the cabinet members to a meeting to discuss France's plan for isolated action. Whatever she does will probably have the moral support of Italy and Belgium, for the compromise plans offered by those countries were much nearer to the French program than to that of Great Britain. Italy, in fact, joined with France in flatly rejecting Bonar Law's proposals.

The British and French plans may be summarized thus as to their more important provisions:

British proposal—

Reduction of German reparations to $12,500,000,000.

Four years' full moratorium, with a graduated scale of payment after that and opportunity for Germany to meet its obligations by loans and deliveries of materials.

Cancellation of all debts owed by France, Italy and Belgium to Great Britain except such as could be paid by allied gold deposits now held in London (about $250,000,000) and a portion of the German first series bonds to be issued as security for reparations.

Demands Germany stabilize credit under allied control.

Opposes any forceful measures unless Germany shows unwillingness to meet the new terms.

French proposal—

Reparations must stand as fixed at $33,000,000,000, but the French are willing to cancel the present German "C" bonds, amounting to $20,500,000,000, if that sum is written off the interallied debts.

Two years' moratorium on cash payments, but insist payments in materials must go on.

Guarantees amounting to $250,000,000 a year by collection of coal tax, and export and import duties on German products. These collections would be made by an allied commission headed by a Frenchman.

Military occupation of Essen and Bochum.

Mr. Bonar Law followed the formal presentation of his plan with a statement in which he said: "You can get certain amounts of money by taking immediate possession of Germany, but you cannot take over Germany and re-establish her financial stability. The allies have reached a point where they must choose between these two methods. They cannot have both. This is not a political question; it is a business question. You can get certain amounts from Germany if you take possession of her, but you cannot take them and re-establish German credit."

He concluded: "It is often said that the British have a selfish interest in the restoration of Germany because we do so much foreign trade. It is my firm conviction that, from a purely selfish point of view, if an earthquake were to come along and swallow Germany up we would gain, not lose, since Germany is our trade rival."

Herr Bergmann carried to Paris a German program and was permitted to submit it in writing to the British and French delegations. It suggested the same reduction in reparations as the British plan and asked a ten-year moratorium and an international loan of a billion and a quarter dollars immediately. The loan the Germans thought they could raise mainly in the United States and in neutral countries, where vast amounts of German capital are now hidden. The French reply to this was that the German war profiteers would certainly absorb all the benefits of such a loan.

FRANCE has flatly rejected the German proposal of a four-power pact to preserve the peace of Europe for a generation, basing her action on the provision of the French constitution that the power to declare war shall rest with the parliament. This, of course, is a technicality, France being unwilling to make an agreement that would impair her liberty of action in compelling payment of the German reparations.

WASHINGTON devoted a great deal of attention last week to Europe's problems. President Harding and Secretary Hughes had long talks with Ambassador Harvey, and the President also received Charles E. Mitchell, president of the National City bank of New York. In the senate Robinson of Arkansas offered a resolution "that the President be and he is hereby authorized, by and with the consent of the senate, to appoint a person or persons to represent the United States in the reparations commission according to the terms of part VIII of the treaty of Versailles and section IV of article II of the treaty of peace with Germany."

This move was approved by the President, who has long desired that the United States have full representation on the reparations commission. He feels that this country can most effectually aid Europe by having a voice in the solution of the basic problem, the settlement of the reparations. It was taken for granted that if the resolution were adopted Roland Boyden, now unofficial observer, would be appointed American member of the commission.

STANLEY BALDWIN, British chancellor of the exchequer, and his colleagues on the commission for the refunding of the British war debt to the United States arrived in Washington last week and prepared for their work. Great Britain owes the United States about $4,500,000,000. It is said the British commission will ask more liberal terms than are provided in our refunding law, which fixes interest at not less than 4½ per cent and the maximum term of the loan at 25 years.

SENATOR BORAH has withdrawn his resolution for a world economic conference, after it has accomplished what he probably expected it would. It compelled the administration to come out in the open with its views in the matter. From the White House came the admission that the United States is vitally concerned with the restoration of peace and prosperity in Europe and that the war debt problem cannot be settled within the terms of the funding act. Secretary Hughes, in a speech at New Haven, suggested that the problem of Europe be turned over to an international conference of experts and financiers.

WHILE the Lausanne Near East peace conference marked time, awaiting action by the premiers in Paris, the Turks were bolstering up their courage, or obstinacy, to stand firm in opposition to the demands of the British. In the national assembly at Angora the majority seemed to be against the making of any further concessions to the allies, and it was reported that instructions were telegraphed to Ismet Pasha to continue his resistance to allied pressure on the questions of Mosul and capitulations. On the other hand, Marquis Curzon returned from his holiday in Paris with authorization from Bonar Law to refuse all Turkish demands that already had been rejected. The British appear not the least alarmed by Turkish threats of warfare.

MODIFICATION of the immigration restriction law so that the existing shortage of labor in the United States may be relieved is being strongly urged by the farm organizations and the large industries, which have joined hands in the movement. On Thursday the house committee on immigration heard the proposals of a committee of the International Manufacturers' association, which were formulated in consultation with agricultural leaders and are backed by senators and congressmen from the leading industrial and agricultural states. The committee made these recommendations:

1. That in fixing the quota of each nationality of otherwise admissible aliens under the present law, due regard should be given to the ascertained annual emigration from the United States of persons of such nationality.

2. That the secretary of labor shall be authorized, upon the presentation to him of satisfactory evidence of a continuing shortage of labor of a particular class or type, to admit otherwise admissible aliens in excess of the quota until, in his judgment, such condition is improved.

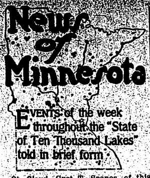
3. That provision shall be made for physical examination of aliens at ports of embarkation or where their passports are vised except that such requirement shall be waived upon assurances of another government that satisfactory examination has been made.

Organized labor, of course, is bitterly opposed to any such relaxation of the restrictions, holding that increased immigration of alien labor will result in lower wages. Samuel Gompers says there would be no labor shortage if the industries from which alien competition has driven native-born workers would pay unskilled labor wages permitting an American standard of living. It is predicted that the house will pass a bill which provides for no material relaxation and that the manufacturers and agriculturists will renew their plea before the senate.

PRESIDENT HARDING'S veto of the Bursum pension bill was a decided surprise to Senator Bursum, and nearly everybody else. The measure provided increased pensions for veterans of the Civil, Mexican and Indian wars and their widows, for Civil war nurses and for maimed veterans of all our wars. The President vetoed it because, he said, it would cost the government $108,000,000 annually and set a precedent entailing pension obligations of $50,000,000,000 in the next 50 years.

ANNOUNCEMENT is made that Secretary of the Interior Fall will retire from the cabinet on March 4, to resume the practice of law and the conduct of private business in New Mexico. It is said the President tried to induce him to retain his position, and also offered him an appointment to the Supreme court bench. Mr. Fall declares only the condition of his affairs induces him to resign. There is a rumor that Mr. Hoover may be given the portfolio of interior affairs and that Julius H. Barnes may be made secretary of commerce.

OPERATORS and miners' officials were in conference again in Chicago trying to establish a basis for negotiating new contracts for the bituminous fields before the prevailing ones expire on March 31. The union leaders are still opposed to agreement by districts and to any form of arbitration, and will not accept a flexible wage scale.



News of Minnesota

EVENTS of the week throughout the "State of Ten Thousand Lakes" told in brief form

St. Cloud—Gust T. Spanos, of this city, is offering a reward of $10 for the return of "Nick," a pet timber wolf, eight months old.

Owatonna—R. L. Van Knocker of Bancroft, Iowa, has been appointed city engineer for Owatonna by the city council.

Caledonia — The Houston County Poultry association show opened with a larger number of exhibits than ever before.

Washington—John R. Mitchell, member of the Federal Reserve board from St. Paul, will leave for a two weeks' rest at Miami, Fla.

Red Wing—Mr. and Mrs. John Pfluger celebrated their golden wedding anniversary at their home here. Their seven children were present, with 22 grandchildren.

International Falls—Tthe city council has directed the city attorney to draw up an ordinance for the strict regulation of soft drink parlors, with a license fee of $100 a year.

St. James—The county board passed a resolution asking the state legislature that seining of the lakes for rough fish be put in the hands of boards of county commissioners.

Duluth—Burning of the new $500,000 terminal warehouse of the McDougall steamship line here will not stop operations with the opening of navigation in the spring, officials said.

Hibbing—The Mahoning Ore and Steel company has stopped all stripping operations and will do repair work for the next two or three months, in preparation for the 1923 season.

Duluth—Efforts are being made to interest the Dulutuh Chamber of Commerce in sending a Duluth delegation of Skiiers to the national ski tournament at Minneapolis Feb. 11 and 12.

Red Wing—A delegation of 50 Kenyon business men and farmers attended a meeting of county commissioners here to petition for graveling two roads south into Kenyon this spring.

Waverly—L. E. Johnson, former cashier of the Miners National bank at Hibbing, and associates have purchased the stock of the State Bank of Waverly and assumed active control.

Mankato—Final arrangements are expected to be made within the next week whereby the St. James Auto Club and Body company will be assured of the erection of factory buildings in North Mankato.

St. Cloud—When the new Stearns county courthouse was dedicated here, a bronze tablet was placed in the court room bearing the names of the judges who have presided since the organization of Stearns county.

Red Wing—Fire caused $1,000 damage to the girls' dormitory of the Red Wing seminary, controlled by the Norwegian Lutheran Church of America. The blaze occurred while the girls were away on their holiday vacation.

Duluth—Carlos Avery, state game and fish commissioner for Minnesota, and W. E. Barber, president of the state game and fish conservation commisison of Wisconsin, will be guests of the Duluth Sportsmen's club at a special meeting.

St. Paul—The legislature will be asked to pass two measures of great importance to the dairying interests of the state, according to resolutions adopted by the Minnesota Holstein-Friesian association, meeting at the University farm.

Duluth—An appropriation of $1,400 was made by the St. Louis county board of commissioners so that the work of the county war records committee may be carried on until a complete list of names and photographs of former service men are gathered.

Hibbing—Reductions in practically all of the budgets submitted by the various departments of the city government were made at the meeting of the village council, the reductions being in keeping with the expenditures permitted under the per capita law.

St. James—Representatives of the city council, the St. James Business Men's association, the G. A. R. and the clergy of St. James at the annual meeting of the American Legion declared that this city needs a community building and they will join hands with the Legion in working out a plan for its construction.

Owatonna—The County Board appropriated a fund of $1,[illegible]00 for immediate payment to aid the Steele county fair and voted against the retention of a paid county child welfare agent.

St. Paul—After three years as president of the St. Paul Trades and Labor assembly, William Mahoney will retire from active leadership of the organization.

Austin—The will of Mrs. George Sutton provides that $1,000 out of her $50,000 estate shall be given to the Austin park board, "the income of which shall be used in giving a good time to the children each June 19."

Minneapolis—A nationwide survey of school and college swimming will be made by the swimming rules committee of the National Collegiate Athletic association under the direction of F. W. Luehring, director of athletics at the University of Minnesota. Mr. Luehring is chairman of the swimming rules committee of the N. C.

St. Paul—The Twin City Automotive exploitation, to be held at the Overland building beginning February 3, will not bar industrial exhibits.

Minneapolis—The University of Minnesota enrolment will be increased by more than 300 freshmen when the second quarter opens.

Minneapolis—C. P. White, Northwest federal fuel distributor, completed his work in this territory, and left for Chicago.

Mankato—County Agent L. E. McMillan recently visited a farm southwest of Vernon Center and found a herd of hogs badly affected with hog cholera.

St. Paul—Minnesota legislators, with the message of Governor Preus urging among other things a state income tax before them, are now ready to grind out laws.

Fairmont—A special grand jury has been called to consider the case against Clarence C. Hamblen of Ceylon, confessed slayer of his wife by poisoning her while she lay ill on October 9.

Duluth—Arrests of several young boys recently for drunkenness has prompted police to seek the aid of county authorities in establishing the source of liquor being peddled to the youngsters.

Montevideo—The eighth annual show of the Chippewa County Poultry association will be held here January 11 to 16. There will be numerous cash prizes offered in addition to 28 silver loving cups.

St. Paul—Fifteen new bridges will be constructed on eight trunk highways in the state this year at a cost in excess of $250,000, was announced by Charles M. Babcock, state highway commissioner.

Pipestone—Christ Bottge has been appointed postmaster at Correll, Bigstone county, Minn. George I. Chesley was recommended by Representative Clague for apointment as postmaster at Pipestone.

Duluth—Boxing in Duluth in the future will be conducted by a new organization known as the National Athletic club which has been awarded the local franchise recently droped by the Duluth Athletic club.

Litchfield—Cut across the abdomen as he accidentally fell on a circular saw, Alfred Swanson of Union Grove township, Meeker county, died at a hospital here as a result of his injuries, received nine hours before.

St. Cloud—St. Cloud Elks played Santa Claus to more than 3,000 children on Christmas day. A generous Santa, a heavily laden tree, moving pictures, voudeville and well filled socks made it a happy event for the boys and girls.

Waseca—An adverse report on the condition of the city's books made recently by members of the state examiner's staff has resulted in the recommendation of a more central bookkeeping system for the city and its various branches.

St. Paul—A court decision in Ramsey county held that the soldier's preference provisions of the civil service regulations will not protect the soldier in retaining a position against persons in classified service appointed to positions

Winona—Lincoln Litcher, employed as a teller in a bank at Lewistown, was killed when his automobile skidded on the icy pavement and overturned while rounding a sharp curve on Trunk highway No. 7, leading down a hill into the village of Stockton.

Minneapolis—Women representing 28 Shrine temples of the northwest met in Minneapolis to organize a women's auxiliary to assist in operation of the new Shrine hospital for crippled children now being completed on Riverside drive at a cost of $350,000.

Lake Benton—A pack of wolves, eight or 12 in number, have been raiding this district for several months and several hundreds dollars in poultry has been destroyed. Poultry men are planning an organized fight against the wolves in which all sportsmen will be asked to join.

Owatonna—Four head of purebred Ayershires, all registered, perished in a fire on the M. E. White farm, Havana, township. The cattle which were often shown at the Steele county fair, were valued at approximately $3,000. The fire started when one of the cows overturned a lantern.

Minneapolis—Investigation of Minneapolis dance-halls, which were termed "the greatest menace to young people in this city when improperly conducted," was recommended to the Hennepin county grand jury by District Judge W. W. Bardwell, in instructing a new panel before it took up its work.

Duluth—Hearing on the notice of a motion for a new trial made by the United States railway administration, defendants in the $1,000,000 woodland fire claims, began before District Judge H. A. Dancer. A decision against the railway administration in the woodland fire case was returned by a November district court jury.

Bemidji—A cat sat on the window sill at the Bemidji automobile company all morning and all afternoon—but not because it wanted to. On investigation, it was revealed that the animal's tail was frozen fast to the window sill, the water dripping from the second sash above having completely embedded the tail in ice.

Canby—The 3-year-old son, Charles, of Mr. and Mrs. E. J. Meyer, developed a sore nose three weeks ago. The child was taken to a physician and after an examination had been made a half-inch screw was removed from one of his nostrils.

Minneapolis—Ordering a widespread scattering of federal agents who had been concentrated in the twin cities to give Minneapolis and St. Paul the driest Yuletide celebration in their history, S. B. Qvale, state director of prohibition enforcement, announced a statewide drive to make 1923 a "dry"

DOCTORS WANTED TO OPERATE

Mrs. Quillon Tells How Lydia E. Pinkham's Vegetable Compound Saved Her from an Operation

Muskegon, Michigan.—"After doctoring for eight or nine years with different physicians without any relief at all, they said at last that medicine would not reach my case and I should have an operation. I had heard of Lydia E. Pinkham's Vegetable Compound and often saw it advertised in different papers where some women had suffered just as I did and got well and strong again by taking the Vegetable Compound. I decided to see what it would do for me, and before I had finished the fourth bottle I was much better, the weakness stopped and the severe pains in my sides left me. I am now much stronger and do my own work and work in the factory besides. I am still taking the Vegetable Compound and give it all the praise."—Mrs. NELLIE QUILLON, 17 Morris St., Muskegon, Mich.

Women should heed such warning symptoms as bearing-down pains and weakness, for they indicate some female trouble, and a persistent and faithful use of Lydia E. Pinkham's Vegetable Compound will seldom fail to help.

Necessary Repairs.

Mabel—I hear you and your fiance have kissed and made up.

Philippa—Yep. And a girl has to make up a whole lot after one of his kisses.

RE-ACTION IN GRAINS

May Wheat Declines 3 Cents, Other Grains Accordingly.

U. S. Bureau of Markets, Washington, D.C. for Week ended Jan. 6, 1923.

GRAIN: Grain prices made marked fluctuations during the week and the close shows net declines from a week ago. Chicago May wheat down 3⅝c; Chicago May corn down half cent. Principal market factors were liquidation and selling by eastern and foreign interests, limited support, short covering and strength in corn. Wheat prices reacted from high point reached early on the fifth but corn developed independent strength on reports of good export business and improvement in domestic shipping and feeding demand. Closing prices in Chicago cash market: No. 2 red winter wheat $1.26; No. 2 hard winter wheat $1.19; No. 2 mixed corn 71c; No. 2 yellow corn 71c; No. 3 white oats 43c. Average farm prices: No. 2 mixed corn in central Iowa 58c; No. 1 dark northern wheat in central North Dakota $1.02; No. 2 hard winter wheat in central Kansas $1. Closing future prices: Chicago May wheat $1.18¾; Chicago May corn 71⅛c; Minneapolis May wheat $1.20; Kansas City May wheat $1.10¼; Winnipeg May wheat $1.12.

LIVESTOCK AND MEATS: Chicago hog prices advanced 15 to 35c for the week, light hogs showing greatest gains. Beef steers 10 to 40c up; butcher cows and heifers 25c lower to 25c higher and veal calves 25 to 50c lower. Feeder steers unchanged. Fat lambs steady to 15c lower, feeding lambs steady to 10c and yearlings steady to 25c up with fat ewes 10 to 25c up. On January 5 hogs steady to strong on butchers and 5 to 10c higher on lighter weights; beef steers mostly steady; butcher cows and heifers 10 to 25c lower; veal calves largely 25c lower, other classes about steady with Thursday's prices. Fat lambs steady to strong, sheep weak. January 5: Chicago prices, hogs, top, $8.80; bulk of sales, $8.30 to $8.55; medium and good beef steers $7.65 to $11.50; butcher cows and heifers $3.65 to $8; feeder steers $5.85 to $7.65; light and medium weight veal calves $8.75 to $11; fat lambs $13 to $15.25; feeding lambs $12.75 to $14.75; yearlings $9.25 to $13; fat ewes $6 to $8.75. Stocker and feeder shipments from 12 important markets during the week ending Dec. 29 were: Cattle and calves 31,909; hogs 12,991; sheep 28,979. In eastern wholesale fresh meat markets beef and veal and mutton generally steady to $1 higher; lamb firm to $2 higher; light pork loins 50c to $1 up and heavy loins practically steady for the week. On January 5 beef generally steady, veal, lamb, mutton and pork steady to firm at all markets. January 5 prices good grade meats: Beef $12-17; veal $15-18; lamb $22-26; mutton $11-16; light pork loins $16-18; heavy loins $12.50-14.50.

DAIRY PRODUCTS: Butter market unsettled through the week but steady to firm at close. Declines in eastern markets and advances at Chicago have served to re-establish more nearly normal price relations. Demand checked by recent high prices. Domestic supply supplemented by some foreign imports.

Closing prices 92 score butter: New York 52; Philadelphia 52; Boston 53; Chicago 50½. Cheese markets steady but very quiet. Slow holiday trade has continued as many buyers are holding off until after inventories are taken. Prices at Wisconsin primary cheese markets Jan. 4th: Twins 26¼; Daisies 26¾; Double Daisies 26½; Longhorns 26½; Square Prints 27.

Minneapolis Closing Cash Prices.

No. 1 dark northern, 1.21@1.30; No. 1 northern, 1.19@1.28; No. 1 dark hard, 1.17@1.21; No. 1 hard, 1.15@1.19; No. 1 amber durum, 1.08@1.11; No. 1 durum, 98c@1.00; corn No. 2 yellow, 65c; oats No. 2 white, 39c@41c; barley, choice to fancy, 57c@69c; rye No. 2, 81c; flax seed No. 2, 2.69.

So. St. Pau Livestock.

Steers, 3.50@7.25; cows and heifers, 3.50@5.75; veal calves, 3.50@9.00; hogs, 8.25@8.35; sheep and lambs, 4.00@11.50.

BUTTER—Creameries, extras, 49c; firsts, 45c; seconds, 40c; storage extras, 42c; packing stock fresh, sweet, 26c; stale goods, 5c; grease, 1c.

EGGS—Country receipts, rots out, per crate, $10.50. No. 1 candled, good cases, free from rots, small, dirties and checks out, per dozen, 38c; fancy storage eggs, dozen, 30c; seconds, small, dirty and held stock, rots and leakers out, per dozen, 18c; checks, rots and leakers out, per doz., 17c. Quotations on eggs include cases.

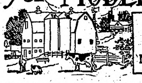
Old Fashioned Rice Pudding.

The following recipe for old fashioned rice pudding is given out by faculty women of the division of home economics, University of Minnesota:

Milk, 1 qt., Rice, ⅓ cup, ½ tsp., Sugar, ⅓ cup, Nutmeg, ¼ tsp., Raisins, ½ cup.

Wash rice, put all ingredients into an oiled baking dish. Bake in a slow oven three to four hours. Add raisins one-half hour before baking is completed. Stir occasionally.

PERTINENT POINTERS for MODERN FARMERS



Prepared Under Direction of North Dakota Agricultural College

USE GREAT CARE IN CULLING YOUR FLOCK

(By O. A. Barton)

There has been a large amount of poultry culling done in North Dakota during the last few months and thousands of hens have been discarded as culls and sent to market. There is no doubt but that many mistakes have been made and some damage done along with the many benefits of these mistakes.

Culling is a comparatively simple process, when done at the right time an din the right way, but there is a tendency to place too much emphasis on some one of the many indications of poor production and convict the hen on too little evidence. It is not safe to cull a hen just because she is moulting in August or September, or at any other particular time, or because she is not laying in the fall of the year or at any particular time; nor even because the pelvic bones are close together or just because she is an old hen. In fact, there is no doubt but that some of the best hens for breeding purposes have been culled out just because they were not laying at the particular time the culling was done, or because they were old, or because of some other indication of low production. Several times I have gone to produce houses and selected good hens from crates of culls which had been shipped in for market. Someone was placing too much emphasis on some one indication and not considering the whole hen.

To illustrate further—one old White Rock hen at the college finished her fourth laying year on November 26 with a record of 152 eggs. She was not laying between September 15 and October 15, and, being an old hen, might easily have been discarded at that time by careless culling. But she came back in November with 16 eggs for the month. An old Barred Rock hen which laid over 100 eggs from May to December first was not laying in November and might have been culled on the same basis. These are the hens we want to breed from, and it is a decided loss to cull hens of their type. We must be careful and consider the whole hen.

Another difficulty is the culling too late in the fall, for it is much more difficult to do a good job and be fair to the flock. Vitality, depth of body, width of back, thinness and straightness of pelvic bones, general body conformation and head parts are all important points and must be considered if we are to secure best results.

Pullets are difficult to cull before they begin to lay, and it is not advisable to attempt culling them other than to eliminate sickly, low vitality, slow or underdeveloped individuals, and even then we must be careful to make allowance for possible poor feeding and poor care for we must remember that there are two kinds of culls—those naturally culls and those which are culls because of the food and care given them.

I do not wish to underestimate the value of culling but I do wish to emphasize the importance and necessity of exercising greater care and discretion in culling. Give old biddy a fair chance to make good before culling her. General body conformation must not be overlooked. The process of culling is comparatively new in North Dakota—let us all be careful in the work.

The poultry department at the Agricultural college will be glad to get any information from any individual in the state who has culled his own flock—as to the breed of chicken kept, the size of flock, the number eliminated and the effect on production, egg records, etc. We are interested in data from farm flocks, and town flocks as well, and will be glad to get any definite data.

Who has the best laying flock in North Dakota? What breed has he? How does he feed them? How are they housed? It is not a question of greater total production but a question of a more economical production, of a better quality of market production, which will increase the profits.

He who would look with contempt upon the farmer's pursuit is not worthy the name of a man.—Beecher.

The squirrels have laid in a supply of nuts for winter. Not all humans know what's good as well as squirrels do.

CONTROLLING BLACK ROT IN POTATOES

(By Dr. Wanda Weniger)

The common name of blackleg has been for some time applied to a disease of potatoes, taken from the appearance of attacked plants in the field. Since the same name is applied to a disease of animals, and the two are not identical, it would seem better to call the trouble of potatoes "black rot" or "black stem and tuber rot." Plants which show a distinct blackening of the stem are also undersized, unthrifty looking, pale green or yellow in color, with their leaves and branches tending to grow upward instead of spreading out normally. If the disease works rapidly, the plant may fall over or wilt.

Black rot of stems rarely appears in patches in a field, but rather the attacked plants are scattered over the entire field. Five or fifty per cent of the stand may be found attacked. The black area on the stems is several inches long, extending from the seed piece to a short distance above ground, and is inky black and slimy, especially in a wet season. The stem may be hollowed and some of the larger branches, especially when the plant is attacked slowly, may also be blackened and hollow Some plants are attacked very early and never get to be more than a few inches tall. These die quickly and do not set tubers. The disease spreads from the seed piece upward, and then to the growing tubers. The seed piece rots away completely, and the tubers frequently rot entirely. When attacked slowly, a plant may produce tubers of a fair size which are rotted only slightly near the stem end Such tubers are hard to distinguish from healthy ones.

The rot of the tuber is inky black, wet, soft, and slimy, with a characteristic foul odor. Such tubers are rotted long before harvest. Some may be rather sound at the surface, but when handled, break open and disclose a slimy mass of black pulp. It is from such tubers that the rot is quickly spread to healthy tubers by contact in the bin, particularly when the bin is warm and moist. Tubers which show only a slight rotted area at the stem may be thought to be infected by Fusarium wilt. Tubers received during the past few months at the plant pathology laboratory of the experiment station have been found to carry a large percentage of blackleg infection at the stem end. Such tubers show a small discoloration of either yellowish or brownish tinge, appearing much like the infection which growers have learned to recognize as Fusarium wilt infection. In many cases, also, tubers have been found to carry both wilt and blackleg infection. These studies emphasize the necessity of stem ending seed tubers and of careful selection and treating to control disease.

A CORN ACROSTIC.

(By H. L. Walster, Agronomist, North Dakota Agricultural College)

C—ultivated crop
O—ffer livestock
R—esists
N—eeded for
overcomes weeds
prepares seed bed
dry roughage
carbohydrates
disease
drought
silage
"hogging" down.
"A clean corn field is crop insurance."

SEED CORN.

Why, When, How, and Where, to Obtain Seed Corn.

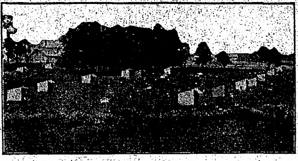
well ventilated
heated
place.
O—ur home grown seed is best.
R—un a germination test before planting.
N—eeds grading to insure uniform planting.

"The corn field is an expensive seed tester."—J. C. Hackleman.

Quality first, price second; this is a good rule when buying seed—or anything else.

FOR BEST RESULTS IN PRODUCING EGGS HENS NEED MUCH EXERCISE



Chickens on Range at Beltsville Government Farm.

(Prepared by the United States Department of Agriculture.)

Good results in egg production cannot be obtained when the flock is confined during the entire year, according to tests that have been made by the United States Department of Agriculture. The department has kept a pen of 50 Rhode Island Red pullets and one of 50 White Leghorn pullets confined in poultry houses throughout the year, giving them a good variety of feed, including sprouted oats and alfalfa meal, the latter being used in the mash. These trials have extended over three years and the result has always been the same—lower egg production and excessive mortality.

The Leghorns stood the confinement much better than the Rhode Island Reds, but even in this case the production was too low to be profitable. In the different years the pens averaged from 98 to 108 eggs per hen, while the other hens on the farm, given good yards or free range, produced from 125 to 160 eggs.

Freedom for Hens.

The hens that were confined to the house produced well during the winter months, but in the spring the yield was only fair and during the summer production almost ceased. Many poultrymen keep hens used for egg production confined during the winter months, and this practice is satisfactory if the hens are not used for breeding. Hens kept as breeding stock should be given as much freedom as possible, and it is the policy of the department to let their hens out every day regardless of the weather.

In these flocks that were kept penned up during the entire year there was a death rate of almost 50 per cent in the case of the Rhode Island Reds, and 25 per cent in the Leghorn flock. Most of this loss occurred during the summer and fall months. Normal mortality in good-sized flocks kept in yards or given free range averages about 10 per cent, according to the department's experience. The mortality is usually higher with general-purpose breeds than with the Leghorns.

Yard Space for Hens.

There is no definite amount of yard space that must be supplied for hens, but the larger the yard the better. More hens can be kept on a certain space on light, sandy soil than on heavy soil because the light soil is more easily cleansed by rain and sunshine. Where only small space is available it is advisable to use the double-yard system so that one yard can be used in growing a crop while the other is used for the poultry. Alternating the use of these two yards for the hens keeps the soil in good condition and does not endanger the health of the hens.

Hints for Pruning

1. Proper pruning gives more and better fruit.
2. It costs less to spray and pick a well pruned tree.
3. All varieties are not pruned alike.
4. Heavy pruning tends to increase wood growth, and may be used to rejuvenate a run-down tree.
5. Light pruning tends to increase fruit production.
6. The growing habit of a tree varies with age.
7. Watersprouts are usually the result of heavy pruning. Those sprouts near the base of the scaffold limbs may be tipped back and caused to produce fruit.
8. A limb grows more from the tip buds than from the lateral buds.
9. Fruit may be thinned by pruning.
10. Pruning wounds need to be painted in Quebec.
11. Keep the top of tree somewhat open. Light helps to make extra fancy fruit.
12. If the buds on your peach trees have been killed and the fruiting wood is in the upper third of the top "dehorn" your trees back heavily to limbs one inch in diameter.
13. Learn the principles of pruning, the details will vary with the tree.
14. Common sense and good judgment will help a great deal.

POTATOES WITH BLACKHEART

Causes of Development of Dark Brown Areas Are Overheating and Insufficient Air.

Overheating and insufficient ventilation are often the causes of the development of dark brown or black areas in the center of potatoes, commonly known as blackheart. Even potatoes stored in pits out of doors frequently develop blackheart because of lack of ventilation. Potatoes shipped long distances in cold weather may also be affected if a car becomes overheated. University Farm potato men say this disease and others peculiar to the storage season can be avoided by handling and storing the tubers under proper conditions. Ask the Office of Publications, University Farm, St. Paul, for pamphlets on storing.

Fertilizer for Pasture.

Pastures receive most of the droppings from live stock during the summer months and may not for that reason be in as great need of the manure as corn and small grain fields.

PRUNE FOR APPLE DISEASES

Blighted Limbs and Cankers, Fruitful Source of Infection, Can Be Removed in Winter.

Blighted limbs and cankers, which may cause the death of the tree and are a fruitful source of further disease infection in the apple orchard, may be easily detected and removed during the dormant period.

Twigs killed by fire blight may be recognized by the dead leaves which cling throughout the winter season. Cankers due to fire blight, black rot and blister canker, can be most easily discovered at this time. Twigs primarily killed by fire blight may bear a secondary invasion of black rot. Such sources of infection are always a cause of loss and danger to the orchard unless removed and burned.

Such varieties as Rome Beauty, Yellow Transparent, Jonathan, Northern Spy, Rambo, Early Harvest and Greening are very susceptible to fire blight and black rot.

Chinch Bugs Are Harmful.

Chinch bugs destroy or greatly reduce the yield of corn, barley, spring wheat, oats, millet, winter wheat, rye, broom corn, sorghum, and other grass crops.

Keep Trees Cultivated.

Keep the young trees cultivated. After three or four years put them down in clover if you wish, but don't make a hog lot or sheep pasture out of your orchard.

Good Time for Pruning.

If time hangs heavily on your hands in winter, prune the fruit trees.

Horse Stable Neglected.

It is strange but true that many a man who carefully covers the radiator of the family car with a blanket, never thinks to stop those cracks in the wall of the horse stable.

Value of Farm Animals.

Farm manure is a valuable fertilizer, but unless animals are valuable for their main products, it is doubtful economy to keep them for the manure alone.

Pumpkin seed to the amount of 119,800 pounds was raised commercially on 772 acres in 1922, according to reports reaching the United States Department of Agriculture.

Make Farming Profitable.

Purebred sires and purebred seeds help to make farming profitable.

Spray Fruit Trees.

Spray fruit trees with liquid lime-sulphur for San Jose scale.

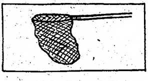
Plenty of exercise for the hen increases the egg yield.

POULTRY

LONG-HANDLED NET IS HANDY

Matter of Capturing Chicken for Family Dinner Made Easy With Device Illustrated.

Who has not seen the farmer, his wife, the hired man and one or more children engaged in the exciting chase for the chicken which is to be served for the family dinner. All around the yard, over the fence, under the barn, through the garden, until somebody luckily falls upon it. An easier way is to make a long-handled net, using a sound, well-made barrel hoop. An old hammock makes a fine net for this purpose. The net should be about two feet deep. Lay it down, mouth up, put a few grains of corn on top, pretend you are looking the other way, and when a chicken steps on the net to pick out the corn, lift up suddenly, tip it slightly to one side, and you have the fowl safe. If you are particularly expert the net may be dropped down over the bird.



Handy Chicken Net.

HEAD LICE INJURE TURKEYS

Grayish White Louse Is Most Serious of All Parasites—Melted Lard Kills Parasites.

Turkeys, ducks and geese are more easily killed by the head lice than are other kinds of farm fowls. The lice are only one of the six or eight forms which bother poultry, but a single head louse has been known to kill a turkey. It is a grayish white louse, and the most serious of them all.

For treatment, dip the tip of the finger in melted lard and rub this well around the comb. Dip again and rub back of the ear, repeating for the other ear, the bill and jaw. This does not give the head a greasy appearance, but is enough to destroy the lice. A few drops of kerosene, carbolic acid or stock dip may be added to the lard, to make it more effective. The bird should be kept in a warm place for a couple of hours after this treatment has been given.

LIME SUPPLY FOR CHICKENS

Experiments Have Demonstrated That Other Minerals Will Not Take Its Place.

Feeding experiments with poultry conducted over a number of years in which an effort was made to substitute other mineral elements for lime in the ration are said to have demonstrated that other minerals will not take the place of lime and that if this element is lacking in the food the demands of the body will be met by drawing on the lime stored up in the bones and muscles of the fowl. It was also found that both lime and phosphorus are more easily taken from the bones of the living animal than from dead bone ash fed to the animal.

CURE FEATHER EATING HABIT

Indication That Fowls Are After Certain Classes of Foods They Are Not Getting.

The reason that fowls eat feathers is due to the fact that they are after certain classes of foods which they need but are not getting. This class of food is represented by any form of milk, tankage, meat scraps, cottonseed meal, peanut meal, or alfalfa pasturage. If one or more of the above feeds are furnished them in sufficient quantities they will get over this habit.

POULTRY NOTES

Good warm wheat makes a nice breakfast for the biddies.

* * *

When whole corn is fed it is best to let the flock have it for the evening meal.

* * *

Use a little more clean litter on the floors. Keep the fowls hard at work. It is a form of health insurance.

* * *

The fancy poultry business pays well but good judgment must be exercised

HIGH SCHOOL DEBATE PROVES INTERESTING

Herbert Nelson Presides in Absence of Regular President.

A debate of unusual merit took place in the High School assembly room last Friday afternoon, the occasion being the monthly meeting of the High School Literary Society.

The meeting was called to order by Herbert Nelson, vice president, who presided in the place of President Ruby Thompson, who took part in the debate. Mr. Nelson requested that the roll be called, but it was discovered that the secretary did not possess the names of the members.

Mr. Nelson then announced that the debate would take place at once. He further informed the audience that the debaters for the affirmative were Eunice Tvedt and Harry McDonald and for the negative Angeline Svobodny and Ruby Thompson.

Miss Tvedt was then given the floor and the debate begun. The question, "Are the Movies Harmful to the Youth of America, or Are They Not?" Miss Tvedt gave a very fluent and in an altogether forceful manner pointed out that bad effects of moving pictures on the minds of the growing generation.

Ruby Thompson, of the negative, was next to appear. She maintained that the movies were not harmful, but educational, and that the attendance of children at moving picture shows should not be discouraged, if the pictures shown were of the proper kind.

Miss Tvedt's colleague, Harry McDonald, took the floor next. He endeavored to disprove the arguments offered by Miss Thompson and also gave more reasons why moving pictures were harmful to American youth in this day.

Miss Angeline Svobodny, Miss Thompson's colleague, took the floor and endeavored to disprove the arguments of McDonald and also added a few arguments in favor of the negative.

Miss Tvedt, in giving her rebuttal, attempted to disprove the points given by Miss Thompson. This ended the debate and the president announced that the decision of the judges would be heard. They judges were Mrs. Fore, Miss Ihle and Mr. Erickson, and they rendered a decision of two to one in favor of the negative.

Receives Contract for Hauling Ice from River

The board of directors of the Goodridge Co-Operative Creamery met Saturday afternoon for the purpose of examining all bids for the filling of the ice house. The bid was let to Andy Swanson of Highlanding. A total of about 80 tons will be stored for summer usage.

Daniel Payne returned on Monday morning to his teaching duties at Esplee after spending the week-end at his home.

LUTHER LEAGUE HAS GOOD MEETING

Splendid Program Delivered Before Enthusiastic Audience.

The Luther League of the Norwegian Lutheran Church held its semimonthly meeting Wednesday evening. Despite the inclement weather conditions, an excellent crowd was in attendance, who no doubt felt repaid for their efforts in being in attendance.

An exceptionally fine program was delivered and rendered in a very pronounced manner, especially the educational readings and singing was enjoyed to their fullest extent. The following is the program:

Song, Luther League; scripture reading and prayer, Rev. V. O. Aaker; song, choir; reading, Stuart Ferdinandsen; duet, Hazel and Eunice Thorson; reading, Esther Ronken; duet, Myrtle Iverson and Mrs. Inez Everhart; reading, Hazel Aarness; song, Luther League; minutes of previous meeting, by secretary; discourse, Rev. V. O. Aaker.

The usual business meeting followed with the following committees elected: Lunch committee, Mrs. Martin Olson and Mrs. Inez Everhart; program committee, Miss Minnie Lindbloom and Stuart Ferdinandsen; membership committee, Misses Thelma Gilbertson and Thilda Ihle.

As a conclusion to the delightful evening a tasty lunch was served.

FLAX STRAW MARKET IN GOODRIDGE IS STRONG

The flax stram market in Goodridge is booming. The buyers have already succeeded in purchasing quite a number of tons. This is undoubtedly because of the attractive price offered.

It is not often that the farme is enabled to sell his straw and those who have flax fiber for sale in the community are taking advantage of the situation in order that it might help to elevate the low situation in the region of their depressed purses.

The market price is $4 per ton. This unusual price on flax fiber has caused the eastern limits of the village to become populated with a conglomeration of stacks, some of which are so gigantic in appearance that they ultimately threaten to completely obliterate the horizon and even, were it possible, to pierce the very heavens themselves.

WORK FOR HOME TALENT PLAY IS PROGRESSING

The home talent play to be given under the auspices of the Community Club is making splendid progress. A committee to select a play and also the cast was named by the president of the Community Club. The committee is composed of Miss Minnie Lindbloom, Mrs. R. H. McDonald, E. J. Erickson and Joseph Christianson. A play hat been selected and if the characters to suit the various roles can be found, it will be given as soon as possible.

Watch the columns of The Banner for information.

LUTHERAN CHURCH.

(Missouri Synod)

Sunday, Jan. 21: German services at 10 A. M. Sunday school at 2 P. M. English services at 3 P. M. at Germantown. Sunday, Jan. 28: English services and Holy Communion at Big Grove at 10:30 A. M. and in Goodridge at 8 P. M. H. Lutz, pastor.

Mrs. Everhart Entertains Group of Friends Sunday

Mrs. Inez Everhart entertained 18 of her friends at her home Sunday afternoon. Games and singing furnished the entertainment throughout the afternoon. A delicious luncheon was then served as a conclusion to the enjoyable affair. The following were present: Misses Adeline Davids, Hilda Christianson, Eunice Tvedt, Sina Christianson, Thelma Gilbertson, Myrtle Iverson, Gretta Gulrud, Pearl Bergeson, Minnie Lindbloom, Lena Resan, Guida Gilbertson and Messrs. Elmer Resan, Maynard Halvorson, Alvin Halvorson, Daniel Payne, Harry E. Halvorson, Ellard Wiseth and Joseph Christianson.

KICKED BY HORSE.

Elmer Reson, a local young man had a narrow and lucky escape Monday morning when he was kicked by a horse. It appears that when the horse kicked it struck the fork that Mr. Reson was using and this came between the horse's hoof and the young man's head. Although knocked unconcious, Mr. Reson is now entirely recovered.

Rev. and Mrs. Lutz Entertain.

Mr. and Mrs. Jay Payne and Mr. and Mrs. Nick Bundhund were delightfully entertained at supper at the Lutz parsonage Saturday evening.

Local News

L. C. Streuber of Grygla was a visitor in our village Tuesday.

Alfred Anderson was a Thief River Falls visitor Saturday.

Will Pittman, a farmer residing north of town, transacted business with local business places Saturday.

Mr. and Mrs. Nels Aarness and daughter, Hazel, of Kratka, were dinner guests at the Otis Ronken home Sunday.

Mr. and Mrs. John raa returned to their home in Reiner township Wednesday of last week after visiting during Christmas at McIntosh, Minn.

Mrs. Guy Potter returned Tuesday from Wisconsin Rapids, Wis., where she has been visiting. She continued on to her home near Shelley.

Miss Betsy Fjeld and brother, Henry, returned to their high school duties Monday after spending the week-end at their home near Erie.

Mrs. G. A. Gilbertson and two children of Germantown left Tuesday for Sherron, N. D., where Mrs. Gilbertson was called by the death of her mother.

John Kusmack Jr. arrived home on Wednesday of last week from Lakefield, Minn., where he is employed, to spend a short time visiting at his parental home east of town.

Mrs. A. Miller of Thief River Falls returned Friday evening to her home after visiting a few days at the Carl Edseth home. Mrs. Miller was at one time a resident of Goodridge.

Miss Carrie Urdahl returned to her home Thursday evening after having visited her sister and brother-in-law, Mr. and Mrs. Ole Prestebak at Thorhult.

Knute Hagan of Middle River was a visitor among friends here Friday. Mr. Hagan recently moved his family and belongings to Middle River, up to that time being a farmer west of the village.

Two Business Transfers Consummated in Week

Two deals have been made in Goodridge the last few days which have involved the transfer of business property. Bert Tanem, proprietor of the local pool hall disposed of his property to Edmund Reopelle of Red Lake Falls, who took immediate possession.

The second deal was made when Sever Anderson, local shoe cobbler and harness-maker, purchased the grocery store of H. R. Leslin, who recently started his business here. The citizens of Goodridge and surrounding country wish the buyers the best of luck in their new business ventures.

HOME BURNS.

Tuesday evening the home of A. Omar, a farmer living north of Goodridge, was entirely demolihed by fire. The origin of the blaze is not known as Mr. Omar was the only person on the premises at the time, and he was engaged with work in the barn and did not notice the fire until the house was a mass of flames. This is a very unfortunate occurrence at this time as all of Mr. Omar's clothes and belongings were destroyed.

ANNUAL MEETING.

The annual meeting of the Goodridge Co-Operative Creamery Association will be held on Saturday, February 3, in the Goodridge schoolhouse, at 1 o'clock P. M. sharp.

STUART McLEOD,
Secretary.

Richard Prestebak of Thief River Falls was a Goodridge visitor Tuesday.

FIREMEN'S MEETING IS JOVIAL AFFAIR

Fire Fighters Enjoy Oyster Supper at Stephenson Cafe Wednesday.

The members of the Goodridge fire department held their annual meeting Wednesday evening, January 10, at the Winton Nichols lumber yard. Due to the extremely stormy weather, only a small majority of the men turned out.

The business meeting and election was held and the following nominees was the result; G. C. Gulrud, first chief. Mr. Gulrud has served in this capacity ever since the organization of the local company and his re-election again this year no doubt shows that he has served in the capacity to the satisfaction of the people.

Carl Edseth was elected second chief; Anton Lien, first captain; Albert Halvorson, second captain; Nick Bundhund, treasurer; M. J. Stephenson, secretary.

After the installation of officers the firemen retired to the Stephenson cafe, where they enjoyed the annual repast of oysters and cigars and social evening of conversation.

LADIES' AID TO MEET.

Mrs. Anton Lien and Mrs. Martin Olson will entertain the Ladies' Aid at the church Wednesday, January 24th. Everyone is cordially invited to attend. The ladies are also urged not to forget the donations for the spring sale.

Fred Solie of Esplee was a shopper in our village Monday afternoon.

NEWS REVIEW OF CURRENT EVENTS

France Occupies the Ruhr District and Germany Offers Passive Resistance.

DECLARES TREATY VIOLATED

American Troops Recalled From the Rhineland—Near East Situation Relieved by Mutual Concessions—Deaths of Rabbi Hirsch and Former King Constantine.

By EDWARD W. PICKARD

> GERMANY asserts that France is making a great economic mistake in attempting to collect reparations payments by force. The English and many Americans agree with this view. The French, the Belgians and the Italians do not. What is your opinion?

FRANCE has made good her threat to occupy the Ruhr, the industrial heart of Germany, for the purpose of enforcing the payment of reparations. Belgium signifies her approval by sending a small body of troops across the Rhine, and Italy gives moral support. Great Britain stands aloof, frowningly. The United States government informally disapproves. Russia foresees another bloody war and menaces Poland in case that country should attack Germany in support of her ally, France.

Germany, indignant and sullen, has declared a "moral war" on France and Belgium; has adopted measures for passive resistance in the occupied region, and has asserted officially that the treaty of Versailles has been violated and she will make no further payments so long as force is being employed against her.

That, briefly, is the present situation, and before long the world will find out whether the German, British and American economists are right in their predictions that the course adopted by France is worse than futile and is likely to result in her own financial ruin; or whether the French are correct in their belief that the method they are pursuing is the only one left that will compel Germany to fulfill her promises and save France from bankruptcy.

PREMIER POINCARE formally notified Germany of France's intentions on Wednesday, and at 4:45 o'clock Thursday morning the advance guard of the French occupationary forces entered Essen. Everything had been prepared for the movement and cavalry, infantry, artillery, tanks and aviation forces poured steadily across the Rhine. In his note to Germany M. Poincare said:

"The French government declares it has no thought of proceeding at this moment with an operation of a military nature nor occupation of a political character; it simply sends into the Ruhr a mission of engineers and functionaries whose object is clearly defined. Its duty is to assure the respect by Germany of the obligations contained in the treaty of Versailles.

"It sends into the Ruhr only those troops necessary to safeguard the mission and guarantee the execution of its mandate. No disarrangement and no change, therefore, will be caused in the normal life of the population, which can continue at work in order and in calm. . . .

"The engineers and functionaries of this mission will have full powers to compel the administrative organs, chambers of commerce and employers', workmen's, industrial, commercial, etc., bodies to communicate to them all statistical or other information they think it useful to demand.

"They will have the right to circulate throughout the occupied territories, to enter offices, mines, factories, railroad stations, etc., and to consult there all bookkeeping and statistical documents.

"The personnel of the German administration and the representatives of industrial and commercial bodies must, under pain of severe punishment, put themselves at their entire disposition for the accomplishment of their work."

In the course of his note the premier said "the French government counts upon the good will of the German government and upon that of all authorities," but this of course was merely a diplomatic phrase. As a matter of fact the Germans announced that every difficulty possible would be placed in the way of the French engineers. The coal syndicate led the way by removing its headquarters and all its documents to Hamburg. The chambers of commerce of Essen and all other Ruhr towns followed suit by moving away. At this writing the attitude of the union workers in the district is uncertain, except that they decided to put on a brief strike of protest. If they refuse to get out coal and to operate the factories, France is prepared to carry on with French workmen.

Berlin's first response to the French action was the recall of the German ambassador to France and the German minister to Belgium, and it was believed complete severance of diplomatic relations would follow. Chancellor Cuno called the premiers of all the German states to a conference, and President Ebert proclaimed Sunday as a national day of mourning. For the first time in several years Germany presents practically a united front to its adversaries. The nationalists and socialists, even in Bavaria, have adopted a common policy of making the French position in the Ruhr unproductive and untenable. This unification may go far toward frustrating the French plans.

HAVING informally advised France against the steps she has taken, the American administration has done the only other thing it could do—it has ordered General Allen to bring home at once his "army of occupation" from the Rhineland. President Harding was asked to do this in a resolution adopted by the senate almost unanimously. There were only 1,200 American troops left in Coblenz, and their retention there or their recall was really only a matter of sentiment. The argument that if there was trouble between France and Germany the presence of the doughboys might involve the United States in renewed warfare was bunk. Most of the American soldiers there heard the recall order with deep regret, for they have been having a fine time in Coblenz, with good pay and plenty of beer and wine, and have endeared themselves to the people there. Moreover, their post in the Rhineland, according to General Pershing, has been an incomparable training school. However, they must now come home to harder work and aridity. The transport St. Mihiel has gone to bring the boys back.

SOVIET RUSSIA'S reaction to the news from western Europe is interesting. The official press declares that if war does not follow, France's action will eventually lead to more conflicts, "drowning humanity in blood and ruining what remains of European civilization after the World war." Which sounds queer coming from a gang of Bolsheviki who have drowned their own country in blood and brought it to the verge of utter ruin. As for Russia's intentions, here is what Trotzky, minister of war, said recently: "When France invades the Ruhr, France's ally, Poland, may decide to march with her to crush Germany. If such is the case, I doubt that Russia will refrain from taking part." Bolshevik interest in Germany is based on the belief of the Russians that Germany will be the next communist state.

MUTUAL concessions have relieved the strained situation in the Near East peace conference at Lausanne and today it appears probable that a satisfactory treaty will be negotiated. It is reported that a separate Anglo-Turkish accord has been reached on the Mosul question, England conceding Turkey's claim to territorial possession on that region while Turkey agrees that England shall have exclusive exploitation of the oil fields. This, if true, removes the chief obstacle to peace. The Turks have agreed that the Greek patriarch may remain in Constantinople if he abandons all political and administrative activities. It has practically been decided that some 400,000 Moslems now residing in the Hellenic peninsula shall be removed to Turkey, and that about 600,000 Christians now in Turkey shall be taken to Greek territory. This compulsory migration will entail great hardships, but the conferees believe it is necessary to the maintenance of peace in the Near East. The Greeks in Constantinople and the Moslems in western Thrace, it is understood, will not be disturbed. Much time was spent last week in trying to devise a formula for judicial guarantees for foreign residents in Turkey that would be acceptable to the Turks.

SENATOR REED of Missouri is making himself very prominent of late. His was the resolution calling for the recall of the American troops from Germany, and he followed it by urging that complete severance from "European entanglements" be achieved by the recall of Roland W. Boyden, our unofficial member of the reparations commission. On Wednesday Reed came forward again with a vigorous speech in support of his resolution requesting the President to open negotiations with the British and French governments looking to the acquisition by the United States of the British and French West Indies.

"We are getting our troops out of Europe," said Senator Reed. "Let us hope that we are getting ourselves out of European entanglements and European disputes and problems. I think this an exceedingly appropriate time to take a preliminary step looking toward the getting of foreign nations out of American waters and the removal of the guns of foreign nations from possessions where they command the passages of the sea which are vital to the commercial welfare of our country and doubly vital in case of hostilities."

London correspondents say there is reason to believe the British government might seriously consider such a transaction provided the white population of the islands approved.

STANLEY BALDWIN and Montagu C. Norman, Britain's debt refunding commissioners, have given the American commissioners solemn assurance that Great Britain intends to pay every penny of her debt to the United States, and also have submitted the facts and figures on which they base their plea for more liberal terms than were fixed by congress—full payment in 25 years at not less than 4¼ per cent interest. It now appears almost certain that this request will be granted. The American commission will soon make a recommendation to the President, who will submit it to congress for approval or disapproval. Mr. Harding is convinced "that the funding of the debts of any foreign country to the United States is impossible without a modification of restrictions in the law creating the debt-funding commission," according to a statement from the White House. Such a modification would mean the granting of easier terms.

EMIL G. HIRSCH, for 43 years pastor of Sinai congregation in Chicago, is dead. He was perhaps the most eloquent Jewish pulpit orator in America and one of the most eminent scholars of his race. More than that, he was a foremost figure in all movements for civic betterment. The influence of his work was felt throughout the nation and he is mourned by Jew and Gentile alike.

Constantine, deposed king of Greece, died Thursday in his place of exile, Palermo, Sicily. His demise was unexpected, resulting from a cerebral hemorrhage. Thus a stormy career came to an end. In nine years he sat upon the throne of Greece twice and twice was forced to abdicate. The first time he was driven out because of his pro-German attitude during the war. He was recalled in 1920 after the death of his son, King Alexander, and deposed the second time last autumn because of the disaster to the Greek armies in Asia Minor.

News of Minnesota

EVENTS of the week throughout the "State of Ten Thousand Lakes" told in brief form

Minneapolis — President Harding probably will be in Minneapolis in June to attend the third annual convention of Disabled American Veterans of the World War.

Owatonna—Building improvements in Owatonna in 1922 reached a total of at least $500,000, according to a recapitulation of the year's building activities made here.

Duluth—The city of Duluth has started an action in district court to recover approximately $42,000 from the Duluth Street Railway company for paving between streetcar tracks.

Winona—Organization of a rotary club in Winona is practically completed. Norman Black of Fargo, district governor, outlined the purposes of the club at an organization meeting.

Minneapolis—Curtis L. Johnson of Rush City, hardware dealer, and member of the governing board of the Minnesota State agriculture society, was elected president of the society, at the close of its annual meeting.

Red Wing—The bank of Maiden Rock, known as the Carpenter bank, was broken into and the vault door broken, but the big money safe was unmolested.

Lewiston—Miss Cora Crooke, poultry specialist with the Minnesota university extension division, announces that the community surrounding Lewiston has been selected as one of the 10 poultry demonstration centers of the state.

St. Paul—St. Thomas' hopes for a championship basketball squad were given a severe jolt Tuesday when Coach Brandy announced that Mike Glenn, one of the big cogs in last year's machine, would not be able to play this season.

St. Paul—Governor J. A. O. Preus of Minnesota is on the program for the third tristate congress here, Jan. 18 and 19. Governor Preus is to make an address on "Benefits of the Great Lakes Waterway to the Cutover Regions," on the first day of the sessions.

Erskine—Citizens of this town, at a mass meeting, decided to build a community hall as a memorial to Erskine men who served in the World war. Of the amount needed $400 already has been collected and committees have been named to solicit the necessary funds.

Owatonna—The Steel county child welfare board will continue its work throughout the county in spite of the withdrawal of the support of the county commissioners in providing a paid executive secretary. This decision was made at the annual meeting of the board here.

Grand Rapids—Old potatoes which were sold by a grower at Grand Rapids for 21 cents a bushel brought as high as $12 a bushel, masquerading as "Florida New Potatoes" on the Minneapolis market in the holiday season, John H. Hay, deputy commissioner of agriculture, charged after an investigation.

Minneapolis—J. F. Reed, a Lac qui Parle farmer, whom Minnesota producers "yanked from a corn cultivator" a year ago to be president of the Minnesota Farm Bureau Federation, was unanimously re-elected at the fourth annual meeting of the association, held at St. Paul.

Duluth—Juvenile delinquency in St. Louis county decreased in the last year, according to the annual report of F. E. Resche, Duluth probation officer. One hundred and eighty-five children were brought before the juvenile court in 1922 compared with 220 in the previous year. Of these, 167 were boys and 18 were girls.

Cloquet—Peter Olesen, husband of Anna Dickie Olesen, the first woman candidate for the United States senate, who was defeated at the recent general election, announced he had resigned as superintendent of the schools here. Mr. Olesen said it was his plan to move from Cloquet to some small town near the twin cities or to either Minneapolis or St. Paul, so that his daughter would have access to the university.

Rochester—For the first time since 1854 the village of Marion, once the most ambitious town in Olmsted county, has no place of business. Earl Yates, who of late has been conducting a store there, has closed up his affairs and ceased operation. This probably marks the last act in the drama of civic progress in Marion village.

Ortonville—Through motorbus service between Ortonville and Sioux Falls, S. D., has been inaugurated.

Windom—That Trunk Highway No. 16, between this city and Fulda, will be constructed this summer is now an assured fact.

Hibbing—Musically inclined thieves, evidently devotees of jazz, stole saxophones, trumpets and $100 in cash from the Evans Melody Mart.

Red Wing—Mr. and Mrs. John Pfluger celebrated their golden wedding anniversary at their home here. Their seven children were present, with 22 grandchildren.

Winona—The first woman to be elected to office in a Winona banking institution assumed her position when Miss Goldie Harrington became assistant secretary of the Deposit Trust Savings bank.

Chatfield—Resumption of pre-war train service on the Chatfield branch of the Chicago & North Western railway was announced after many unsuccessful efforts by citizens for better train service.

Owatonna—The major building project begun during the past year included a new $200,000 home office building for the Minnesota Implement Mutual Fire Insurance company and the new National Guard armory.

Minneapolis—Fire fed by oils and chemicals, raged for two hours in a three story brick structure at Ninth street and Nicollet avenue, wiping out or badly damaging 14 stores, causing a loss estimated at $125,000.

Albert Lea—Masons here believe Albert Lea has more past masters of the Masonic lodge than any other city of its size in the northwest. Western Star lodge has 14 living past masters, nine of whom live in Albert Lea.

Waseca—Former Sheriff Bernard Fischer has appealed to the state supreme court from the decision of Judge Arthur B. Childress following the recount of ballots cast for sheriff at the Waseca county election.

Hibbing—Despite the heavy snows of last month, peat fires are still burning in the outlying districts, and an attempt is being made to extinguish the fires before the snow leaves the ground.

Eveleth—Russell O. Smith, age 9, is recovering at a hospital from a fractured skull received when a lamp post, broken off when a speeding truck struck it, felled him.

Red Wing—Thomas E. Boyden was sentenced to St. Cloud by Judge Albert Johnson for a term not to exceed two years, after he had pleaded guilty to a charge of forgery.

Fairmont—A special grand jury has been called to consider the case against Clarence C. Hamblen of Ceylon, confessed slayer of his wife by poisoning her while she lay ill on October 9.

Slayton—At a meeting of the Town and Country club here the matter of tuberculosis among cattle was fully discussed. It was shown that the percentage of infection in Murray county was 11.9 per cent, the largest of any county in the state.

Alexandria—Albert Hansvick, fourteen years old was shot and almost instantly killed by his elder brother, Jalmar, when a Winchester rifle in the hands of Jalmar was accidentally discharged. The accident happened in the kitchen of the family home.

Mankato—It is improbable that citizens of Mankato will take an active part in concerted effort of towns along State Highway No. 60, from this city to Faribault, to have the state highway department pave the road, according to officials of the Civic and Commerce association.

St. Paul—A plan to market potatoes on a co-operative basis outlined at the old Capitol, St. Paul, at a conference of marketing directors and agricultural commissioners of the seven potato producing states of the Northwest. These states produce 34 per cent of all the potatoes in the country.

Brainerd—Judge W. S. McClenahan of the district court has granted a temporary injunction restraining the county commissioners of Aitkin county from entering into a contract of $138,881 to build a new courthouse in Aitkin. The plaintiff alleges that the county cannot build when no bonds had been voted and when not enough funds had accumulated to pay for the structure.

Crookston—"Old Bill" Anderson has started on his 20th year of incarceration in the Polk county jail, on a charge of vagrancy. Sheriffs and jailers, policemen and judges have come and gone, but Anderson has been regarded as a permanent fixture of the bastile. Every three months "Old Bill" shows up in municipal court to plead guilty to vagrancy and has been regularly sentenced to 90 days in jail.

Mankato—Prizes offered by the Hubard Milling company of this city, for the best acre of Marquis wheat raised in Blue Earth county or adjoining territory, have been awarded. Following are the winners: Clarence Pohl, first prize of $50 for an acre of wheat which yielded 22 bushels and 59 pounds; C. E. Whitney, of Mapleton, with 20 bushels and 41 pounds an acre, second, $30; A. D. Stanford of Mankato township, 17 bushels and 6 pounds to the acre, third, $20.

Red Wing—A man giving his name as D. E. Russell, whom no one here knew, walked away with $98 by turning quick tricks at two banks. At the Goodhue County National bank, Mr. Russell deposited a check for $264, saying he wanted $200 of it credited to him on a savings account, taking the balance in cash. At the First National bank he deposited a check for $234, taking $34 in cash and asking that $200 be placed in the savings bank. Both checks were made out on blanks of Adams, Seaton & Co. of La Crosse, Wis. Both checks were worthless.

Crookston—C. H. Grist, member of the Chicago Retail Merchants association was the principal speaker at a weekly meeting of the Crookston Association of Public Affairs.

St. Paul—After three years as president of the St. Paul Trades and Labor assembly, William Mahoney will retire from active leadership of the organization.

Granite Falls—Rev. O. J. Kvale, who was elected in the November election to succeed Congressman A. J. Volstead has resigned as pastor of Our Savior's church at Benson, effective July 1, 1923.

WOMAN SUFFERED THREE MONTHS

Pains in Back and Nervousness Made Well by Lydia E. Pinkham's Vegetable Compound

Montevideo, Minn.—"I suffered for three months with pain in my back and sides, and was awful nervous so that I was unfit to do my work. After I began taking Lydia E. Pinkham's Vegetable Compound I grew strong, and now I weigh 150 pounds. I keep house and am able to lift and do any kind of work. I have got wonderful results from the Vegetable Compound and recommend it very highly to my friends. I give you permission to publish my testimonial."—Mrs. OLE BERGSTROM, 210 8th St. So., Montevideo, Minnesota.

Another Nervous Woman Finds Relief

Port Huron, Mich.—"I suffered for two years with pains in my side, and if I worked very much I was nervous and just as tired in the morning as when I went to bed. I was sleepy all the day and didn't feel like doing anything, and was so nervous I would bite my finger nails. One of my friends told me about Lydia E. Pinkham's Vegetable Compound, and it helped me so much that I soon felt fine."—Mrs. CHARLES BEELER, 1910 Elk Street, Port Huron, Mich.

AS SURE AS DAWN BRINGS A NEW DAY

HILL'S CASCARA QUININE BROMIDE

AT ALL DRUG STORES Will Break That Cold and Make You Fit Tomorrow PRICE 30 CENTS

W. H. HILL CO., DETROIT.

Better Not.

Stephen Fullen, a familiar figure about the courthouse, tells a story about his niece, six years old, relates the Indianapolis Star. The niece was busily engaged memorizing a Christmas poem, aided by her proud relatives. One line of the poem went something like this:

"Old Santa comes speeding o'er the snow—"

"He'll get arrested if he don't watch out, for speeding," interrupted the little girl.

After the laughter of her admirers had quieted she suddenly spoke up.

"But Lew Shank better not arrest Santa Claus if he knows what's good for him."

DYED HER SKIRT, DRESS, SWEATER AND DRAPERIES WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her worn, shabby dresses, skirts, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is sure because Diamond Dyes are guaranteed not to spot, fade, streak, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.—Advertisement.

Motor Cars in Belfast.

The 10,000 cars in the city of Belfast show that there are more cars in this city than in any other in the United Kingdom of the same size and commercial importance. Within the past nine months, 1,246 motor vehicles have been registered. The wholesale price of petrol is, however, higher than in some parts of the United Kingdom Vice Consul George H. Barringer reports to the Department of Commerce.

Cole's Carbolisalve Quickly Relieves and heals burning, itching and torturing skin diseases. It instantly stops the pain of burns. Heals without scars. 30c and 60c. Ask your druggist, or send 30c to The J. W. Cole Co., Rockford, Ill., for a package.—Advertisement.

Circulates Widely.

Mrs. Gaussip (quarreling)—I suppose you think what you say goes.

Husband—It does if you hear it.

Joseph A. Widmer

How's Your Blood? Do You Need a Tonic?

Helena, Mont.—"Dr. Pierce's Golden Medical Discovery has no equal as a blood tonic or as a liver and stomach medicine. I was in very bad physical condition, due to having liver trouble and gastric stomach condition. My food did not digest properly, would ferment, and gas would form, giving me great distress. I also suffered with severe bilious headaches and my blood was in an impoverished state. By the use of the 'Golden Medical Discovery' I was relieved of all these conditions which had caused me so much trouble and distress. My liver became active, my food digested well, my blood was good and I felt like a new man."—Joseph A. Widmer, 307 Hoback St.

Obtain the Discovery in tablets or liquid from your nearest druggist or send 10c for trial pkg. to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., and write for free medical advice.

Timely Comments on Agricultural Topics for Our Readers

DAIRY

TUBERCULOSIS TEST TABLETS

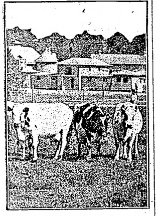
Perfection of an Apparatus Is Considered Big Aid in Campaign for Eradication.

(Prepared by the United States Department of Agriculture.)

The United States Department of Agriculture announces the perfection of an apparatus through the use of which tablets to be used in the ophthalmic test for tuberculosis in cattle may be manufactured in sufficient quantities to supply the demand. The material used in making these tablets takes up moisture from the air so readily that unless atmospheric conditions are ideal it is impossible to shape the material into tablets. In practice it was found possible to manufacture them during only about thirty days in the year, until the new apparatus was devised.

The ophthalmic test, while not official, has become very important in the fight against tuberculosis in cattle, and several million tablets are now needed annually to supply the demand. Under the former system of making them only when the humidity and temperature of the air permitted, it was impossible to keep up with the demand.

The apparatus, which was designed in the bureau of animal industry, consists of a specially constructed, closed chamber in which air is cooled and dried by having the moisture frozen out of it by circulating over brine coils. The air then passes over electric heating coils, which raise it to the proper temperature, without changing the moisture content. This air is then supplied to a working box, where the tablets are to be made. This box is arranged to admit the hands of the operator without opening it to the outside air, the temperature being regulated by means of a thermostat.



Dairy Herd Tested and Found Free From Tuberculosis.

The new device enables the department to make test tablets in sufficient numbers at any time of the year, regardless of atmospheric conditions, and is an aid in the nationwide campaign for the eradication of tuberculosis in cattle. This same means of regulating the relative humidity may be used in making other medicinal tablets than those used in the tuberculin tests.

EASY MATTER TO UNDERFEED

Cows Are Often Neglected During Winter Season When Feed Prices Are High.

During the winter months, with high-priced feeds, it is an easy matter to underfeed the cow. An animal will use so much feed for maintenance regardless of whether or not she produces any milk. If milk production is desired, she must be fed enough to produce it, above what is required for her maintenance. A thousand-pound cow needs 20 pounds of good corn silage and eight pounds of clover hay or its equivalent simply for body upkeep. If milk is expected, she must be fed above this amount to produce, the heavier producing animals requiring the most feed.

DECREASE IN FLOW OF MILK

Absence of Succulent Feed and Chilly Winds of Winter Are Chiefly Responsible.

The tendency on the part of the dairy cow to give a decreased flow of milk when cold weather approaches is due to natural causes. Absence of succulent feed, together with exposure to chilly winds, are often responsible for a sudden "drying off" in a cow's flow. This is why successful winter management of the dairy herd calls for rations of succulent feed, together with protection from the elements.

THE BREEDING, CARE AND FEEDING OF HOGS

(By George J. Baker)

Breed modern type hogs with lots of bone and quality. They should be long, high, deep, wide, smooth and with good arched backs.

Use a good modern type of boar, and keep him in a good comfortable place by himself. Give him plenty of exercise and keep him in good condition. Besides giving him some corn, be sure that he gets plenty of protein feed such as ground oats, middlings, alfalfa or clover hay, or tankage, especially during the breeding season.

Fush the sows, that is, make them gain in weight, two or three weeks before breeding.

Breed for March or April pigs, depending on the quarters you have for them. If you have a warm place for the pigs, where they may also get plenty of exercise, then March pigs are advised.

Be sure the brood sows have plenty of exercise during the winter. After the sows are flushed and you begin breeding, try to have them all bred within two or three weeks. Each sow may be marked by putting a notch in her hair with a pair of shears at the time she is being bred, then you will know exactly when to get ready for the young pigs. Give the sow and pigs special care and attention at farrowing time.

Provide good pasture, such as clover or alfalfa and get the sows and pigs on the pasture as soon as the season will permit, say, about the middle of April or the first of May.

Feed a little corn and ground oats or middlings to the sows right along and give the pigs access to the self feeder, containing corn meal about ten parts and tankage one part; when the pigs get a bit larger they may have whole corn. If possible, have a field of well matured corn to turn them into by September 1; at the same time allowing them to continue on the alfalfa pasture. If alfalfa pasture is short, feed some tankage. Hogs appreciate a few pumpkins, mangles, and the like. Rape pasture with the corn is also good. This will enable the hogs to get into shape for market before the cold weather sets in. The price also is usually good during September and early October. Try to have them weigh a trifle better than 200 pounds at that time.

Hogs should have access at all times to some mineral mixture such as the following: a handful of salt, thoroughly mixed with a quart of air slacked lime and a peck of ashes. Good drinking water is essential.

BREEDING, CARE, AND FEEDING OF BEEF CATTLE.

(By George J. Baker)

A good thick purebred herd bull should be in use. If the herd is a purebred herd the calves may be born at any time during the year, perhaps most of them in the spring. In case one plans on showing at fairs, the senior calves should be born shortly after September 1, and the junior calves shortly after the first of January. If the herd is a grade herd, and one is trying to cut down on equipment and labor, perhaps most of the calves should be born in the spring. The calves may run with the cows in the pasture but preferably, especially with purebreds, have the calves kept in a barn or shed with adjoining pasture where they may have water and grass and keep out of the intense heat of the sun. Allow the calves to nurse twice daily, and feed oats and cracked corn and all the hay they want. If grass is short, two to three pounds corn silage daily may be fed to each calf.

Unless feeding for baby beef, it is sufficient to simply keep the calves growing in good shape, weaning them at six or eight months of age, and then carrying them along with plenty of good feed to continue constant growth.

Provide good pasture for the cows and calves, such as clover, a mixture of timothy, alsike clover and bluegrass. Bromus makes a good pasture, though it is difficult to break up afterwards.

Do not turn out on to pasture in spring until the pasture gets a fair start if your area is at all limited. Provide the cattle other feed and roughage in the fall before the pasture gets too short. Do not let them run down in condition in the fall before you begin feeding them.

Give them free access to salt all the year around.

In winter feed legume hay, preferably alfalfa, corn fodder, and silage. If these are of good quality you will need but a small amount of grain except for the young calves, and the very heaviest milking beef cows. Use plenty of good drinking water.

Before you decide to paper that dingy room, try sweeping down the walls with a dry cloth. It may save you a papering bill.

USE CARE IN BUYING A DAIRY HERD BULL

(By Max Morgan)

In purchasing purebred bulls for the dairy herd there are three points to always consider: (1) the individuality of the animal; (2) the production records back of him; (3) will his calves be larger producers than their dams?

With dozens of purebred bulls standing in barns today there is no reason why one should purchase an off-type sire. During the past week nearly fifty purebred dairy sires were found on four farms, and they were not all good ones by a long way. Most of them were from untested dams, yet the price asked for them was ridiculous. With so many sires offered for sale there is no reason why anyone should purchase an animal that does not have production records behind him. It is a big-enough gamble if that little is known about him yet what chance does a farmer have to just purchase a dairy bull like he would a beef animal. It is a different subject and should be done only by those who understand dairy type, pedigrees, records and breeding. The sire should be a masculine, looking animal for his age, smoothly layed in shoulders with the spine standing higher than the shoulder blade. A straight top line filled in behind the shoulders, wide between the front legs, smooth and deep, big middle with spring of rib, strong across the loin, and especially must he have a straight long rump. That is, from hip bone to pin bone it should be long and level. The distance between pin bones should be wide. Sloping rumps is probably the most common fault found with bulls and also cows, which the average buyer does not understand. The "sloper" is seen on nearly every farm as it is inherited from one generation to another and can only be bred out by using good straight topped, level rumped bulls.

Attention has been called several times recently to farmers who have paid three to five hundred dollars for dairy sires out of untested cows. This is a mistake, for such animals with prices like that should have dams testing from four to five hundred pounds of butterfat. Buying a dairy sire is not like a beef sire. One must take time, look the animal over out of doors, see his dam and sire, see the calves he has sired. Talk with the herdsman, read his pedigree carefully, get the production records behind him, and don't let the seller mix you up by rattling off a line of pedigrees about him being a son to a daughter of a thirty pound sire. If a good animal is desired with good breeding and yearly records behind him, ask someone who knows the game to assist you. There is less chance to make a mistake and many dollars may be saved.

PLANTING TREES AND SHRUBS.

(By C. B. Waldron.)

In planning home grounds the principal objects to be attained are to provide shelter in the way of shade trees and shelter belts, to create a background and framework for the buildings by the proper placing of large trees, to tie the buildings to the landscape by appropriate planting about the foundation and to give the place individuality by the proper planting of the boundaries.

Since the most important object on the home grounds is the dwelling, the lawn in front is left unobstructed, so that the house may be brought into pleasing view against the planting at the sides and rear.

It is an axiom in landscape gardening that trees, shrubs, and flowers are not planted for their own sakes but because they help to create a good landscape picture. For this reason the shrubs and trees are not scattered over the landscape but are massed and grouped in the manner described for the sake of getting the best views.

Before any attempt is made at planting either home, school, or park grounds a careful plan should be made even though it may take several years before the planting plan is fully completed.

It is difficult to think of anything more essential than beautiful and comfortable surroundings for our homes and school grounds and for the places where communities gather for their public affairs.

The interest taken in this work by students at the North Dakota Agricultural college means that in the years to come there will be many beautiful bits of landscape in North Dakota. After the preliminary six weeks work in studying some of the home grounds in the city of Fargo and a series of lectures and textbook lessons, the students are just completing drawings of a number of landscape plans. These drawings include plans for city and country homes, the farmstead, school grounds, and a village park.

He is happiest, be he king or peasant who finds peace in his home.—Goethe.

RAPID PROGRESS IN SELECTING ROAD FOR FEDERAL-AID SYSTEM

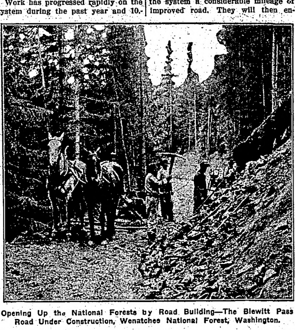
(Prepared by the United States Department of Agriculture.)

The selection of the roads to compose the system of federal-aid highways which will reach into practically every county in the United States is progressing rapidly, according to the bureau of public roads of the United States Department of Agriculture. State federal engineers have held numerous conferences during the past summer in all sections of the country.

Outline the System.

The system is being outlined in accordance with the requirements of the federal highway act of last November, which contemplates a system of highways to be built with federal-aid such as no other nation has ever possessed and which, once built, will be continuously maintained in serviceable condition. Eighteen feet will be the minimum width of roadway unless conditions justify a lesser width, and such cases must be given special approval. The system will consist of not more than 7 per cent of the total road mileage in any one state, not more than 3-7 of which will be primary or interstate highways, and the remainder secondary or inter-county highways. The total mileage of primary and secondary roads will be approximately 187,000 miles.

Work has progressed rapidly on the system during the past year and 10,000 miles of road have been completed in conjunction with federal-aid. These have been projects of such importance that there is no doubt as to their being included in the system as finally outlined.



Opening Up the National Forests by Road Building—The Blewitt Pass Road Under Construction, Wenatchee National Forest, Washington.

Approximate Mileage.

The following table gives the approximate mileage of the primary and secondary system in the various states. In 13 states the figures are based on the total mileage of highways in the state, while the remainder are based on the maps submitted.

	Mileage in Primary System	Mileage in Secondary System	Total Federal Aid System
Alabama	1,696	2,262	3,958
Arizona	642	856	1,498
Arkansas	2,158	2,879	5,037
California	2,015	2,432	4,447
Colorado	1,440	1,920	3,360
Connecticut	350	470	820
Delaware	115	151	266
Florida	1,127	833	2,960
Georgia	2,427	3,235	5,662
Idaho	1,163	1,609	2,772
Illinois	2,888	3,851	6,739
Indiana	2,128	2,838	4,966
Iowa	2,930	4,214	7,144
Kansas	3,216	3,384	6,600
Kentucky	1,370	1,880	3,250
Louisiana	1,200	1,600	2,800
Maine	492	834	1,326
Maryland	444	592	1,036
Massachusetts	553	737	1,290
Michigan	2,250	3,000	5,250
Minnesota	3,091	4,122	7,213
Mississippi	1,416	1,874	3,290
Missouri	3,345	4,461	7,806
Montana	2,000	2,700	4,700
Nebraska	2,408	3,211	5,619
Nevada	600	930	1,530
New Hampshire	293	707	1,000
New Jersey	513	685	1,198
New Mexico	1,390	1,867	3,257
New York	2,150	2,404	4,554
North Carolina	1,840	2,354	4,194
North Dakota	2,061	2,754	4,815
Ohio	1,690	2,315	4,005
Oklahoma	3,381	4,508	7,889
Oregon	1,177	1,628	2,805
Pennsylvania	2,700	3,600	6,300
Rhode Island	79	86	165
South Carolina	1,371	1,854	3,225
South Dakota	3,462	4,615	8,077
Tennessee	1,329	2,748	4,077
Texas	3,640	8,015	10,655
Utah	690	965	1,655
Vermont	444	599	1,043
Virginia	1,600	2,133	3,733
Washington	1,273	1,697	2,970
West Virginia	942	768	1,710
Wisconsin	2,364	3,152	5,516
Wyoming	1,288	1,946	3,234
Totals	71,492	98,079	187,406

From the present outlook it is thought that this program of road construction will cover a period of from 15 to 20 years. Many states will complete their mileage in a much shorter time as they have included in the system a considerable mileage of improved road. They will then enlarge the federal-aid system by including additional mileage.

When the system is complete the total improved road mileage of the country will be far greater than the 187,000 miles included in the system. How much greater it is hard to say, but in all of the states the system has been outlined, keeping in mind that state roads independent of federal-aid will connect with it.

WINTER PRUNING IS FAVORED

Particularly Advantageous to Peach Trees as It Stimulates Growth of Wood.

The pruning of orchards at this time of year is particularly advantageous to peaches. Winter pruning stimulates wood production. It may thin next year's crop, but it at the same time increases the fruiting area for the succeeding year.

Idle Horses.

Horses that are forced to remain idle may be fed a little more roughage than usual, with a saving to the feed bill.

BULLETINS ARE OF GREAT SERVICE

Oklahoma Farmers Save Much Money on Broom Corn Crop.

Weekly Reports of Quantities in Storage and General Market Conditions Served to Boost Prices Materially.

(Prepared by the United States Department of Agriculture.)

"We were glad to publish your bulletins that gave market conditions to farmers and saved the farmers from $50 to $100 per ton on their broom corn," the editor of an Oklahoma newspaper recently wrote the United States Department of Agriculture.

The bulletins referred to were weekly reports of the quantities of broom corn in storage, and of general market conditions, issued by the department's representatives in the broom corn territory. The reports indicated a shortage of stocks in northwestern Oklahoma and the farmers refused to sell at the low prices bid by speculators. The result was the sales of the crops at prices more in proportion with actual supply and demand conditions.

The Department of Agriculture now conducts a market news service on all leading agricultural commodities, including hay, grain, feed and seed, fruits and vegetables, live stock and meats, cotton, and dairy and poultry products. A corps of trained market reporters are located in the field and at large market centers to report conditions, and the information is immediately dispatched to farmers and the trade by mail, telegraph, the press, and radio.

"Know your market" is the department's slogan. Farmers are urged in their own interests to get in touch with the department so that they may get the full benefit of the market news service.

POULTRY

STRIVING FOR WINTER EGGS

Room, Warmth, Ventilation and Light Are Among Most Essential Factors With Hens.

The Missouri poultry house originally designed several years ago by the poultry department of the Missouri College of Agriculture, and now in general use in many states and in the Dominion of Canada, allows two and two-thirds square feet of floor space for each hen. One nest is provided for every six hens, and enough roosts are supplied to give each hen a reserved seat eight inches apart.

This extremely practical poultry house has a number of special features which have proved helpful in getting high winter production.

Light is admitted from all directions by means of six-light glass windows, two in front, two in each side and one in the rear. There are, therefore, no dark corners in this house. Since light comes in from all sides the hens scratch in all directions and the litter never piles up.

A 30-inch wire-covered opening, one foot from the floor and extending from each side of the door the entire width of the front, gives the Missouri poultry house good ventilation. During the winter the success of ventilation of this type depends upon having the east, west, and north sides and the roof entirely air-tight so that wind will drive into the house only a short distance and never back to the roosts which are on the north side. There is a gradual movement of the air from the inside out, thus insuring an abundance of ventilation without drafts.

The straw loft is another distinctive feature. Joists or collar beams are placed in the house just high enough to afford head room. In order to prevent the birds from roosting on these, they are covered with inch boards four inches wide, placed two inches apart. This forms a loft which is filled with straw. The straw acts as a sort of sponge by absorbing both dampness and heat and helps to keep the house drier and warmer in winter and cooler in summer.

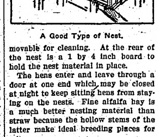
Using this poultry house, 238 demonstration farm flocks owners in 37 Missouri counties last year got 125 eggs per hen and a profit of $2.88 per hen.

Extension Circular 101, sent free by the Missouri Agricultural extension service, Columbia, Mo., gives plans, lumber bill and directions to enable anyone to build a poultry house of this type.

PRACTICAL NEST FOR HENS

Built of Good Quality of Lumber They Can Be Made Any Length Desired by Poultryman.

The nests shown in the accompanying picture are very practical. They are built of a good quality of lumber planed on both sides and can be made of any length desired. Individual nests are 14 inches square, 12 inches high in front and the front board is removable for cleaning. At the rear of the nest is a 1 by 4 inch board to hold the nest material in place.



A Good Type of Nest.

The hens enter and leave through a door at one end which may be closed at night to keep sitting hens from staying on the nests. Fine alfalfa hay is a much better nesting material than straw because the hollow stems of the latter make ideal breeding places for mites.

WATCH FOR ROUP SYMPTOMS

Listening in Hen House at Night for Deep Breathing or Rattle in Throat of Fowls.

Go into the hen house at night and listen diligently for a short while. It is a good way to detect a cold or the first symptoms of roup in the flock. Birds breathing hard or rattling in their throat should be taken off the roosts and carefully examined, and, if affected in any way, removed to a coop or apartment away from the rest of the flock.

EDITORIAL

DON'T BE ALARMED!

Let's turn to normal folk awhile. Let's look over the whole country and not fix our eyes on some little part of a city or nation where abnormality seems to be the rule.

An Iowa newspaper is running a series of tales about New York. It's very interesting to some because it deals with dance halls and tipsy women and generally with abnormalities.

But where one tipsy woman played the fool a half million sober women were putting three million children to bed.

Where one male idiot is out raising hell of an evening a half million men are asleep regaining the strength that shall enable them to earn the necessities and comforts for the women who put children to bed and maintain a home.

Where one Blanche and one Tiernan exist a million decent families are making good.

Where one drunken woman with a hammer beats the life out of another a million other women are scheming kindnesses for each other.

All these abnormalities that so distract us are the final proof that most men and women are decent, honest and law abiding people. The more folks you meet the more convincing becomes the fact of this.

Let's take a little time to see and appreciate the general run of folks, common everyday folks who don't raise the devil, normal folk who don't want to, who protect themselves and their families and so protect and keep normal that herd we call organized society.

Let's try that for a few days. Of course it will be dull comparatively, but it will be useful.

GOODRIDGE'S OPPORTUNITY.

Could not our community profit greatly by taking advantage of the many opportunities for entertainment and education offered through the general extension division of our University at Minneapolis?

The extension division is built up primarily to extend to every community over the state the advantages in entertainment and education that are common in the University. It has built up one of the best Lyceum circuits in the state. It has hundreds of educational and entertainment films for distribution. It conducts a drama service department to aid towns such as Goodridge in putting on home talent plays. Lecturers from every department in the University are available through the extension division, and an expert community service organizer is now being sent out from there.

About 200 courses are offered by correspondence study and can be carried on here at home. Within the next few weeks a representative from the extension division will be in this vicinity to explain in detail every branch of their service and cooperate with us in every possible way.

Let us be ready to take advantage of hi visit, and if we want any specific information drop a word to the University requesting the representative to bring it to us.

MAYBE WE'RE WRONG.

The main trouble the world over at present is too much finance. There are too many slips of paper drawing interest. Productive power is ample in all lines to give all the people plenty. The world never was in better condition to produce the necessities of life.

But there is vast opportunity for improvement in distribution. And we are gradually working toward better adjustments. There isn't many people in the world who really enjoy to oppress their fellow-beings. It is a simple matter of getting organized right. But that is no simple problem for us to deal with.

CUT IT OUT.

We believe that the Legislature should cut out the expense portion of the pre-primary law. It is all right to let any party or parties that want to hold conventions and endorse candidates for the primary, but let them hold the caucuses and conventions at their own expense. The last pre-primary cost Roseau county maybe a thousand dollars or more. It was a needless and useless expense.—Warroad Pioneer.

CHAPTER IX—Continued.

—11—

She led him to her "sofa" and they sat down, leaning back against the tree.

"Tell you what, Nadine?"

"About the great big world you know so well."

"I don't know the big world, as you think it. But I know the universe as I feel it. It is here."

About her finger she sat wrapping the lily-stem that had marked her favorite play. Was it that she did not understand his reference to his universe? No, for she shook her head, and with a sigh that did not mean weariness.

"The universe could not be on this little island."

"It could be held in your dimpled hand."

"Oh, my hand dimpled!" She held it in front of him, touched his brow with the palm.

"It is not soft enough to be dimpled, Virgil."

"I would kiss it soft."

He caught her wrist, touched the tip of each finger with his lips and then kissed the palm. She laughed, drawing back her hand.

"You must not do that. We must talk of other things."

"Yes, but first let me tell you of my dream."

"I do not like to hear dreams. We always forget them and make up something we did not dream. . . . But did you not tell me once?"

"No, I don't think so. In my dream you touched my heart with a torch and set it afire."

"But I would not do that. I would save you from the fire. Ah, and Tony he has gone to the city, but when he comes back, we must watch close. . . . One time he tried to take my hand, and he said he would kiss me. And I say: 'That may be, Tony. You can kiss me because you stronger. But when you have, then you be dead.' And he knew that I speak what was to come."

"We care nothing for him. Let him keep out of my way. . . . And when I saw you at the ball, I knew that you were the girl with the torch. And do you know what I said to myself? Let me whisper it to you."

"There is no one to hear."

"I said: 'You are to be my wife.' And just then you turned about and looked at me."

"But I did not see you."

"Come, now, you must have seen me."

"Well, perhaps. But I did not say: 'I am to be his wife.' No, I did not say that. And it cannot be, Virgil."

"But it is going to be, all the same, and you know it. Why, what is all this universe for if that is not to be? Why was this little island cast up here? Why did the word ring forth: 'Let there be light'? It is part of the plan of creation, and nothing can prevent it. . . . I shall have to wait, but I—"

"Will wait a long time, Virgil. But we must not talk like that. Come—let us forget such things."

She put her spell on him, and he was a boy again. Hand in hand they walked about, pretending that the acre island was miles and miles in extent. Time was a day-star shooting unseen across the sky, and then a heavy sentence fell upon him. It was time for him to go. In the cane she stood with him where his canoe was moored. He held her hand, drawing her toward him, but she took it away.

"No—no, you must not . . . Quick Virgil, you must go now. The sun is low."

CHAPTER X

In the night, in that hour of self-reproach which comes to us all, Virgil awoke in a rage with himself. He had been dreaming, had seen himself infirm of purpose, without character. Back to Highland Bruce he traced his ancestry, and was he to be the first of his race to prove degenerate, to trample upon the memory of his father, to loll in stupid love, to give his soul to a creature far beneath him in birth and schooling, a girl whose father had murdered! Out of bed he got, and bowed with the weight of shame, walked the uneven floor, for his slow steps were doddering.

"Caught in an instant, a fly in a speck of jelly, and have never been able to get free," he reproached himself. "Even Liberty Shottle, the slave of cards and dice, can see my weakness and must laugh at me. But by the God in Heaven it shall not be. In this land there is no law. I bring my own law with me, my oath, and a smile and a word of flattering love bade me put it aside, and I let it slip from me. Now I must redeem myself."

He stood at the window. Gamecocks were crowing the dawn, a courageous challenge to all the world. No, there would be no weakening now. The sweetish comedy had been played.

Swiftly he dressed himself, stole downstairs, out of the house, down to the river. There was no boat, but no matter, he would walk to Willow Head. Realizing that it was yet too early for the execution of his grim purpose, he halted at a wayside place, ate breakfast and waited for the sun. Then not in flurried haste, but deliberate in strength, he walked on to Willow Head, crossed over, found his neglected rope where, in a hollow stump in backsliding weakness he had hidden it, buttoned it beneath his coat and strode down into the swamp.

It was a long way to his canoe near the Muscadine isle, and then a long pull to Periwinkle house, but there was time enough. Stepho would not go away till Thursday. Ah, he would go away no more, for now on Tuesday he must settle with the spirit of Alfred Drace.

Mists hovered about, but the island was in a blaze of light. Silently the canoe slit the satin water. Silently he landed. Determined vengeance may pick its way as softly as eager love; and in the cane, sharper of whisper now that the weather was cool, he made not a sound. Out into the open he peered. No one within sight. On the bark of the live oak were the dead flowers of yesterday. There in the shade was the box that had served as table, once so prettily strewn with violets.

In spite of his vow of vengeance and his hatred of Stepho, these things caught at Drace's heart, shook his fixed purpose of action. For many minutes he waited—no sign of Stepho, of anyone. And then his blood leaped; for soft hands suddenly blinded him from behind, soft laughter bubbled over at his astonishment. And dark thoughts and dark purposes fled on the wind as he caught Nadine and hugged her close.

"Now for your punishment!" And he kissed her.

"Oh, you must not again . . . Virgil, I cannot like you when you are rude. . . . You must not!"

"I don't want you just to like me."

"You do not? Then I will try not to. . . . Come and sit down, Virgil. You worked so hard for your kisses you must be tired. . . . How did you guess?"

"Guess what?" he asked as she led him to the sofa and he sat gazing entranced as she captured and imprisoned her guerrilla bands of hair.

"That Father and Tony had gone hunting today. But they may be back at any time, Virgil. You must not stay."

"But I must stay; you hold me prisoner. I must stay until you love me as madly as I do you."

"As madly as you do me? That might not be so much mad, Virgil. But why should I love you?"

"Because you are to be my wife. We are engaged."

"Are we? I did not know that. Why you not tell me sooner?"

"I did, and now you must know it."

"But I did not. Then I must be stupid, yes?"

"The whole universe is stupid if it denies it. The angels are stupid if they fail to see it."

'Oh, you must not talk like that. It is worse than swearing the big oath. . . . And I am to be your wife, Mrs. Virgil? Then what do we do? Go about and sing with the fiddle?"

"No, we go to the beautiful places on earth and look upon them—together. We—"

"No, no, you must not think like that. You take my father by the wrist and he hate you. . . . And I do so wrong to see you. I am the sinner, but I believe that the Blessed One, she ask for my forgiveness. . . . No, Virgil, we can only play together and then . . . It will live in the mind, our childhood here. . . . My father is not well all the time now, and I must be good to him. . . . Only I must see you, sometimes. That is the only wrong I do him.

"For I—I love you. . . . I did not want to tell you, but I cannot keep it all the time down in my heart. . . . I dream of you all of the night, and I kneel down and pray that you always love me. . . . There, I have told you so much. And I kiss you, too. . . . Now—you may stay for a little time, and then you must go."

Boy and girl they played, not from the book but from love's ever-varying text. In his canoe they paddled afar off where the lily-pads paved the surface of the pond. They landed on a knoll where was spread over persimmon saplings an arbor of muscadine; here an adventurous catbird had her nest of young. She cried and fluttered about in great alarm, but when she saw that they were not her enemies, that they caught grasshoppers to feed her brood, she sat high among the vines, calling her mate, the musician, and here he came, scared at first, but when she had explained to him he sang his medley, ending with the catcall whence comes his unpoetic name.

The sun had been speeding, and went behind a cloud. Fear seized Nadine, and taking Virgil's hand, she urged him toward the boat.

"My dear one, we must go now. The sun was jealous that we so happy and will go into the dark to pout. . . . I will show you the near way for you to come again, the way I came when there was the fire. You can leave the canoe in the rushes and you will need it only to cross over to the cane. But we must hurry now."

In the rushes opposite the island he hid his canoe, and then she conducted him along a narrow and sometimes treacherous trail. Coming to the foot-log, she halted.

"I must leave you here. But I stand for two minutes. The sun he will wink a few more times. . . . I am so glad now to know that I will be your wife. And I am strong and can work."

"Lord bless you, but you won't have to work."

His arms were about her, her cheek against his, and with happiness the world was glowing.

"Till Thursday!" he cried as he dipped his paddles.

"Till Thursday!" she echoed as she watched him go.

"Till Thursday!" muttered the sinister voice of old Stepho, who had approached softly through the undergrowth at the sound of voices, and had overheard their parting. But when he came to Periwinkle house, he gave no sign to Nadine that he had overheard—only talked of Monsieur Boyce and the fine dresses he would buy for her when she was his wife.

It was long past noon when Drace reached the river.

The General had gone over into another parish to attend a stock sale. Tycle said; and when she had looked at Drace more closely, at his torn clothes, his muddy shoes, she sighed and sat down beside him where on the rustic bench he had dropped to rest before going to his room.

"Virgil," she said, "there is something troubling you. Now, you needn't tell me that it is business. I know what business is. I know all of its tricks; but I also know love and all of its tricks. Virgil, you are in love. Let me hope that it is not that Nina Spence. She isn't worthy of you; and besides, she doesn't belong to us. She is not of our world. Virgil, I am so sorry."

She put her hand on his arm, and he took it and affectionately kissed it.

"Aunt Tycle, I never saw the girl you speak of. I am in the—the throes, you might say, and have been—was before I got here, but not with her."

"But is it with anyone I know?"

"You have seen her, I have heard."

"Oh, you must tell me. It shall be sacred with me. If you only knew how people tell me their affairs of the heart. Even old Colonel Josh has told me. Now, why won't you?"

"I shall tell you, but I must put you on your honor. I said that you have seen her. You have; you spoke of her. Nadine—"

"Oh, Virgil! But her father!"

"Yes, I know. But let me tell you my story."

He told of his love, not of his father's death—told her nothing of his oath; she listened enraptured; and when he had finished, she mothered him with her arms about his neck.

. . . .

About ten o'clock next day, while the family sat in the shade, up to the gate drew a resplendent carriage, drawn by two black horses and driven by a negro in livery. Out stepped a man as tall as Lincoln and wearing a hat as high as his. His raiment flashed like the varnish of his equipage. Drace recognized him as he came through the gate, taking off his gloves, and the General cried out:

"Tycle, I wish I may die dead if it isn't Liberty Shottle!"

"Colonel Shottle, at your service," replied Liberty, bowing and gesturing with his gloves in his hand.

"Well, Liberty!" cried his aunt, giving him a hug of welcome.

The General and Drace grasped him, stroked his velvety raiment, urging him to a seat.

"Why all this, Colonel Shottle?"—from the General. "You don't mean to tell me that you have sold your jute-stock?"

"Uncle Howard, sir, first issue orders to have my carriage stored, my horses stabled and my driver quartered, please."

The order was issued, and they sat waiting for Shottle to explain his transformation.

"A simple story," he began, stretching out his legs. "But do not forestall me. Poker, dice, roulette, faro, hazard—all of them failed."

"And this comes of legitimate investment!" Tycle cried. "I knew it would. Oh, I knew it just had to come. Now tell us about it."

"It was an investment, Aunt Tycle. But let me not forestall myself. I left here on a boat, got broke. Finally I reached Tampa, Florida."

"Away down there, Liberty?"—from Tycle.

"Patience, my dear aunt. Tampa, and broke! After a day of hope with its throat cut from ear to ear, I got on a boat bound for Havana. The Spanish captain gave me passage for service. He was studying English, and I agreed to explain to him certain niceties of our mother tongue, you understand; and I am sure that, reaching port, he knew more about gambling terms than he could have picked up in a year of close study in one of our ordinary schools. He was appreciative, generous, and gave me a bonus of five dollars. I went to a hotel, not of the first class, and it was there that I made my investment. The weather was warm and—"

"For gracious sake, Liberty, tell us!" his aunt urged him.

"That is my aim, but let us not be impetuous. . . . I was eating a Spanish stew out on the sidewalk, the weather being warm, when along came an agent—not a man in distress, but a regular agent—and I invested with him. I bought a ticket in the Havana lottery. . . . Wait, now. Nothing ever happens until it does, you know. The drawing came off two days later, and my number, 356,792, won the first prize, twenty thousand in gold."

(TO BE CONTINUED.)

Natural Qualification.

"Oliver Twist was always asking for more," remarked Senator Sorghum.

"Yet he became a worthy citizen," observed the admirer of Dickens.

"Yes. Probably he grew up eventually to be a tax collector."

Masterpiece Born in Suffering.

Tom Hood's famous "Song of the Shirt" was composed in 1844, while he lay in bed suffering from his last sickness.

RADIO

INTERFERENCE OF RECEIVING SETS

Each, When Tuning for Distant Station, Acts as a Continuous Wave Transmitter.

We have explained that the continuous, fairly steady whistles, usually heard while tuning for the distant stations, was due to a combination of the carrier waves of two stations which were very nearly on the same wave length. There is another series of whistles always present which very much resemble the whine of a mosquito both in tone and amount of annoyance produced. These are caused by the receiving sets of other listeners. Every receiver using a vacuum tube detector with a regenerative circuit is a potential transmitter. In fact it contains all the essentials of a radiophone transmitter on a small scale.

The detector tube when oscillating produces oscillation exactly similar to the carrier wave of the radiophone stations. The frequency or wave length of this wave can be varied by changing the tuning of the receiving tuner.

The usual procedure in tuning for a distant phone station is as follows: Put the detector tube in an oscillating condition after the tuner has been adjusted near the point where experience has taught us to look for the broadcasting stations, then move the dial slowly across the approximate point where the stations are usually heard. The carrier waves are located by a whistle which starts at the upper limit of audibility and goes down the scale until it becomes so low that it is no longer a note. At this point the set is in exact resonance, and if the tickler, coupling, or plate tuning inductance is decreased until the detector tube stops oscillating, the very best adjustment is obtained for reception of that particular station.

Unfortunately while this listener is going through this operation his receiving set is acting as a continuous wave transmitter, and is producing some inharmonious wails in the phones of his neighbors who happen to be already on the wave of the same station. The continuous wave sent out by the receiver combines with the carrier wave of the transmitting station, producing an audible note. If the operator could tune his set as simply as was described above there would be very little interference, but he usually whistles back and forth across the wave of the transmitting station several times. Often several listeners who have been getting the concert perfectly will get restless between selections and get their tubes to oscillating and whistle up and down a few times.

All listeners should be very careful to keep their detectors in a non-oscillating condition as much as possible to reduce this annoyance of interference between receivers.

Opinions seem to vary considerably in regard to the comparative amounts of energy inducted into the antenna by the "single circuit" or conductively coupled, and the "three circuit" or inductively coupled receiving set.

Previous to the introduction of the single circuit very little trouble had been experienced with beat notes from receiving stations. This was no doubt due to the fact that receiving sets were rather few and far between; also up until a few years ago there was a very small percentage of c. w. telegraph and phone stations so that there was no reason why an amateur should keep his tube in oscillation condition. On the contrary, he was very careful to keep it just below the oscillating point, that being the most sensitive adjustment for spark signals.

With the telephone and c. w. telegraph transmitting stations, i. e., tube transmitters, came the single circuit tuner with its extreme simplicity of adjustment, which was so well adapted to the very sharp tuning of the new transmitters. And with the advent of these new transmitters came the necessity for making the detector tube oscillate in order to locate a station on the scale of a receiving tuner. Naturally then the interference between receiving sets became noticeable at about the time that the single circuit sets became numerous, and this helped to prejudice the minds of the radio public against this type of receiver. However, the fact that the single circuit arrived at about the same time with the inteference was by no means the only reason for believing this tuner to be the main cause of the trouble.

For instance in constructing a single circuit or conductively coupled tuner the difficulty is in obtaining regeneration at all points on the scale. This seems to show that there is more resistance in this circuit than in the inductively coupled type. The main point of difference is the close coupling to the antenna. Being conductively coupled, the coupling to the antenna circuit is at maximum at all times. This causes the radiation resistance to be high, which seems to be the factor that keeps the tube from oscillating freely without unusually close coupling between plate and grid circuits. Thus we are led to believe that this circuit is one to avoid if interference with other listeners is to be reduced.

If we must have single circuit tuners the thing to do to reduce the radiation to a minimum is to reduce the size of the antenna series condenser and increase the number of turns in the inductance. This will give sharper tuning and there will be much less trouble in getting the tube to regenerate.

In many localities there is a great deal of interference from spark stations, especially in the cities on the coast or Great Lakes, where there are commercial stations to handle the ship traffic. These spark stations do not tune very sharply, and even if the station is located several miles away it is often impossible to tune them out with the average tuner.

When tuning for a faint station and using amplification there is nothing more nerve-wracking than to have a spark station roar in unexpectedly. There is little that can be done about this interference. If the station is close a change of wave length would do little good even if this were possible. If it is a commercial station it is doing a much more important work than our broadcasters are, and of course cannot be expected to stand by for them.

FIRST RADIOPHONE EXCHANGE

Opened at Croydon, England, to Make Connection With Pilots of Air Expresses.

What is said to be the first radiophone exchange in the world was recently opened at Croydon, England, the point from which the air liners to the European continent take their departure, according to Consul Linnell.

The chief use made of this exchange is to connect the aerial traffic controller, who has his headquarters in a control tower at Charing Cross, London, with the pilots of the air expresses flying between Croydon and the continent.

The wireless exchange can also connect the phones of the airships and airplanes while in flight with any office at the aerodrome at Croydon, making direct telephone conversation possible.

The pilot of each aerial transport is now required to report his position to the traffic controller every 15 minutes, so that the progress and position of each plane is known throughout its journey. The controller is of particular value in directing the course of the aircraft in cases of fog and in giving them special directions for landing.

Radio in the Prison.

"Trusties" and officials at the Ohio state prison farm at London, Ohio, are now able to keep in touch with the outside world through the installation of a radio receiving set, purchased from the entertainment funds of the institution. The set, which has just been installed, will be enlarged within a few months by the addition of a transmitting set, through the use of which prison authorities hope to be able to bring about recapture of escaped convicts more quickly. The news of escape will be broadcasted immediately.

Court Adjourns by Radio.

From his steamer, incoming from Europe, Justice Tompkins of the Supreme court of Rockland county, New Jersey, radioed to his secretary in Nyack the necessary formal notice for the adjournment of his court, which was scheduled to convene on the morning of his arrival. The justice realized that he would not have sufficient time to reach Nyack after the ship docked, and for the first time in history used the radio to arrange for adjournment.

Popular Demand for Bulletins.

An interesting fact concerning the circulars issued and distributed by the bureau of standards was disclosed when it was announced that 20,643 copies of No. 120, which tells how to make a simple receiving set, had been sent out from the Washington office. They are sold at cost and may be obtained by sending 5 cents to the Superintendent of Documents, Washington.

The Hot-Wire Ammeter.

A hot-wire ammeter is used to measure the current in the antenna system of a transmitter. The value of the current flowing in this system is usually indicative of the performance of the apparatus. This meter is employed in tuning a transmitter to resonance, so that the maximum value of current may be induced into the antenna circuit.

Radio Aids Einstein Tests.

Special radio time signals sent from NSS, Annapolis, for the benefit of scientists in the Indian ocean, working on a test of the Einstein theory of relativity during the recent solar eclipse, were nearly twice as audible as those from a commercial station, the navy has been advised.

Helps Americanization.

An American Legion station in Nebraska broadcasts lectures on American traditions and American institutions so that foreign-born residents within range of the plant may make more rapid progress in Americanization.

Japanese Radio Enterprise.

Powerful financial interests of Japan headed by Viscount Shibusawa are endeavoring to obtain government support in the formation of a 200,000,000 yen radio corporation, which in the United States would be worth about $100,000,000.

GRAIN TRADE CAUTIOUS

Chicago Hog Prices 5 to 10 Cents Lower Than Week Ago.

U. S. Bureau of Markets, Washington D. C., for week ended Jan. 12, 1923.

LIVESTOCK AND MEATS: Chicago hog prices generally five to ten cents lower than a week ago. Beef steers steady to about 35c, butcher cows and heifers 20 to 50c and feeder steers 35 to 40c up. Veal calves steady to 25c lower. Fat sheep steady to 25c and fat ewes 25c to $1 lower; yearlings steady to 10c up; yearlings unchanged. On January 12th hogs slow, lighter weights steady to 10c lower, butchers weak to 15c lower than Thursday's average; beef steers generally steady. Spots 15 to 25c lower on yearlings; vealers around 25c lower; sheep and lambs generally steady. January 12th Chicago prices: Hogs, top, $8.75; bulk of sales. $8.30 to $8.65; medium and good beef steers $8 to $11.50; butcher cows and heifers $3.85 to $10.75; feeder steers $6.25 to $8; light and medium weight veal calves $8.50 to $11; fat lambs $13 to $15; feeding lambs $12.75 to $14.85; yearlings $9.25 to $13; fat ewes $5 to $8.50. Stocker and feeder shipments from 12 important markets during the week ending January 5th were: Cattle and calves 85,870; hogs 5,252, sheep 23,141.

FRUITS AND VEGETABLES: Potatoes firm in city markets, slightly weaker at Northern shipping points. Prices reported: New York sacked round white potatoes $1.35 to $1.40 per 100 lbs. in city market; 95c to $1 f. o. b. shipping points. Northern stock 80c to $1.15 in midwestern markets; 62 to 67c f. o. b.

GRAIN: Trade in grains was local and mixed with support on breaks and pressure on advances and close for week fractionally higher. Trade was cautious and not inclined to press either side of market account unsettled foreign situation which was main influence during wek. Buying was not aggressive on the 12th and wheat market heavy but decline held in check by fair support on breaks. Export demand very slow and no indications of any business. Dry weather talk from southwest and Green bugs in Texas was strengthening influence in July which showed firmness compared to May. Corn prices lower in sympathy with wheat. Closing prices in Chicago cash market: No. 2 red winter wheat $1.30; No. 2 hard winter wheat $1.21; No. 2 mixed corn 72c; No. 2 yellow corn 72c. No. 3 white oats 45c. Average farm prices: No. 2 mixed corn in central Iowa 59½c; No. 2 hard winter wheat in central Kansas $1.03; No. 1 dark northern wheat in central North Dakota $1.04. Closing future prices: Chicago May wheat $1.19⅛; Chicago May corn 72⅛; Minneapolis May wheat $1.20¼; Kansas City May wheat $1.10⅞; Winnipeg May wheat $1.13.

HAY: Most hay markets slightly weaker. Receipts and country loadings generally light but mild weather restricting demand. Quoted May 12: No. 1 Timothy, Chicago $23; Minneapolis $16.50; No. 1 Prairie, Minneapolis $15.

FEED: Mill feed markets inactive with buyers and sellers apart. Stocks mostly in second hands and firmly held because of improvement in grains. Wheatfeeds slightly firmer on light offerings by mills. Oil meals easier and cottonseed meal quoted about $1 lower. Gluten feed prices advanced by manufacturers $2 per ton. Hominy feed firm, price a shade higher, demand and offerings light. Interior and storage stocks good. Quoted January 12th: Bran $24.50; Middlings $24.50; Flour Middlings $27.25; Rye Middlings, $23, Minneapolis. Gluten feed $44.35 Chicago.

DAIRY PRODUCTS: Butter market firm at close. Declines early in month checked. Tendency again upward. Imports on eastern markets light during week. First large shipments of Australian and New Zealand butter have just arrived at San Francisco. Stocks low for season. Total available supply barely equals demand. Closing prices: 92 score butter, New York 54½; Philadelphia 54¼; Boston 54½; Chicago 52. Advances in prices on Wisconsin cheese boards Monday have placed trading on slightly higher basis than last week. Cheese prices on Wisconsin primary markets January 11th: Twins 26½, Daisies 27¼, Double Daisies 26¾, Longhorns 27¼, Square Prints 27¾.

Minneapolis Closing Cash Prices.

No. 1 dark northern, 1.20@1.29; No. 1 northern, 1.18@1.27; No. 1 dark hard, 1.16@1.20; No. 1 hard, 1.14@1.18; No. 1 amber durum, 1.06@1.10; No. 1 durum, 97c@99c. Corn No. 2 yellow, 64c. Oats No. 2 white, 39c. Barley, choice to fancy, 56c@59c. Rye No. 2, 80c. Flax seed No. 2, 2.77.

So. St. Paul Livestock.

Steers, 6.25@7.50; cows and heifers, 3.50@7.00; veal calves, 2.75@8.75; hogs, 7.00@8.35; sheep and lambs. $.50@13.75.

BUTTER—Creameries, extras, 50c; firsts, 46c; seconds, 41c; storage extras, 43c; packing stock fresh, sweet, 26c; stale goods, 5c; grease, 1c.

EGGS—Country receipts, rots out, per crate, $10.50; No. 1 candled, good cases, free from rots, small, dirties and checks out, per dozen, 38c; fancy storage eggs, dozen 50c; seconds, small, dirty and held stock, rots and leakers out, per dozen, 18c; checks, rots and leakers out, per doz., 17c. Quotations on eggs include cases.

An Understanding of Holly.

A mother and her two sons, age five and three, were shopping. Entering a downtown store the children became very quiet, and Dick took hold of his brother's hand, admonishing him not to make any noise "in here as some one must be dead." They had noticed the holly wreaths tied with ribbons that were a part of the Christmas decoration in the store.

BLOOD SHED IN FRENCH ADVANCE

Soldiers Fire on German Demonstrators; One Killed and Several Injured.

SITUATION IS CRITICAL

Ruhr Mine Owners Are Obeying Instructions From Berlin Not to Deliver Any Coal to Allied Engineers.

Berlin—A clash between German demonstrators and French troops occurred at the railway station at Bochum. The French fired, killing one person, and wounding several.

The incident followed political demonstrations on a big scale. Several thousand persons collected in front of the town hall where the French general had his headquarters and cheered the German republic, then marched through the streets. A number of young communists made a counter demonstration, cheering the Third Internationale and the French communist league.

The police were unable to handle the crowds and towards evening the French troops had to intervene. It was about 8 o'clock in the evening when they opened fire near the railway station.

Refuse to Deliver Coal.

Essen—The deadlock involving the complete breakdown of all negotiations in the economic field between the Frency occupying authorities and the German magnates in the Ruhr is creating a critical situation which the French will meet with penalties—military, economic, and financial. The exact nature of the penalties the French general staff refuses to disclose, saying that instructions from Paris are being awaited.

In the meantime the military occupation of Bochum and Gelsenkirchem has been completed according to plans.

Given 24 Hours to Change Mind.

Paris—The allied engineers' commission at Essen, acting in agreement with the French government, has decided, because of French information received, to suspend for 24 hours the order given for the requisition at the pitheads of the coal due the reparations account. There is ground for hope that the mine owners will withdraw their decision, to comply with orders from Berlin to cease coal deliveries of coal and coke to France.

The French and Belgian troops now occupy the whole Ruhr basin and have reached the limits of that neutral zone, 30 miles in depth, in which the Germans are barred from having reichswehr or regular garrisons. The troops are at the gates of Dortmund where they were ordered to stop for the present.

NORRIS BILL MEETS DEFEAT

Senate Action Is Declared Death Blow to Bill.

Washington—Such progress has been made by the senate in consideration of farm credits legislation that managers predict a vote early this week on the Capper bill, the first of the farmer relief measures to be taken up.

The credit legislation, pending in the form of two bills, was taken up after the administration shipping bill, in accordance with plans of Republican leaders, had been laid aside temporarily by unanimous consent to make way for the farmers' measures. Although the senate made a slow start in considering the legisaltion, it later went forward at accelerated speed, and as a result, it was said both bills might be passed this week.

Before proceeding with the Capper measure, the senate took action which was said to mean defeat of the Norris bill proposing a government corporation to buy and sell agricultural products. Senator Norris (Rep., Neb.) objecting to immediate consideration of the farm credits bills, demanded that his bill, which was reported several weeks before the credit legislation, be taken up first. His motion, however, was defeated, 53 to 19. Mr. Norris said the defeat meant the loss of his bill during the present congress.

STANDARD OIL MAKES PRICE

Washington—Control of oil prices, particularly gasoline, by the Standard group of companies, was charged by representatives of independent oil concerns at the senate oil investigation.

Appearing in the inquiry for the first time, the independents one after another presented grievances against practices of the companies commonly dscribed as belonging to the Standard group.

Chicago "U" Head Resigns.

Chicago—Harry Pratt Judson, president of the University of Chicago since 1907, has resigned, effective February 20, the sixteenth anniversary of his elevation to the position, it was announced here at the close of a meeting of the university senate. The board of trustees, the statement said, has offered the acting presidency to Ernest D. Burton, head of the department of new testament and early Christian literature and director of the libraries, who has accepted it.

TELLS OTHERS OF ITS GREAT VALUE

In Nursing Sick, Mrs. Patten States, She Often Recommends Tanlac—Thinks It Wonderful.

"I firmly believe Tanlac is what keeps me so well and strong," is the high tribute paid the medicine, recently, by Mrs. Edith J. Patten, widely known and esteemed resident of 560 Cumberland Ave., Portland, Me.

"When I began the use of Tanlac I had not felt right for a long time and was all run down. After persistently taking the treatment considered best for such a condition I got no better. In fact I seemed to be growing worse until a lady friend insisted on me trying Tanlac.

"At that time I took two or three bottles and was perfectly well again. Since then I have taken a bottle two or three times a year and no one could feel better. I have done lots of nursing of the sick, and since Tanlac did so much for me I have been the cause of many others taking it—always with splendid results. It is with this knowledge and experience that I recommend Tanlac as a wonderful medicine."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.—Advertisement.

One way to forget other people's faults is to remember your own.

FREEDOM FROM LAXATIVES

Discovery by Scientists Has Replaced Them.

Pills and salts give temporary relief from constipation only at the expense of permanent injury, says an eminent medical authority.

Science has found a newer, better way—a means as simple as Nature itself.

In perfect health a natural lubricant keeps the food waste soft and moving. But when constipation exists this natural lubricant is not sufficient. Medical authorities have found that the gentle lubricating action of Nujol most closely resembles that of Nature's own lubricant. As Nujol is not a laxative it cannot gripe. It is in no sense a medicine. And like pure water it is harmless and pleasant.

Nujol is prescribed by physicians; used in leading hospitals. Get a bottle from your druggist today.—Advertisement.

KNEW WHAT HE WAS DOING

Obvious Advantage in This Gentleman's Manner of Wearing His Diamond Ring.

The gentleman, obviously of Hebrew extraction, had assembled his friends round the festive board. After having discussed satisfactorily the various delicacies provided for their delectation they were called upon to admire and appraise all his new and numerous possessions. But of all the latter the one of which he was most proud was a truly magnificent ring, which, however, was so turned as to display the diamond on the inside of his hand.

His brethren noticed this peculiarity and one of them remonstrated:

"Vy, Isaac," he said, "it is a good ring—I never saw a better. But it is on the wrong way round."

Isaac gave him a look of eloquent pitying contempt.

"Oh, what nonsense you do tell me," he replied. "I ask you, Cohen, Does one talk like this (holding out his hands, palm downwards), or like this?" (palm upwards).—Buffalo Express.

British Columbian Honey.

More than 700,000 pounds of honey were harvested in British Columbia in 1922, compilations made by the provincial apiarist show. Fifty-three tons were contributed by the Kootenay bees, the Okanogan and Thompson valleys yielding another fifty. From Vancouver island and the Gulf islands twenty-nine tons were gathered, while twenty-four tons were harvested from Greater Vancouver and Westminster. The populous Fraser valley produced more than half of the total yield, accounting for nearly two hundred tons.

A clever woman is one who makes her husband believe he knows more than she does.

Real discipline conveys a touch of enthusiasm to the disciplined.

Disordered Stomach

Take a good dose of Carter's Little Liver Pills—then take 2 or 3 for a few nights after. You will relish your meals without fear of trouble to follow. Millions of all ages take them for Billiousness, Dizziness, Sick Headache, Upset Stomach and for Sallow, Pimply, Blotchy Skin. *They end the misery of Constipation.*

ALL HE WANTED TO KNOW

Merchant Evidently Believed in the Saying, "It Isn't What You Used to Be."

Some time ago a young man went to a great store in Chicago to apply for a position and was fortunate enough to be shown into the office of the merchant prince himself, to whom he stated the object of his call.

The merchant was favorably impressed with his appearance and address, and after asking him a few questions relative to his business experience, promised him a place in his employ. But the caller, who evidently had expected to be more rigorously catechized, thought it best to volunteer additional information.

"If you wish," he began, "to know something of my antecedents—"

"I don't care to know anything about your antecedents, young man," interrupted the merchant with a smile. "If your subsequents are all right, you'll do. You may report to Mr. Smith next Monday."—From Everybody's Magazine.

Machine Shaves Lake Ice.

Tractor-drawn and with rotary blades revolved by a gasoline engine, a machine has been invented to shave ice on lakes for skating.

Save for a rainy day and don't forget that life has some cloudbursts.

A grouch who is not a grouch to you, is sometimes a treasure.

WAR TAUGHT PEOPLE THRIFT

One Good Effect, at Least, Came as Result of the Gigantic World Conflict.

While Christmas savings clubs originated about 15 years ago, the World war is credited with the tremendous growth recently in the number of depositors, and, of course, the totals of savings.

The weekly payment system for Liberty bonds, regular purchases of Thrift and War Savings stamps and more or less regular frequent contributions to the war funds got the average American into the habit of putting aside something out of the pay envelope.

"Employers adopted the system of taking the payments out of the salary, and as the amounts were only a dollar or two a week, it wasn't missed so much," explained a Hyde Park banker to the Woman. "When it was all over employees generally realized how easy it was to save. They just got the habit, and the Christmas club idea was almost doubled in a year's time, 1920 to 1921, in membership."

This year there were 5,000,000 depositors and deposits of $190,000,000.

Impending Change.

Patient—"Doctor, I'm completely buried in work." Doctor—"Well, that'll soon be changed to dirt if you don't quit."

If it isn't perfectly useless, it lacks much of being a genuine hobby.

Off to school on a winter morning

—fresh and rosy—or pinched and chilly? That's a matter for Mother to decide.

Children, as well as grown-ups, need a hot mealtime beverage that is wholesome, invigorating, and free from harmful after-effects.

Coffee is known to be harmful—especially to children. That is why so many thoughtful mothers give their children delicious Postum. This pure cereal beverage gives needed warmth and comfort, has delightful flavor and aroma, and is free from anything that can injure the health of children or adults.

Your grocer sells Postum in two forms: Instant Postum (in tins) prepared instantly in the cup by the addition of boiling water. Postum Cereal (in packages) for those who prefer to make the drink while the meal is being prepared; made by boiling fully 20 minutes.

C. A. Lieberg and son, Harry, who farm north of town, were shoppers in Goodridge Saturday.

Ole Nomeland of Grygla was a visitor and business transactor in Goodridge Saturday night.

Oscar Moslett, salesman for the Kiewel Products Company, was a business visitor in the village Monday.

Miss Frieda Bundhund left Monday for Thief River Falls, where she will seek employment.

Miss Ruth McDonald visited with Esther Ronken Sunday. She returned in the evening.

Mrs. Ellen Iverson and son, Ellard, were passengers to Thief River Falls Wednesday, where they attended to business matters.

Mr. and Mrs. Edmund Reopelle of Red Lake Falls arrived here Monday evening. Mr. Reopelle recently purchased the Tanem pool hall.

Miss Nellie Wiseth returned Monday evening to her home north of the city after visiting for a short time at Thief River Falls.

O. N. Urdahl, the local buyer for the Thief River aFlls creamery, attended to business matters in that city Friday.

Carl Christianson left Monday for Thief River Falls, where he underwent an operation for the removal of his tonsils.

Misses Hazel and Clarissa Aarness, students at the local high school, returned to their duties Monday after spending the week-end at their home near Kratka.

SCHOOL NOTES.

Emma Gilbertson and Frances Hincik entertained the high school by reading two worth while selections on Monday evening in place of the usual opening exercises.

* * *

The eighth grade room was in attendance at the high school debate on Friday.

* * *

At a combined meeting of the senior and junior classes held last week it was decided to present a junior-senior play during the first part of April instead of having the two classes give a play each.

* * *

The English I class, composed of Freshmen, gave two minute speeches in class Tuesday. The class gives promise of producing a few extraordinary orators some day.

* * *

Lillian Hanson has quit school on account of cold weather.

* * *

Under the competent leadership of Miss Lindbloom, the Girls Glee Club started its New Year's work by song practice Tuesday evening.

* * *

The state examinations for half-year subjects and the six weeks' examination for whole year subjects will be given Friday and Thursday. The half year subjects are: Commercial arithmetic, botany, American history and economics. Those who have taken these subjects will take the following subjects the next semester: Physiology, geology, civics and sociology.

* * *

The debate held last Friday was very well received by a large and appreciative audience. The participants manipulated the topic in a very efficient manner.

* * *

Ray Jensen was absent from school Tuesday morning.

* * *

The members of the Sewing class have made dress forms the past week. The class is also planning on putting on an exhibit.

* * *

The next meeting of the high school Literary society will be held Friday, February 2. The program will be composed of a declamatory contest between the various members of the Freshmen class. A prize will be given to the winner. The public is cordially invited to attend.

* * *

The schoolhouse doors have been equipped with new locks. Wonder why? Maybe it's to safeguard the happiness of a few of the teachers, which has been in danger of being disturbed.

* * *

The high school Literary club held its business meeting for the election of officers Thursday. The following were elected: Ruby Thompson, president; Herbert Nelson, vice president; Mabel Graff, secretary and treasurer.

IDOLATRY!

By REV. H. LUTZ.

Text: "Thou shalt have no other Gods before me." (Genesis 20,3.

The explanation of this commandment which Dr. M. Luther gives in his Smaller Catechism is: "We should fear, love and trust in God above all things." If we fail to do that we commit idolatry.

Idolatry is the sin of giving to some creature, real or imaginary, the honor, praise and glory which belongs to God only.

The heathen commit idolatry when they make idols of wood or stone and worship them as God, or when they pray to the sun, moon or stars, or trees or animals. People commit idolatry when they pray to the Virgin Mary or to the saints. For the Lord has said: "Thou shalt worship the Lord, thy God, and Him only shalt thou serve." People worship an idol when they pray to the "Creator of the Universe" or the "Great Architect" or the "Father of All," and at the same time wilfully and intentionally exclude Jesus, the Son and Savior from their prayers. For it is written: "All men should honor the Son even as they honor the Father. He that honoreth not the Son honoreth not the Father, which hath sent Him." (John 5,23.

Infidels who deny the existence of the true God commit idolatry, for they set up a multitude of idols in His stead. Rev. Wm. Dallmann writes: "The infidel' Creator is "Matter," the "Atom," the "Molecule"; "Force" is the idol that keeps the thing from collapse; "Law" is the idol that keeps the sun raising and setting on schedule time; the idols of "Nature," "a Strong Constitution" and an "M. D." pull the infidel through sickness; the idol "Fate" robs the infidel of his wife; "Good Luck" raises his wages; and "Bad Luck" throws him out of a job. No God? The infidel has a whole menagerie of gods!"

Of course, we Christians, who believe in the true God, pray to the Triune God, and worship Him in spirit and in truth, never commit idolatry! Let us see!

God says: "Fear not them which kill the body, but are not able to kill the soul; but rather fear him which is able to destroy both body and soul in hell." (Matth. 10,28.) And yet out of fear of men many will lie, cheat, and steal, and perjure themselves; they crouch before men, but defy God.

Concerning all these things, God says: "I am the Lord, thy God, thou shalt have no other gods before Me." God would be our one and all, our highest treasure, our dearest friend, our hope and our trust.

What a consolation for us that Jesus came into the world to have SINNERS!

Amen!

A number of the teachers went skiing Friday after school. They report a good time. They also discovered a mite of a hill, which is something extraordinary in this part of the state.

Mortgage Foreclosure Sale.

Whereas, Default has occurred in the conditions of that certain mortgage duly executed and delivered by M. O. Seavey and Rachael Seavey, his wife, Mortgagors, to Ole A. San, Mortgagee, bearing date the 1st day of July, 1921, and with a power of sale therein contained, duly recorded in the office of the Register of Deeds, in and for the county of Pennington and state of Minnesota, on the 31st day of August, 1921, at eight o'clock A. M. in book 57 of Mortgages, on page 609, such default consisting in the non-payment of the interest upon the principal sum of such mortgage, which interest to-wit: the sum of Two Hundred Eighty-six and 80-100 Dollar ($286.80), became due and payable on July 1, 1922, and, whereas, the undersigned, Nick Bundhund, was on the 10th day of July, 1922, duly appointed guardian of the estate of said Ole A. San by the Probate Court, of Pennington County, Minnesota, and a certified copy of the letters of guardianship issued to the undersigned as such guardian has been duly recorded in the office of the said Register of Deeds.

And, whereas, the undersigned did on November 6, 1922, pay the interest then due upon a prior mortgage upon and against the premises hereinafter described, amounting to the sum of One Hundred Twenty-four and 42-100 dollars ($124.42). And, whereas, the undersigned, as guardian has declared and does hereby declare the whole sum secured by said Mortgage to be due and payable, and, whereas, there is now claimed to be due and is due at the date of this notice upon said mortgage the sum of Five Thousand Two Hundred Ninety-five and 92-100 dollars ($5,295.92), including the interest so paid on said prior mortgage, and no action or proceeding having been instituted at law or otherwise, to recover the debt secured by said Mortgage, or any part thereof.

NOW, THEREFORE, NOTICE IS HEREBY GIVEN, That by virtue of the power of sale contained in said mortgage, and pursuant to the statute in such case made and provided, the said mortgage will be foreclosed by a sale of the premises described in and conveyed by said mortgage, to-wit:

The west half of the Southwest quarter (W½ SW¼ of section fifteen (15), and the east half of the southeast quarter (E½ SE¼) of section sixteen (16), and the west half of the southeast quarter (W½ SE¼) of section sixteen (16), in township one hundred fifty-four (154), north of range forty (40), west of the fifth principal meredian, containing 240 acres, according to the Government survey thereof, in Pennington county, and state of Minnesota, with the hereditaments and appurtenances; which sale will be made by the sheriff of Pennington county, at the front door of the Court House, in the city of Thief River Falls, in said county and state, on the 6th day of January, 1923, at 10 o'clock A. M. of that day, at public vendue, to the highest bidder for cash, to pay said debt of Five thousand two hundred ninety-five and 92-100 dollars ($5,295.92) and the interest, and taxes, if any, on said premises, and Seventy-five dollars ($75.00) attorney's fees, as stipulated in and by said Mortgage in case of foreclosure, and the disbursements allowed by law; subject to redemption at any time within one year from the day of sale as provided by law.

Dated November 16, 1922.

NICK BUNDHUND,
as Guardian of the Estate of Ole A. San, Incompetent, Mortgagee.
H. O. CHOMMIE,
Attorney for Mortgagee,
Thief River Falls, Minnesota.

Notice of Postponement.

Notice is hereby given that the sale mentioned in the above notice is postponed to the 20th day of January, 1923 at ten o'clock A. M., and that in all respects save time it will take place as stated in such notice.

Dated January 6, 1923.

NICK BUNDHUND,
as Guardian of the Estate of Ole A. San, Incompetent, Mortgagee.
H. O. CHOMMIE,
Attorney,

State Board of Health

[illegible]AL MAN TALKS OF EARLY PERIOD

Acquits Himself With Credit Before Audience on Friday Evening.

Christ Urdahl, a prominent farmer living west of town, was the first speaker at the Community Club meeting program. He was requested by the chairman to say a few good words for our railroad. Mr. Urdahl did this in a very fluent manner and caused many to wonder why Mr. Urdahl had not chosen the vocation of an orator instead of the life of a farmer.

The speaker related that back in 1908, when this country was a wilderness and the farmer had to drive 20 miles to get to market, the Thief River Fallls Commercial club, through the efforts of G. Halvorson, finally succeeded in getting a corporation to put a railroad through here.

Mr. Urdahl stated that he was proud of this railroad and of the fact that he was one of those who had given right-of-way. Mr. Urdahl said:

"We do not realize what our little railroad has done for us, but I believe that if it was discontinued we would soon ealize what it meant to haul our grain 20 miles to market."

In conclusion the speaker urged the people of Goodridge and community to patronize the road and also predicted that we would soon see the extension of the railroad if we did this.

BAND TO ATTEMPT REORGANIZATION

Meeting Is Called for Monday, January 29, to Talk Over Possibilities.

Here is a message to Goodridge and vicinity that should be hailed with delight by every man, woman and child:

The Goodridge band, which has been in a state of quiesency since last spring will make one final attempt at reorganization. The services of an excellent conductor can be secured and with this man using the baton there is not a mite of a doubt about the success that the band expects to attain.

But, the band cannot be run without the support of the public and if the people of Goodridge don't back the band this time, —wellfinale is the only word.

So the band is here issuing an appeal to all men with any knowledge of a wind instrument to make themselves conspicuous at the schoolhouse Monday evening, January 29. Don't forget the date—Monday, January 29.

BE PRESENT!

CLARENCE OLIVER, SEVEN MONTHS OLD CHILD, DIES

The twin boy of Mr. and Mrs. Ernest Peterson passed away last Friday after two months' illness. He was born last July and baptizied the ame month. The funeral was held Tuesday of this week. Rev. V. O. Aaker officiated at home and at Erie church.

SCHOOL NOTES

The following high school students have not been absent the last six weeks: Emma Gilbertson, Esther Gandrud, Norton Gunderson, Frances Hincik, Harry McDonald, Herbert Nelson, Esther Ronken, Edith Schie, Laura Swanson, Eunice Tvedt, Vivian Thoreson, Gorman Thompson, Oscar Wiseth and Henry Fjeld.

The high school students named below have the honor of not having been absent from their school duties during the semester ending January 19, 1923: Emma Gilbertson, Norton Gunderson, Frances Hincik, Harry McDonald and Esther Ronken.

The report cards were distributed in all the rooms Tuesday.

A number of the girls have become interested in manual training and henceforth will have this subject added to their numerous other duties.

The third and fourth grade pupils have been paying frequent visits to the thermometer lately as they are keeping a weather chart in their room.

Mrs. Mutnansky was a visitor in the third and fourth grade rooms Tuesday.

Irene Halvorson was absent from school last week on account of illness.

An artist of very promising future has been discovered in the sixth grade.

Mrs. E. J. Erickson read the "Swan Song" Wednesday morning as an opening exercise.

Lillian Markuson has been out of school the last week because of illness.

A. B. Mandt was a welcome visitor in school last Friday. We hope that more will come and visit us.

Florence Halvorson has been absent from school these beautiful days because of a bad cold.

Eunice Thoreson was absent from school Monday and Tuesday due to eye trouble.

The seventh grade history and geography classes are having social recitations.

Randall Erickson and Ruth McDonald have improved in spelling and have joined the Eighth A division.

UNUSUAL WEATHER FOR MONTH OF JANUARY

The surrounding community has enjoyed some exceptionally fine weather during the past month for a country that usually experiences between 20 and 30 below zero. Those who are engaged in hauling freight, driving school busses and the mail certainly have reason to appreciate the mild state of the weather.

We have, of course, been visited by an occasional blizzard, but without this annual caller there would be no joy in living in northern Minnesota.

REV. LARSON TO PREACH.

Rev. George Larson of Thief River Falls will hold services in the Free Lutheran Church Sunday forenoon, January 28, at 11 o'clock in the Norwegian language and in the evening at 8 o'clock in English. Everybody welcome.

LARGE AUDIENCE AT COMMUNITY MEETING

Excellent Program Is Given by Local Talent—Lunch Follows Program.

The Community Club meeting turned out to be what The Banner and Goodridge wanted it to be—a success. A large and enthusiastic audience filled every available seat and standing room in the large school auditorium. Stewart McLeod, the club president, presided with the usual pep and efficaciousness.

The local Lutheran Free Church choir was the first number on the program, rendering a very fine and talented selection. The member of the choir are all excellent singers and the four parts blend in a beautiful melody.

A duet by Margaret and Leona Bundhund was enjoyed to its fullest extent. This was followed by a saxaphone solo by Joseph Christianson.

Miss Gretta Gulrud played the piano accompaniment. This was followed by a piano duet by Miss Minnie Lindbloom and Miss Adeline Davids. This number was particularly enjoyed as the two ladies showed exceptional skill in tickling the ivories and bringing out the beautiful strains of the selection.

A vocal solo by Miss Minnie Lindbloom accompanied by Miss Adeline Davids on the piano was without a doubt the most beautiful selection ever rendered in the school auditorium. Miss Lindbloom deserves much credit for the way she delivered the solo.

The two last numbers were also of a fine variety of performances being a song by a trio composed of Maurice Resan, Edwin Olson and Rudolph Resan. The last was a piano solo by our up-and-coming pianist, Miss Vivian Thoreson.

A number of speeches were delivered throughout the program, but these have been given individual consideration in other columns.

POSSESSION OF WILD DUCKS AND GEESE IS ILLEGAL

It is a violation of the Migratory Bird Treaty Act and Regulations to possess migratory game birds in Minnesota after January 10 and prior to the opening of hunting season next fall, according to the Biological Survey of the United States Department of Agriculture in a warning issued to sportsmen and cold storage plants.

All migratory fowl game birds in storage in Minnesota at this time are subject to prosecution, irrespective of the fact that under authority of state law permission has been granted to possess such birds for a longer period.

DANCE WELL ATTENDED.

The dance held at the local hall after the Community club meeting Friday evening was attended by a record crowd. A local orchestra consisting of Martin Moen, cornet; John Vraa, violin; P. O. Tvedt, trombone; Ellard Iverson, piano; Einar Aakre, drums, furnished the music. The music was fine and everyone enjoyed themselves immensely. A lunch at midnight was served at the Stephenson Cafe, after which the terpsichorean artists again retired to the dance hall, where they tripped the light fantastic till the voice of the chanticleers announced it was morning.

PROTZELLER SPEAKS AT COMMUNITY MEET

Manager of Electric Line Discusses Local Railroad Situation.

H. W. Protzeller of Thief River Falls, manager of the Northwestern Electric Railway, was the main speaker at the Community Club meeting held Friday night. Mr. Protzeller used a very fine and pleasing introduction when he lauded the Community Club for its excellent work.

Mr. Protzeller discussed only the railroad situation throughout the speech and brought forward the great value it was to Goodridge and vicinity. He discussed the freight rates and agreed with the people that they were too high, but he stated it was not the fault of the private owners, as freight rates are governed by the Railroad and Warehouse Commission.

Mr. Protzeller discussed the present critical competitive situation between railroads and trucks. He stated that the road between Goodridge and Thief River Falls was built for service, and to more fully prove this statement he quoted the motto adopted by the company when the road was built. The present railroad situation was thoroughly covered. Mr. Protzeller used figures in proving his statements.

HIGH SCHOOL EXAMINATIONS ARE HELD JANUARY 17, 18, 19

The final examinations for the first semester in the local high school was held January January 17, 18 and 19. The examinations included the subjects of botany, economics, American history, commercial arithmetic and domestic science. The results were very satisfactory considering the number of students that wrote the examinations. The per cent of failures were very low, thanks to the efficiency of the faculty.

Six weeks' examinations were also held in the whole year subjects. They were not very difficult and there were few who had not applied themselves enough to get a passing mark.

NEW POOL HALL PROPRIETOR MOVES FAMILY TO GOODRIDGE

Edmund Reopelle, the new pool hall proprietor, who recently purchased the business from Bert Tanem, has moved his family to town. The floor directly above the billiard hall is being remodeled and Mr. Reopelle and family will move in as soon as the work is completed. Mr. Reopelle was engaged in this business at Trail, Minn., previous to his buying here and is, therefore, an experienced man in this business.

The meeting held Friday night should sufficiently arouse the people to a realization of the pending calamity if the decreasing business for the railroad is not stopped.

1—View of Memel, neutral city seized by Lithuanian peasants. 2—Giant blast furnaces of Gelsenkirchen, one of the busiest cities of the Ruhr basin occupied by the French. 3—George Gould, Jr., and Mrs. Gould, who are reported to have separated in the Riviera after a marital quarrel.

NEWS REVIEW OF CURRENT EVENTS

France Occupies Entire Ruhr Basin and Seizes All Mined Coal, Cars and Barges.

MINES ARE NOT CONFISCATED

Operators Help German Government's Passive Resistance Program—Revolt of Lithuanian Peasants in Memel Zone — President Obregon Expels Papal Delegate to Mexico.

By EDWARD W. PICKARD

> **MANY statesmen in Washington are supporting the movement for the acquisition by the United States of the British and French West Indies in the interest of national defense. The prohibitionists like the idea because some of the islands are now headquarters of the rum runners. Do you think President Harding should go ahead with the plan?**

CONFRONTED with a powerful "passive resistance" of the German government and the German coal barons, the French last week found that their organization for the exploitation of the Ruhr basin needed enlargement and strengthening and, in consequence, they slowed up a bit—but without any apparent diminution of their determination to get from the Germans all that can be had.

Early in the week the Berlin government instructed the coal mine operators of the Ruhr to refuse to deliver any more coal to the French under penalty of a year's imprisonment. The operators therefore defied the demands of the French economic commission and ignored its orders to attend conferences. Some of them left the region. Immediately the French extended their zone of occupation to include the entire Ruhr valley, the troops advancing on the north to the Lippe river almost to Hamm, on the south to Unna and Witten and on the southwest to Dusseldorf. They met with no real opposition anywhere, though they had to fire on a crowd in Bochum, killing one man. Exasperated by the official attitude of the Germans, the French threatened to arrest and court-martial the coal operators and to confiscate the mines. And, too, there was a lot of "On to Berlin." Not far from Muenster 25,000 men of the German reichswehr, or national police, were said to be concentrated and for a few days it looked as if there might be real warfare.

Then the French commission temporarily modified its plans. It announced that for the present the mines would not be confiscated, but all coal already mined would be seized and diverted to France and the recalcitrant operators would be tried by court-martial, but not arrested. The state forests along the left bank of the Rhine also were seized and will be worked to produce reparations. Every coal car and barge in the Ruhr was commandeered and Germany now can get no German coal except some of an inferior quality that is produced in Upper Silesia.

So far as the workers in the occupied region are concerned, they appear to be apathetic. Most of them are communists and they say they have been exploited by the German industrialist magnates and that the change of masters neither hurts nor helps them. They still insist that the capitalists are the ones who should pay the reparations.

CHANCELLOR CUNO and his government show no signs of receding from the position they assumed at the start of the present complications. They insist that the reparations proposals which the allied commission refused to receive recently in Paris represent the limit of Germany's capacity to pay and are still open on condition that the French withdraw from the Ruhr. They state that their program of economic resistance will be carried even to the point of ruining Germany, arguing that this would also result in the ruin of France, while acceptance of a reparations program beyond the country's ability to pay would ruin Germany alone. The government is said to have agreed to reimburse the mine owners for the profits lost by refusal to deliver coal to the French—which enraged the socialist press—and also to pay the wages of the workers in case of a general strike.

Cuno is not receiving the unified support that was expected. The socialists dislike some parts of his program and, of course, the communists are always trying to stir up trouble. The reactionary element, especially in Bavaria, sees an opportunity in the present affair and is agitating for a restoration of the monarchy, presumably with Prince Ruprecht as king.

On Sunday some 200,000 Bavarian Fascisti armed to resist French occupation, in the words of their leaders, were reviewed by Adolph Hittler, head of the National Socialists.

PREMIER MUSSOLINI of Italy, who has advised France not to go too far with the military occupation of Germany, says he is working on a plan for a continental economic bloc, which he hopes would be joined by England and which, in that case, he believes would bring peace to Europe.

The reparations commission on Tuesday voted new defaults against Germany on coal, cattle and horse deliveries. Friday the commission met again and it is said Roland W. Boyden, the American unofficial member, submitted a report setting forth the present situation and intimating that the reparations should be drastically revised, but not specifying figures or totals. It would seem that the time for discussion of such a document has passed.

Russia is reported to have called new classes to the colors, but has informed Berlin that she will not attack Poland without provocation.

TURKEY is occupying a strong strategic position just now. Should there be a renewal of war in central Europe her nonparticipation could be assured by concessions to her demands for full national sovereignty and, at least so long as the situation continues acute, all she has to do is to insist on those demands. Kemal is strengthening his army for possible contingencies. The British are preparing to evacuate Constantinople, but, according to the Turks, are merely moving their military equipment to Chanak to retain control of the straits until a peace treaty is signed at Lausanne.

MUCH space and many large headlines have been devoted to an affair in Europe that probably will turn out to be of minor importance. When the allies undertook to remake the map of central Europe they accepted the suggestion of Woodrow Wilson and made of the seaport of Memel and some adjacent territory a temporarily neutral zone, under the control of the League of Nations. It was claimed by both Lithuania and East Prussia, between which it lies. A few days ago the Lithuanian peasants living in this zone, several thousands in number, armed themselves and marched to the city of Memel, which they occupied, the small French garrison being unable to offer resistance. The "Little Lithuanian Volunteers," as they called themselves, announced they were in revolt, not against the League of Nations, but against the German administration and German money imposed on them. Several French warships were at once dispatched to Memel and the allied council of ambassadors decided to send a mission to that city to establish a provisional inter-allied government under the authority of the British, French and Italians. Lithuania, France, Russia and Germany were each blamed for the insurrection by some of the others, Germany being especially vehement in its charge that it was framed up by the French with the connivance of the Poles. While, as was said above, the affair probably is of relatively small importance, some observers profess to see in it a grave threat against the peace of central Europe. The Lithuanian diet was informed by the premier that the government would not accept any decision of the council of ambassadors regarding Memel unless it reflected the will of the inhabitants of that territory.

Late dispatches from Memel carry the story of Anthony Ivas, an American citizen from Boston visiting his parents in Lithuania, who says that he both instigated and financed the insurrection. He declares the Lithuanians would accept an English and Italian administration of the zone until a plebiscite could be held, but would resist the return of the French because they have been trying to find an excuse to give Memel to Poland.

ALTHOUGH both the British and American war debt refunding commissions are still apparently confident of the success of their negotiations, the sessions were broken off temporarily last Thursday by the Englishmen, who announced that "the conversations had reached a stage making desirable a personal report to their government." For this purpose, and to obtain further instructions, they sailed Saturday for London. The difference in views between the commissions is not believed to be great, relating mainly to the interest rate. The Washington administration is hopeful the entire question can be settled in time for action during the present session of congress, and the feeling in England also is quite optimistic.

SAMUEL GOMPERS and the general executive board of the Brewery Workers' union have arranged for the mobilization of the forces of organized labor to obtain a modification of the Volstead act so that the manufacture and sale of light wines and beer may be permitted. Said Mr. Gompers: "We plan to make America once more the home of the sane and the land of the free. Wine and beer of light alcoholic content are sure to come back, and they will come back soon."

If Representative Upshaw of Georgia sought notoriety by the rather cheap means of charging that many members of congress and high government officials were liquor drinkers, he has achieved his purpose. Washington seems unduly annoyed, and Congressman Hill of Maryland has demanded that the house investigate the charges.

Governor Silzer of New Jersey, in his inaugural address, made some very moist recommendations to the legislature, and Governor Pinchot of Pennsylvania, on being installed, made an equally dry speech. These pronouncements were coincident with the third anniversary of the prohibition amendment.

Deaths from poisonous moonshine and bootleggers' booze are becoming so numerous that the government has decided to curtail the dealings in denatured and industrial alcohol. It also will bottle, for medicinal purposes, all bulk liquors now held in bond and guarantee them as to proof and quality.

PRESIDENT OBREGON, it is reported, is about to begin a campaign against the Catholics in Mexico and, as an opening gun, he last week expelled from the country Mgr. Filippi, the papal delegate, as a pernicious foreigner. The churchman, who is believed to be the instigator and organizer of the Fascisti movement in Mexico, was charged with holding a large public religious meeting at Silao, contrary to the law, and with refusing to obey the orders of the governor of Guanajuato. Mgr. Filippi, who came to the United States, denies that the law was violated by the meeting.

Obregon declared that he would see that high dignitaries of the foreign clergy should not come to Mexico and direct the church of Mexican Catholics, making themselves arbiters of the church. Mgr. Filippi is an Italian. In official circles in Mexico City this utterance is said to mean that no future papal delegate will be allowed to come to Mexico.

AMONG recent deaths that of "Judge" William H. Moore, nationally famous as financier and horseman, is noteworthy. He leaves an estate valued at about $30,000,000, all of which goes to his family.

The American public heard with deep regret of the death of Wallace Reid, the motion picture star. His fight to regain health after breaking away from the drug habit had been watched with deep sympathy.

News of Minnesota

EVENTS of the week throughout the "State of Ten Thousand Lakes" told in brief form

Red Wing—By a vote of 45 to 11 stockholders in the Red Wing Co-operative creamery decided to change the organization from a co-operative to a stock company.

Pipestone—At the annual sale held at Faramont Hereford farms 23 head of cattle were sold at an average price of $126 per head. The high price paid was $270. Many Hereford breeders were attracted by the sale.

Hackensack—A fire of undetermined origin raged through the business section of this place, causing heavy damage to the main street. Five structures were destroyed.

Owatonna—An average of approximately 800 Steel county women have attended each of the four days' sessions of the Community Cooking School.

Barnesville—Adam Sakry, a farmer, reported that he had discovered traces of oil in the water from his flowing well. His well is 112 feet deep and is located on the banks of a creek.

Mankato—Extensive preparations are being made by the Blue Earth County Farm Bureau and various breeding associations in the county for conducting a "better sire campaign" throughout the county.

Faribault—George W. Murray, who for the last five years has been operating the Brunswick hotel, has bought the property from John W. Schultz. It is announced by Mr. Murray that he will erect a new hotel immediately north of the present structure.

St. Vincent—A cash prize of $50, in addition to any bounties collected, has been offered to the person killing the most wolves or coyotes. The beasts have become so troublesome in this section that it was decided to make it an object for men to go out and track them down.

Owatonna — Minneasota dairymen brought the 45th annual convention of the State Dairymen's association to a close after adoption of a program for further progress and an extension of its activities this year.

Hibbing—Making use of what they had gained through fire drills and marching out of a mine in an orderly manner, between 40 and 50 miners escaped suffocation and possibly death when a fire of undetermined origin broke out in the Leetonia underground mine.

Olivia—Although believing its work of considerable importance in the community the Renville county board has decided to abolish the child welfare department. The commisisoners feel the people demand more economy in county affairs and made cuts in the salaries of the number of county officers in addition to abolishing the work of the child welfare supervisor.

Crookston—Secretaries of the county fair associations of Marshall, Polk, Kittson and Norman counties met here to form a fair circuit and fix fair dates for next summer that will allow each fair to show the same attraction. Contracts were signed up with a number of amusement companies. The Northwestern or Crookston fair also may join the new circuit. The four fairs already banded together are those at Ada, Hallock, Warren and Fertile.

Duluth—A request that Attorney General Hilton be instructed to take an appeal from the decision of the state railroad and warehouse commission granting an increase in telephone rates in Duluth is contained in a resolution unanimously adopted by the city council. The request follows the ruling of District Judge W. A. Cant, holding that only the attorney general could institute proceedings in the case.

Duluth—Alleging malicious slander, Mrs. Sarah McAlpine, widow of the late John McAlpine, Duluth lumberman, and her son, Dale McAlpine, filed suit in district court againts Mrs. Mattie B. Titus. Mrs. McAlpine seeks $25,000, while Dale has brought suit for $50,000. Mrs. Titus accused them of being connected with the death of Mr. McAlpine, who was found dead in the basement of his home Oct. 14, 1913, with a bullet wound in his breast.

St. Paul—The Minnesota State Dental Association will hold its Fortieth Annual Meeting in the Saint Paul Auditorium February 6, 7, 8, and 9, 1923. A program of lectures and clinics, covering all of the phases of dentistry, will be presented by men of the highest type in their respective fields. Several nationally known clinicians from outside of the State will appear on the program. A program for Dental Nurses and Assistants has been arranged, to which all Dental Nurses and Assistants are invited.

Minneapolis—Ed Hooley, star on the crack Stillwater high school football and basketball teams of 1921, and center on the Detroit university football team this past fall, registered at St. Thomas.

Ortonville—The funeral of Col. William Wellendorf, one of the largest livestock dealers in central Minnesota, was held here. Death was caused by complication of diseases.

St. Paul—Covert S. Townley, employe of the Nonpartisan league and brother of Arthur C. Townley, founder of the league, was killed in the automobile accident near Lincoln, Neb

FROM 94 POUNDS SHE GOES TO 132

Mrs. Gross Praises Tanlac for Overcoming Stomach Trouble —Says Results Are Priceless.

"Before I took Tanlac I only weighed ninety-four pounds and scarcely had strength to sweep the floor; but now I weigh one hundred and thirty-two and am as healthy and happy as can be." This remarkable statement was made recently, by Mrs. Mabel Gross, 1137 Aldrich St., N., Minneapolis, Minn.

"For nearly two years I had been in a seriously weakened condition and suffered nearly all the time from headache and backache. My nerves were beyond my control and I was terribly dizzy. I couldn't half sleep and my stomach was so out of order that even the sight of food nauseated me.

"The benefits I have received from Tanlac are priceless. I am now a perfectly well woman and my friends often speak of how healthy I look. Health is worth everything, and that is what Tanlac has meant to me."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.—Advertisement.

Learning From Experience.

Experience is not only the best of teachers, it is in reality the only teacher, for we must learn either from our own experience or from the experience of others.—Charles E. Carpenter.

Timely Comments on Agricultural Topics for Our Readers

PRICES SHOW FAIR GAIN

Foreign Political Conditions Influence The Markets Generally

U. S. Bureau of Markets, Washington, D. C., for week ended Jan. 15, 1923.

GRAIN: Grain prices made slight net gains during the week, Chicago May wheat up 1⅛c; Chicago May corn up 2⅝c. Foreign political conditions main factors influencing market. Wheat market inactive at opening on the 15th but later short covering brought prices to fractionally higher level. Visible supply wheat 40,193,000 bushels compared with 46,398,000 bushels same date last year. Visible supply corn 18,816,000 bushels compared with 24,259,000 bushels same date last year. Closing prices in Chicag o cash market: No. 2 red winter wheat $1.31; No. 2 hard winter wheat $1.21; No. 2 mixed corn 72c; No. 2 yellow corn 72c; No. 3 white oats 44c. Average farm prices: No. 2 mixed corn in central Iowa 59c; No. 1 dark northern wheat in central North Dakota $1.02. Citsing future prices: Chicago May wheat $1.19⅛; Chicago May corn 72⅞c; Minneapolis May wheat $1.19⅝; Kansas City May wheat $1.10⅞; Winnipeg May wheat $1.13⅜.

FEED: Mill feed markets quiet but firm. Jobbers heavily stocked and discounting prices. Present light operation of flour mills tend to sustain wheat feed prices. Cottonseed meal weak; linseed meal easier. Corn feeds firm, production good, demand fair. Alfalfa meal steady, demand light, production good. Supplies in interior considered normal and storage stocks in excess of those held at same time last year. Receipts and movement good.

LIVESTOCK AND MEATS: Chicago hog prices were 30 to 65c lower for the week. Beef steers ranged from 25c higher to 25c lower on top and good grades to 10c higher on medium grades. Butcher cows and heifers were 10 and 35c higher respectively while feeders were 35 to 40c higher and veal calves 50c lower; Fat lambs were 25 to 40c lower, feeders steady to 10c higher, yearlings steady and ewes 40c to $1 lower. On January 15th, hogs were five to fifteen cents lower; beef steers generally steady to 25c lowr, and fat lambs 25 to 50c lower. Fat sheep weak to 25c lower. January 15th, Chicago prices: Hogs, top, $8.40; bulk of sales $7.75 to $8.25; medium and good beef steers $7.90 to $11.50; butcher cows and heifers $3.75 to $10.50; feeder steers $6.25 to $8; light and medium weight veal calves $8.25 to $11; fat lambs $12.75 to $14.75; feeding lambs $12.75 to $14.85; yearlings $9.25 to $13; fat ewes $5 to $8.35. Stockers and feeder shipments from 12 important markets during the week ending January 5th were: Cattle and calves 35,870; hogs 5,252; sheep 23,141. In eastern wholesale fresh meat markets beef ranged from steady to $2 higher for the week, veal $1 to $5 higher on better grades and steady on lower grades; lamb remained practically unchanged. Mutton was $2 lower on good grades and $1 to $2 higher on medium grades. Light pork loins were from $1 lower to 50c higher and heavy loins steady to 50c lower. On January 15th beef was $1 higher at Boston, steady to slightly higher at Philadelphia with good steers 50c to $1 higher and other grades steady at New York. Veal was steady at all markets. Lamb was $1 higher at Philadelphia and steady elsewhere. Mutton was $2 higher at Boston, steady to $1 higher at Philadelphia and steady at New York. Pork loins were 50c to $1 higher at Philadelphia. Loins and houlders 50c to $1 higher with other grades steady at New York and Boston. January 15th prices good grade meats: Beef $14-17; veal $17-20; lamb $24-28; mutton $13-17; light pork loins $16.50-18; heavy loins $13-15.

DAIRY PRODUCTS: Butter markets barely steady to weak. Firmness early in week gave way under pressure of relatively heavy supplies which included several thousand packages of foreign butter. Closing prices 92 score butter: New York 53c; Philadelphia 54c; Boston 53c; Chicago 51c.

So. St. Paul Livestock.

PERTINENT POINTERS for MODERN FARMERS

Prepared Under Direction of North Dakota Agricultural College

TIMELY ADVICE ON SELECTION AND CARE OF POULTRY BREEDING STOCK

(By O. A. Barton)

At no time within the last 20 years has the price of poultry feeds been more favorable for profit to the producer than during the last two years, particularly where a good quality product has been produced. Those favorable conditions still exist in a general way, yet we hear the same question, "Does poultry pay?"

Whether it pays or not, depends primarily upon four fundamental factors: breeding, feeding, housing, care and management and it depends upon all four of them for success and profitable returns cannot be secured in a big way from the consideration of any three of these four factors if the fourth is neglected.

We have abundance of mute evidence of the truth of the above statement in empty poultry houses, built by enthusiasts who thought a fancy or elaborate house was all that was required, and they neglected other factors.

Other breed enthusiasts have placed and still are placing all the emphasis upon some particular breed or variety. Many fall for this enthusiasm and either start out with this or that highly recommended breed, or drop the breed they have and change to one thus recommended. In most cases, the result is the same dissatisfaction after a few years. They have been chasing an air-bubble breed, placing all the emphasis upon the breed and overlooking the fundamental factor, breeding.

Select Good Breeders.

There are good and poor individuals in all breeds. It is not so much a matter of breed, as it is the breeding of what we have, to develop and strengthen the desirable elements and reduce or eliminate the undesirable ones, for it is possible by persistent and careful selection of hatching eggs and breeding stock to breed in or out any characteristic desired to a very marked degree. Broodiness in the heavier breeds can be largely bred out or reduced. Size, shape and color characteristics can be quite definitely fixed. Quick development, early maturity and productivity tendencies may be established to a remarkable degree. It has been my pleasure and delight to prove these theories in my own flock.

The selection of the breeding stock and the method of procedure depends upon what one has to start with and what ambitions one has for the development of his flock. With a general mixed or mongrel flock one can only hope to breed for developing, production tendencies, quick development and size for market, but here he will usually be handicapped for the pure or standard bred stock should develop more quickly and grow much larger, if properly handled and bred.

If one has pure bred or standard bred fowls to start with and aspires not only at production of market eggs and poultry, but also at the sale of eggs for hatching, and stock for breeding purposes, then his methods must be more severe and the work more carefully done.

Mature Hens Best.

Experiments have proven that the mature hens are better breeders than pullets, they are likely to hatch more chicks, which are larger, have more vitality, grow faster, develop more quickly and should produce better. Where possible it is advisable to go through the entire flock between February 1 and March 1, handling each hen and pullet carefully.

Select for breeding those hens which were saved from the fall culling which represent the variety you are attempting to breed if they have proper egg laying characteristics as set forth in any reputable culling circular.

Circular 53, available by writing to the North Dakota Agricultural college, gives this information. Give preference to those hens which have been laying during the winter months. It is a good plan to mark any hens known to have laid during the winter.

If pullets must be used to supplement the hens available, select only those pullets for breeding which are well matured, fully developed, which represent your variety and which have started laying before February 1. The earlier they begin to produce the more valuable they will be for breeders for that is a characteristic you desire to establish in your flock.

Vitality Essential.

Vitality is a prime essential to producing healthy chicks. Select only hens and pullets which are active and alert with bright eyes, well developed comb and wattles, but not coarse or over-sized. Avoid excessively fat fowls, those which show any indications of weakness, disease or inactivity. Do not breed from fowls known to have roup, white diarrhea or tuberculosis, or from those having physical deformities, such as crooked backs, or deformed beaks. Eliminate from the breeding flock, those pullets which are decidedly undersized or which have been very slow in maturing. Pullets which have just begun laying at hatching time are laying small eggs which usually run low in fertility and still lower in hatchability and if chicks are hatched they are likely to be small and low in vitality, falling an easy prey to all the ailments to which chicks are succeptible. If you are breeding some standard variety of poultry know your variety and all the breed characteristics of that variety.

The Standard of Perfection published by the American Poultry association is the official poultry breed book which describes in detail all breeds and varieties of chickens, turkeys, ducks, and geese and will be a valuable assistance to any breeder of poultry. This book tells you the breeding defects and disqualifications of all breeds and varieties. So do not breed from stock having serious defects or disqualifications if you expect to have market for your stock and eggs for breeding purposes. To illustrate, a rose comb is one of the outstanding breed characteristics of the Wyandottes, yet all the varieties of Wyandottes will throw some single combs, or "revert to types" as we say. Single comb Wyandottes may be excellent producers and may be kept for that purpose, but should not be used for breeders if one expects to sell breeding stock or hatching eggs. Each breed and variety has its own peculiar and definite characteristics of shape, size, color, comb, shank color, color of ear lobe, and so on. In most cases, we say. "The shape or type and skin color determines the breed while the color and comb determine the variety." Hence the Leghorns may be single comb white or rose comb, brown or anyone of the several varieties of Leghorns.

Regardless of whether one has a flock of standard bred poultry and aspires to the sale of breeding stock and hatching eggs, or just a common mixture with aspirations only to market the poultry and egg production vitality and quick development are the fundamental basis upon which one should select breeders. The essentials will usually be found together and even after the most careful selection we will get enough poor ones.

By the careful selection and culling of the breeders for a few successive years one can materially increase the average production of hens, the size, uniformity and the general quality of the entire flock. Do not, however, expect to do it all in one year.

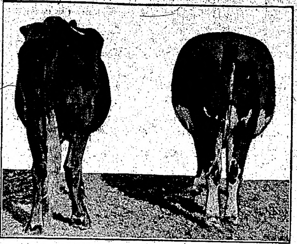
Select Males Carefully.

Male birds should be strong, vigorous and active with wide back, well spread feet and legs, avoid knockkneed males, and those which are inactive, very slow in developing and too timid. A bright eye, broad head and a bird with much masculinity is desirable.

After all of the breeders have been selected be sure they have plenty of exercise, keep them busy, do not overfeed, and do not underfeed. Give them a variety of feed. Green feed is essential. Beware of too much meat at feeding time. Avoid frozen combs and feet if possible for frost reduces vitality. Be especially careful to eliminate all disease from the breeding pen for healthy chicks of strong vitality cannot be hatched from fowls which for any reason, are low in vitality.

A dressing of two parts of beeswax to one part of mutton fat melted together will make shoes as nearly "waterproof" as it is possible to make them. Apply at night and wipe well next morning with a piece of flannel.

BIG UTILITY VALUE OF PUREBREDS



A Purebred Beef Cow Compared With a Scrub.

(Prepared by the United States Department of Agriculture.)

Based on utility value alone—apart from breeding or sales value—purebred live stock has an earning power from a third to one-half greater than scrub stock, the average superiority of purebreds for all classes of farm animals being about 40 per cent. This is the conclusion of the United States Department of Agriculture after weighing the opinions of more than 500 farmers and stockmen owning about 25.000 head of breeding stock and close to 30,000 fowls. These men are all participating in the Better Sires-Better Stock campaign, a systematic plan conducted by the Department of Agriculture and various states in improving the average quality of live stock in the country. A list of questions relating to the value of purebred live stock was sent to these participants and the answers, after thorough analysis, were used as the basis of Department Circular 235, "Utility Value of Purebred Live Stock," by D. S. Burch, which has just been issued.

Big Points of Purebreds.

Of the principal points in which purebreds excel other stock, according to the circular, the most prominent are: Superiority and uniformity in conformation and type, greater sale value, early maturity, and the economy in the conversion of feed into meat, milk, wool and work.

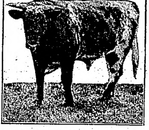
The comments of many of the farmers questioned indicate the value of the different points listed. Says a Virginia farmer: "My purebred stock weigh as much at fifteen months as my scrubs did at three years—a saving of 21 months in feed and labor, besides getting a better price. They are early maturing, easy keepers and good producers."

Purebred Rambouillet Rams.

"My cows have more than doubled in milk production," says a Pennsylvanian. "Scrub and grade cows used to give me about 4,000 pounds of milk a year, while my purebreds average over 8,000 pounds."

A breeder in Washington state makes this observation: "I find the young of purebred stock are uniformly good, while with scrub stock there usually are one or two good ones to eight or ten poor ones." A Montana ranchman says he has increased the weight per fleece on 10,000 sheep from six pounds to eleven and one-half pounds—almost 100 per cent—as a result of the use of purebred sires.

Many stockmen emphasize the greater salability of purebreds. "Buyers in this locality come to me first," is a frequent comment.



A Good Bull Is Half the Herd.

The circular contains much good advice on improvement of live stock, based upon farm experience. Copies may be obtained without cost from the Department of Agriculture, Washington.

MAKING FRUITS ATTRACTIVE

Consumers Favor Produce With Nice Appearance, Uniform in Size and Color.

Consumers who buy either at the corner grocery or of the huckster in the cities buy by appearance. They like to get fruit that looks nice. A basket of apples may be just as fine flavored and have the same average size, but if they are mixed up of various sizes and colors the city consumer will pay considerable more money for the basket that sits beside it with uniform color and size, for it looks more attractive. A half-dozen small potatoes in a basket may cut the price down enough to have made it profitable to have thrown them away and a half-dozen big potatoes with them rather than keep them. Uniformity is the first point to keep in mind and then quality and size come in line. The quality may be there but it doesn't appeal. Catch the eye and the sale is half made.

Save Lumber Trees.

Save all trees for lumber that will make lumber. Use only defective ones for firewood.

FORECASTS AID TO BEEKEEPERS

Predictions of Much Value in Fall and in Spring.

Instance of Importance of Service Related by New York Apiculturists Who Used Telephone to Inform Neighbors.

(Prepared by the United States Department of Agriculture.)

Beekeepers are dependent on weather conditions to prevent large winter losses, part of which occurs if they do not know when to put their bees in the cellar in the fall, or if the bees are removed from winter quarters too early in the spring. On the other hand, it is advantageous to give the bees the benefit of cleansing flights as soon as possible in the spring and as late as possible before cold weather sets in. Close attention is paid to the weather forecasts, especially in the northern states.

An instance of the way in which the weather bureau of the United States Department of Agriculture co-operates with beekeepers occurred recently in New York state. There are approximately 15,000 beekeepers there, half of whom winter their bees in cellars. When the weather map indicated the approach of severe weather, with no indications for a bee flight in sight, telegrams were sent by the state extension apiculturist to secretaries of 20 county and regional associations. These men in their turn were prepared to telephone key men who would telephone beekeepers in their own localities. In this way most of the beekeepers who winter their bees in cellars were reached.

Considering that the honey crop in New York state approximates 4,000,000 pounds a year, and that the greatest losses to the beekeepers of the state have been due to winter weather conditions, the weather bureau service is of real importance.

On the sacred island of Pu-tu, China, live more than 1,000 monks.

DAIRY FACTS

TANK HEATERS ARE FAVORED

When Milk Cows Are Watered Infrequently It Is Poor Policy to Supply Ice Water.

When a cow drinks water, her body at once sets to work raising it, if necessary, to the same temperature as exists normally in the body. In order to warm the water taken in, heat is just as necessary as it is to warm a kettle of water on the stove.

To provide the heat necessary, the blood and internal organs give up a portion of their supply until more is supplied from food previously consumed. As the milk cow is a heavy consumer of water, much heat is required to warm it. Consequently when cows are allowed to drink water that is very cold, a high percentage of the feed eaten is required to heat it. If it is true that some heat is being given off from the body all the time and when the amount of water taken in at one time is small the loss is unimportant. But when the cows are watered only once or twice daily, and then get near ice water, they are likely to suffer injury and more feed is necessary. Stated briefly, it is a question of balancing good feed and the cow's time digesting it, against the cost of a good tank heater and a few pails of cobs or coal. The man interested in getting the most out of his cows and in their comfort will not expect them to be their own tank heaters.

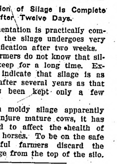
SILAGE READY WHEN NEEDED

Mistaken Idea to Think That Certain Time Must Elapse Before Feeding to Stock.

What is the best time to begin feeding silage, is a question which is interesting many dairy farmers.

The specialists on live stock feeding say that the time to begin using silage is when the dairyman needs it; they feel there is no justification for the idea that a certain time must elapse between the filling of the silo and opening it for use.

Experiments made at the state colleges of the country indicate that fermentation starts almost as soon as the corn is placed in the silo, and that the greatest change takes place during the first five days after filling. After 12 days, fermentation is practically complete, and the silage undergoes very little modification after two weeks.



Fermentation of Silage Is Complete After Twelve Days.

Some farmers do not know that silage will keep for a long time. Experiments indicate that silage is as palatable after several years as that which has been kept only a few months.

Although moldy silage apparently does not injure mature cows, it has been found to affect the health of calves and horses. To be on the safe side, careful farmers discard the moldy silage from the top of the silo.

REAL VALUE OF DAIRY COW

Most Reliable Method Is to Figure Her Actual Butterfat Production by Weight.

The most reliable way of getting at the real value of a dairy cow is to figure her actual butterfat production. This can be done by weighing the milk produced by each cow and by determining the per cent of butterfat through occasional tests of the milk with a Babcock tester.

COMPARATIVE COST OF COWS

Cheaper to Milk and Feed One Animal Giving Large Yield Than It Is for Three Scrubs.

It is much cheaper to milk and care for one cow giving 300 pounds of butterfat in a year than it is to milk and care for three cows giving 100 pounds of butterfat each, and if the 300-pound cow is heavily fed she will not eat as much as the three 100-pound cows

THE ELECTRIC LINE.

The announcement of H. W. Protzeller, manager of the electric line, made before the Community club meeting last Friday evening conveying the information that the line had run up a deficit of $72,000 during the last four years, came as a complete surprise to many. The deficit, according to Mr. Protzeller, does not include $20,000 in taxes on valuation.

It has been common knowledge for some time past that the electric line has not been a paying proposition; that returns from the road were inadequate to take care of current expenses, and the belief has persisted that officials would sooner or later be forced to do one of two things: Either abandon the line altogether and leave Goodridge and eastern Pennington county without rail transportation or discover means by which the road can be placed on a paying basis.

Not being versed in transportation problems, The Banner is unable to venture an opinion as to which course will be pursued, but it is fairly certain that something will be done—and that in the very near future.

It is a well-known fact that the short stub lines, or "feeders," of the United States have fared pretty badly during the past 10 or 12 years. The motor transport business in this country has assumed tremendous proportions, being highly organized in many sections of the east, and with each succeeding year it has brought difficulty to transportation officials of the short haulers such as, for example, the local line.

While it may not be be an agreeable situation from the standpoint of the stub lines, it has apparently worked out to the advantage of shippers, for year after year we are witnessing the establishment of truck freight hauling lines which are eating away revenue that formerly went almost exclusively to the carriers.

There are many advantages of shipping by truck that the non-shipper is apt to overlook. Hauling by truck gives shippers the advantage of shipping from door to door instead of from station to station, thus saving darying and handling charges. Shippers are concerned chiefly with having their merchandise get under way at the least possible cost and are not essentially sympathetic with the problems of the roads that used to serve them.

At the Community club meeting last Friday evening there was a committee appointed to interview local business men and gain their views regarding better co-operation between the line and shippers from this end of the county. The Banner hopes that something fruitful will result from activities of the committee, but it is difficult to see where, assuming the road received every pound of freight hauling out of this section, it could be placed on anything like a paying basis. A loss on an average of $18,000 a year, or more, could not possibly be picked up along a line 20 miles long under any circumstances.

It is also a well-known fact that Grygla has not been a supporter of either Goodridge or the electric line and in many respects The Banner cannot too severely condemn our neighbors to the north in their attitude. They have a productive country up there and Grygla's importance as a center should not be overlooked. That village's business men are an aggressive lot of youngsters and must be reckoned with. For years past they have been clamoring for some kind of transportation that would set them free, but so far their pleas have fell upon deaf ears. There may be reasons for it, of which The Banner is not aware, but just the same Grygla will some day get what they are asking for; if not from the electric line, then by other overtures.

Goodridge simply cannot provide sufficient freight and passenger traffic to support the electric line and it is idle to even calculate that it can. The road has one salvation, as this newspaper views it, and that is either to extend the line to Grygla or tap other territory to the east or northeast. The road already has the rolling stock and even one year's deficit would build a few miles of right-of-way. Here is Goodridge, a village of 200 persons, expected to sustain a railway system by itself. It simply can't be done and officials of the road must have known this long ago.

Extend the line and give the road a chance to earn a living. It is so completely hemmed in now with its short mileage that it is difficult to understand how the line has been able to exist as long as it has. There are sections of eastern Marshall and western Beltrami county that for years have been agitating for transportation facilities without avail.

The Banner believes that the country is important enough for a railroad. At the present time there are thousands of cords of wood shipped into various parts of the country from around Middle River and Roseau while as many thousands of cords are standing 15 and 20 miles east of this village awaiting the time when it can profitably be hauled to market.

This newspaper would dislike to see the glistening rails of the electric line grow rusty, as if this was brought to pass it would be a severe blow to the future life of the community, but The Banner can't possibly see where the terminus of the electric line can carry the road on its own shoulders.

When spring comes the trucks will again hit the trail and the falling off of revenue for the road will surely result and shippers will dispatch their goods the way they see fit. Nothing can deter them from choosing their own mode of transportation.

AN AD FOR A PASS.

A bill is said to be in the making for introduction into the Minnesota Legislature, providing for the exchange of advertising for railroad transportation.

Some years ago the newspapers were given all the passes they asked for from the railroads. Then this fad changed so that the railroads could contract for advertising in newspapers and pay for the same in mileage.

Then a soft-hearted Interstate Commerce Commission, yielding to the yawps of a group of self-righteous reformers, abolished the practice. Since that time newspaper publishers have paid cash for their railroad tickets. As a matter of fact, the average publisher is dollars and cents ahead under the present system. But there is no earthly reason why advertising and transportation should not legally be exchanged.—Worthington Globe.

GERMANY AND FRANCE.

It should be clearly undestood by the Germans that American criticism of France in her present policy is not support of Germany.

Americans are well agreed that Germany ought to pay to the utmost limit for the damage inflicted on her neighbors by an unprovoked war, and do not believe that Germany has made any uch sincere effort to pay as did France in a similar situation in 1871.

The chief concern of Americans in the present case, says the Crookston Times, is that France does not seem to be choosing the best way to collect from Germany.

At present it looks as if American fears were well-founded and the French are going to meet with nothing but reluctance and sullen opposition from the Germans. But there will be nothing in that attitude for the Germans to brag about. Idleness, sulkiness and sabotage on their part will do the Germans no more good than it does France. The welfare of both countries alike depends on the revival of German industry.

Either nation can drag down both. Unfortunately, it looks just now as if the two are going to co-operate in dragging themselves down, and thus hasten the process.

CURSING!

By REV. H. LUTZ.

Text: "Whosoever curseth his God shall bear his sin. And he that blasphemeth the name of the Lord shall surely be put to death" (Lev. 24, 15, 16.

The second commandment is: "Thou shalt not take the name of the Lord, thy God, in vain."

When Moses asked God who he is, He said: "I AM THAT I AM." So God's name is really God himself, God as He has revealed Himself unto us. This He has done in His word, the Bible, and in the names by which He is called and known. This we should not take in vain, that is, we should not use it thoughtlessly, profanely or insincerely.

One way of taking God's name in vain i by cursing. What is often called swearing, is in reality, cursing.

When we curse we plaspheme God, or invoke upon ourselves or others the wrath and punishment of God.

Cursing is one of the sins which die hard. Pastor Volkening of Jellenbeck had a dramatic way of putting things, but his meaning will apply to our conditions with varying degrees o. fitness. He had his congregation sing the beautiful hymn, "My dear Jesus, I'll not leave." Thereupon he began his sermon as follows: "You liars of Jellenbeck! You sin, 'My dear Jesus, I'll not leave!' You ought to sing, 'My dear moonshine, I'll not leave,' 'My dear dancing I'll not leave,' 'My dear cursing, I'll not leave, etc."

Cursing is one of the pet sins of many even among those who consider themselves Christians. How is it possible? we ask, in view of the wickedness of just this sin. Do you, my dear fellow-wanderer in this vale of tears, who are in the habit of committing this sin, fully realize what it means.

Whoever curses, blasphemes, mocks and ridicules God. Supposing your name were Tom Day. Supposing, further, that you knew and heard that your name were used daily and often by hundreds of people as a byward. All conversation were interlarded with the words, "Tom Day." Would you consider that an honor, would you not be grieved and offended? And what are you compared with the great God of heaven and Savior of the world. Now think it over. How do you suppose the Lord likes it when you misuse, prophane and abuse His holy name, using such expressions as: "Oh, My God," "Oh, Lord," "Jesus Christ," or even such silly and idiotic corruptions of God's name as "Golly," "Jeminy," "Gosh," etc.

Can you blame God for threatening: "Whosoever curseth his God shall bear his sin, and he that blasphemeth the name of the Lord shall urely be put to death." And do not imagine that He never carries out his threat. In France during the Reign of Reason, a certain Chaumette boldly said: "If there is a God, let Him hur a thunderbolt at my head!" There was cursing, blasphemy. Fourteen days later he was lead to the guillotine to be beheaded. "The thunderbolt is falling," called a voice from the crowd. Chaumette became pale and was filled with terror when he heard that.

He that blasphemes God moves a tower which in its fall shatters him.

Not much need be said about the horrible crime committed when one curses his neighbor or himself. It is done by such express ions as "God Damn You!" "I'll Be Damned!" etc. Think of it! To ask God to cast someone into the pangs and pains of eternal hell fire! Do you mean what you say? No! Then for God's sake, for your neighbor's sake and for your own sake, don't say it!

If you have not been guilty of this sin thus far, "Let him that thinketh he standeth, take heed lest he fall." If you are guilty, flee to Him, whose blood can cleanse you, too, from all sin—to the Lamb which was sacrificed on Calvary—Jesus Christ.

Amen!

Work is a great blessing, says the Browns Valley Tribune. You cannot see how, but some day you will say that you were fortunate in your boyhood days because you were compelled to work. Because you cannot get power to do things save by doing them. Look over the successful men you know. Get their history. Nearly all of them were compelled to work in boyhood. They toughened their muscles by hard work and sharpened their brains by looking out for themselves.

Grygla came to the front last week with a nice page writeup in the Minneapolis Tribune, covering the general agricultural possibilities of that section of the country, the page being liberally embellished with attractive pictures. They are too busy hanging together and hustling for the good of the community to do any knocking at Grygla, and many another locality in need of settlers could profitably tear a page from the Grygla code of ethics.

A dog always appreciates a friend thereby having it all over some men.

PASTE THIS IN YOUR HAT.

Pennington county has the champion three-year-old Guernsey cow.

Since 1907 Pennington county has risen from dairy obscurity to one of leadership. A million dollars was paid for dairy products in this county in 1922. Watch us grow in 1923.

The finest wheat in the middle west was raised in Pennington county last year, the prize-winning grain being raised within three miles of this city.

Our alfalfa and clover growing attracted the attention of two of the leading farm journals of the country, the editors in each case coming here for a personal inspection, and both printed column after column predicting an influx of dairy farmers to this section.

There are 27 accredited herds of pure-bred Holstein cattle in the Thief River Falls territory.

There are nine accredited herds of Guernseys.

There are several fine herds of Shorthorns.

We have the climate, the soil, good water, plenty of cheap fuel, fine school systems and neighborly neighbors.

What more do you want?

Job was a patient man, but he never had to chase a collar button under the bureau.

RED CROWN GASOLINE
Your Guarantee of Service

Sustained Pulling Power for Winter Driving

When the snow is deep or the road is bad, you need sustained power—the kind of power that enables your car to buck a drift if necessary—the kind of power to keep moving through a muddy stretch.

If you lose traction and your wheels spin you're stuck. You get sustained rhythmic power when you

Use RED CROWN
The High-Grade Winter Gasoline

Red Crown is true to name, a high-grade winter product.

It starts easily, even in severely cold weather. It enables your car to get away quickly, accelerate smoothly, and it delivers to your rear wheels all the power and speed your engine is capable of developing.

This is the time to switch to Red Crown.

Leads French Army In Germany

Gen. Degoutte is in immediate command of the French troops now in control of the Ruhr district of Germany. At certain points he has thrown his troops beyond the basin boundaries and invaded neutral territory.

ALLEGED MOONSHINE VENDERS ARRESTED

Soft Drink Parlor Proprietors Arrest- in Bovey, Nashwauk and Keewatin.

Federal agents swooped down on several of the western Mesaba range villages the first part of last week and arrested a number of venders of moonshine. At Bovey the place of Al Hussian, owner and operator of a soft drink parlor, was raided and he and his employe, Nick Musha, arrested on the charge of having intoxicating liquor in their possession. They were taken to Virginia on Wednesday, where they were arraigned before United States Commissioner Poirier. They waived the preliminary examination and were bound over under bonds to await the action of the federal grand jury at Duluth. Their trial was set for Feb. 27. United States Prohibition Agent Hess and Indian Agent Hess made the arrest.

Jim Aimonetti and W. A. Gordon of Nashwauk were also arrester on Tuesday night of last week and charged with having intoxicating liquor in their possession. Both conduct soft drink parlors in Nashwauk. They also appeared before the Virginia commissioner and wee bound over to the federal court. At Keewatin Peter Denovich was arrested by the federal men on a similar charge. He also made a trip to Virginia.—Grand Rapids Herald-Review.

THE STATE CAPITAL

By The County Chairman

A graduated income tax with personal property exemptions to take the place of present day taxation inequalities, the elimination of frills and fads and the use of common sense in the carrying out of the state's educational program, and pronounced opposition to an intensive and costly road building program, such as is advocated by C. M. Babcock, commissioner of state highways, were prominent features of Gov. Preus' message to the legislature last week. His excellency's inaugural talk could hardly be styled a classic, but it was full of meat and fairly bristled with economic demands. That Commissioner Babcock had either proceeded on his own hook or failed to connect with his chief in his advocacy of a $20,000,000 bond issue in aid of an immediate and intensive road building program was evident, as His Excellency's message carried very little in support of the plan. The burden of his talk was economy and retrenchment and decided opposition to increased taxation or expenditures. That the Babcock plan of a big bond isue faces trouble is unquestioned. That the cities and every dealer in road supplies and material is behind the issue is evident, but there is much outspoken opposition in both houses.

-‡‡-

Decided opposition to the state convention act of two years ago, repeal of the Brooks-Coleman street car control law, and the passage of a state bank guarantee bill were features of the Farmer-Labor fight for control in the late campaign, but the story now is that the leaders have had a change of heart, especially on the question of proposed election law changes. With the Farmer-Labor party at present a top-notcher in state political affairs it is said the leaders have come to the conclusion that the repeal of the convention law would be unwise. It is also reported that at a recent conference of the party heads block voting was favored and the return of the legislature to party lines advocated. As to the repeal of the Brooks-Coleman street car control law the belief was expressed that such would be harmful, while in the case of a state bank guarantee there was such a difference of opinion that no action was taken. State bankers are badly divided on the latter. The weak concerns want such a law, but the stronger state institutions are decidedly opposed to it.

-‡‡-

A score or more of bills were dumped into the legislative hopper the first three days of the session and it is expected that the figure will reach the hundred mark this week. Rep. Frank Nimocks of Minneapolis as usual was accorded the honor of House File No. 1, a bill providing for certain jury exemptions, while in the senate James Dwyer, also of Minneapolis, came first with a bill relating to the powers and duties of the state board of health. Following came a number of bills, including the creation of the house interim committee on agriculture. These include a state bank guarantee act, the establishing of a system of rural credits as contemplated by an amendment to the state constitution, and a bill regulating the manufacture and sale of filled milk. The rural credits

-‡‡-

With the railroads of the state reduced to nearly fifty per cent of normal efficiency the commercial truck

To Tell Europe When and How Much to Pay Us

This is the House Committee just after leaving the White House where President Harding outlined his policy for the European debt settlement. They are, left to right: Burton, Ohio; Mondell, Wyo.; Sanford and Longworth, Ohio; Campbell, Kan.; Towner, Iowa; Madden, Ill.; Green, Vermont; Green, Iowa.

has been a Godesnd to the farmers and small shippers of Minnesota and the threatened move to burden them with an increased tax because of road deterioration is not favored in some quarters. The hint is that the railroads are behind the move, but so far away they have not shown their hand in a legislative way. The car shortage of the past year cost the potato farmers of the Red River Valley millions of dollars, and what little salvage was realized was solely due to the commercial truck. That regulation might be beneficial is conceded but over-taxation would be suicidal. The truck is the admitted solution of the short haul problem and the sooner farmers and shippers of Minnesota realize it the better. Over 75 per cent of the milk produced in the state is now moved by trucks.

-‡‡-

bill is one of the big things of the session and is due to be heavily debated. The bill proposes a commission for the carrying out of its provisions, but quite a few members in both houses are opposed to the creation of any new boards or commissions. They contend that present machinery of the state can do the work.

-‡‡-

Again and for the fourth time Senator F. B. Kellogg announces and repeats that under no consideration is he considering or will he accept a cabinet or any other political position. He is through and he hopes that the good people of Minnesota will take his word for it. When his term expires Senator Kellogg says he intends to return to St. Paul to resume the practice of law.

-‡‡-

To those concerned with the enactment of a law carrying out the principles of the rural credits amendment to the state constitution it might be of interest to know that the bill as framed is well within the demands of caution. Loans will be on the basis of about sixty per cent of valuation. Interest will be not to exceed five and one-half per cent and the maximum loan will be about $15,000. Needed capital will be supplied through the medium of bonds.

WINTER SPORT IN KARLSTD.

Erik Youngcrans had a lot of exciting sport last week that was also profitable. Erik is quite a hunter and after the last heavy snow he deemed it a suitable time to go after wolves on horseback. Last week he sallied forth with Albert Carlson as his assistant. During their exploits they found three wolves and rode them down and killed them with a 22 rifle. It is a little hard to get the gray fellows out in the open as they like to keep in the sheltering shadows of the timber. The last one they caught just as he was entering the timber, Erik jumped off his horse and caught Mr. Wolf by his bushy tail and held him while he fired a bullet into his head. During one of the fast chases Albert, who rides horseback, took a head first dive into the snow when his horse stumbled and nearly broke his neck, only the soft snow saving him from injury.—Karlstad Advocate.

John Aasen, 24 years old, of Minot, N. D., didn't know what to do with his 8 feet 9 inches and 450 pounds until the screen star, Harold Lloyd, sent out a distress call for a giant to help him on an unfinished film. Now he is in the movies—and he has made good.

Protection of the game and fish in Minnesota's lakes is to be the main feature of the Lakes Protection Bill now being drafted for presentation to the state Legislature. Only nets with a small mesh would be used in seining carp, buffalo and other rough fish from the lakes. The purpose of this would be to prevent the return of any small carp or other rough fish to the water to grow and later be taken by the seine. At the present time it is possible to take rough fish over a specified size, and those below that length must be thrown back in the water.

FOR SALE.

One Ford car with a piston ring,
Two rear wheels, one front spring,
Has no fenders, seat nor plank,
Burns much gas and hard to crank.
Carburetor's busted halfway through,
Engine's missing, hits on two,
Nine years old, ten in the spring;
Shock absorbers, 'n everything.
Radiator's busted, sure does leak;
Differential's dry, can hear it squeak.
Ten spokes missing, front all bent;
Tires blowed out, ain't worth a cent.
Got lots of speed, runs like the deuce,
Burns either gas or grape juice;
Tires all off, been run on the rim—
But it's a d—— good Ford for the
shape it's in.

Moonshine may be slower than a gun, but it will finally get you there.

Every state bank in Minnesota will be called upon to set aside annually one-eighth of one per cent of its average daily deposits to be placed in a state guaranty bank fund, to insure depositors, if the bill prepared by the Minnesota house of representatives pre-session committee on agriculture is passed at the present session of the Legislature. The bill as prepared is titled the State Bank Guaranty Bill, and provides for a bank depositors' fund. It provides also that no bank shall pay interest on deposits directly or indirectly at a greater rate than 5 per cent a year. Under the provisions of the proposed law it shall be the duty of the superintendent to examine every bank doing business in the state, before January 1, 1924, and no assessment under the act shall be levied upon any bank by the superintendent of banks until its condition shall be approved by him. Every bank whose condition has not been approved shall be given until July 1, 1924, to comply with conditions imposed, and if unable by that time to comply shall immediately be liquidated.

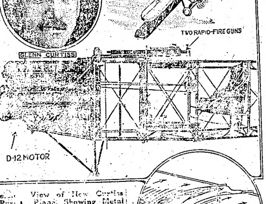
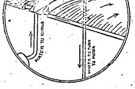
Fastest Pursuit Plane in World Gives America War Mastery of Sky



Sketch View of New Curtiss Pursuit Plane, Showing Metal Construction.



Engine Water Is Cooled by Wing Radiation — Diagram Indicates How Water Is Pumped Through Tiny Grooves in Wing Surface.

The test performance of a new Curtiss Pursuit Plane has caused a sensation in the Army and Navy services. Ever since the Pulitzer Race at Detroit, in which a new all-American motor finished in the first four places, it has been expected that military planes of a super-type would make their appearance at almost any time. The actual performance of the first pursuit ship of a series surpasses expectation.

In many respects, this aeroplane is a departure from precedent. It uses the same Curtiss motor used in the racing ships at Detroit. It is equipped with wing radiators, the most radical advance in the art of cooling a motor since 1917, and which reduces the resistance of the air almost to zero. These features were expected. The construction, however, is said to possess, also, a new feature, in that the entire machine can be stored for a period of twenty years, if necessary, and taken out of storage, ready to assemble and fly on twenty-four hours' notice.

This machine is also stated to be the first real fighting ship of all-American construction and design. While tests are not completed, expert opinion is that it is not only the fastest, but also the most powerful fighting ship in existence in any nation today.

Refreshing

Nash's
DELICIOUS
GUARANTEED QUALITY
Coffee

Packed in moisture-proof container—it keeps its crispy "hot roasted" freshness.

THERE'S a spirit of hospitality in this pleasing blend of selected mountain plantation coffees—the richest and most pleasing kind obtainable. So blended and roasted that it makes a satisfying, full-flavored brew—whether you use hard (alkaline) or soft water. Your coffee taste will tell you.

Air-cleaned—clean-cut—makes crystal-clear coffee, without a tinge of bitterness. You'll love the delicious flavor.

WOMAN SO ILL COULD NOT WORK

Gained Strength, Weight and Now Doing Own Work, by Taking Lydia E. Pinkham's Vegetable Compound

Marion, Ind.—"I was all run-down, nervous and bent over. I could hardly drag around, let alone do my work. I read some letters in the papers telling what Lydia E. Pinkham's Vegetable Compound had done for others and I thought I would try it. Then a man told my husband about his wife and what good it had done her and wanted him to have me try it. I took one bottle and could see what it did for me in a week's time, and when I had taken three bottles I had gained both in strength and weight and was doing my own work. I took it before my last baby was born and it helped me so much. I sure am glad to recommend the Vegetable Compound to any woman who suffers from female ailments, for I know by experience what it can do. I have used Lydia E. Pinkham's Sanative Wash, also the Liver Pills, too, and think them fine."—Mrs. WM. ELDRIDGE, 620 E. Grant Street, Marion, Indiana.

A record of nearly fifty years service should convince you of the merit of Lydia E. Pinkham's Compound.

Constipation

Relieved Without the Use of Laxatives

Nujol is a lubricant—not a medicine or laxative—so cannot gripe.

When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus replaces it. Try it today.

CHAPTER X—Continued.

—12—

Tycle hugged him; Drace shook his hand; and the General exclaimed his astonishment.

"Well, that beats anything I ever heard in my life. It doesn't seem possible, sir."

"No, and I was somewhat taken by surprise, Uncle Howard. But there is often success in a change of occupation, and I had tried everything else. It took me a few moments to adjust myself; then I got a draft, and in Mobile received premium enough on my gold certificate to pay my debts. And now it gives me great pleasure to perform that duty. I owe you, Uncle Howard, twelve hundred and thirty dollars, all told. Aunt Tycle, I owe you five hundred. Virgil, I owe you—but we'll get at that later. Worthy and patient creditors, here we are!"

He took out a roll of bank notes, counted the amount of his indebtedness to his aunt and showered her lap with greenbacks. Then he turned to the General.

"No, Liberty, I don't want the money," protested Bethpage. "If you pay me, it will be the first time you ever returned borrowed money to me, and I don't care to have you establish a precedent that might bring disappointment in the future."

After the family bedtime, Shottle came into Drace's room and requested him to report as to what progress he had made; and Drace told him all that had occurred.

"And now let me tell you a notion of mine," said Shottle then. "If you are waiting for that old sharkbone to decay, you'll perhaps wait twenty years. Attention: I'm going on a little trip tomorrow. In two days, when I come back, I'll drive down to a convenient point; you fetch the girl, into the carriage you jump, and away we go, drive over to some place where we can catch a train, and Cincinnati before old Stepho knows which way we've gone. What do you say?"

"But—what becomes of my oath? Oh, don't think that because I dally I have forgotten it or that in one jot I shall fail to keep it. If I should, in all after-life I'd have a contempt for myself."

CHAPTER XI

"Till Thursday!" Drace had cried. Nadine had echoed it, and another voice, hidden in the cane, had muttered the words with how different a meaning! Now Thursday was come again; and Virgil Drace infirm of purpose, again made his way down the river and through the swamp to his tryst with Nadine.

But Death sought to make a third at that tryst. From afar the sentineled Tony had seen Drace coming. And hardly had the Northerner's canoe touched the bank when from out the cane Tony and Stepho leaped upon him and bore him to the ground, dazed by a blow from an oar.

"Ha! My fine carpetbagger! You seize my wrist and keep my knife from the old General! You steal here to make love to my daughter! Ha! Who will now keep my knife from you? In a little while, now, you will be deep in the marsh, and the green mold will be on your bones. And the old fool at the big house, he die too, for my men will cut his throat. And then—"

A piercing cry from the house, and Nadine ran to them, a knife that mated Stepho's dirk clutched in her hand.

"No—no!" she cried. "You shall not."

Stepho looked up. "Take the girl away, Tony," he commanded.

But Nadine threatened him off with her knife. Then she turned the blade in another direction and spoke again. "If you do not let Virgil go," she said, "I will kill myself—now."

Stepho knew Nadine—the wild heart of her. "You promise never to see this man again, and to marry Monsieur Boyce, like I wish?"

"I promise nothing—except that I will kill myself if you do not let him go."

Stepho hesitated a moment, craft fighting with anger. Then craft won; he or Tony would stroll up to the Bethpage plantation and make an end of the General and Drace that night.

"All right," he snarled. "He can go. But let him never come back here or—" He drew the back of his dirk across his own throat in a significant gesture. Then with Tony he lifted Drace into his canoe; and the young man, still dazed from the blow, feebly made his way out of the swamp.

When he had passed from sight, Nadine dropped her knife and sank to the ground sobbing. Old Stepho turned savagely upon her.

"You liar! You she-wolf! I would kill you, but I promise you to the man Boyce. An' now there come something that I tell you. In you there is not the blood of Stepho la Vitte. But you never shall know your name. You she-wolf!"

He thrust himself toward her, his fangs gleaming in his merciless mouth, but without flinching she now laughed in his face.

"Oh, you make me so thankful that I am not your child. You hang his father and would murder him! But he will be gone; and if you kill me, it makes no matter. And you think I will stay here and let the man come to marry me! I will—"

He seized her, and Tony ran in to help. She fought with the dirk, but they wrenched it from her hand, held her helpless, dragged her into her room; and she lay for a time on the floor while she heard them fastening her in her prison. It was now dark. She got up, went to the window and found that heavy bars had been nailed across it. She lighted her lamp and with a pencil began to write a note to Drace, praying in her heart that she might find some way to send it to him. Little she slept and in the dawn she was at the window, the vines all of them gone. She heard footsteps near, and she tried to look out to discover who it might be, but she could gaze neither to the right nor the left, so closely was she mewed. She spoke, softly, louder and then there drew the darkened form of a man, Batoche, an old frog-hunter whom once before she had employed.

"I am here to borrow the mushkrat-spear for the one day, for mine he was broke; but they are still asleep."

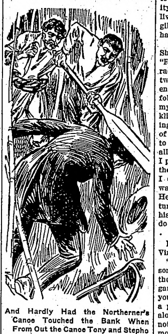
"Come closer, good Batoche, and listen to me. Take this note to Monsieur Drace, at General Bethpage's house—quick, with no one to see you, and I will give you a diamond when you come back."

"Give me the note, an' I be there soon."

She gave him the note, and he hastened away. She stood at the door, wondering why she had not heard her father stirring about. Once she thought she heard him call Tony. After a long time Tony came, and she heard them together as they went out. Then all was silent.

. . . .

Sick in mind and body, Drace made his way back to Bethpage. He made himself as presentable as possible before he entered the house; fortunately, too, the attention of Tycle and the General was at that moment centered on Colonel Josh, who had stopped off to pay them a call—and who showed astonishment when asked to walk out to dinner, though he yielded with astonishing alacrity to the pressure of the General's hand upon his arm. He was busy with a helping of late mustard greens and hog's jowl, when Tycle inquired:



And Hardly Had the Northerner's Canoe Touched the Bank When From Out the Canoe Tony and Stepho Leaped Upon Him.

"And how is dear Lucy?"

"Madam," said Josh, "I am grieved to impart to you a distressful piece of news. She is soon to be married to a man named Spivan."

"Oh, I'm so sorry, Colonel Josh."

"Madam, it is a calamity. Luke Spivan!"

"What's the matter with him?" the General inquired. "Isn't broke, is he?"

"General, the man has money. But do you know what his calling is? I shall enlighten you, sir. This fellow is a dealer in oysters, the—the excrescence of the sea, you might say. And not only that, but he deals in crawfish as well, back-crawling crawfish, sir. I offered her my heart and my home. I told her that I would devote my life to her, and from week to week she put me off. But when this fellow Spivan asked her, I understand she accepted him at a jump, sir. And now I advise him to keep out of my way."

"Oysters and crawfish, eh?" said the General, winking at Drace.

"Those were my words, General—not only oysters but crawfish. I would not have believed it if she had not assured me with her own lips, lips that will please pardon my nearness to profanity."

Tycle's sympathy went out to old Josh, haloed him; and with her eyes she begged the General to drop the subject, but it was sweeter to him than any sugar ever grained in his mill.

After dinner they were in the parlor when they saw a vagabond equipage stop at the gate, an old carry-all drawn by a staggering horse, driven by a ragged negro. There was one passenger in the habilaments of a scarecrow, topped off with a yellow cotton hat—enough to disguise any man on earth save one, and this man was the exception.

"Tycle, what did I tell you!" cried the General. "I knew it as well as I knew my name. Now look at him!"

They looked at him, went out into the hall to meet him, Tycle in convenient tears. The visitor kissed her and shook hands with the men.

"It is not necessary for me to assert that I hold no commission, civil or military," said the vagrant.

"Sit down, sir," commanded the General. And then, surveying him slowly from head to foot: "Will you please state as to whether or not you regard yourself a human being?"

"General," said Tycle, "please don't scold him, for I'm sure he must be hungry."

"My dear, I shall not scold him; but I don't see anything about him that calls for congratulations."

"Liberty," said Virgil, "tomorrow we'll go over and have the parish surveyor run you off a suit of clothes."

"My dear relatives, I thank you for these little attentions; and as to your question, Uncle Howard, let me say, sir, that my claims as to being a human are somewhat vague. One of the first things I discovered about myself was my unreality. When do we eat?"

Tycle ran out and returned with a piece of frosted cake that looked like a corner broken off a marble mantlepiece. The General was laughing.

"Well, Liberty, we are always glad to see you, anyway. It is the unreality, if I may so speak, that spices our lives; and when you come with your gilded worries, you enliven us. Where have you been, anyhow?"

"I've been wherever there is," said Shottle, gesturing with his cake. "First I went to Memphis, to the races, and gave old Skinny Hughes two hundred for a sure card on the entries. Lost ten thousand. Then I followed the horses to Lexington, with my bank account leaking like a sprinkling cart. But why linger when nothing can be swifter than the approach of poverty? Finally I sold my clothes to a negro preacher and invested my all in lottery tickets. It seemed that I possessed myself of all the figures of the multiplication table, didn't see how I could possibly miss, but I did. It wasn't laid out for me to win again. He gets to a certain pinnacle of fortune, slips off, and spends the rest of his life struggling to get back. When do we eat?"

. . . .

Long after bedtime Shottle came to Virgil's room.

"Virgil, you know I've got to hit on something of a permanent nature. So the question is, now that I've quit gambling, what am I going to do? If you'll not go to sleep, I'll tell you of a plan. Mark me: I have observed, along with thousands of others, that nothing digs deeper after rainy-day money than a circus and menagerie. It is known that the poor man of the South, and especially the negro, will sell his cookstove to buy a circus ticket. Now comes my plan, and mind you, I strive to keep it from being too sudden. Attention! You buy a circus, and I'll go along as ring-master. That is the one thing I am really fitted for. You never saw me crack a whip, did you?"

"Don't believe I ever did."

"All right, you've got something to look forward to. . . . Yes, I'll be the ring-master, and—"

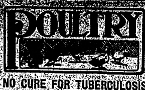
"And bet an elephant on the turn of a card," said Virgil.

"Ah, one of my own, perhaps, but not one entrusted to me. I am not an embezzler of elephants. I wouldn't bet a garter-snake on a sure thing. Besides, I told you I'd quit gambling—that is, I'm quitting. It isn't wise to expose my constitution to the shock of a sudden change. . . . Well, good night."

(TO BE CONTINUED.)

Kimono Copied From Nature.

The pattern of the child's kimono, exuberant, dainty or fantastic, is but a reflection of nature in Japan. A profusion of bowers is spread to brighten the Japanese children's year. In April, they go picnicing under the cherry blossoms, a canopy of delicate bloom. The birthday of Buddha comes just when these are at their best; thousands of children gather in one of the parks for the flower festival, offering flowers to the infant deity; the image stands under a canopy of blossoms. Then as azaleas, peonies, wistaria, and lotus follow in season, and, finally, the wonderful chrysanthemums, the children are out to enjoy them all. The splendid maple leaves of autumn are at once a most fitting background for Japanese children and a source of keen delight.



POULTRY

NO CURE FOR TUBERCULOSIS

Most Common Symptom of Disease Is That Fowls Get Very Thin, Waste Away and Die.

Tuberculosis is one of the most common diseases found in the poultry flocks of the corn belt, says J. J. Warren of Iowa. The disease develops rather slowly. The infected birds do not usually show any symptoms until several weeks have passed, and in many instances several months after they have contracted it.

The most common symptom of tuberculosis is that the birds get very thin, "waste away" and finally die. Another is to find a bird going lame in one leg without showing any outward sign of injury, even while the bird is in good health. The bird may live several weeks after this lameness first shows up.

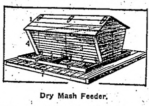
To make sure that the disease is tuberculosis, it pays to kill and examine the insides of a very sick bird. The liver, spleen and intestines are often enlarged, but contain light yellow spots which are hard, sandy lesions. Lungs are seldom found to contain lesions.

There is no cure for tuberculosis except to keep it from spreading. Burn the dead birds or bury them; kill the infected birds without spilling any blood; don't try to keep aged hens; and keep the henhouse clean, especially from droppings. Use lime on the soil where the flocks feed, and change the ground. It helps some to separate the young chicks from the old ones and to be careful when buying new stock. Sanitation is the biggest help.

HOPPER FOR FEEDING FOWLS

Model Shown in Illustration Appears to Afford Best Means of Rationing Hens.

After using many types of dry mash feeders in the poultry house, the model shown in the cut appears to afford the best results. The fowls cannot stand on the top of the feeder, or get into it.



Dry Mash Feeder.

It is also difficult for them to waste any of the food by throwing it out, as the sloping guard in front prevents that. A sloping bottom should be put in, as suggested by the dotted line. Such a feeder can be made by cutting down an empty grocery box.

PROFITABLE TO CULL FLOCK

It Is an Art Anyone Can Acquire, and the Sooner Unhealthy Fowls Go the Better.

Culling chickens is to the poultry keeper what milk testing is to the dairyman. Fortunately it is an art anyone can acquire. The sooner the flock is culled the sooner expenses are cut down. Then, too, the prices are higher earlier in the season. The man who is making the most of his poultry, systematically culls. Birds lacking in health, and general purpose breeds not laying and two years old, or over, should go. The older the bird, the less profitable she becomes.

MATURE GEESE AS BREEDERS

Fowls Are Usually Best for Breeding When From Three to Five Years of Age.

Toulouse geese ordinarily will not breed until about two years of age, and they do not mature for another year. They are usually best for breeding when from three to five years old, although the females may be kept until they are from twelve to fourteen years of age, the ganders not generally being kept after they are eight to nine years old.

POULTRY NOTES

The busy hen is the laying hen.

* * *

There are poor laying hens in all breeds.

* * *

In poultry raising the breed is important, but the man or woman behind the breed is more so.

* * *

A sick hen may be faded but will not show the vigor that is shown in a good layer.

* * *

With colder weather more corn may be fed but it is easy to overfeed of corn, even in winter.

* * *

For the sake of keeping peace in the neighborhood, it is a good plan to locate the turkey flock now and then.

* * *

Clean floors are needed for clean nests. If the floors are dirty, mud is tracked into the nests, and gets on the eggs from the hens' feet.

Boiled Loon Recipe.

Uncle Augustus, the sage of the village, was engaged in conversation with one of the young hunters who was enjoying the good ducking.

The young hunter wanted to know something about a loon.

"Ye never see a loon?" asked Uncle Augustus in amazement.

"No," replied the young man. "I never did. Are they good to eat?"

"Yes, they're good to eat, if you know how to cook 'em. You see, you put the loon in a kettle of boiling water and set it on the stove. Then you drops a flatiron on it, and when the flatiron is done th' loon is ready ter eat."—Judge.

A Married Woman's Advice

Every Woman Should Read This

St. Paul, Minn.—"During my early married life I became sort of rundown and suffered with general feminine troubles. I took Dr. Pierce's Favorite Prescription and it built me up in health and strength. Then about two years ago I suffered with functional disturbances, became weak and all run down in health, and I again took the Favorite Prescription and it gave me the same help as before; it built me up in health and strengthened my whole nervous system. Favorite Prescription is a splendid woman's medicine and nervine."—Mrs. S. L. Roberts, 291 Cliff St.

EXPERTS PLAN FARMER HELP

Urge Consolidation of Banks and Cleaning of Farmers' Wheat for Market.

WOULD SAVE WRECKS

Instructors in Agricultural Colleges of Minnesota, North and South Dakota and Montana Make Recommendations.

Minneapolis—Recommendations designed to readjust the farming industry in the Northwest were presented to 50 Twin City business men by W. C. Coffey, dean of the University of Minnesota college of agriculture, at a meeting here. The recommendations were in the form of preliminary committee reports by the spring wheat regional conference, formed by instructors in the agricultural colleges of Minnesota, North and South Dakota, and Montana to solve farm problems common to all four states.

Would Save Wreckage.

"We are attempting to save the wreckage which may be so near in agriculture," Dean Coffey explained. "We are vitally concerned in the present problems, but we are holding great confidence in the future in the effort to make farming a less hazardous occupation."

The recommendations of the various committees called for:

Limitation on the establishment of new banks and consolidation of existing banks.

Marketing Training.

Through cleaning of grain at shipping points.

Definite location of various agricultural areas.

Mobilization of a better and more adequate harvest labor supply.

Training of producers in marketing systems.

Reduction of freight rates.

BOTH SIDES CLAIM GAINS

Coal Is Being Dug Despite Strike Orders—Prices Climb.

Duesseldorf — The Germans and French are both claiming the advantage in movements in the economic battle which has been in progress here for the past ten days. The Germans hold that the strike of the miners is a complete success, but the French declare that the order for a general strike has not been followed by the miners.

A press correspondent visited the mines at Altenessen, which is the junction for Essen, and found practically the entire force at work. Coal was coming to the surface in quantities averaging between 30 and 40 per cent of the regular output.

40 Per Cent of Trains Canceled.

The railways are running on a decreased schedule, about 40 per cent of the trains having been canceled. The tramway service is normal both in Essen and Duesseldorf, while the steel and iron trades are as yet undisturbed.

Telegraphm and postal rates have been tripled and the railway fares doubled. It now costs 1,500 marks a word to telegraph to London and 900 to Paris, while the postal rate on a letter from Duesseldorf to Paris is 150 marks.

STRIKERS SCORE RAILROAD

Little Rock, Ark.—Declarations of two witnesses—"Red" Orr and Luther Wise—that they plead guilty to a charge of arson of which they were innocent, because of fear that they would be lynched if they went to trial and assertions that high officials of the Brotherhood of Railroad Trainmen were forced to leave Harrison, Ark., by a "mob," was before a committee of the Arkansas legislature at the end of the opening session of an inquiry ordered in connection with recent disorders incident to the strike of railroad workers along the line of the Missouri & North Arkansas railroad.

Orr and Wise, strikers, who declared they accepted penitentiary sentences of from seven to ten years each, asserted that when they demanded a trial they were told by Circuit Judge Shinn that their lives were in danger.

Both denied any connection with the burning of the bridge with which they were charged.

Orr asserted that when visiting their grand lodge members of the Brotherhood of Railroad Trainmen, came to Harrison last April, they were waited upon by a "mob" of armed men, with rifles issued them from the general offices of the road, and served notice to "get out."

Cleared of Murder Charge.

Bottineau, N. D.—After deliberating 14 hours, a verdict of not guilty was returned by the jury in district court here in the case of Leonard Miller, 24, of Harlem, Mont., charged with murdering William Mahlstedt, farmer of Barnum, Minn. Mahlstedt's decomposed body, the head pierced by a bullet, was found hidden in some brush along a fence, apparently about six weeks after death. The case centered largely over the identity and possession of an auto said to have been driven by Mahlstedt when last seen.

Addressing the House.

It may be believed that Mr. Scrymgeour has made a new record by addressing the house as "Friends," though there have been some famous departures from the strict rule of "Mr. Speaker, sir." Pitt once addressed the speaker as "My dear sir," to the scandal of the precisians. Macaulay was very indignant with a new member of opposite views who was guilty of "Ladies and Gentlemen," and one has heard a tale of a member who addressed the house as "Gentlemen," and was sternly called to order.—London Daily Chronicle.

DYED HER BABY'S COAT, A SKIRT AND CURTAINS WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her old, worn, faded things new. Even if she has never dyed before, she can put a new, rich color into shabby skirts, dresses, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything. Buy Diamond Dyes—no other kind—then perfect home dyeing is guaranteed. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade or run.—Advertisement.

Ancient Mine Workings.

A discovery of considerable archeological interest has been made 30 miles north of the Leeupoort tin mines in the Transvaal, near the Bechuanaland border.

A prospector has unearthed what is apparently a portion of an ancient smelting plant and a quantity of slag, which is being submitted to expert examination.

Nearby were old workings and a substantial body of ore containing a whitish metal, thought to be platinum or molybdenum. Mining engineers have left for the scene of the discovery.

To Have a Clear, Sweet Skin

Touch pimples, redness, roughness or itching, if any, with Cuticura Ointment, then bathe with Cuticura Soap and hot water. Rinse, dry gently and dust on a little Cuticura Talcum to leave a fascinating fragrance on skin. Everywhere 25c each.—Advertisement.

NO CANARIES IN CANARIES

Marines Who Had Expected to Stock Up There Met With Some Disappointment.

Canaries are scarcer than hens' teeth in the Canary islands, according to the United States marines of the cruiser Pittsburgh, who arrived at Gibraltar recently after a visit to Las Palmas, the principal seaport of those islands.

The marines expected to find canaries hopping all over the islands, waiting for salt to be sprinkled on their tails. Disillusionment came with their first visit ashore.

The islands got their name from canis, the Latin name for dog, and the marines say there are fewer canaries in the Canaries than their are snakes in Ireland.

Relatives and sweethearts of the sea soldiers who were promised a shipment of feathered songsters at an early date will now have to wait until the marines have an opportunity to visit a bird store in the United States.

Any marine on the Pittsburgh is ready to sell a canary cage for a song.—From Letter to the Philadelphia Evening Public Ledger.

Settled.

"Well, want to marry my daughter, I suppose," snapped the grumpy old millionaire as he glowered at the young man before him. Then, adjusting his glasses, he added: "By the way, aren't you one of my daughter's former suitors?"

"N-n-no, sir," faltered the timid youth.

"Well, you are now," said the old grouch as he turned away. "Get out!"—Boston Transcript.

NOT THAT KIND OF A BAT

Humanitarian Needlessly Alarmed Over Action Which He Thought Savored of Cruelty.

The man was a vegetarian and believed that his mission was to safeguard every animal, bird and fish which required protection. One day he came upon a group of boys throwing stones up into a tree. He decided to protest.

"What are you doing, boys?" he asked.

They stopped and stared at him.

"Come! Is it a squirrel, or a bird."

"No, sir," replied one of the boys. "It's a bat."

"Poor bat!" cried the man. "And why do you molest it? Has a bat no right to live? Has it not the same right to existence as yourself? What has the bat done that you should hurl stones at it"

"Please, sir," interrupted the boy, "this is a baseball bat we were throwing at the nuts."—Pittsburgh Chronicle Telegraph.

Just a Simple Matter.

"If I ask for 'est one thing, mother, can I be sure to get it?" quietly spoke Elise, the four-year-old member of the household. Mother, with an air of relief, said: "Yes, mother promises that you shall have one thing you want, but you must not ask for anything else."

"All 'wight," lisped the darling. "I want 'est a toy store."

News to Him.

"My wife has been nursing a grouch for a week." "That so? I didn't know you were ill."

GOT OLD GENTLEMANS "GOAT"

College Boy's Expression Made Him Fear Money Had Been Wasted on His Education.

Whenever old Eben Toothaker doesn't understand what you say he says, "What say?" So do his neighbors. It is not strange that he doesn't understand his college boy son's way of asking the same question.

Old Eben's wife noticed that he was somewhat depressed the evening after the boy had got back to the farm from his first year at college. "What's the matter, Eben?" she asked.

"Mary, I've spent $900 on that boy's education, and I'm afraid it's wasted," said Eben. "He don't know as much as he did when he went to college."

"Why, what do you mean, father?"

"Well, tonight I said to him that it looked to me 'sif it might rain tomorrow, and what do ye s'pose he said?"

"Why, I don't know. What did he say?"

"Well, sir, he begged my pardon!"—Youth's Companion.

Endangers Fur Animals.

According to Dr. William T. Hornaday it takes 80 skins to make the average mink wrap, 200 for a squirrel coat and 280 for a black mole coat, 90 skins may go to the making of a striped skunk jacket, and 800 to a Siberian ermine wrap. Before many years, if the present rate of slaughter continues, many of our most interesting animals will be practically extinct; even now the trapper is forced rather afield, and skins once unmarketable are being used to supply the deficiency.—Scientific American.

Nerves of Steel—

The successful man of today is clear-headed, self-reliant. His keen eye and steady hand result from abundant, self-controlled energy, and steady nerves.

Such a man can overcome difficulties because he is physically fit. Foolish habits of food and drink have no place in his scheme of things. When he finds that coffee disagrees he promptly changes to healthful POSTUM.

This pure cereal beverage is not only free from the health-disturbing drug element in coffee, but there's comfort and satisfaction in its delicious, full-bodied flavor.

You'll find Postum a factor for Health.

"There's a Reason"

Your grocer sells Postum in two forms: Instant Postum (in tins) prepared instantly in the cup by the addition of boiling water. Postum Cereal (in packages) for those who prefer to make the drink while the meal is being prepared; made by boiling fully 20 minutes.

Made by Postum Cereal Company, Inc.
Battle Creek, Michigan.

TAXATION.

With apologies to Denver Post.)
Tax the people, tax with care,
To help the multi-millionaire.
Tax the farmer, tax his fowl,
Tax the dog and tax his howl.
Tax his hen, and tax her egg,
And let the bloomin' mudsill beg.
Tax his pig, and tax his squeal,
Tax his boots, run down at heel;
Tax his horses, tax his lands,
Tax the blisters on his hands,
Tax his plow, tax his clothes,
Tax the rag that wipes his nose;
Tax his house, and tax his bed,
Tax the bald spot on his head.
Tax the ox, and tax the ass,
Tax his 'Henry,' tax the gas;
Tax the road that he must pass,
And make his travel o'er the grass.
Tax his cow, and tax the calf,
Tax him if he dares to laugh,
He is but a common man, so
Tax the cuss, just all you can.
Tax the lab'er, but be discreet,
Tax him for walking on the street.
Tax his bread, and tax his meat,
Tax the shoes clear off his feet.
Tax the payroll, tax the sale,
Tax all his hard-earned paper kale;
Tax his pipe, and tax his smoke,
Teach him gov'ment is no joke.
Tax their coffins, tax their shrouds,
Tax their souls beyond the clouds.
Tax all business, tax the shop;
Tax their incomes, tax their stocks;
Tax the living, tax the dead,
Tax the unborn, before they're fed.
Tax the water, tax the air,
Tax the sunlight, if you dare.
Tax them all, and tax them well,
Tax them to the gates of hell.
But close your eyes so you can't see
The coupon clipper go tax free.
—Don Lupton.

Dr. Theodore H. Dahl Dead.

Dr. Theodore H. Dahl, former head of the Norwegian United Lutheran Church of America, died last Thursday at his home in Minneapolis. He was 74 years of age and lived in retirement at 3117 Park avenue. The funeral, which was held Sunday, was attended by church dignitaries from many points of the northwest.

NO WONDER GERMAN GIRLS WANT SOLDIERS TO REMAIN

German girls who have sweethearts among the American troops on the Rhine and who do not favor the return of the soldier boys to the United States, are justified because when the boys leave German soil it will take a small fortune to communicate with them.

A letter from Germany, received at the Bemidji post office this week, would show that the problem of financing regular correspondence with a sweetheart in America would be a big task for the ordinary German girl. The letter, which was just an ordinary piece of first class mail, bore 100 two-mark stamps, which under ordinary financial conditions would represent about $48.00 in American money. The stamps are pasted together with one end attached to the letter and the sheet of stamps is four times the size of the letter. Registered mail would be almost prohibitive, according to Postmaster Ritchie, the cost of sending a registered letter from Germany to the United States being 400 marks. German marks are now lited at Bemidji banks as being worth one cent a hundred.—Bemidji Sentinel.

That part of Europe that isn't in Dutch, is in debt.—St. Cloud Times.

January 12, 1923.
Gladys Klein, Grammar.

My Christmas Vacation.

The day after our program mother was ill and father went to town to buy Christmas things and left us children to battle for ourselves.

In the evening mother was well again and father came home from town with lots of things, but we didn't see a single thing until Christmas evening.

We had a real good time Christmas eve, even sister Ruth enjoyed herself.

We all stayed at home on Christmas day looking over the presents we received. The rest of the week we were visiting, except Saturday.

One day the folks went to town and left us alone, but we had a good time. We cooked candy and played games. While we were playing our candy almost boiled away, only a little bit was left.

When Saturday came I was rested and felt like working, so we fixed up for New Year's. On New Year's eve we stayed up until 1 o'clock and ate candy and nuts, and also waited for Christmas Fools, but our luck was slim as no one came. New Year's day we spent playing dominoes, eating our candy and nuts. We received a large salmon fish from Seattle, Wash., but it wasn't a live one. During the rest of my vacation I had a very bad cold.

The last day we determined to have a good time, and we had it, too.

Heaters

MY LOSS WILL BE YOUR GAIN!

HISTORICAL SOCIETY

BAND RETURNED TO LIFE BY MUSICIANS

Morlan Bishop to Be Tutor and Swing Baton at Rehearsals.

The meeting held at the schoolhouse Monday night for the purpose of reorganizing the band was a success from start to finish. The turnout was very satisfactory and pleasing to those who have striven to agitate a reawakening of this worthy musical division.

H. A. Halvorson, presiding, called the meeting to order and stated the purpose of the assemblage, which was to discuss the present financial standing and the future prospects for maintaining the organization. The hiring of a bandmaster was the question that received the most consideration and it was finally decided to turn the band over to the leadership of Morland Bishop. Two nights a week were set as band rehearsal nights, Monday and Thursday. A business meeting was held with the following results:

H. A. Halvorson was again elected president, he having served the band the year previous in this capacity. Joe Christianson was elected secretary and treasurer.

The following is the band personnel as outlined at the meeting: Conductor, Morland Bishop; cornets, Martin Moen, John Vraa, Herman Kjos and Harry McDonald; clarinets, Ludolph Urdahl and Edwin Nelson; trombone, P. O. Tvedt; baritone, H. B. Rockne; tuba, Joseph Christianson; mellaphone Daniel Payne; alto, Noble Urdahl; bass drum, H. A. Halvorson; snare drum, G. C. Gulrud.

Two new members were also added, they being Maurice Resan, who will play an alto, and Rudolph Resan, who will play the drums.

M. J. Stephenson is remodeling and repairing his ice house prepapratory to the annual filling for summer use.

SCHOOL NOTES.

Mr. Poppenhagen visited school on Thursday and Friday.

* * *

The English III class has been taking up debating work the past week as part of their English III course. The class has taken a deep interest in this work and some very heated debates have been the result.

* * *

The Cooking Class began its first day of laboratory work by making cookies Tuesday.

* * *

Esther Clementson started school here this week. She is a member of the first grade.

* * *

The high school students have had charge of the morning exercises this week. They have been entertaining by means of readings and musical selections.

* * *

Mr. and Mrs. E. J. Erickson. Misses Pearl Bergerson, Adeline Davids and Minnie Lindblom transacted business in Thief River Falls Tuesday.

* * *

The following books have been added to the school library this week: Drinkwater's "Lincoln," Cathra's "My Anthony," Snow's "High School Prize Speaker," Ramsey's "Short Stories of America," Rehbamy's "A Hidden Treasure," Harris' "Nights With Uncle Remus," and Palmer's "Trades and Professions."

* * *

Folrence Halvorson has returned to school after a week's illness.

* * *

After a period of absence Morris Erickson has returned to his school duties.

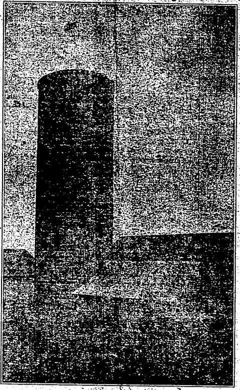
* * *

The seventh and eighth grades organized a secret society Monday. The following officers were elected: Tillie Forte, president; Eleanor Ronken, vice president; Hattie Bundhund, secretary, and Bennie Mandt, treasurer.

* * *

Tuesday morning the eighth grade room was entertained by an unseen musician.

Silos, Sugar Beets and Dairy Cows Would Make Eastern Pennington a Mecca for a Hundred Homeseekers



SUPERINTENDENT OF SUNDAY SCHOOL SURPRISED AT HOME

Tuesday night the teachers of the Norwegian Lutheran Church Sunday school drove out to the Otis Ronken home and surprised Mr. Ronken, who has served efficiently in the capacity of superintendent since the beginning of the school. Mr. Ronken was presented with a fountain pen as a token of their appreciation. The follolwing were the guests: Mrs. Jay Payne, Mrs. Gilbert Gunderson, Mrs. Inez Everhart, Misses Vivian Thoreson, Guida and Thelma Gilbertson. Leonard Gunderson acted as teamster for the surprising party.

M. The Erie Ladies' Aid and confirmants meet at Lokken's place the 7th of this month. Sunday, Feb. 11: Norwegian services at Torgerson at 2 P. M.

GOOD ROADS PROVED PAYING INVESTMENT

Minnesota Already Collecting More From Tourists Than It Raises for All Highway Purposes.

Automobile tourists left more than $30,000,000 of new money in Minnesota last year, according to conservative estimates given in a highway bulletin. Although Minnesota has only just begun to develop its attractions for its tourists, it is added, automobile tourists in the state last season spent nearly $5 for every dollar paid by motor vehicle owners here for better highways, and $4,000,000 more than the aggregate raised in the state each year for all road work.

"It must be realized that it was our improved state trunk routes or so-called Babcock highways that made it possible for these people to visit us," said a good road advocate, "and if we are to continue to attract these people to Minnesota our road building program must be continued so that our highway system will stand on a par with the interstate highways leading into the state."

Here are the bulletin figures:

State highway traffic census takers counted a daily average of 15,568 passenger automobiles with licenses of other states, and it is estimated that they carried 50,000 visitors. Assuming that 30,000 were entertained at homes or camped out, it would mean $60,000 at $2 a day, and that the remaining 20,000 stayed at hotels at $5 a day for lodging and meals, bringing $100,000, would make a total of $160,000 a day for subsistence. Their miscellaneous expenditures at $1 a day would mean $50,000 more. The average tourist travels 150 miles a day, consuming 10 gallons of 24-cent gasoline and a quart of 30-cent oil and the tourist cars took $42,033 a day of fuel and lubricant.

So if the given averages are applied for only three months—a 120 day season—there was $30,240,000 of money left in Minnesota last summer by the highway tourist.

Ludvig Larson of Holt was a business caller here Tuesday.

RURAL SCHOOLS HOLD CONTEST

Arnold Akre, Dist. 57, and Gertrude Swanson, Dist. 37, Are Winners.

A contest between four rural schools each sending two representatives was held Saturday afternoon in the local schoolhouse. Among the schools represented were Districts Nos. 37, 57, 70 and 228.

District 37 is taught by Miss Agnes Newton, who brought two students, Gertrude Swanson and Myrtle Ellingson. Miss Martena Storli, with Arnold Aakre and Ralph Erickson, were representatives of District 57. Miss Clara Ferdinandsen bringing James Lee and Myron Lien, represented District 228. Miss Agnes Forslund was present from District 70, but brought no contestants.

The contest was composed of oral and written dictation and spelling. Each student received a mark on their work in the various contests. After the conclusion of the examinations the marks were added together to determine the winners. It was then found that Arnold Akre of District 57 and Gertrude Swanson of District 37 were the receivers of the two highest marks.

BIRTHDAY PARTY.

Nine of the young friends of Jesse Leslin surprised her Sunday in honor of her fifteenth birthday. The afternoon was spent in playing games, etc. The following girls were the surprisers: Tena Gaudland, Alice Stephenson, Ida, Hattie and Martha Bundhund, Hazel and Eunice Thoreson, Edith Gunderson and Thelma Torgerson.

It is better to dream than to never have a vision of happiness.

You can always toke a month off—if there's calendar handy.

GOODRIDGE CITIZENS AT SUGAR BEET MEET

Goodly Number of Business Men Arouse Village to Benefit of Plant.

Goodridge was well represented at the sugar beet meeting held at the Auditorium at Thief River Falls Tuesday night when a score of business men and farmers took the electric line special which had been placed at the disposal of the towns along the branch.

Some splendid information was picked up at the meeting as to the benefits and the meaning of the sugar beet industry and local citizens now having something tangible to work on.

A number of acres were pledged for the eastern end of Pennington county.

The following are some of those attending the meet: J. A. Sundquist, V. C. McLeod, Nick Bundhund, Charley Thompson, J. P. Jensen, H. B. Rockne, Christ Urdahl, T. M. Thoreson, Daniel Payne, Morlan Bishop, Albert Halvorson, Sam Gangness, Oliver Tommerdahl and Theo. Tandberg.

ATTEND WEDDING DANCE.

The following from this village attended the wedding dance at Erie Saturday night. The dance was given by Mr. and Mrs. John Erickson Jr.: Miss Lillian Stephenson, Cora McEnelly, Susie Lindvick, Olga Grimley, Alvina Holte; Messrs. Algett Nelson, Ellard Iverson, Bert Tanem and Ellard Wiseth and Mr. and Mrs. Anton Lien.

LUMBER FOR SALE.

I will start to saw lumber about March 1st and all who want tamarac dimensions or roof lumber, call on me or write.

NEWS REVIEW OF CURRENT EVENTS

General Strike Begins in the Ruhr on Orders From the German Government.

FRENCH RETALIATE QUICKLY

Isolate Occupied Region From Rest of Germany—American Troops Leave for Home—Britain and Turkey Can't Agree About Mosul—Doings in Congress.

By EDWARD W. PICKARD

> SENATOR LAFOLLETTE and the other "progressives" in congress are preparing for a campaign against special privilege in the federal law. In a letter to LaFollette, Former Secretary of the Treasury Shaw, speaking for "conservatives," demands a showdown on the special privileges to combine and restrain trade granted by congress to farmers and organized labor and denied to manufacturers, employers and other elements. What do you think about this issue?

FRANCE'S operations in the Ruhr continue to monopolize most of the attention of the world. Developments followed one another fast last week, but it is yet too early to predict the success or failure of the maneuver. Having occupied the entire Ruhr basin, the French announced their military movement would go no further at present and turned their attention to the difficult task of persuading or compelling the Germans to continue the mining of coal and other normal activities. At first the coal magnates said they would produce the coal if paid for it by the French, but their own government ordered them to cease, and this order they at once obeyed. A number of them, including Fritz Thyssen, son of the second richest man in Germany, were arrested and tried by court-martial. The French prosecutor admitted there were extenuating circumstances in that the prisoners had obeyed their own government and asked only that they be fined. All were found guilty and fines totaling about $20,000 were imposed. Appeal was taken to a higher French court in the Rhineland.

The immediate effect of this procedure was a general strike of all workers in the Ruhr, which had been threatened for several days. To this the French responded with orders for the complete isolation of the district from the rest of Germany. It thus will become a buffer state economically attached to France and Belgium. The French would have liked to include the entire Rhineland in this buffer state, but refrained because that would complicate the situation. In Berlin it was believed they planned to include not only the Rhineland but also the Saar and the Palatinate. If the Germans do not weaken, not only the official duties in the Ruhr but also all of the work will have to be done by the French. They were planning to import a large number of Polish miners, for above all France must have coal from the mines there. General Weygand was made French high commissioner in the region and established himself in Essen, being accompanied by Yves Le Trocquer, the French minister of public works, and experts from that department who have been put in charge of the exploitation of the mines.

All German rail workers in the Ruhr quit on orders from Berlin, and the tie-up was almost complete for the time being. However, several thousand railway men were sent from France to the occupied region. A dispatch from Warsaw said that the Polish war ministry has ordered men of the Polish and former German armies whose service time has expired and who are

mines, smelting works and postal services to hold themselves at the disposal of the French government.

POLAND has assured the German foreign office that it is preserving the strictest neutrality regarding the Ruhr occupation, that it has no bellicose intentions and that a recent movement of troops from the Lithuanian frontier has no significance. Great Britain seems somewhat at a loss on what attitude to take. She has no intention of abandoning her ally, but is skeptical of France's success. Some public men and some newspapers there are demanding that the British army of occupation be withdrawn, and it was decided that a cabinet meeting should be held to discuss this question. Italy is still hoping that the whole affair can be settled by mediation and it was reported in Rome that Premier Mussolini would ask the United States to issue a call for a world conference. Premier Branting of Sweden notified France that he would suggest to the League of Nations that it intervene, at the meeting of the league council on January 29. So far Germany has consistently refused to take part in any mediation parley so long as French troops are in the Ruhr.

THAT the United States will interfere in the embroglio in any way is said in Washington to be quite improbable, at least for the present. Under the situation that has now developed the administration believes that if it does anything, it must do something that will be helpful and not harmful, and up to the present moment officials hold that there is no opportunity for anything more than has been done without making the situation worse.

If the United States should make a gesture toward France, the French would claim that the Germans had thereby been stiffened in their resistance and if the Ruhr expedition fails, they would blame the United States for its failure. On the other hand, if the United States should assume a course which the French could interpret as encouragement, the feeling of exasperation in Germany would be heightened. Either way no good would be done and the United States would be incapacitated for helpfulness in the future.

ON WEDNESDAY, with simple, dignified ceremony, the American flag which had been flying over Ehrenbreitstein for four years was lowered as American and French bands played "The Star Spangled Banner"; Major General Allen turned the old fortress over to the French, and the little American army of occupation, with tears in its eyes, took train for Antwerp where it was given a rousing welcome by the Belgians. Then the boys boarded the transport St. Mihiel and sailed for home. In the Rhineland there remains only a small detachment to complete the details of the evacuation. Secretary of War Weeks has ordered that there shall be no American officers with the French or Belgian forces of occupation as observers.

DISPATCHES from the Near East and from Lausanne were not so reassuring last week. It seems the Mosul question was not settled outside of the peace conference and yet remains the chief obstacle in the way of an amicable settlement. Great Britain insists that the dispute must be referred to the League of Nations, and the Turks are equally insistent that the matter be settled by a plebiscite. Lord Curzon gave the world a good laugh by stating that England was not interested in Mosul because of its alleged oil richness, but only in keeping her pledge to the Arabs of Irak that they should not again be placed under Turkish rule. Most of the other questions arising at Lausanne have been settled and the conference, it is said, will go ahead with the drafting of the treaty. In this will be a clause referring the Mosul matter to the league. This will give the Turks an excuse to refuse to sign, and then, according to Curzon, there may be a renewal of war in the Near East. It was announced that France and Italy would not associate with Great Britain in forcing Turkey to accept the treaty.

The Angora government, after protesting to the allied high commissioners against the concentration of Greek forces in western Thrace, has called to the colors all the Turkish reserve classes, 25 in number, according to dispatches from Smyrna. A large delegation of East Indians is at Angora proclaiming its object to be the solidification of the Islamic world; and an Egyptian delegation also is there asking Kemalist support for the struggle for Egyptian independence.

ILLINOIS is still blushing for the verdict in the Herrin mine massacre trial. But the state senate has made what amends it could by voting an ample sum to enable the attorney general to continue the prosecutions. The verdict at Marion might be considered as based on either the alibis offered or the defense presented that the killings were justifiable under provocation. Unfortunately for itself, organized labor has chosen to accept the latter interpretation. The murders were not committed in the heat of conflict; the men were massacred in cold blood after they had surrendered.

PEACE in the bituminous coal field for this year and probably longer is assured by the new agreement signed by the operators and officials of the United Mine Workers of America in New York. The agreement covers the tristate competitive field of Ohio, Indiana and Illinois and will be used as a standard in the rest of the bituminous territory. The terms are not vitally different from those of the existing agreement.

THE War Department has appealed to the senate to restore to the army bill for defense the appropriations rejected by the house for the Oahua and Panama canal defense projects and for maintenance of power works in Manila. The amounts asked by the department were cut by the house from $886,090 to $313,500. General Wells, speaking for the department, said the original sums were not excessive, being based on fundamental principles of defense.

HEARINGS were held last week by the senate committee on immigration on several proposed measures. One, introduced by Reed of Pennsylvania, increases the percentage of immigrants admissible from 3 to 5 per cent. Instead of using the number of aliens of the different nationalities resident in this country under the census of 1910, as is the case in the present law, the bill provides that the census of 1890 shall be the basis. The effect of the proposal is to increase quotas for northern European countries and to decrease those from some of the southern European nations.

DESPITE strenuous opposition, the house adopted by a vote of 233 to 101 the Green resolution proposing an amendment to the Constitution which would prohibit further issuance of tax-exempt securities. It had the approval of President Harding and Secretary of the Treasury Mellon, but the vote was not partisan. Twenty-four Republicans opposed it and 23 Democrats voted for it. The resolution's chances for adoption by the senate during this session are doubtful.

PRESIDENT HARDING sent to the senate the nomination of Federal Judge Edward T. Sanford of Knoxville, Tenn., to be associate justice of the Supreme court to fill the vacancy caused by the resignation of Justice Pitney. Judge Sanford, who is a native Kentuckian, has written and lectured much on legal and other topics.

CHARGES by the Washington police that some foreign envoys are using their diplomatic immunity to supply liquor to bootleggers have aroused the federal prohibition agencies, and an inquiry has been set afoot. Published reports named the Cuban legation, but Doctor Padro, the charge d'affaires, went to the State Department and stated that he was in entire ignorance of "any alleged selling of liquor" at the legation.

THE open hearing in the atrocities and murders by masked mobs at Morehouse, La., came to a close on Thursday and indictments are expected to follow. Before adjournment of the hearing Attorney General Coco made a statement concerning the outrages in the parish, charging the Ku Klux Klan with responsibility for them.

News of Minnesota

EVENTS of the week throughout the "State of Ten Thousand Lakes" told in brief form

Hastings—John Freeberg of South St. Paul, was indicted for murder by the Dakota county grand jury in connection with the killing of Jonas H. Linebech of South St. Paul. Linebech was killed March 30, 1922.

Chatfield—Harry L. Atchison, merchant of Chatfield and postmaster for 30 years, died suddenly of heart disease here. He was 60 years old.

Red Wing—Carl Anderson, proprietor a milk depot, and Ole Nyfiot, buttermaker at a creamery here, are to establish a third creamery in Red Wing on a cash basis.

Luverne—Waldo Hadler, 5-year-old son of Mr. and Mrs. Otto Hadler of Mound township, near here, was killed when he was caught under the wheels of a wagon loaded with hay.

Rochester—Five per cent of the 60,000 dairy cattle in Olmsted county are tubercular, according to a report issued by the Rochster public health office, following a survey of the county herds. The officers recommended the tubercular test for all cattle.

Rochester—The sum of $75,000 to finance the Rochester Park band the coming season, is contained in the operating budget for 1923, recently established by the Rochester Civic and Commerce association, thus assuring a band for the city.

Willmar—A new state bank will be established near Willmar in Roseland township. Application for establishment of the institution has been made to the state securities commission by S. B. Qvale of Willmar and James Mattson of Svea.

Thief River Falls—The board of organizations of Lutheran Free church will hold a four day mission meeting beginning Feb. 15 at 11 a. m. Rev. O. H. Slethen of Minneapolis, president of the Lutheran Free church, will be at the first meeting.

Red Wing—By a vote of 45 to 13 stockholders in the Red Wing Co-operative creamery decided to change the organization from a co-operative to a stock company.

Duluth—Judgment in the settlement of 44 fire claims totaling $55,415.29 were filed in district court by Judge W. A. Camp. The judgments were for payment on the losses suffered in the forest fires of 1918 and were paid through James E. Davis, chairman of the United States railway administration.

Albert Lea—Arrest and conviction of the persons who killed one of the finest Duroc-Jersey show mothers in the county is being sought by owners of the Lee farm, northwest of this city. The animal, weighing more than seven hundred pounds, has captured grand championship prizes at many southern Minnesota fairs.

Winona—Fire of undetermined origin destroyed the grain elevator of the coal shed of the Western Grain & Coal company in this city, causing a loss estimated by officials at $25,000. Practically the entire loss, which includes the building, 1,000 tons of coal and coke and a quantity of grain, is covered by insurance.

Crookston—The hearing of the contest proceedings brought by ex-Sheriff O. K. Bolstad against Sheriff Anton Nelson has been completed in district court here before Judge Wm. Watts. The case will now have to be argued before the judge at a latter date by the attorneys for the two men. Bolstad is contesting Nelson's election on the grounds that the corrupt practices law was violated.

St. Paul—M. G. Swenson, former vice president of the Fidelity State Bank, 2417 Central avenue, was arrested charged with the alleged embezzlement of $1,400. The defalcations, which extended over a period of two years, according to representatives of the U. S. Fidelity & Guaranty company, were uncovered last October, and resulted in Swenson's discharge. Since that time he has been at liberty upon his promise to make restitution.

Red Wing—Taxpayers of Goodhue county paid out more than $12,000 to operate district court last year, according to figures compiled by County Auditor C. H. Meyer. This is a decided increase over the year previous and was made so partially by an increase of civil cases, many of them being brought here from other states.

St. Cloud—Headquarters stations of the St. Cloud fire department was condemned and ordered razed within 90 days. George H. Nettleton, state fire marshal, declared the building was in condition to collapse at any time, endangering the lives of a score of firemen always on duty there. The building houses most of the city's motor apparatus.

Morris—J. F. Perkins was awarded $23,800 by a jury in district court here, in his personal injury suit against the Great Northern railway for $80,000. Perkins, an employee of the company, fell from a refrigerator car two years ago. His left leg was cut off at the hip.

Frazee—Sander Jascola, an ex-service man, committed suicide by shooting. The man disappeared from his home near Todd Lake and a few days later a search for him was instituted. His body was found by one of the searchers in a strawstack where he had crawled.

Grand Rapids—The Itasca county fair will be held Sept. 11, 12 and 13 this year, it was decided at a meeting of the directors of the County Fair association. The premium list will be out April 1.

Owatonna—Minneasota dairymen brought the 45th annual convention of the State Dairymen's association to a close after adoption of a program for further progress and an extension of its activities this year.

Thief River Falls—The departments meeting of the Minnesota Co-operative Creameries association of District No. 14 was held in Thief River Falls. About 60 delegates attended. The district is composed of 10 counties, commonly known as the Red River valley.

Pipestone—At the annual sale held at Faramont Hereford farms 23 head of cattle were sold at an average price of $126 per head. The high price paid was $270. Many Hereford breeders were attracted by the sale.

Hastings—W. H. Beerse, chairman of the Dakota county board of commissioners appointed the 1923 board of health for Dakota county, as follows: Dr. R. C. Radabaugh, Hastings; J. P. Nolan, South St. Paul, and Andrew Denzer of Riverside station.

International Falls—The big sawmill of the International Lumber company is to resume operations. The mill will operate one shift until all departments are in good working order, when the night shift will be put on and, work rushed to full capacity. Several hundred men are employed at the mill.

Pipestone—At the annual poultry show here, silver cups were awarded to the following exhibitors: Fred Ziemer, Waconia, Minn.; Mrs. William Hussong, Heron Lake, Minn.; C. Howard Williams, Pipestone, Minn.; Mrs. William Winters, Pipestone; F. J. Grone, Hadley, Minn.; Miss Anna Johnson, Lakefield, Minn.

Owatonna—A. L. Sperry, attorney, was elected head of the Owatonna Commercial club at its annual session here and plans were made to co-operate with other civic and commercial organizations and with Steele county farm organizations for the betterment of conditions in the city and county.

Windom—At a meeting of a number of the county fair boards of this section of the state, dates for the fairs next fall were chosen. New Ulm and Jackson will have their fairs from Aug. 27 to 29; Worthington, Aug. 30 to Sept. 1; St. James, Sept. 10 to 12; Blue Earth, Sept. 13 to 15; Windom, Sept. 17 to 21; Fairmont and Redwood Falls, Sept. 25 to 28.

Rochester—Scores of wells in Olmstead county are reported going dry, necessitating the calling in of well diggers to deepen the failing wells. Some of drilling machines have been operating at high speed to provide water for stock, especially on the high lands east and north of the Zumbro River valley.

Moorhead—Five suits instituted against the Great Northern railway by Miss Alma Haroldson of Flom, Minn., totaling $30,000 for the death of her father, mother, sister and brother and for injuries to herself in a wreck at Moorhead last fall when their car was struck by a freight train, will be settled out of court, attorneys announced when the time came for trial.

Albert Lea—The annual meeting of the Farmers' Mutual Insurance company of Manchester, elected the following officers: H. C. Nelson, president; B. N. Anderson, vicepresident; G. O. Myram, secretary and B. E. Boltolfson, treasurer. The secretary's report showed the company had policies in effect to the amount of $14,037,091, which $3,172,829 represents new policies written in 1922

Minneapolis—A total of 35,863 common barberry bushes were destroyed in Minnesota in 1922 according to the annual report of L. W. Melander, state leader of the United States department of agriculture eradication group. This means, according to plant disease experts, that there are now 35,863 fewer centers of black stem rust in the state than there were when cereal crops were planted last year. Approximately 780,000 barberries have been found by state and government agents in the last five years and practically all of them have been removed.

Duluth—Alleging malicious slander, Mrs. Sarah McAlpine, widow of the late John McAlpine, Duluth lumberman, and her son, Dale McAlpine, filed suit in district court againts Mrs. Mattie B. Titus. Mrs. McAlpine seeks $25,000, while Dale has brought suit for $50,000. Mrs. Titus accused them of being connected with the death of Mr. McAlpine, who was found dead in the basement of his home Oct. 14, 1913, with a bullet wound in his breast.

St. Paul—The Minnesota State Dental Association will hold its Fortieth Annual Meeting in the Saint Paul Auditorium February 6, 7, 8, and 9, 1923. A program of lectures and clinics, covering all of the phases of dentistry, will be presented by men of the highest type in their respective fields. Several nationally known clinicians from outside of the State will appear on the program. A program for Dental Nurses and Assistants has been arranged, to which all Dental Nurses and Assistants are invited.

Winona—Edwin A. Brown, former city treasurer of Winona, will oppose Alderman George L. Kerkow, president of the city council, for the office of mayor at the city election April 2. Mayor E. S. La France and five other city officials failed to file for re-election.

Albert Lea—Bert Kronberg, a prominent farmer of Freeborn county, was killed while en route to market with a load of corn. A large tree which was being cut near the highway fell across Kronberg's wagon as he approached the spot and crushed Kronberg to death.

After Every Meal
WRIGLEYS
Top off each meal with a bit of sweet in the form of WRIGLEY'S.
It satisfies the sweet tooth and aids digestion.
Pleasure and benefit combined.

Timely Comments on Agricultural Topics for Our Readers

POULTRY

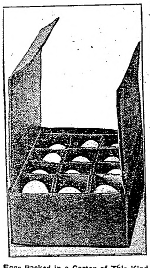
POINTERS ON EGG HANDLING

Bulletins Issued by Department of Agriculture Give Best Methods and Practices.

(Prepared by the United States Department of Agriculture.)

Breaking eggs and preventing breakage of eggs are both at times the concern of persons engaged in the egg business. The United States Department of Agriculture also has taken an interest in these problems and has published information on methods and practices. Although the bulletins were first issued a few years ago, the department's recommendations to shippers and to persons planning the installation of breaking plants are good today. Several thousand copies are now available for distribution. Persons writing for copies should ask for Department Bulletin 664, The Prevention of Breakage of Eggs in Transit When Shipped in Carlots, and Department Bulletin 663, The Installation and Equipment of an Egg-Breaking Plant.

Other bulletins of a similar nature, all prepared by the bureau of chemistry, are available for distribution. The following is a complete list, with the exception of those mentioned above: Department Bulletin 224, A Study of the Preparation of Frozen and Dried Eggs in the Producing Section; Department Bulletin 391, Accuracy in Commercial Grading of Opened Eggs; Department Bulletin 565, How to Candle Eggs; Department Bulletin 17, The Comparative Rate of Decomposition in Drawn and Undrawn Market Poultry.



Eggs Packed in a Carton of This Kind Are Quite Secure From Breakage.

In addition, the department has three circulars on eggs: No. 25, Points for Egg Buyers, including what to sell, what to buy, how to candle, and egg-candling devices; No. 55, How to Load Cars of Eggs; and No. 74, How to Break Eggs for Freezing.

PROMOTE HEALTH OF FLOCKS

Much Good Can Be Accomplished by Spraying Runways and Houses With Lye Solution.

Every poultry raiser knows that fowls thrive best in clean, well ventilated places. By keeping the houses, roosts, nests and runways sprayed with a concentrated lye solution you will do a great deal toward promoting good health and productiveness among your poultry.

Many of the most successful poultry raisers use this lye solution around their poultry houses at least every other week. The solution is made by dissolving a small can of lye in five gallons of water. A sprinkling can, hand spray, or an old whisk broom may be used to apply the solution.

AVOID EXCITEMENT IN PENS

Poultrymen Will Save Several Eggs Every Day by Observing Rules of Silence.

Whistling, or speaking gently, or knocking on the door to let the hens know when he is coming will save the poultryman several eggs in the day's gathering, says Prof. Willard C. Thompson, poultry husbandman of the New Jersey experiment station, in a circular issued on "The Winter Time Management of the Laying Flock." Fright, he continues, is often fatal to and always interferes with normal egg production. Hence the necessity of having the poultryman move slowly so as not to cause excitement in the pens.

PERTINENT POINTERS for MODERN FARMERS

Prepared Under Direction of North Dakota Agricultural College.

EACH FARMER SHOULD KNOW HIS OWN SOIL

(By H. L. Walster, Director North Dakota Soil Survey)

Stock-taking time is here; the merchant is listing the goods on his shelves and is discovering that some lines have moved rapidly and that for others there has been no demand. The farmer is making his inventories, looking over his surplus stock of grain and livestock and determining how it shall be fitted for the market. Both farmer and merchant are using these times to look over the question of needed repairs, improvements, etc. The merchant is planning his spring selling campaign; the farmer is planning his spring production campaign.

In all of this stock-taking, this inventory of the farm, let us not fail to consider taking stock of the soil, that fundamental asset on whose producing capacity the prosperity of both farmer and merchant alike rests. Each different type of soil is peculiarly fitted for a special job in production, and each requires a special kind of handling. Do you know and love your fields well enough to name them? The European farmer names his fields and knows their every peculiarity, even as he knows the habits of his own boys and girls.

Because North Dakota is a prairie country there is a rather general notion that our soils are very much alike. Let us take a glance at the soil map of four sections of land in Traill county, North Dakota. Here within an area of four square miles in the Red River valley are found seven different types of soil. The Fargo clay and the Fargo silty clay are two very heavy soils; the clay being heavier than the silty clay. The Bearden silt loam, the Fargo silt loam, and the Laurel silt loam are heavy soils, but are not as sticky as the clay soils. The Bearden very fine sandy loam and the Fargo very fine sandy loam are lighter, looser, and more open soils than the three silt loams.

How do these seven soils differ? The Fargo clay has a drab, sticky clay subsoil; the Fargo silty clay has drab crumbly clay subsoil; the Fargo silt loam has a grayish drab clay subsoil; the Bearden silt loam has a yellowish brown silty clay loam subsoil; the Laurel silt loam has a grayish brown silt loam subsoil; the Bearden very fine sandy loam has a brown very fine sandy loam resting on dark gray very fine sandy clay of open structure; the Fargo very fine sandy loam has a dark drab stiff plastic clay subsoil. Although many of these soils look much alike at the surface, each has a distinctly different subsoil. Differences in subsoils cause differences in drainage, with resulting variations in earliness in the spring; differences in ease of root penetration with resulting variations in adaptation to deep rooted crops.

Subsoils are not alike; neither are the surface features alike; the Fargo clay is almost level; the Fargo silty clay consists of a series of long low swells with intervening poorly drained depressions. The Fargo silt loam has better drainage than either the Fargo clay or the Fargo silty clay. The Fargo very fine sandy loam has enough slope to afford good surface drainage. The Bearden very fine sandy loam has about the same surface features as the Bearden very fine sandy loam. The Laurel silt loam is well drained river bottom land.

Since these seven soils differ in color, subsoil, drainage, surface features, and in degree of heaviness, they naturally differ in crop adaptation. The Bearden very fine sandy loam and the Fargo very fine sandy loam are ideal potato soils, especially the former. Consider the soils in the northeast quarter of section 21; five different soil types occur here within a single quarter. What now would be their best use? The following plan seems feasible:

1. Set aside the small area of Fargo clay for pasture or hay.
2. Use the Fargo very fine sandy loam and the Bearden very fine sandy loam for potatoes.
3. Use the Fargo silty clay for a general rotation of crops.

For further information as to the soil survey of North Dakota, write the Director of North Dakota Soil Survey, Agricultural College, N. D.

TANKAGE FED PIGS PRODUCE MOST PORK

(By J. H. Shepperd)

The following is a summary and illustrations of the hogging off corn with supplementary feeds for the years 1921 and 1922.

The pigs having all of the digester tankage they would consume made the greatest gain per day and per acre of corn in the 1922 trial, but they ate more corn in addition to all the tankage they wanted than any other of the four lots on corn.

The four lots of twelve pigs each were given the same acreage of standing corn on the approximate ratio of 3⅓ pigs per acre of corn.

On November 9 it was found that the self-feed tankage hogs had finished their 3⅝ acres of corn. Just how much corn the others have left can not be told until spring, as the rain and snowfall had made the corn too wet to gather up and weigh back this fall. From field observation we know, however, that the pigs (Lot 4) which were given corn, mineral matter (soft coal and salt) and water had the most corn left. Lot 3, the pigs which were given alfalfa, pasture, corn, mineral matter (soft coal and salt), and water, ranked next largest in the quantity of corn left. Lot 2, the pigs which were given four-tenths of a pound of digester tankage per head daily, with the standing corn, mineral matter (soft coal and salt), and water, ranked next in the quantity of corn left in the field; and Lot 1, the pigs getting digester tankage from the self-feed (all they would eat), with standing corn, mineral matter (soft coal and salt), and water, had finished their allowance of corn in addition to the 800 pounds of tankage on November 9, 1922.

Hogging Off Corn Trial.

Gains made during the trial, 1922:

Lot 4, corn only, 1,239 pounds; Lot 3, corn and alfalfa, 1,408 pounds; Lot 2, corn and four-tenths pounds tankage daily per head, 1,477 pounds; Lot 1, corn and self-feed tankage, 1,641 pounds.

Profit From the Added Foods, 1922.

(Alfalfa pasture, four-sixteenths pounds tankage, self-feed tankage):

Lot 3—Alfalfa pasture, 169 pounds at 7½ cents, $12.675, equals income from half acre of alfalfa pasture as supplement to the standing corn.

Lot 2—Four-tenths pounds tankage daily per pig, 238 pounds at 7½ cents, $17.85, equals gross income from 350 pounds of tankage. 350 pounds tankage at $75 per ton, $13.125, making a net gain of $4.725.

Lot 1—Tankage in self-feeder, 402 pounds at 7½ cents, $30.15, equals gross income from 800 pounds of tankage. 800 pounds tankage at $75 per ton, $30, making a net gain of 15 cents.

Loss From Added Tankage in 1921.

Lot 1—Tankage in self-feeder, 804 pounds at 7 cents, $56.28, equals gross income from 2,160 pounds tankage. 2,160 pounds tankage at $68 per ton, $73.44, making a net loss of $17.26.

Note: The pigs sold for 7 cents in 1921 and for 7½ cents per pound in 1922. The cost price of tankage was $68 in 1921 and $75 per ton in 1922. The pigs were on the corn 80 days in 1922, August 22 to November 9. The pigs were on the corn 57 days in 1921, August 19 to October 15.

Income From the Corn.

Gain in weight of pigs per acre:

In 1922—Field of corn per acre, 32⅓ bushels; gain of pigs per acre, 342 pounds; selling value of gained weight, $25.63; 3½ pigs per acre of corn.

In 1921—Yield of corn per acre, 28.34 bushels; gain of pigs per acre, 328 pounds; selling value of gain per acre, $22.96; four pigs per acre of corn.

CULLS.

I know I'm only a cow, but then, I'm entitled to more than a dirty pen. And what do I want in the line of feed? I don't crave much, but I surely need a sizable bunch of alfalfa hay, corn silage and oats at least twice a day. And water I like with the chill well broken. I'd have said this before could I only have spoken.

I know I'm only a cow, but then, just think of the many occasions when I pulled you through a financial pinch. I'm an earner of wealth, now that's a cinch, if I am the one that ought to say it; the grocery bill, I always pay it. So give me a place in the barn that's warm, and keep me sheltered from winter's storm. I yield good profit to those who care. My boss may not be a millionaire, but nevertheless, you've got to yield, he is one of those men they call "well heeled."

I know I'm only a cow, but then, money I've made and can do it again.

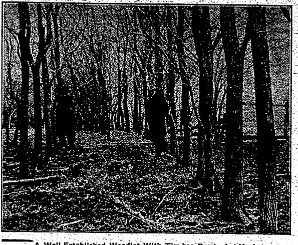
"Feeding Farm Poultry" is the title of a new circular published by the North Dakota Agricultural college.

BEST TREES FOR FARM PLANTING

(Prepared by the United States Department of Agriculture.)

Many plantings of trees have turned out failures because of the selection of species unsuited either to the climate or to the soil. The best trees for planting on a home farm usually are those which grow well in similar soils in the region, according to the recommendation of forest specialists of the United States Department of Agriculture, in Farmers' Bulletin 1123, "Growing and Planting Hardwood Seedlings on the Farm," recently published by the department.

In determining what species of hardwood trees should be grown, the bulletin says, the object of growing the trees and their adaptability to the climate of the region should be kept in mind. As illustrations, the bulletin points out that box-elder is not a good tree to plant for timber; the yellow poplar, because of climatic conditions, cannot be grown successfully in the plains region of the central United States, and hardy catalpa will not thrive in poor, sandy or heavy clay soils.



A Well-Established Woodlot With Timber Ready for Market.

Trees May Be Grouped.

To a certain extent trees may be grouped as those most valuable for lumber, for posts and poles, for windbreaks, etc. Some of the varieties listed in the bulletin as suitable for lumber are: Ash, basswood, beech, birch, black cherry, cottonwood, cucumber, elm, hickory, sugar maple, red oak, white oak, red gum, sycamore, black walnut and yellow poplar. Varieties suitable for posts and poles are: Hardy catalpa, coffee tree, red elm, eucalyptus, black locust, honey locust, Russian mulberry, oaks, osage orange and white willow. Varieties best suited for windbreaks are: Green ash, box-elder, cottonwood, eucalyptus, hackberry, silver maple, Russian mulberry, osage orange, Russian olive, white willow and yellow willow.

A mixture of two or more kinds of trees in a plantation sometimes is desirable, says the bulletin. For best results, trees such as the cottonwood should be spaced widely, while others, such as black walnut and black locust, have such scant foliage that their shade does not prevent the growth of a heavy sod. A mixed planting of cotton wood with either of the other two varieties mentioned will more completely utilize the ground, increase the yield and bring about a better forest condition. Frequently, less expensive and less valuable varieties can be planted as fillers with trees that are to make up the permanent planting. Mixed plantings also are desirable as a protection against diseases and insect attack. When chestnut and black locust, which are susceptible to such attacks, are planted among trees not so liable to injury of this kind, the latter will provide a stand of trees if the former are killed.

Utilizes Poorest Soil.

Unless intended for windbreaks, plantations should be located on the poorest soil of the farm, that least suited to the production of agricultural crops. Odd corners cut off by streams or driveways and hillsides or poorly drained soil should be selected. In starting a grove, seedlings one or two years old are preferable to seed or cuttings. Nut trees, such as walnut, hickory and oak, develop a deep taproot and few lateral feeding roots during their first year. They cannot, therefore, be transplanted as successfully as other trees. The nuts or acorns should be planted on the permanent site. Sometimes it is advisable to sprout the nuts before this planting is made. Cottonwood and willow plantations are most easily started with cuttings—12 to 14-inch sections taken from one or two-year-old twigs of living trees. Cuttings should be collected during early winter and buried in moist sand in a cool place preparatory to planting in the spring.

In general, early spring planting is preferable to planting at any other season. As compared with fall planting, it has at least two distinct advantages—the stock has an entire growing season in which to become established before it is subjected to the rigors of winter, and it is not in immediate danger of being heaved out of the ground by alternate freezing and thawing.

CHECK ON BROWN-TAIL MOTH

Infested Area in New England States Has Been Reduced 67 Per Cent, Says Entomologist.

The maximum area infested by the brown-tail moth in New England has been reduced 67 per cent, according to the annual report of the entomologist of the United States Department of Agriculture. The maximum spread was in 1914, when over 38,000 square miles was infested, including portions of all the New England states and the eastern end of Long Island, N. Y. Now this insect is known to be present only in Maine, New Hampshire, and Massachusetts.

Feeding Little Pigs.

In feeding little pigs they will usually begin to eat when they are about five weeks old. At this time, nothing is better for them than a little clear skim milk.

Roup Is Serious Trouble.

Contagious roup is sometimes a serious trouble in the farm flock. It occurs often as a result of poorly ventilated or draughty coops.

PARASITES TO FIGHT BORER PEST

Introduction of Enemies of Pest Progressing Rapidly.

Government Agents in France Have Been Constantly Collecting Insects Which Are to Be Liberated in New England.

The work of introducing the natural enemies of the corn borer from Europe made rapid strides during the last fiscal year, according to the report of the bureau of entomology of the United States Department of Agriculture. Agents at Hyeres, southern France, have been almost constantly collecting and shipping insect parasites of the corn borer to America, where these have been assorted and reared, to be subsequently liberated in large numbers in the heavily infested regions of New England. More than 500,000 specimens of a single species of parasite were liberated in this manner during the summer of 1922, and thousands of individuals of several other kinds were also liberated in this region.

The present plans of the bureau include the continuation of this work, in order to insure, where possible, the establishment of all available beneficial insect enemies of the pest before it becomes widely distributed throughout the United States. With this in view, what promises to be successful steps have been taken to establish one species of these parasites on native corn borers in the South Atlantic and Gulf states and on the sugar cane borer in Louisiana so that this enemy may be present and ready to attack the pest in case the European corn borer should spread to those regions.

Rains Hurt Sheep.

Bad for sheep to get their fleeces soaked with cold rains. A sheep, if dry, can stand any degree of cold, but if its fleece is wet it chills very quickly.

DAIRY FACTS

GOOD SIRE MOST ESSENTIAL

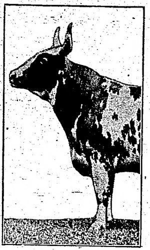
Dairy Farmer Urged to Stop Working for Scrub Bull and His Unprofitable Progeny.

Look to the future of your herd—the herd of tomorrow, and cease working for the scrub bull and his scrub progeny, and get a good purebred bull that will work for you and build up a high economical producing herd.

Study of the yearly production records and feed costs of 8,994 cows in a report of the United States Dairy division shows the following results:

Cows that produce 100 pounds of butterfat in a year, with an average feed cost of $34, gave a return of $10 over cost of feed; cows that produced 200 pounds of butterfat per year, with an average feed cost of $46, gave a return of $42 over cost of feed; cows that produced 300 pounds of butterfat per year, with an average cost of $58 for feed, gave a return of $74 over cost of feed; cows that produced 400 pounds of butterfat in a year with an average feed cost of $70 gave a return of $106 over cost of feed.

Thus it is shown that as production of fat increases, feed cost also increases, but not in proportion, and the income over the feed cost also increases. It costs twice as much to feed the 400-pound fat-producing cow, but she makes ten times as great a return over feed cost, and "what is left after the bills are paid" is what interests all of us.



A Good Purebred Bull Will Aid Materially in Increasing Dairy Profits.

A good purebred bull, plus good feed and care will help you to produce the above results.—F. E. Ball, Deputy Colorado State Dairy Commissioner.

GIVE CALF SEPARATE STALL

Make It Possible to Prevent Spread of Various Diseases Among Young Animals.

The best breeders have come to the conclusion that it is highly desirable to provide every new-born calf with a separate stall for at least a period of four or five weeks. Men who have been studying the young calf declare that at the time of its birth it is likely to be infected with a variety of germs which are apt to cause trouble. By investigating the contents of the calf's stomach, in order to determine the kinds of bacteria it contains, a number of disease-producing bacteria have been found. If several youngsters are kept in a stall together at this early period, the chances are, if one is infected with a certain disease, that all will have the same trouble. The separate calf stall makes it easy to prevent the spread of these various calf diseases and by keeping calves in separate stalls for four or five weeks, the usual time of infection, many of the common ills will be eliminated.

CHURNING TROUBLE CAUSES

Ordinarily Weather Is Determining Factor, Being Either Too Cold or Else Too Warm.

Churning troubles are due occasionally to the feed or to the fact that it has been some months since the cows were fresh. Ordinarily the trouble is caused by the weather; the cream is either too cold or it has been made too warm. Cold weather holds back the ripening of the cream, also, and unripe cream makes trouble in the churn. The best plan is to keep the cream in a warm enough place so it will ripen as it does in summer, and then to churn with the cream at a temperature of 60 to 62 degrees. Cream sometimes makes trouble if the cows do not have plenty of salt.

The Goodridge Banner

An Independent Legal Weekly Newspaper Published Every Friday at Goodridge, Minnesota.

EDITORIAL

SUGAR BEETS.

As one man expressed it at the mass meeting of farmers and business men at Thief River Falls last Tuesday evening, "The actual raising of sugar beets will bring prosperity to a country that has for a number of years subsisted on nothing but optimism."

The Banner believes that the raising of sugar beets and the establishment of a $1,500,000 plant at Thief River Falls would be quite the biggest thing ever pulled in northern Minnesota. That the country is well adapted for the raising of beets has been demonstrated and one grower has made a world's record for raising a product with the highest sgar content of any beets raised in the world.

That's pretty hard to believe, but The Banner has it on reliable authority that such is the fact.

And the pulp from sugar beets is said to be the highest grade feed for dairy cattle. Therefore, it would seem that the sugar beet industry and the dairying industry have much in common. Realizing from $50 up to $150 per acre on sugar beet land and feeding the pulp to grade and registered dairy cattle loloks like a mighty good proposition to The Banner.

Many from Goodridge and the surrounding country were at the mass meeting and this newspaper believes that this community has taken a genuine interest in this sugar beet business. The little town of Mavie, six miles down the electric line, came to the meeting with a complement of 35 farmers, and that is a splendid sign and one which there is no mistaking.

Men who have their money invested and have the interests of the community at heart are not going to pass up this opportunity of perhaps bringing Northern Minnesota into its own. We have the land and the energy and whether we get a factory in this county or not, we have made up our minds: "We're going to raise sugar beets."

But we're not going to cease dairying and grain raising on account of sugar beets because we still believe that we have the best farming section anywhere in the country. But we know that a few acres planted to sugar beets aren't going to hurt us one bit.

SHOULD THE STATE KILL?

The big city dailies and a number of country weeklies throughout Minnesota are clamoring for a law that will give the state the privilege of hanging men, shooting them or burning them to death via the electric chair in cases where they are found guilty of a capital crime.

These newspapers claim that in states where capital punishment is legalized, crimes of violence are of rare occurrence. But is this true?

Illinois has capital punishment and every week or two The Banner notices that one, two or several from the death house in the Cook county jail are taken to the scaffold and summarily dispatched to the world beyond.

New York has the electric chair in which criminals are scorched and seared to death under the guise of a humane and "poinless" death, but as far as The Banner is able to ascertain, "juice" is still flowing pretty freely through the cables into the death house at Sing Sing.

Utah pulls the trigger of a high power rifle every time it wants to make a murdered out of itself. But the fact that Utah still uses bullets on her criminals hasnt' proved a deterrent to crime, as officials in that state will tell you.

Now Minnesota wants capital punishment. The state repealed the law a number of year ago and since then The Banner hasn't noticed that the state is being overrun with criminals any more than are those states that put men through a violent death.

Capital punshment works out to the disadvantage of the poor devil every time. Who ever heard of a millionaire or a rich man, outside of war times, that ever paid the supreme penalty? Just the other day the son of a New York millionaire went free after murdering an ex-sailor, and when haled into court for his crime a New York judge declared there was no case against him. Had a poor man without friends or influence committed the crime, he would have been relegated to the death house at Sing Sing the very next day.

We dont' need capital punishment in Minnesota. We had it once and repealed the law as unnecessary. Wait until we need it, at least.

WHY TRADE AT HOME?

There are many people who are of the belief that because they live close to a small-sized city they can go there and buy the necessities of life at a cheaper figure than they can from the home town merchant.

The Banner does not hold fast to that idea. In fact this newspaper has witnessed instances where the contrary is the rule. Most folks go to the larger center because the merchant there has made a bid for their trade, something that the smallelr home town merchant has overoloked.

Goodridge has several business institutions that compare favorably with other towns the size of Goodridge. There is nothing extraordinary about the line of goods that they carry in stock, but of this The Banner is confident: They stand ready at all times to meet any fair competition. And that is what most folks are most concerned about. So long as they feel that they are securing their money's worth they are satisfied. and should be.

But the big mail order houses are tempting them more and more with each succeeding year. About two years ago there was established at St. Paul a branch house of one of the largest catalog concerns in the country and since that time their printing presses have been swaying night and day in order to get their printing and direct advertising into the hands of the consuming public.

All right, Mr. Merchant, what are you doing to counteract that influence? Are you doing anything at all? customers will stay by you and remain faithful to your business place even though you do not take them into your confidence from time to time? If you can do so without bending in their direction once in a while you are indeed a marvel.

But this newspaper doesn't believe that you can. We're going to do a little shouting for ourselves this time and say that The Banner has every facility for conveying YOUR MESSAGE—and at the extremely low price of 15 cents per running inch. And cheap at half the price.

We're going to have a sweeter country than ever after we get several hundred of our acres planted to sugar beets.

Our idea of a hot time: Being a moonshine peddler in Thief River Falls must be an exciting life. Two raids within a week undoubtedly makes a hot time out of what could be a mere droll elxistence.

Do you like moonshine? If you do you ought to be able to get a pretty good buy in the stuff over at the county seat, and The Banner wouldn't be at all surprised to see wholesale slashes in prices of poison.

Towns do not grow as Topsy did in "Uncle Tom's Cabin." When a one-cylinder town becomes a six-cylinder city it is because of the aggressiveness and effort of its townsmen. When towns grow into cities there must be some reason for it, and so alsso is it true when villages increase from 200 to 500 population.

Trade at home. Don't think for a minute that because a town is big that you can go there and get anything for nothing. The home town merchant will meet any competition.

We are all for the dairy cow, but we are going to be dead against her if Maw has to get up at five A. M. to milk her while Pa and the boys take a last nap, managing to get up just in time to eat the breakfast Ma prepares after said milking. We know of one Redwood county farm where this actually takes place each and every morning—including Sunday. It does not make us feel any particular pride in that particular farm either.—Redwood Falls Gazette.

CHEAP LAND.

Freeborn county lands are cheaper, considering location, quality and climate, than any land in the Middle West.—Albert Lea Enterprise.

Easy, there brother! Pennington county enters strenuous objection to the above statement. Land here will produce anything which can be grown in Freeborn county, besides being ideal for clover and alfalfa, and can be purchased for a third of the cost of land farther south. This, gentlemen, is the garden spot of the U. S. A. for the homeseeker who is looking for profit from his investment.

Be careless and your employer will be careful not to promote you.—The Forbes Magazine.

Cost of Maintaining the High School Department

By E. J. ERICKSON.

In figuring up the cost of maintaining the high school department, we must first consider the amount of state and other aid the district draws for the department.

TUITION—For tuition of non-resident pupils, the state pays the district $7 per month per pupil. We have 21 non-resident pupils in attendance, and of these 18 will be in attendance for nine months; 1 for 8 months; 1 for 7 months and 1 for 6 months. This will bring the total state aid for tuition up to 1,281.

STATE AID FOR H. S. TEACHERS—The state pays the district $250 for each of the high school teachers. As we have three teachers in the high school this aid will amount to $750.

FLAT AID—The state pays the district $400 in flat aid for maintaining the high school department.

TRANSPORTATION—The expense for transportation will be the same if the district maintains the high department or not, as the same number of bus drivers must be employed. There are nine high school students coming in the vans. The state pays the district 8 cents per mile per pupil per day for one way [illegible] of these pupils attend school [illegible] days during a school year of 180 days, some will attend more and some less, but on an average each will attend school 150 days out of the 180. The state aid for these 9 pupils will amount to $452. Without these pupils your total state aid for transportation would be lowered $452.

PRINCIPALSHIP—In case the district did not maintain the high school department, a principal had to be employed to take the place of the 7th and 8th grade teacher. A capable man to take the principalship could not be obtained for less than $1,600 a year. At present the district is paying the 7th and 8th grade teacher $1,125, or $125 per month. This would make a difference of $475 which would be added to the school expense in case there was no high school department. Hence this can be considered an aid to the district due to the high school department.

BOOK RENT—The non-resident pupils pay $1 per month for book rent. This will amount to an even $100 for this year.

Summary of Aid.

Total for tuition	$1,281.00
State aid for high school teachers	750.00
Flat aid	400.00
[illegible]	[illegible]
Principalship	[illegible]
Book rent	[illegible]
Total Aid	$3,458.00

Now let us consider what you actually have to pay out for maintaining the high school department.

Salaries for the three high school teachers	$4,275.00
Books for the high school this year	80.00
Miscellaneous (estimate)	125.00
Total	$4,480.00

If we now subtract the total amount of aid from the total amount of expense, we will arrive at the amount it cost the district to maintain the high school department:

Total expense	$4,480.00
Total aid	3,458.00
	$1,022.00

I did not mention the cost of fuel and upkeep of building as this cost would remain the same, due to the fact that the entire building would be occupied regardless of the high school department.

Rev. Geo. Larson of Thief River Falls spent the week-end here. He conducted two services at the Free Lutheran church here Sunday.

[illegible] slipped us a remarkably beautiful day last Sunday. Cameras predominated as it was an ideal day for taking of snapshots. Hiking was a close second.

Realize beforehand that if you steer a crooked course, you'll end in the ditch.—Forbes Magazine.

CHAPTER XII

—13—

Drace was far too disturbed in mind to sleep, and before the sun was high he walked out alone in the garden, to muse upon his situation. Slowly he paced his way along the path. Someone spoke, and he turned to face the man Batoche.

"Monsieur, a note."

Drace took the paper and hastened into the summer house.

The note was brief, but full in the expression of what had befallen Nadine, something to throb with the telling of it: "As soon as you can, my love' one, you must come to me to take me from the man I thought my father, but who is the awful brute. Yesterday he called me a she-wolf and told me I am not his daughter; and when he told me, my heart was light, for then I have not within me the murderer's blood. Come not alone, Virgil, for Tony will be here, and both of them watch. I am locked a prisoner in my room, and tomorrow they take me to Memphis to make me marry Monsieur Boyce. But I fear not so long as I know you come."

Quickly Drace slipped up to his room, buckled on his pistol, found a rope, looped it with a hangman's noose and tucked it beneath his coat. Nadine was not Stepho's daughter; now he was free to act! Swift was he to answer the appeal, but he was set against her caution, the advice to bring someone with him. It was his fight alone, the execution of his oath, which was not dead like the autumn leaf, but fresh like the new leaf in the spring. He would shoot Tony, the dog, and then string up his master.

No one saw him, not even the watchful Tycle, and he hastened toward Willow Head, not having found a boat at the landing. Never had the river seemed so broad, the current so swift. At last his canoe touched in among the cane roots at the island's edge. He leaped ashore, but was cautious in the cane, an Indian in stealth as he approached the house. He heard not a sound, saw no smoke issue from the chimney. Perhaps the wolves were in wait for him, to snap him, but he was now in full view, and he ran at the top of his speed. But near the house he halted, peering about, looked in at the door of the main room, found it deserted, then walked softly around to the barred window. Nadine spoke before he recognized her, standing in the twilight of her prison.

"My heart was loud to tell me you would come, Virgil. And you brought no one with you. But of that there was no need now."

He stood in silence looking at her, his strength exerted against a bar at the window, to tear it loose, but the wrought-iron nails were too long, and he could not budge them.

"The ax, Virgil! Is it lying there?"

Acting upon her suggestion, and with no caution now against making a noise, he cut the bars away and helped her through the window.

"Nadine, he said, "my oath must now be kept."

His arms about her, he stood pressing her close, and never had he felt so strong, and surely never so determined. Her eyes half closed, her head on his arm, she did not speak. She looked as if she were at rest, and dreaming. He kissed her, and her eyes flashed wide.

"I have come to hang the monster that called you a she-wolf."

"When I have told you, yes. And now you will listen. Early I thought I heard Tony and my—I mean Stepho la Vitte, go out. But Stepho was not walking with Tony, the strong man, but was dragged out in the rocking-chair; for some time in the night come the strange stroke, and Stepho was paralyzed."

"Nadine! What are you saying?"

"I am saying that you must listen. Tony came to the window and told me what was happen'. I ask him to let me out, but he would not, for he wants to please Stepho till the last, on account of the money that may be somewhere hid. He went for the doctor, and he came but has gone away again, for I hear him say he can do no good. The old man was out in his chair where he so often sit; and we will go see him, for it will not be for long. Let us forget all and be kind when death was come, Virgil."

"Yes, but where is Tony now?"

"I think he is looking for the money. Let us go now to the poor old man."

"You forgive easily, Nadine."

She looked at him in wonderment.

"How can we not forgive when the heart say we must, Virgil? He use me for the trap, which I will explain all to you, but he give me the chance to be with you, and for that I thank him—and for not being my sure-enough father. . . . Come with me."

. . . .

Old Stepho sat in his chair asleep, but as they approached him, he opened his eyes, looked at Nadine, then at Drace.

"Monsieur was ver' strong. An' I kill you if I be not struck down like the beef. An' Tony kill you if he here, but I send him off for something. Ah, the leetle gel, she hate me now?"

"Monsieur," she said, "I cannot find it in my heart to hate. It is the poison. Many times you were kind, and I remember them."

He bowed his head, and through his tangled lashes looked up at Drace, fire gleaming through brushwood. But he spoke to Nadine, turning upon her a less malignant glance.

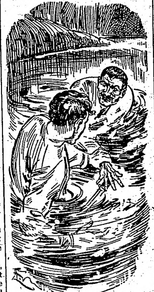
"The paralyze, it begin down here an' creep up. When it touch the heart, I was go. I say just now that Tony, he would kill the strong monsieur. He would not. He be scared when I was done. . . .

"Your name, leetle gel," pursued Stepho, "was Walton—the daughter of a northern man who live in the same town with Mr. Drace's father near Cincinnati. You an' your mother were carried off by my men; but your mother, she fall from the horse just as we come to our camp and she die. About her neck was a purse with money and papers—one that tell where more money is buried. After the war I go back and dig up this money, but I keep it for you, for your dowry. It is here—buried under the hearthstone. . . . Now—now I beg you to go for Father Tahan. You know where he live. Quick, for it creep up."

"Yes, I will go. Virgil will stay to keep you company."

"Let me go with you," Drace pleaded, fearful that some harm might befall her.

"No, my love' one," she gently opposed him. "You must stay here for no harm can come to me now. Stay here and be kind to him, for kindness is the will of the One above. You will, yes?"



"No Mercy Now!"

She kissed him fondly, and the old wolf-eyes closed, that they might not see. Now she was ready to go. Virgil steadied the canoe for her and gently shoved it off. She threw him a kiss, and rounding a green cape, raised her paddle into the sunlight and flashed him adieu.

. . . .

Drace returned to Stepho's chair, the old man shagging his brows at him. Then thinking of the rope still buttoned tightly beneath his coat, he tore it out and threw it away. Nature, he reflected, had usurped his task, and he could safely turn over to her his claims. A slight noise behind him; he looked quickly about, and there a few feet behind him at the edge of the cane stood Tony. Upon him the vision of Drace's countenance came, it seemed, with a startling flash. Instantly he fell back, through the cane fringe, into the bayou. Loudly he cried for help.

"Oh, monsieur," implored the old man, "please he'p heem queek. He can no swim. An' he die befo' hees sins they was forgive. He'p the po' wretch, monsieur. Queek, monsieur."

Virgil threw off his coat and his pistol-belt, and leaped into the water. A moment before, he would have shot the beast; now he would save him.

Tony was not in sight. But soon he arose, swimming, and Drace saw a knife in his hand. In the water Tony was as much at home as a beaver! He dived, and Virgil knew now that it was his aim to dart beneath him and with the knife to rip him as a skillful swimmer rips a crocodile. But in the water the strong man, young Drace, was at home, too, and turning about with a quick swirl, he waited. Tony came up; and now they came toward each other, like rival otters—grappled and struggled, treading water, shoulders up. Virgil caught Tony's left wrist, wrenched his arm limp and helpless, seized him by the throat, his left hand steel-gripped about the murderous right wrist, the knife hand.

No mercy now! Fire and water, their game! Down, gasping, down! The head beneath the surface, the hand still out, striving to stab. Slowly the hand opened; the knife dropped; the hand closed—half opened, was limp. Drace turned loose his grip. The body sank.

Virgil swam ashore and came dripping out of the cane. The old man spoke:

"Tony! Whar he?"

"I have drowned him."

"Monsieur was ver' strong!"

"If I had brought him to the shore, he would have sneaked a chance to murder me."

"He was the bad man, yes. He ought be dead, yes. I was to keel heem bimeby. He keel the man here not long 'go. Twice he go keel you, an' once he snap the pistol. I set the trap for you to be stabbed in the water. Then there be no blood to tell the tale. Now I am so sor'. Will monsieur pull me into the house?"

"No. You would reach for a pistol to shoot me. Stay where you are."

"Monsieur have still suspicion. We wait."

. . . .

Virgil put on his coat, his belt, and sat down on the grass. The old man was silent, his eyes closed. He might be dead, but no matter. More than an hour dragged by, the breeze moaning in the cane. Virgil arose and stood near the chair. Stepho opened his eyes, but was silent. Virgil sat down again and waited, the wind tangling the tops of the cane.

He heard the canoe coming.

Father Tahan was kindly and soft of voice. For many a despairing wretch he had held the Cross. At sight of him old Stepho's eyes were still hard. Time wears granite away, but does not mellow it. Not yet had he granted mercy, and for no pity could he hope.

"Father, this is the man I would keel. I hate heem, the carpetbagaire."

"It is not true," said Virgil, standing near. "I fought against the carpetbaggers in June, in New Orleans, when they were hanging a man. I cut him down."

How great can be an instant change! The old wolf-eyes dewed soft.

"Oh, monsieur, I was that man! They hang me. I hear of the brave man, but I not know it was you. Please forgive me. . . . Tek the leetle gel, an' I know you be kind to her. She love you. For you she would die. Monsieur, I beg you not to think so hard of me. . . . No, my leetle gel, you must not cry."

"I did not know you," said Drace. "A cloth was about your features. Think not of it now. Listen to the one who has come with a message of peace and forgiveness."

The priest devoted himself to his sacred offices. The wind moaned softly in the cane. . . .

The priest spoke presently to Virgil. "She must not stay here. Take her away, and I will see that everything shall be done."

Nadine stood with Virgil's coat pulled close about her face. And into his heart she spoke:

"The sun is low, Virgil. But you leave me now no more."

[THE END.]

IS STILL A MYSTERY TO CHEMISTS

Men of Science Have Not Yet Discovered the Real Nature of the X-Ray.

It was in 1895 that Prof. Conrad Roentgen, the famous German physicist, announced the discovery of the fact that if a current of electricity be passed through a certain kind of glass bulb, from which the air had been exhausted, the resultant "light" (so called in spite of the fact that it is not apparent to the eye), would penetrate the flesh and other semi-solid substances and reveal objects on the other side. For want of a better name to give to this disturbance of the ether, Professor Roentgen called it the X-ray, "x" being the accepted symbol for an unknown quantity.

The real nature of the X-ray is still undiscovered. The ray itself is generated by a battery, the wires of which are connected with two electrodes, one of which is a concave disc of aluminum and the other a flat disc of platinum. The current is then discharged through a glass vacuum tube and produces the ether disturbance which renders flesh or clothing semi-transparent, while glass, metals, bones and mineral substances are generally opaque to it.

For Mildew.

When any of your clothing has become mildewed, put it in a bucket of buttermilk and it will come out looking like new.

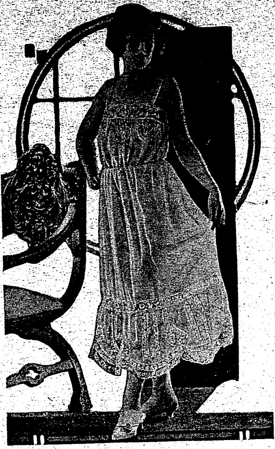
Yakutat, a fishing village of far north Alaska, has a newspaper which picks up its news from the wireless.

NEW STYLES IN LINGERIE

IDEAS FOR SPRING SUITS

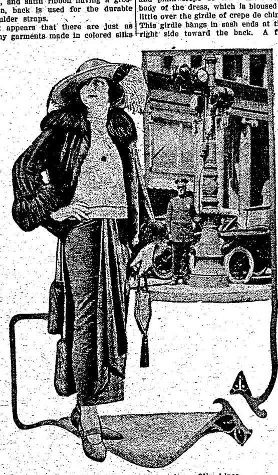
THE new year presents its styles in lingerie at its very beginning. While the holiday rush was on the merchants were making ready for their annual "white sales," and the day after New Year's found them inaugurating a period of special attention to all fabrics used for making lingerie or underthings, tub blouses and washable dresses and children's tub frocks.

There are not many new style points in women's lingerie, but what there are denote that undergarments are accommodating themselves to coming changes in outer garments. For instance, the attractive underslip illustrated here reveals a wider skirt and a higher waistline. It is, in fact, a camisole and a petticoat joined in one garment. It belongs in the category of trimmed lingerie as distinguished from tailored lingerie, and may be developed in either silk or cotton wash fabrics, in white or light colors. Two widths in val lace edging and a narrow insertion provide for its decoration, and satin ribbon having a grosgrain, back is used for the durable shoulder straps.



This Attractive Underslip Shows Wider Skirt.

It appears that there are just as many garments made in colored silks and cottons as in white, and the shades in demand are "pink," "peach," "honey dew," orchid and some light blues. The demand for blue has increased unexpectedly, perhaps, on account of the beautiful shade called "forget-me-not," which appears in the displays.



Three-Piece Suit Emphasizes Long, Slim Lines.

French triple voile is compelling attention among the finest cotton fabrics and cannot be excelled in beauty or durability by other cottons or by silk.

At his fixed post, one of the finest stands at attention, with his eyes riveted upon a pretty lady in an unusual suit. It is safer to wager that his are not the only eyes on Fifth avenue that have been arrested in their wanderings by falling upon this something new in suits. Every woman will recognize, by now, that this particular suit is one of the much-heralded, new three-piece models.

The idea of the three-piece is certainly in the air with different designers handling it in different ways. Some of them emphasize long, slim lines and take up with the new front draperies, as in the suit pictured. One can hardly imagine anything but a short coat with a dress of this kind under it. The skirt is wrapped about the figure, ending at the front in a plaited drapery that is caught up under the bodice, which is made of a different material. The fabric in the skirt and coat is a heavy crepe woven in a striped effect and plain crepe de chine makes the body of the dress, which is bloused a little over the girdle of crepe de chine. This girdle hangs in sash ends at the right side toward the back. A fur collar, fur cuffs and long fur tassels that finish the sash ends, proclaim this a cold weather outfit, but if this fur trimming were gone, it would look very spring-like.

TEACHER PAYS IT GLOWING TRIBUTE

Declares Tanlac Ended Indigestion, Chest Pains and Palpitation—Lost Strength Restored.

"Tanlac has improved my general condition ten times more than I anticipated," recently stated Herbert A. Guptill, a well-known school teacher of Kezar Falls, Maine.

"My trouble began with a sudden loss of strength. Almost everything I ate disagreed with me and caused a sickening sensation that remained with me for hours. For months I found breathing difficult on account of indigestion, and had such chest pains and palpitation I thought my heart was affected. I also suffered greatly from headaches and nervousness, seldom slept well, and felt tired and worn-out all the time.

"Since taking Tanlac no kind of food hurts me and I have a wonderful appetite. I have gained ten pounds, breathe freely, sleep perfectly, and feel as strong and well as ever in my life. Tanlac is certainly a superior medicine."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.—Advertisement.

Avoid Quarrels.

He that blows the coal in quarrels he has nothing to do with, has no right to complain if the sparks fly in his face.—Franklin.

HELP FOR GIRLS WHO WORK

Mrs. Lodic Tells How Lydia E. Pinkham's Vegetable Compound Helped Her

Tyrone, Pa.—"A friend told my husband how Lydia E. Pinkham's Vegetable Compound had helped his wife, so my husband bought me a bottle because I was so run-down, had a nervous weakness, no strength in my body and pains in my left side so bad that I could hardly do my work. Before I was married I used to work in the factory, and I had pains just the same then as I have had since I have done my housework. I would not be without a bottle in the house now. It has stopped the pains all right and I have found out that it is a wonderful body builder, as it has made me well and strong. It is going to be the 'old reliable' with me hereafter, and I am always willing to tell other women how it has helped me. You can use this letter as you wish as I can honestly say that my words are true."—Mrs. M. LODIC, R.F.D. No. 4, Box 40, Tyrone, Pa.

Letters like this bring out the merit of Lydia E. Pinkham's Vegetable Compound. They tell of the relief from such pains and ailments after taking Lydia E. Pinkham's Vegetable Compound.

The Route There.

FRENCH DRIVE RUHR OPPONENTS

Wholesale Arrests and Deportations Reported—20 Germans are Killed.

STRIKES ON INCREASE

Censorship is Established and Several Papers are Suspended—Communication Cut Between Berlin and Rhineland.

Paris—Twenty Germans are reported to have been killed when French soldiers were obliged to use their arms to protect themselves during a violent nationalist demonstration at Boppard, near Bingen, says the Echo De Paris. The newspaper says it has been impossible to obtain confirmation of the report on account of interruption of communication with the Rhineland.

It is asserted the demonstration originated through the arrest of the burgomaster of Boppard.

The Rhur valley is virtually isolated and communication for the most part is cut off and a censorship has been established. Berlin is out of touch with Essen and other Rhineland points.

The railroad strike is in full swing and the telephone and postal services are badly crippled.

The French authorities are engaged in the systematic arrest and expulsion of German officials, state and municipal, for refusal to obey orders. A number of papers in the occupied territory have been suspended by order of the Rhineland high commission for brief periods for the publication of prejudiced articles.

The British parliamentary labor party wants parliament convoked earlier than February 13, so that the situation arising out of Franco-Belgian occupation of the Rhur may be given full consideration.

Premier Poincare announces that the French troops will remain in the Ruhr until reparations are paid, but no longer.

Fritz Thyssen, who is in Berlin, announces that the "people of the Ruhr form a compact unit in their determination to resist French encroachments, and under no circumstances will they give in."

PEACE PARLEY NEAR CRISIS

France and Italy Seeking to Avoid Abrupt Ending.

Lausanne—Constructive influences are being brought to bear on the various delegations at the Near East peace conference to reduce to a minimum the chances of a rupture of the conference when the allied draft of the proposed treaty of peace is officially submitted to the Turks.

Although the allied front still remains unbroken there are clear indications that France and Italy, at least, will not subscribe to any proceedings having the ring of an ultimatum to the Turks when the draft treaty is handed them.

As for the Turks, they are beginning to show tendencies of despair. The treaty was presented privately to them. It consists of more than 150 typewritten pages, and contains many clauses to which they are absolutely opposed, and many others, inserted at the last minute, which they say they are unable to understand.

The Angora delegates have worked themselves into such a state that they are now distrustful of anything and everything the allies put forward, and they hesitate to make any definite decisions.

A delicate situation at Lausanne and alarming possibilities are liable to follow a brusque rupture of the conferences; this is further emphasized by reports relating to the movement of troops and threatened troop movements.

Turkey and Russia were alleged to have already signed a special accord whereby Russia would hasten to the aid of Turkey in the event of resumption of hostilities, and occupy Mesopotamia, wresting this disputed territory from the British.

RUM SMUGGLED IN QUANTITY

1,200,000 Gallons Annually Into U. S. From Bahamas, Charge.

Washington—Liquor is now being smuggled into the United from the Bahama islands at the rate of 1,200,000 gallons annually, while the government and population of that British colony getting "relatively immense revenues from the traffic" are absolutely indisposed to sympathize with efforts to check it, according to a statement by Representative Rogers, Republican, of Massachusetts, based, he declared, on official data furnished him by the state department.

Williston Wants Big Bridge.

Williston—A great deal of interest is being shown here in the proposition to construct a bridge across the Missouri river at this point. The need of a bridge has been keenly felt, especially by farmers living in the northern part of McKenzie county who have been obliged to depend upon uncertain ferry service or travel far greater distances to the smaller towns to the south. This bridge would be constructed on the route of the Denver-Estevan highway and would thus benefit the entire western part of the state.

Sticks in Their Mouths.

Lela had moved from the country in Kansas to Indianapolis and, on her first visit to her aunts near Lebanon was much interested in watching all the farm animals and poultry.

She pointed to the chickens and said, "We had chickens in Kansas, Aunt Barbara, but," with a surprised look at the geese, with their long bills, "we didn't have any of them things with sticks in their mouths."—Indianapolis News.

A Lady of Distinction

Is recognized by the delicate, fascinating influence of the perfume she uses. A bath with Cuticura Soap and hot water to thoroughly cleanse the pores followed by a dusting with Cuticura Talcum powder usually means a clear, sweet, healthy skin.—Advertisement.

Perhaps You Know This Kind.

Mary Roberts Rinehart writes most entertainingly in the American Magazine about her experiences camping with men. She says a man will tolerate the presence of a woman in camp, but he doesn't want to be bothered with her. In his attitude, he is, she declares, like the slovenly dressed woman of whom it was said that she said to her clothes: "Well, clothes, I am going downtown. If you want to come along, hang on."

Cole's Carbolisalve Quickly Relieves and heals burning, itching and torturing skin diseases. It instantly stops the pain of burns. Heals without scars. 30c and 60c. Ask your druggist, or send 30c to The J. W. Cole Co., Rockford, Ill., for a package.—Advertisement.

Ingenious Pile Driver.

There has been employed on numerous occasions by members of the Engineer corps a most ingenious pile driver, which acts with great speed. On two sides of the pile one-inch gas pipes are placed in longitudinal grooves. At the lower end the pipes are furnished with nozzles inclined inward toward the point of the pile. A force pump drives water into the pipes, and the water, issuing from the nozzles under a pressure of 70 pounds to the square inch, removes the dirt so rapidly beneath the pile that it sinks three times as fast as if hammered by a pile driver.—Washington Star.

The Proud Rat Catcher.

The witty Oliver Herford was talking about snobbishness.

"I know a city missionary," he said, "who invited a famous bishop to dine at his slum residence to meet two local characters, a garbage collector and a rat catcher.

"The bishop accepted the invitation gladly, and the garbage collector said that he, too, would be delighted, but the rat catcher spoiled the party. He must refuse, he said, to sit down with a garbage collector."

A woman is never satisfied with herself until she has put it all over her neighbor some way.

Life is merely a game of chance—and fate seems to have stacked the cards against most of us.

Discipline, B'Heck!

"No, sir," said Standpat, harshly, "you can't be too firm with 'em. Now take that there flapper daughter of mine. Nothin'd do 'er but she must have her hair bobbed. Me an' her mother both spoke right up in unison together and said 'No,' in a loud, firm tone. We decided we'd stand right by each other on that and nothin' could shake us. She kep' astin' day after day, beggin' an' pleadin' an' bawlin' around, but no, sir! When me an' Mandy makes up our minds nothin' can change us. That girl pestered us fer weeks about gittin' that hair bobbed, us a-refusin' reg'lar an' steady. An' even when she got it bobbed she wa'n't so almighty pleased with it at that!"—Farm Life.

Words of Wisdom.

Robert, age six, and his auntie were sitting on the veranda, when Robert's Sunday school teacher passed and spoke to Robert in a sweet, musical voice.

Turning to his aunt with a rather wistful look, he said, "I don't think anyone will ever marry Miss Blank because she hasn't a pretty face."

Auntie kept on reading aloud, but was interrupted presently by a happy little voice exclaiming, "Oh, auntie, I believe someone will wish to marry her after all, because I believe she has a pretty soul."

Tortoise Wins Again.

Large Families and Genius.

Havelock Ellis, the English sociologist, took from dictionaries of biography 1,030 British geniuses from the Fourth century to the present time, rejecting any about whose parentage nothing was known. He found the vast majority came from very large families, "much larger than the average family at the time they lived." The geniuses tended to be the oldest sons of large families or the youngest sons of large families. Only children made up a very small percentage of the thousand and thirty.—McClure's Magazine.

Get Rid of Spiders.

If you are troubled with spiders saturate pieces of cotton wool with oil of pennyroyal and place them where you think the spiders are breeding. You will soon be rid of them.

Perfection in Ancient Grecian Foot.

When Athens was in her zenith, the Grecian foot was the most perfectly formed and exactly proportioned of any of the human race.

Couldn't Be Done.

"Tell the truth."

"I haven't time; my train starts at six-fifteen."

Being polite is a habit; not as easily acquired as the unpleasant ones.

All the world may be a stage, but stage money does not pass.

Help Yourself to Health and Comfort

THOUSANDS of people do not stop to think of the harm which may result from drinking coffee and tea.

If you have frequent headaches—if you are nervous and irritable—if you cannot sleep at night—it is time to find out the cause and help yourself to health and comfort.

You alone can do it. Postum makes it easy.

Just stop coffee and tea for a while and drink delicious Postum instead. You will find it wholesome and delightful, with a delicate fragrance and a fine, full-bodied flavor.

Made from wheat, roasted just like coffee, Postum contains no caffeine, nor any other harmful ingredient.

Your grocer sells Postum in two forms: Instant Postum (in tins) prepared instantly in the cup by the addition of boiling water. Postum Cereal (in packages) for those who prefer to make the drink while the meal is being prepared; made by boiling fully 20 minutes.

SWEARING

By REV. H. LUTZ

Text: "Thou shalt fear the Lord, thy God, and serve Him, and shalt swear by His name." Deut. 6,13.

In the second commandment God forbids us to take His name in vain. One way of doing that, as we saw last time, is by cursing. Another way is by swearing.

Swearing is calling upon God as the witness of truth or the avenger of a falsehood. When the Apostle Paul wished to affirm by oath to his congregation at Corinth that the reason why he had not as yet come to them was that he wanted to spare them. (1, Cor. 1,23) he said: "I call upon God for a record upon my soul." "I call upon God for a record"; that is to say, let God be my witness that I speak the truth. "Upon my soul," let my soul be at stake, let God punish my soul, if I lie.

From this we see that not all kinds of swearing is forbidden. Our text tells us what kind of swearing is permitted, nay, commanded. "Thou shalt FEAR THE LORD, Thy God—and swear by His name." So when our fear of God demands it, we should swear by God's name. Because we fear God we obey our government, for "the powers that be (government) are ordained of God." (Rom. 13,1). So, therefore, when the government asks us to swear in court in order that it may be reasonably sure that justice will be done, we must swear. Or if we have been elected to some government office and we are asked to take the oath of office affirming that we will faithfully perform the duties of that office, it is God's will that we take that oath. The government has a right to demand oaths of us and if we fear God we will obey.

So, also, has the church a right to expect us to swear. For the church, too, is God's institution, and serves the glory of God and our neighbor's welfare.

But none else has a right to ask us to swear an oath. All other oaths are forbidden, sinful. In all other cases we have the Savior's command:

"SWEAR NOT AT ALL."

To mention some oaths that are sinful: At one time a number of Jews swore that they would not eat or drink a thing until they had killed the Apostle Paul. They asked God to be their witness that they would commit murder. That was blasphemy. Murder is sin. To drag God's holy name into a plan to murder, by swearing, made it just so much worse.

When Peter was asked by that maid of the high priest: "And thou also was with Jesus of Nazareth?" he cursed and swore and said: "I know not this man." That was a lie. That was false swearing.

When Herod, the king, swore that he would give his step-daughter anything she asked up to half of the kingdom, that was an oath in uncertain things. He knew not what she would ask. Upon the advice of her mother she asked for the head of John Baptist. So that oath led Herod to commit murder. He sinned when he swore that oath and he sinned doubly when he kept it. So, take a warning, dear reader, do not swear when you do not know exactly what you are swearing to. And if you have sworn such an oath, repent and retract it. By all means, do not think that you are bound to keep such an oath (in uncertain things) that would be double sin!

Finally, many people have a habit of swearing frivolously and carelessly. They swear to most anything they happen to be saying, things that really amount to nothing. "Sure as God is in heaven," "Sure as I live," etc. They are all too common expressions. As a rule they are used in connection with things that neither harm nor help anyone. They are unnecessary oaths. That is taking God's name in vain. Concerning our daily conversations and also our common business deals, God has said: "Let your communication be: Yea, yea and nay, nay; for whatsoever is more than these cometh from evil." Amen!

EDITORS STAND FOR STATE DEVELOPEMENT

Northern Minnesota Association Passes Strong Resolutions

The Northern Minnesota Editorial Association in annual session at Red Lake Falls, January 25 and 26 passed strong resolutions favoring the retention of the State Immigration Commission to aid in Northern Minnesota Development. The editors also went on record as favoring the Babcock road plan of bonding for additional highway work. The resolutions adopted were as follows:

WHEREAS, the development, prosperity and progress of Northern Minnesota are of paramount importance to the members of the Northern Minnesota Editorial Association in convention assembled, we hereby pledge ourselves to greater efforts during the coming year towards the advancement of this rapidly growing section of the great state of Minnesota,

WHEREAS, there appears to be a concerted effort to either abolish entirely the Department of Immigration or by consolidation render it ineffective and valueless and, WHEREAS, in the opinion of this association this department has done a most valuable work for the State in conducting an honest advertising campaign setting forth the resources of the state and in bringing to the state a surprisingly large number of settlers and, WHEREAS, only harm to the undeveloped portions of this state can result from the abolishment or curtailment of this department.

BE IT RESOLVED, that we urge the legislature now in session to assist rather than hamper the work of the Department of Immigration and that this department be allowed to retain its past standing with such financial assistance as is bi-annually required through appropriations.

WHEREAS, this association has since the inception of the Babcock Road plan been one of its consistent supporters and, WHEREAS, we can see only good results from the proposed plan of issuing bonds so as to complete as rapidly as possible the necessary road work in this state.

BE IT RESOLVED, that we commend the idea of a ten million dollar bond issue as suggested for the purpose of pushing the development of roads to a successful completion.

WHEREAS, Northern Minnesota is rapidly becoming a mecca for tourists and, WHEREAS, there are many beautiful spots that should be the property of the public and thus be preserved for posterity.

BE IT RESOLVED, that we endorse the proposed state park system as recently outlined by State Auditor Chase in his report to the legislature. And in this connection this association again affirms its belief in the work that is being done by the Ten Thousand Lakes Association and urges a continuation by the legislature of the appropriation that makes its functioning possible.

WHEREAS, Dairying is of vital importance to Northern Minnesota and, WHEREAS, the National Dairy Show which for two years has been staged in this state is to meet this year in an eastern city.

BE IT RESOLVED, that we commend the plan of the Board of Governors of the State Fair to hold a Northwest Dairy Exposition in connection with the 1923 Fair.

WHEREAS, the people of the state have by their vote approved a Rural Credits Plan.

BE IT RESOLVED, that we urge the legislature to enact at its present session a law covering the operation of the plan that will be sufficiently flexible so as to be of real value to the farmers of this section of the state who are anxious to proceed with the development of their holdings.

WHEREAS, this convention sincerely believes that the publication of the personal property tax list under law now in force has been of material assistance in exposing the tax dodger and has resulted in increasing the returns to the several municipalities.

BE IT RESOLVED, that we strenuously oppose the effort that is being made to repeal the law and that the legislature be asked to leave it in its present form. This association further endorses the recently organized Association of Country Newspapers, Incorporated, formed for the purpose of cooperatively securing foreign advertising.

To Red Lake Falls, her hospitable citizens, her commercial club and the management of the Lincoln Hotel this Association expresses keen appreciation of the courtesies that have made this convention one of the most pleasant in the history of the organization. We especially present our thanks to those progressive and enterprising publishers of the Gazette, Messrs. Christie & Cutten for their untiring efforts in preparing for the convention just held.

AMERICAN LEG... HAVE RAD... ...EIV...

Some agi... has been lately am... American member... the securing phon... result was a me... wa... last Firday even... was ...ded that a radio re... be purchased.

Owen Olson was appointe... purchasing. The radiopho... dered the next day from a... Duluth. The outfit arrived... and within the next few d... lage of Goodridge will be... hear from Metropolitan... indulge in music from... Grand Opera Company.

The radio will be ins... auditorium of the local s... public will be enabled ... privilege of hearing from the rest of the world comfortably seated in one of their own institutions.

The purchase of this radio again goes to show that the American Legion and citizens of our village are right up to "snuff" and we can be justly proud of being on equal terms with larger cities.

OBITUARY.

Word has been received here that Mrs. Bernard Olson, wife of the cashier of the Strathcona State Bank, had passed away Thursday night.

The cause of her demise was given as due to an infection of the throat. Mrs. Olson leaves to mourn her sad departure a bereaved husband and little daughter.

Mr. Olson is well known in this vicinity having at one time been employed at the Farmers State Bank of this place. The many friends and acquaintances of Mr. Olson extend their sincere sympathy in his sorrow.

A five year old boy was permitted to vote in the recent English elections. Probably figured that children before they are spoiled might vote with intelligence.

Here's What's Making Pennington County Famous

Lutheran Church, Missouri Synod.

Rev. H. Lutz, Pastor.

Sunday, Feb. 11: German services and Holy Communion at 10 A. M. Sunday school at 2 P. M. English services and Holy Communion at 3 P. M. at Germantown. Sunday, Feb. 18: English services at Big Grove at 10:30 A. M. and in the parsonage at Goodridge at 8 P. M. conducted by Rev. Mr. Schoedel. The pastor will preach and celebrate the Lord's Supper at Grygla at 10 A. M. and Esplee at 3 P. M. and conduct a business meeting at the latter place. H. Lutz, Pastor.

Norwegian Lutheran Church.

V. O. Aaker, Pastor.

When you go away on a trip isn't it strange how little of your clothes the trunk will hold, and how many of hers the wife can crowd in?

Splendid Showing Made By Goodridge Creamery

According to Secretary Engelstad's Report, Indebtedness is Reduced by $2,000 During Season.

The annual report of the Goodridge creamery, just made public by Secretary Engelstad, indicates a healthy and propsperous condition on the part of that institution. While the creamery has had its ups and downs, and up to last summer found its existence threatened, yet the report herewith published indicates a reduction in the indebtedness of the concern of approximately $2,000, and present prospects for the future look rosy indeed.

The report of Secretary Engelstad follows:

Butter Production.

Amount of cream received, 183,719 lbs. Average test, 28.44. Amount of butterfat, 52,248.1. Overrun, 12,394 lbs., or 23.72 per cent. Average price paid monthly patrons, 36.36. Average price paid cash patrons, 31.50. Deducted to sinking fund, monthly patrons, 2 cents. Average price received for butter, 37 cents.

Receipts.

62,756 lbs. butter shipped	$21,441.84
1,886 lbs. sold at home	665.58
Cream shipped to T. R. F.	231.48
Bal. dep. prior to May 1	31.79
Sinking fund, from patrons	198.41
Miscellaneous	13.06
Rec. from Morgan Vaughan	254.30
Total	$22,836.46

Disbursements.

FOR SALE.

Ten good dairy cows, four just now fresh and four to freshen soon. One team of horses, some machinery. E. Olson, 3 miles west of Goodridge, at stop 13 on electric line. tf.

The Girl's Glee club met in regular session Friday evening. The outcome of this meeting was a decision to stage a basket social some time in the near future. It was also decided to use the proceeds for the purpose of buying music for the club and a few more songbooks for the school.

COMMUNITY CLUB MEETING TO BE HELD FEBRUARY 16TH

The next meeting of the Community club will be held Friday evening, February 16. The following ladies were appointed to arrange a program:

Mrs. O. S. Kirklie, Misses Guida Gilbertson and Adeline Davids. This assures us of a splendid program and a big turnout is expected. Take your friends with you and be present and enjoy a pleasant evening with the friends and neighbors of your own community. Keep the community spirit alive by attending and you will help the progress of your own interests as well as those of the community.

INCOME TAX FACTS

The numerous inquiries at the revenue office relative to the liability of taxpayers for filing income tax returns have indicated that there is still a considerable doubt in the mind of the average individual as to his status, according to L. M. Willcuts, collector of internal revenue.

Mr. Willcuts believes that a majority of taxpayers can satisfy themselves as to their liability by first determining their status as a single or married person.

A single person is an unmarried person, a widow, or widower, or married person living apart from husband or wife on the last day of the taxable year. By living apart is meant living apart by mutual consent, not because one of the parties is temporarily absent or forced through sickness to reside at a hospital or asylum. Divorcees are classified as single persons.

A married person is one living with husband or wife on the last day of the taxable year. In respect to the taxable year for the twelve months of 1922 a person married on December 0, 1922, would be a married person while a person separated by death or divorce from his or her legal mate on December 30th would be a single person.

The liability for filing returns is based on the amount of the net income for the year without taking into consideration the amount of personal exemption and credits for dependants.

A single person should file when the net income is $1,000 or more and a married person when the combined net income of husband and wife is $2,000 or more.

Any individual with a gross income of $5,000 or more must file a return, or when the combined gross income of husband and wife is $5,000 or more a return must be filed.

Personal expenses such as doctor bills, streetcar fare to work, clothing and the like, are not deductible from gross income in arriving at the net income subject to tax.

Taxpayers who are in doubt are urged to call at a revenue office or write to the Collector of Revenue, St. Paul, Minn.

Many are now taking advantage of the assistance offered and are discharging their liability before the March rush.

Brother, let a few seeds of human kindliness sprout in your heart!

MRS. FRED ANDERSON DEAD; FUNERAL IS HELD THURSDAY

Monday, February 5, at 5:45 A. M., occurred the death of Mrs. Fred Anderson of Erie, at the home of Mr. Anderson at Thief River Falls.

Deceased was about 26 years of age and her death is greatly felt by the husband and infant child. She was a very diligent and helpful woman and this makes her sad departure all the more felt by her husband and her friends. The Erie community especially feels the loss of this popular and prominent young lady. She leaves a host of friends to mourn her death. Besides her husband and parents, she leaves a number of sisters and brother to mourn.

Funeral services were held at Thief River Falls Thursday, February 8.

HELP AVAILABLE FOR FILING OF INCOME TAX RETURNS

For the purpose of assisting taxpayers in filing their income tax returns for the year 1922, a deputy collector of internal revenue will be assigned to Thief River Falls February 20, 21 and 23.

LUTHER LEAGUE MEETS WITH MANY PRESENT AND PROGRAM

The Luther League of the Norwegian Lutheran Church held semi-weekly meeting Wednesday night, January 21. The crowd was by far the largest ever in attendance. This goes to show that the programs and the work of the League is being noticed and that it is attracting a larger crowd at each meeting. The Luther League is a fine organization for this community and the organizers and supporters are entitled to be highly eulogized. The following program was delivered, after which the audience enjoyed a lunch at a charge of 10 cents:

Song, Luther League; scripture reading and prayer, Rev. V. O. Aaker; song, Hazel Thoreson, Ruth McDonald, Ethel Halvorson, Tena Gaudland, Myrtle Stephenson, Edith Gunderson and Eunice Thoreson; recitation, Adeline Stephenson; reading, Eunice Tvedt; duet, Clenora Urdahl and Esther Ronken; reading, Tena Gaudland; reading, Alvin Halvorson; song, Resan quintet; composed of Alice, Roy, George, Maurice and Rudolph Resan; reading, Hattie Bundhund; song by quartet composed of Harold Olson, Maurice Resan, Edwin Olson and Rudolph Resan; discourse, Rev. V. O. Aaker; song by Luther League.

The following committees were elected: Lunch committee, Mrs. Bennie Johnson and Mrs. Ellen Iverson; program committee, Miss Adeline Davids and Raymond Jensen; membership committee, Alvin Halvorson and Clarence Gaudland.

FIRST BAND REHEARSAL.

Under the leadership of Morland Bishop, the band held its first rehearsal Thursday night, February 1. The evening was devoted mostly to "tuning up" and otherwise perfecting the organization. The meeting was a success in every way and the citizens of Goodridge are no doubt on the schedule for a treat from a real musical organization in the near future. A good assortment of music has been secured, towards which the band boys show much enthusiasm.

AMERICAN LEG ILL HAVE RAD CEIVING SET

Some agi has been going on lately am American Legion member the securing of a radiophon result was a meeting that wa last Firday evening and it was ded that a radio receiving set be purchased.

Owen Olson was appointed to do the purchasing. The radiophone was ordered the next day from a company at Duluth. The outfit arrived Wednesday and within the next few days the village of Goodridge will be enabled to hear from Metropolitan centers and indulge in music from the Chicago Grand Opera Company.

The radio will be installed in the auditorium of the local school and the public will be enabled to enjoy the privilege of hearing from the rest of the world comfortably seated in one of their own institutions.

The purchase of this radio again goes to show that the American Legion and citizens of our village are right up to "snuff" and we can be justly proud of being on equal terms with larger cities.

OBITUARY.

Word has been received here that Mrs. Bernard Olson, wife of the cashier of the Strathcona State Bank, had passed away Thursday night.

The cause of her demise was given as due to an infection of the throat. Mrs. Olson leaves to mourn her sad departure a bereaved husband and little daughter.

Mr. Olson is well known in this vicinity having at one time been employed at the Farmers State Bank of this place. The many friends and acquaintances of Mr. Olson extend their sincere sympathy in his sorrow.

A five year old boy was permitted to vote in the recent English elections. Probably figured that children before they are spoiled might vote with intelligence.

Lutheran Church, Missouri Synod.

Rev. H. Lutz, Pastor.

Sunday, Feb. 11: German services and Holy Communion at 10 A. M. Sunday school at 2 P. M. English services and Holy Communion at 3 P. M. at Germantown. Sunday, Feb. 18: English services at Big Grove at 10:30 A. M. and in the parsonage at Goodridge at 8 P. M. conducted by Rev. Mr. Schoedel. The pastor will preach and celebrate the Lord's Supper at Grygla at 10 A. M. and Esplee at 3 P. M. and conduct a business meeting at the latter place. H. Lutz, Pastor.

Norwegian Lutheran Church.

V. O. Aaker, Pastor.

Sunday, Feb. 11: Norwegian services at Torgerson at 2 P. M. and at Goodridge at 8 P. M. Sunday school and Bible class in Goodridge at 10 A. M. We wish to see a large turnout both at the Sunday school and at the services. The church will be warm.

When you go away on a trip isn't it strange how little of your clothes the trunk will hold, and how many of hers the wife can crowd in?

Splendid Showing Made By Goodridge Creamery

According to Secretary Engelstad's Report, Indebtedness is Reduced by $2,000 During Season.

The annual report of the Goodridge creamery, just made public by Secretary Engelstad, indicates a healthy and propsperous condition on the part of that institution. While the creamery has had its ups and downs, and up to last summer found its existence threatened, yet the report herewith published indicates a reduction in the indebtedness of the concern of approximately $2,000, and present prospects for the future look rosy indeed.

The report of Secretary Engelstad follows:

Butter Production.

Amount of cream received, 183,719 lbs. Average test, 28.44. Amount of butterfat, 52,248.1. Overrun, 12,394 lbs., or 23.72 per cent. Average price paid monthly patrons, 36.36. Average price paid cash patrons, 31.50. Deducted to sinking fund, monthly patrons, 2 cents. Average price received for butter, 37 cents.

Receipts.

62,756 lbs. butter shipped	$21,441.84
1,886 lbs. sold at home	665.58
Cream shipped to T. R. F.	231.48
Bal. dep. prior to May 1	31.79

AT AGE 71, FINDS HOUSEWORK EASY

Mrs. Jennings Says Tanlac Restored Strength After "Flu" Attack and Ended Stomach Trouble.

"I was almost an invalid and Tanlac built me up to a strong, well woman. I consider it my best friend," is the grateful and characteristic statement of Mrs. Emma Jennings, residing at Clearwater, Cal.

"An attack of the grippe left me completely broken down. My stomach felt sick, my legs and arms so tired and weak I could hardly use them, and I scarcely had energy and strength to dress myself. I just kept getting weaker in spite of all I could do and, as I am seventy-one, I had begun to think my age was against me ever getting well.

"Almost from the day I began taking Tanlac I commenced to feel stronger. So I kept picking up with every bottle until now I can easily do all my housework, for I am feeling fine. I wouldn't be without Tanlac in the house. It is just grand."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.—Advertisement.

Overcomes Illegibility.

Acting on requests to decipher illegible documents and papers, particularly those that have passed through fire without being burned to ashes, the bureau of standards has worked out a method that is very effective and comparatively simple. It is based on the principle that a photographic plate or film, besides being sensitive to light, is also sensitive to certain gases or vapors. The specimen under investigation is placed between two photographic plates and kept in intimate contact with the sensitized coating in the dark, for a period of two weeks in the case of fast plates. On development in the usual manner, a perfect copy of the writing and printing is obtained.—Popular Mechanics Magazine.

COULD HARDLY DO HER WORK

Lydia E. Pinkham's Vegetable Compound Made Her Eat, Sleep and Feel Better Every Way

Chicago, Ill.—"I was weak and rundown and in such a nervous condition that I could hardly do my work. I was tired all the time, and dizzy, and could not sleep and had no appetite. I tried different medicines for years, but they did not help me. Then I read in the papers about Lydia E. Pinkham's Vegetable Compound and what it had done for other women and gave it a trial. I began to eat better and could sleep, and consider it a wonderful medicine. I recommend it to my friends and will never be without it."—Mrs. M. OHLEN, 3640 S. Marshfield Ave., Chicago, Illinois.

It is such letters as these that testify to the value of Lydia E. Pinkham's Vegetable Compound. This woman speaks from the fullness of her heart. She describes as correctly as she can her condition, first the symptoms that bothered her the most, and later the disappearance of those symptoms. It is a sincere expression of gratitude.

For nearly fifty years Lydia E. Pinkham's Vegetable Compound has been so praised by women.

PISO'S
for Coughs & Colds

COUGH? Try Piso's—astonishingly quick relief. A syrup unlike all others—pleasant—does not upset stomach—no opiates. 35c and 60c everywhere.

Father Was a Black Man.

As the new colored preacher of the negro church was passing one morning he leaned over the fence to admire Sam Hill's flowers.

"Sam," he said, "I understand you have a white poppy."

Sam became indignant.

"N-o, sah," he said, emphatically "You been hearing 'bout Samuel Johnson. My daddy's black as de ace o' spades."—London Tit-Bits.

Papa's Spelling Bee.

A youngster who stuck at the spelling of "acquaintance" was advised by his father to consult a dictionary. This, however, failed to settle the point, and father himself called for the book to be brought to him.

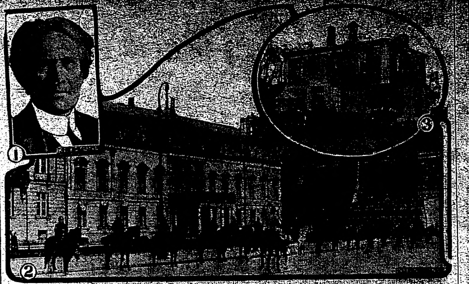
"Silly boy," he snapped. "Of course, you wouldn't find it under 'Aq.' Surely you know better than that. Look under 'Ak'."—London Tit-Bits.

Undesirable Age.

Age of discretion is a period when nothing is as attractive as it was.

Gratitude always blooms fairest in the soil of expectancy.

Refreshes Weary Eyes
When Your Eyes feel Dull and Heavy, use Murine. It Instantly Relieves that Tired Feeling—Makes them Clear, Bright and Sparkling. Harmless. Sold and Recommended by All Druggists.
MURINE for Your EYES



1.—Dr. Robert Watson of New York, who succeeds the late Dr. W. F. Crafts as superintendent of the International Reform bureau. 2.—German troops protecting the French embassy in Berlin. 3.—Country home of President Cosgrave of the Irish Free State after it was burned by republicans.

NEWS REVIEW OF CURRENT EVENTS

Deadlock Between France and Germany in the Ruhr Is Not Yet Broken.

COAL SHIPMENTS STOPPED

Belgium Fully Supports Her Ally—Peace Treaty Submitted to Turks—Tension at Lausanne Lessened—British Accept American Plan for Funding Debt.

By EDWARD W. PICKARD

> SECRETARY OF THE TREASURY MELLON says the issuance of tax exempt securities must be stopped or the federal government must find some substitute for its surtaxes on incomes. The subject is of vital interest to many investors. How do you and your friends feel about it?

FRANCE is determined to carry on her adventure in the Ruhr to a definite conclusion, and is equally determined that the conclusion shall be the submission of Germany. General Degoutte, commanding the Ruhr, Rhineland and Saar, made quite clear his government's intentions the other day when talking to correspondents at Dusseldorf. He said new sanctions will be imposed almost immediately in retaliation for Berlin's order to post office, railway, and other state employees and officials to resist the French army. And if obstructions continue there will be further seizures.

"The future of Germany lies in her own hands," General Degoutte said at the conclusion of the interview. "If she surrenders now, Germany may have back the Ruhr when the French have collected what they came for. Further defiance may prolong indefinitely the French occupation."

Before the week had ended the French had closed the last avenue for the shipment of coal from the Ruhr to unoccupied Germany, and had seized the Ruhr customs, replacing with their own men such German officials as refused to work under them. Defections from the German customs personnel were reported by the French to be 40 per cent and by the Germans to be 70 per cent. A considerable number of German officials in both the Ruhr and the Rhineland were arrested and deported. Thousands of mine workers were imported from France, Poland, and other countries, but the strike of railway men nearly tied up traffic and brought about a great shortage of coal cars. Coal production had fallen to about 50 per cent of normal, but even so the accumulations at the pit heads could not be moved and the French authorities admitted the mines might have to be shut down before many days. Foodstuffs in the occupied region are becoming alarmingly scarce but the French probably will organize motor trains if they cannot get the railways in operation. They are seizing all the German automobiles they can find, and also have seized the stocks of mineral water, petroleum, benzol, spirits, and tobacco in the large merchandise warehouses. The interdiction against coal shipments may soon be extended to steel, iron and other manufactured products.

At the time of writing, the French policy has settled down to a program of holding on to the district, keeping its coal away from the rest of Germany and waiting for the German industrial magnates to grow tired and to force their government to submit to the allied demands that the terms of the treaty be fulfilled.

d by republicans.

General Weygand and the French minister of public works went to Brussels for a conference because of signs that Belgium was becoming alarmed by the developments in the Ruhr. When they returned it was officially announced that France and Belgium were in full accord on measures for control and administration of the occupied region. Great Britain seemingly has not yet made up her official mind and is willing to wait longer for results.

IT CANNOT be said that the Germans show any signs of weakening. Their war slogan, "Hold Out," has been revived and the passive resistance program is being carried out quite thoroughly. Chancellor Cuno reiterates that the government will not budge from its position so long as there are French bayonets in the Ruhr. He asserted the French army of occupation is costing 1,000,000 gold francs ($250,000) more than the value of coal payable under the treaty, and that productivity was decreasing, and as a result both countries were suffering. The German national council has appropriated 500,000,000,000 marks for the relief of the Ruhr inhabitants, nearly 1,000,000 for each organized worker. Moscow has donated $50,000 to them.

EARLY in the week it looked as if Great Britain and France had at last reached the parting of the ways because of developments in the Near East conference at Lausanne. Lord Curzon had the treaty ready for submission to the Turks, and announced that the British delegation would depart as soon as it was handed to them, virtually serving them with an ultimatum to sign at once or fight. The French promptly informed the Turks that they would not leave Lausanne as long as there was a chance to reach an amicable agreement, and it was said Italy took the same stand. When Wednesday came the treaty draft was presented to Ismet and his colleagues and Curzon energetically defended it as a just and generous settlement which would afford opportunity for Turkey to reconstitute her national life "without external intervention or internal servitude." He then consented to stay in Lausanne until Sunday night. The allied delegations and the American observers appeared united in the opinion that a decision one way or the other could not be delayed much longer, though Ismet had asked for several weeks. If the difficulties are ironed out and a basis of accord is reached, as seems likely at this writing, much of the credit will be due to Ambassador Child, who has been exceedingly active in harmonizing the conflicting views of the allies and in persuading the Turks to modify their demands and conclude a speedy peace for the sake of their national interests. The treaty as drafted requires Turkey to abandon her claims to the districts detached and now under mandate of other powers and also to Egypt and the Sudan. The Maritza river is fixed as the boundary in Thrace, Turkey getting Adrianople and Greece getting Karagatsch. The dispute over the Mosul district is referred to the League of Nations.

The Russian delegates informed the conference they would not sign the convention providing for the control of the Dardanelles.

Lord Balfour warned the League of Nations council in Paris that the moment the Kemalists began a movement on Mosul Great Britain would institute a blockade of Turkey, and he intimated the other nations in the league would be expected to support this blockade economically.

THOUGH the league council may not act, or be asked to act, in the matter of the Ruhr, it was busy with other things, with good results. Representatives of Czechoslovakia and Hungary informed it that the league's proposal for the settlement of the boundary dispute had been accepted by both nations.

The council adopted the suggestion of the last league assembly and decided to call an international conference to consider the extension of the Washington naval restriction accord to those nations that were not given opportunity to sign that pact. It also determined to invite all nations, members of the league, to limit their annual expenditures for armaments to the amounts appropriated in 1913. Another matter of discussion was the welfare of the German minorities in Poland.

HAVING defied the representatives of the allies to oust them from Memel, the regular and irregular Lithuanian troops were still in control of that district, but on Wednesday the council of ambassadors sent to the government of Lithuania a curt note, virtually an ultimatum, demanding the immediate withdrawal of the troops. It is understood the note threatened forcible action if Lithuania failed to comply with the demand. The situation there is more serious than it seemed at first likely to become, but neither France nor England wants to resort to military measures.

RATHER surprisingly, Great Britain already has accepted the American terms for the funding of the war debt, and it is now up to congress to pass the measure modifying the present law and giving the American commission broader powers. The leaders in congress believe this can be done at this session. The proposed settlement is on the basis of 3 per cent for the first ten years, 3½ per cent thereafter, and maturity of the loan in 62 years. There is provision for a one-half of 1 per cent sinking fund whereby the principal will be reduced annually. The amount due the first year would be $158,297,197.

The terms propose to give England a slightly lower rate of interest than the average rate paid by the government to holders of Liberty bonds, which difference must be paid by American taxpayers. Senator McKellar estimates this difference at $58,000,000 annually. On the other hand, it is pointed out, that this difference would be offset by the savings on interest on Liberty bonds, which would be retired with the proceeds of British payments.

SENATOR BORAH renewed his proposal for an international conference on world economics, and told his colleagues he thought the administration was drifting aimlessly although another European war threatens. The senator, more than usually pessimistic, asserts the French invasion of the Ruhr is likely to result in a triple alliance of Germany, Russia and Turkey; that this combination could bring on another general European conflict, and that the United States would be drawn into the row inevitably. He suggests the United States can call the conference and participate in its deliberations and leave to the European powers the responsibility of carrying out its agreements, as was done in the case of the Algeciras conference in 1906. Thus he replies to the objections of the irreconcilables as voiced by Senator Johnson of California.

REPRESENTATIVE PORTER of Pennsylvania, chairman of the house foreign affairs committee, has introduced a resolution requesting President Harding to urge a world-wide limitation of the production of narcotics and habit-forming drugs, and to report to congress within six months the results of his efforts. It is left to the discretion of the President whether or not he shall call an international conference on the subject.

PRESIDENT HARDING has accepted the role of arbitrator between Peru and Chile in the Tacna-Arica dispute, and the rest of the world hopes, with the Vatican, that this will put an end to the age-long enmity between those two countries.

PROHIBITION COMMISSIONER HAYNES has just completed a trip through the states of the Pacific coast and the Southwest, and says he is convinced the people out there are in favor of strict enforcement of the eighteenth amendment. At Juarez, Mexican officials assured him their government would co-operate with the United States to curtail the smuggling of liquors and drugs.

FIFTEEN thousand railway signalmen, who refused to join the shopmen's strike last summer, now receive their reward. The federal railroad labor board has restored for them the eight-hour day with time and one-half pay for overtime. A general increase in wages was refused by the board, but it raised the pay of some men from 68 cents an hour to 72 cents, the established minimum.

THE interstate commerce commission has ordered the railroads to resume the issuance of interchangeable mileage books at reductions of 20 per cent from regular passenger rates.

Why Bake At Home
when you can buy bread like it, ready baked?

COUNT the raisins—at least eight big, plump, tender fruit-meats to the slice.

Taste it—see how the raisin flavor permeates the bread.

No need to bake at home when we've arranged with bakers in almost every town and city to bake this full-fruited raisin bread.

Just 'phone and they'll deliver it—all ready to surprise the family tonight.

It comes from master bakers' modern ovens in your city. And it's made with Sun-Maid Raisins.

That's another reason for its superiority. A rare combination of nutritious cereal and fruit—both good and good *for* you, so you should serve it at least twice a week.

Use Sun-Maid Raisins also in puddings, cakes and cookies. You may be offered other brands that you know less well than Sun-Maids, but the kind you want is the kind you know is good. Insist, therefore, on *Sun-Maid* brand. They cost no more than ordinary raisins.

Mail coupon for free book of tested Sun-Maid recipes.

SUN-MAID RAISINS
The Supreme Bread Raisin

Your retailer should sell you Sun-Maid Raisins for not more than the following prices:

Seeded (*in 15 oz. blue pkgs.*)—20c
Seedless (*in 15 oz. red pkgs.*)—18c
Seeded or Seedless (*11 oz.*)—15c
Seeded, *in tins* (*12 oz.*)—20c
Seeded, *in tins* (*8 oz.*)—15c

Concern for Santa.

Little Letha is about the smallest patron of the West Indianapolis library, and was being taught a piece to speak for her Sunday school Christmas entertainment.

"I come to say, good night, sleep tight—"

"For Santa will be speeding," prompted her mother.

"Santa will be what, mother?" exclaimed the little girl.

Mother patiently repeated the lines and Letha's concern grew.

"Oh, mother, Shank will get him, and he'll get arrested," she said in frightened earnestness.—Indianapolis News.

Stop the Pain.

The hurt of a burn or a cut stops when Cole's Carbolisalve is applied. It heals quickly without scars. 30c and 60c by all druggists, or send 30c to The J. W. Cole Co., Rockford, Ill.—Advertisement.

Practice "Give and Take."

In the business world today a man who is unwilling "to give and take" stands very little chance of attaining success. The philosophy of modern business has so been developed that biggest business is now greatest service.

Not Guilty.

Conductor—Shamokin! Shamokin!
Irish Passenger—No, playing cards.
—Penn State Froth.

Disagrees With Experts.

After extensive research over a period of years, and the testing of tens of thousands of adults and children, psychological "experts" announce that we do not progress mentally after the age of fifteen. "There is little mental growth after the age of fifteen," is the flat statement of the findings of these specialists.

That may be true of "experts"—especially medical experts, but it is silly when said of the average human being.

The brain, like other parts of the body, is developed through exercise.—Los Angeles Times.

Relative Rewards.

"Do you know," said the earnest person, "that there are men renowned in literature, art and science whose annual incomes are not large enough to give them the ordinary comforts of life?"

"I don't doubt it," said Mr. Gawker; "but if nature gave them sound bodies to start with and they've enjoyed reasonably good health, it seems to me that it's their own fault if they haven't gone in for athletics and acquired proficiency with a pair of eight-ounce gloves."—Birmingham Age-Herald.

Heaven helps those who help others to help themselves.

Don't Be Fooled
Low Price and High Quality Don't Go Together, Stick to
CALUMET
The Economy BAKING POWDER

Never accept "Just as Good" Brands; it will only mean disappointments and failures on bake-day, which are expensive.

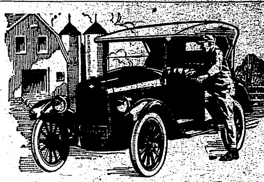
Calumet is a High Grade Baking Powder, Moderate in Price

When you use it you never spoil any of the expensive ingredients used—such as flour, sugar, eggs and milk.

The sale of Calumet is 2½ times as much as that of any other brand.

BEST BY TEST

THE WORLD'S GREATEST BAKING POWDER



Why Farmers are Turning to

CHEVROLET

for Economical Transportation

In 1922 Chevrolet jumped from seventh to second place in sales of all cars, and to first place in sales of fully equipped modern cars.

Purchases by farmers were the chief factor in this remarkable development.

Farmers want automobiles not only of low first price, but also of low later cost for operation and maintenance.

They want room, comfort, and the ability to stand up under hard conditions.

They find that Chevrolet, fully equipped as sold, is the best value per dollar in the low-priced field, and neighbors tell them it costs less per mile to operate.

WILL NOT STAND MINGLING

Some Danger in Combination of Potash Tablets and Potassium Chlorate.

At a merry party in England, one of the guests suddenly found himself emitting a shower of sparks. The place of origin was his coat pocket. Everybody laughed, and thought it was a well-contrived joke. But it was not. That was proved by a burned jacket, chair, carpet, and hand. Investigation showed that the guest had in his pocket a packet of potash tablets. Also he had there a box of safety matches.

Now a safety match is coated with potassium chlorate, and it strikes when it is rubbed against phosphorus painted on the box surface. But potash tablets are made of potassium chlorate, and so they, too, are likely to strike on a safety matchbox. This is what they had done. Some of them had escaped from their packet and were loose in the jacket pocket, ready to make a fireworks display if they rubbed against the matchbox. If you carry a safety matchbox, be careful what else you carry in the same pocket. Mind it is not potash tablets for a sore throat, or you may "go off" unawares in a private fireworks display.

Hotplate Has Lasted Long.

A man in Washington state is said to own the oldest electric hotplate in existence. He has had it 20 years, during which time he estimates it has been used 10,000 hours and has consumed $165 of electrical energy.

Decidedly Not.

Mr. Howell—"Health is better than wealth." Mrs. Powell—"Not for your prospective heirs."

Fortune tellers are fortune swellers—for themselves.

ALL THAT INTERESTED HIM

Darky's Desire for Telephonic Connection With San Francisco Had Become Secondary Matter.

An old negro hurried into a drug store telephone booth and asked for long-distance connection, giving the address of a person in San Francisco. After a long wait the operator told him that the San Francisco exchange was on the wire.

"Now," she said, "deposit $7.65 and I will give you the connection."

The old negro appeared not to have understood.

"What did yo' say, Miss?" he asked.

"I said you must deposit $7.65. Put the money in the slots on the telephone."

"Ma-aam?"

"I told you to deposit $7.65." She raised her voice.

"Say, Miss," came the quivering tones of the darky, "how much do it cost t' hang up dis thing?"—From Judge.

Twin Suns.

The star Alpha Centauri, one of the nearest to the earth, consists, as the telescope shows, of two suns, one of which is five or six times brighter than the other. But observations by Roberts at the Cape of Good Hope observatory led to the conclusion that the two components of Alpha Centauri, much as they differ in brightness, are really twice as heavy as our sun. It seems to follow from these facts that one of these twin suns is losing its light and in the course of ages may become only a gigantic opaque planet, while its companion will continue to blaze with solar splendor.—Washington Star.

She'll Get It Anyhow.

Nipp—"A woman always vants the last word." Tuck—"And man can save a lot of time by letting her have it."

A necessary part of your diet

VARIETY in foods is essential, of course, but in providing variety do not overlook the importance of *nourishment.*

Crisp, delicious Grape-Nuts is a highly nourishing cereal food in unusually compact form. It supplies the rich nutrition of wheat and malted barley, including the mineral elements of these splendid grains, without which health and strength cannot be maintained.

Grape-Nuts, with good milk, is a complete food. Economical, too, because a moderate amount provides unusual nourishment.

News of Minnesota

EVENTS of the week throughout the "State of Ten Thousand Lakes" told in brief form

Sleepy Eye—E. H. Snow, chicken fancier, is having a record size incubator constructed. It will have a capacity of 6,000 eggs.

Farmington—Plans are being drawn for the erection of a $75,000 hospital here. The present building is inadequate to meet the growing business.

Virginia—Virgina members of the Amercan legion are about to launch a city-wide campaign for new members beginning Feb. 12, continuing until Feb. 22.

Albert Lea—Rev. Jacob O. Tweeten, formerly of Lee, Ill., was formally installed as permanent president of Luther academy here, by Rt. Rev. H. G. Stub, president of the Norwegian Lutheran Church of America.

Owatonna—Officers were elected by the Owatonna Shrine club at their annual meeting here. C. A. Tincher was elected president; M. K. Brown, vicepresident; Will H. Darby, secretary and G. B. Bennett, treasurer.

Madison—The ownership of most of the stock of the First National bank has changed hands, W. S. Whitmore of Minneapolis being one of the principal purchasers. Mr. Whitmore has been named president of the institution and Oscar E. Nelson, cashier.

Trumph—Voters of Triumph and Monterey will vote on the question of a $30,000 bonds issue. The purpose is to use the money to enlarge the educational plant of the two villages situated midway between the two places.

Windom—The large flour mill, operated by the late T. C. Collins for more than 40 years was destroyed by fire at a loss of nearly $30,000. The railroad bridge, a short distance away, caught fire several times but was extinguished.

Farmington—Fred Phillips, farmer near here, owns a violin made by Nichols Amatus, Cremona, Italy, in 1661. He believes it to be the oldest violin in the world. It has been handed down from father to son in his family until it came to him.

Lakefield—The city council has taken the first steps on a street paving program for Lakefield. It is proposed to pave the main business street of the city first. A mass meeting has been called for Feb. 13, at which time the matter will be finally discussed.

Hibbing—The Commercial club of Hibbing at a meeting appointed a committee of three, to appear before the county board of commissioners in the interest of securing a county aviation field for Hibbing. A. Legge, Edward Bergeron and John Curran are the members of the committee.

Slayton—Persons who have been soliciting for members for a National Guard company for this city have received 106 signers to the membership roll. While it is said there is no opening for a militia company for Slayton at present it is thought that there will be in the near future.

International Falls—Deputy Rose of the Ranier customs office broke up a well organized whisky ring when he found several cases of whisky on the southbound D. W. & P. train. A man in Duluth is said to be involved as the head of the smugglers. Eight cases of whisky were found on the diner. The case is being investigated.

Hibbing—Vergilo Bertone of Chisholm, is the choice of the Italian Federated Clubs of Northern Minnesota for the appointment as deputy sheriff on the range. John Capra, of Hibbing, was the second choice. Mr. Bertone is a former mail carrier in Chisholm and a prominent union man. Capra is a former employe of Hibbing.

Fosston—M. N. Koll, Cass Lake, was re-elected president of the Minnesota state division of the Theodore Roosevelt International Highway association at the annual meeting of the division here. L. W. Huntley, Grand Rapids, was elected secretary. The meeting went on record as favoring the construction program outlined by the state highway department and the bill authorizing the issuance of $20,000,000 bonds to carry out the department's road program.

Marshall—The county commissioners have decided upon an extensive road program for the coming year. The road north from Marshall known as the Clarkfield road will be graded and a road will be built between Cottonwood and Tracy. The road north and south of Tracy will be regraveled and the road running south from Balaton to the county line will be graded. A new and important road has been decided upon giving a direct line from Amiret to Brookings, S. D., via Russell, Minn.

Thief River Falls—The departments meeting of the Minnesota Co-operative Creameries association of District No. 14 was held in Thief River Falls. About 60 delegates attended. The district is composed of 10 counties, commonly known as the Red River valley.

Duluth—Judgment in the settlement of 44 fire claims totaling $55,415.29 were filed in district court by Judge W. A. Camp. The judgments were for payment on the losses suffered in the forest fires of 1918 and were paid through James E. Davis, chairman of the United States railway administration.

TURKS AGREE TO SIGN TREATY

Near East Peace Conference at Lausanne Has Successful Ending.

DECISION WAS SUDDEN

Ismet Pasha Accepts Allies' Terms—Declares He Is Ready to Sign Now—Lord Curzon Returns to England.

Paris—The Havas news agency learns from Lausanne that Ismet Pasha has accepted the allied terms respecting capitulations.

Ismet, according to an earlier dispatch to Havas, informed M. Bompard, head of the French delegation, after a short conference that the Turks were disposed to consider the allied treaty as finally presented and with last minute concessions included, might not refuse to sign. The negotiations were then renewed, and as at present believed, with successful results.

Ready to Sign Now.

Paris—M. Bompard, head of the French delegation at Lausanne, had a long talk with Ismet Pasha before leaving for Paris, details of which he telegraphed to Premier Poincare, who has received his message. Ismet was more completely informed of the intention of the allies in the event a settlement was not reached. He did not persist in his uncompromising attitude, and accepted the text of the capitulations previously submitted to him, thus removing the only obstacle to the signature of the treaty.

The reservations of the Turks on other points, such as Mosul, have already been accepted by the allies.

Premier Poincare hastened to transmit this favorable news to London, and it has been placed in the hands of the British government, although too late for the cabinet meeting which was called on the arrival of Lod Curzon, the foreign secretary, from Lausanne.

STORM TAKES FOUR LIVES

Blizzard Sweeps Entire South With Exception of Florida.

Atlanta, Ga.—Four persons are dead as a result of snow and sleet storms that spread over southern territory from the Potomac river to the lower Mississippi valley, enveloping the south in the most frigid blasts of winter.

Parham Williams, former member of the Louisiana legislature, dropped dead while shoveling snow off the walks at his residence at Lexington, Miss., while another man was killed at Alexandria, La., when an automobile collided with a sleigh in which he was riding.

Two lives were claimed at Birmingham. Herbert McClain, 10, was electrocuted when he skated against a live wire blown down by high winds, and Will Kyser, a negro fruit peddler, succumber to exposure.

With the exception of Florida, few parts of the south were not shivering from the wintry winds.

HARDING WILL RUN IN 1924

Unanimous Nomination by G. O. P. Predicted by Watson.

Washington—President Harding will be a candidate for reelection in 1924 and will be nominated unanimously by the Republican party, Senator Watson of Indiana, prominent in the Republican leadership, predicted in the senate during a debate with Democrats over political questions.

The Indiana senator also promised his support for Senator Lodge of Massachussetts, the Republican leader in the senate, for that position in the next congress, saying that "if the senator from Massachusetts wants to be leader in the next congress, I know of no reason why he shouldn't be and I am for him." He added that the Republican party would present a united front in 1924 and stand on the administration's record in congress and in the executive departments.

Significance was attached to Senator Watson's statements because of mention which has been made of him as a possible presidential candidate next year and because of his prominence in the administration leadership and his close personal and political connection with President Harding. Frequently he is in consultation with the chief executive and in fact made his statement on the floor of the senate not long after returning from a White House conference.

Brainerd Strikers to Go Back.

Brainerd, Minn.—The strike of federated shop crafts workers at the Northern Pacific shops here ended as a result of a mass meeting of striking shopmen. At the time of the walkout, July 1, 1922, 1,175 men left their employment. Later in the year approximately 500 returned to work, the places of those remaining on strike being filled by replacement men. No announcement of an agreement between the strikers and railroad officials as to reemployment of these at the meeting was announced.

BAYER

I Tried.

Vachell Lindsay said the other day: "Poetry is on its last legs in this country. The more successful a periodical is, the more its editor is bound to hate us poets.

"A young man got in to the editor of a great weekly and said:

"'I am a poet, sir. Will you try me—'

"The editor with a hasty laugh interrupted him.

"'Sure I'll try you,' he said, 'You're guilty. Ten years hard.'"

Important to Mothers

Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it

Bears the Signature of Chas. H. Fletcher

In Use for Over 30 Years.
Children Cry for Fletcher's Castoria

The Last Word in Umbrellas.

A youngster in the eighth grade at public school No. 27 was once walking along the street with his mother, when a shower came up. While they were waiting in the shelter of a building, watching the umbrellas which were suddenly appearing, the boy said, "Mother, I wish I had a flannel umbrella."

"Why?" inquired the mother.

"Oh, to keep it's ribs warm," was the reply.—Indianapolis News.

Shave With Cuticura Soap

And double your razor efficiency as well as promote skin purity, skin comfort and skin health. No mug, no slimy soap, no germs, no waste, no irritation even when shaved twice daily. One soap for all uses—shaving, bathing and shampooing.—Advertisement.

It is the lie that is never uttered, only expressed, that sometimes does the most harm.

Skin Eruptions

Are Usually Due to Constipation

When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus replaces it.

Nujol is a lubricant—not a medicine or laxative — so cannot gripe. Try it today.

EDITORIAL

NONE OF OUR BUSINESS.

Considerable discussion is going the rounds as to the merits and demerits of the French invasion of the Ruhr basin. Some espouse the cause of the French, while others contend that the French have gone to the extent where justice fails to sustain them.

Nearly everyone who waxes warm over the subject seems to lose sight of one important fact—it is none of our business.

If France and Germany want to fight again—as they will some day—let them do it, without interference from us. And if other countries join in and bankrupt themselves, let them go to it, if they haven't better sense.

It is purely an European problem. It requires no word or act from us.

If we pay the proper amount of attention to our own affairs, and direct a proportionate amount of energy toward the development of our own country, we will have all that we can do, and there will be neither time nor occasion for meddling in other people's affairs.

We can not be expected to pull other nations out of the mire until we first get out ourselves.

WHAT ARE YOU?

Are you a republican or a democrat, a prohibitionist or an anti, as regards matters concerning the home community?

Or are you simply a LOYAL CITIZEN OF THE TOWN?

The man who puts party or business above town is not the best kind of a citizen for the town.

Aside from country, our first thot should be for the town in which we live. Our greatest energy should be directed toward the development of our business, social, educational and moral life.

When these duties have been properly performed we will be justified in devoting more time and attention to affairs that are more foreign in their nature.

Be a LOYAL CITIZEN FIRST.
After that, be anything you like.

The poor boy in a country town or on a farm has a good chance to forge ahead. The poor man in a large city faces almost a certainty of standing still. If you feel that you simply must leave the good old home community, at least do it with your eyes wide open.

GOD'S NAME—ITS USES AND ABUSES.

By REV. H. LUTZ.

Text: "Thou shalt not take the name of the Lord, thy God in vain." (Exodus 20,7.

Two of the most flagrant abuses of God's holy name have been considered, namely, cursing and swearing falsely or unnecessarily.

Another is using witchcraft. That means using God's name or word to perform supernatural things such as conjuring, fortune-telling, consulting the dead, and similar Satanic acts. Resort is had to such means chiefly to obtain knowledge not to be had by natural means, or to secure relief from sickness. When Saul had fallen away from the living God, he stole to the witch of Endor. And in our enlightened age men and women still throng about mediums, clairvoyants and fortune tellers. Many cannot overcome the superstitious dread of certain days or numbers regarded as luckless. Using witchcraft in any form is employing the devil's help and is a sin against God, and, if done under cover of His sacred name, or in connection with it, is taking His name in vain to adorn the sin of doing the devil service. Whatever we cannot find out by prayerful thought, by asking the advice of well-informed men, or by searching the Scriptures, is not for us to know. Likewise, in time of need our help and refuge is God. We should use the natural means by which He has given us, and pray Him to bless them, but do not try to thwart His purpose by resorting to a power and wisdom not His.

Another abuse of God's name is lying or deceiving by it. This is done by false prophets, who, while contradicting or denying the true faith, preach their own ideas and seek to gain people to believe these by twisting Scripture into a seeming agreement with their views. Those also lie and deceive by God's name who, living in sin, would be accounted saints, making a great display of piety by way of prayers, church attendance and a devout bearing. But not every one that sayeth: "Lord, Lord" shall enter into the kingdom of heaven.

But while forbidding the misuse of God's name, the second commandment also commands and urges its right use. We should not, of course, altogether avoid the mention of God's name as too sacred to utter. If mentioned with reverence and devotion, it cannot be mentioned too often. As in our hearts we fear and love God, so "we should call upon His name in every trouble, pray, praise and give thanks.

Would that all our thoughts and words and deeds by the help of the Spirit of Christ, were so ordered as to read: "Hallowed be Thy Name!"

AMEN.

Roseau Man Wins in Wheat Contest

Wallace Miller Takes First Prize in Acre Marquis Wheat Judging.

Growers From All Over the Northwest Have Displays at Winter Shows.

Wallace Miller, Roseau, won first prize in the acre Marquis wheat contest, samples of which are on display at the winter shows at Crookston this week. He grew 53 bushels and 38 pounds of wheat which scored 99.

The Spring Wheat Crop Improvement association of Minneapolis furnished $150 in prizes for the 10 best acre yields of Marquis wheat grown in 1922. Second in the contest was Alfred Carlson, Hallock, who raised 42 bushels and 39 pounds on his acre.

An exhibit of bread baked from various wheats was staged in connection with the wheat exhibits. Thirteen samples of bread were on display, baked by the Pillsbury laboratory. According to Bert Ball of the Spring Wheat Crop Improvement association, this is probably the first bread exhibit which has ever been held in connection with a wheat display of this kind. Bread baked from the Marquis wheat was a fine loaf, showing that Marquis wheat makes a very desirable flour and works well. Wheat of this variety, according to Mr. Ball, demands the highest premium. Kota wheat, a new variety, works well in the dough but fails to spring or expand in the oven. The flour has a yellow color. the loaf has a coarse texture and is about equal to the most inferior Minnesota or South Dakota wheat sold on contract grade. Kubanka durum is a high quality durum wheat, desirable for making macaroni but not adapted to bread making. It makes a poor dough, small sized loaf of very yellow color with characteristic cracks showing wheat gluten. A mixed durum wheat tested in the oven proved to be neither adaptable to bread making or macaroni.

Another variety of wheat which the wheat association is discouraging for the northwest section of Minnesota is Minturki, a Minnesota winter wheat. This makes flour of poor strength and color and is decidedly inferior to spring wheat. Mindum, or Minnesota durum wheat, is fairly good for macaroni but is not a wheat bread. Canadian Marquis, like Minnesota and Dakota Marquis, makes a flour of excellent strength and is strongly recommended by the spring wheat association.

The ill effects of weed seed in milling wheat was shown by one loaf of bread baked from wheat containing corn sockle. This made a heavy, dark loaf of doubtful digestibility. It is said that the weed seed shipped into Minnesota in wheat cars last year would fill 14,000 freight cars, all of which were badly needed to move the wheat crop to market.

Other winners in the acre contest were P. M. Cameron, Hallock, who won third prize; A. Wardeberg, McIntosh fourth; Ed M. Johnson, Hallock, fifth; William S. Ash, St. Vincent, sixth; Boraas Bros., Hallock, seventh; Arthur Norem, Hallock, eighth; John Rydeen Clearbrook, ninth, and Martin Manahan, Chatfield, tenth.

LENTEN SERVICES AT CITY AUDITORIUM

Rev. E. H. Kreidt Arranges for Series of Six Sermons at City Auditorium.

Following the custom inauguarated last year, Rev. Emil H. Kreidt of St. John's Lutheran church has arranged for a series of six sermons on Christian Truth. The services last year were held in Trinity Lutheran church. The active interest of the people at large and the favorable comments by not a few encouraged Pastor Kreidt to continue the plan and to expand it. He has secured the City Auditorium for the place of meeting, and the services of very capable men.

The sermons this year will present the general theme: "The practical value of Christianity for Man." Among the speakers engaged is Rev. H. F. Buegel of Grand oFrks, N. D. The Rev. Buegel is an elderly man, tried, and not found wanting, by the many years of his active ministry. He now holds the responsible office of Mission Director in the North Dakota and Montana District. The Rev. Buegel will preach the first sermon Feb. 21.

Rev. H. A. Nuoffer of Cass Lake has consented to preach the third sermon. On repeated occasions the Rev. Nuoffer has shown himself a capable preacher, well able to present his theme and to hold the interest of his audience. Two years ago he was honored with the office of Superintendent for all North [illegible] congregations.

Pastor Kreidt feels especially fortunate in securing the services of Rev. Erdman Frenk of Bemidji, perhaps the most brilliant of the young pastors in this part of the state. While a student at Concordia Seminary, St. Louis, Mo., the Rev. Frenk was engaged to lecture at Washington University on "Psychology of the New Testament." Thus he should give an instructive and interesting portrait of "Jesus Christ the Savior."

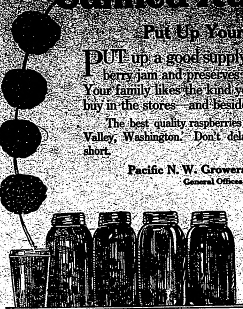
With the other speakers, who have already preached to large and attentive audiences in Thief River Falls, Pastor Kreidt feels that his Lenten Services have made a large step forward. All the services, naturally, will be held in the English language. The public is cordially invited to attend these services. Detailed announcements will be made at the proper time through the local papers.

The Lenten Season, commemorating the Great Passion of Jesus Christ, has for ages been looked upon as a call to mankind to "get closer to God." These sermons with their inspiring truth, presented by men at home in their topic and in the language as well, will help you.

Successful men never achieved success by wasting their time envying others.

Even if the war did get a lot of 'em there are still some brave and reckless men left. The other day we saw two of 'em order hash.

The world is looking for young men who are self-starters.



Canned Raspberries

Put Up Your Own at Home

PUT up a good supply of Raspberry and Loganberry jam and preserves at home—in Ball-Mason jars. Your family likes the kind you make better than any you can buy in the stores—and besides you save one-third to one-half.

The best quality raspberries and loganberries come from Puyallup Valley, Washington. Don't delay your canning—this year's crop is short.

Pacific N. W. Growers and Jobbers Association
General Offices, Minneapolis, Minn.

Raspberry Preserves

One pound of sorted berries. Place in preserving kettle one pound granulated sugar, add one cup of water. Allow syrup to boil until it spins a hair, or boil to 250° if thermometer is used. At this degree add berries and boil slowly until fruit is transparent. Skim while boiling, do not stir berries. Boil to a jelly consistency, take from fire, place kettle in pan of cold water to cool. When cold, fill into jars and pour melted paraffin over top. Place in cool room.

RED CROWN GASOLINE

Your Guarantee of Service

A Purring Motor in Winter

There is no more thrilling winter sport than motoring. If your motor purrs along ready and eager for a hard pull or a quick spurt you are thrilled. And this is dependent upon the gasoline you use. There is no commodity you can buy that gives you so much for your money as a good gasoline. It is your faithful servant, ready to do your bidding in fair weather or foul.

But be sure you get the best.

Use Red Crown

The High Grade Winter Gasoline

It starts easily, even in severely cold weather. It responds instantly when you touch the accelerator. It delivers all the smooth, rhythmic power your engine is capable of developing. It gives you racing speed if you want it. It burns clean and vaporizes to the last drop.

It gives maximum mileage and you can get it everywhere and everywhere the same.

At the Following Standard Oil Service Station:
2nd and Main Streets

And at Any Filling Station or Garage Showing the
RED CROWN SIGN
Standard Oil Company (Indiana) Thief River Falls, Minn.

Mrs. Christina Van Hess

The Appealing Charm of Health and Beauty

Sioux Falls, S. Dak.—"About two years ago I was in a rundown, nervous condition, my back ached terribly and I had bearing pains. I suffered from functional disturbances, and felt sick and mean all over. A friend told me about Dr. Pierce's Favorite Prescription and she was so enthusiastic about it that I bought a bottle. I never took a medicine in my life that did me so much good; it strengthened me and rid me of all my aches and pains. My system was regulated and my nervousness left me. I am still just as well and strong as can be —never know a sick or wearisome day, and I give all the credit to Dr. Pierce's Favorite Prescription."—Mrs. Christina Van Hess, 1425 N. Dakota Street.

Sold at drug stores in tablets or liquid. Write Dr. Pierce, President Invalids' Hotel in Buffalo, N. Y., for free medical advice. Send 10c for trial pkg. tablets.

His Condition.

"Well, Buckaloo; here again, eh?" said 'Squire Ramsbottom of Petunia.

"Uck—Yassah, yassah! S'picion I is, if yo' says so, sah!" chuckled the colored culprit.

"H'm! Are you guilty or not guilty of the charge against you?"

"Uh, well, sah, I isn't mo' dan ten dollahs or two weeks in jail guilty, if I's guilty a-tall, sah; and I isn't so sho' I is."

Attribute Their Success to Newspaper Advertising

In an interview today, Mr. Warren Wright, President of the Calumet Baking Powder Company, strongly advocated the use of newspaper advertising, and points to Calumet's success as proof of his statement.

"Calumet sales are 2½ times as much as any other brand," stated Mr. Wright, "and we attribute this to our lavish use of newspaper space. We believe that the newspaper is the most direct medium we can use in getting our message across to the housewife, and we know from our experience covering thirty years that the housewife will respond to newspaper advertising quicker than she will to any other form of advertising.

"The housewives have confidence in newspaper advertisements because they know that the newspapers set up high standards for their advertisers. It is for that reason that the housewife looks to the newspaper for information on products in which she is interested."

The Boycott.

The word boycott means to combine to refuse to work for, deal, or associate with or assist a person; a species of excommunication; to place merchandise under a ban to prevent its sale. It was a method of intimidation adopted by the Irish Land league in 1880, and Captain Boycott was one of its first victims.

Work ill done must be twice done.

"MOLLY—MINES!"

"Daddy! Daddy!"

It might have been the tender agony of the cry to which Patrick Casey's dulling brain responded, sending the message of his will along the nerves to transmit a final summons. His body twitched, he choked, swallowed, opened gray eyes, filmy with death, brightening with intelligence as he saw his daughter bending over him, the face of Sandy above her shoulder. The gray eyes interrogated Sandy's long and earnestly until the light began to fade out of them and the wrinkled lids shuttered down.

Another swallow of the raw spirits and they opened flutteringly again. The lips moved soundlessly. Then, while one hand groped waveringly upward to rest upon his daughter's head, Sandy, bending low, caught three syllables, repeated over and over, desperately, mere ghosts of words, taxing cruelly the last breath of the wheezing lungs beneath the battered ribs, the final spurt of the spirit.

"Molly—mines!"

"I'll look out for that, pardner," said Sandy.

This is the beginning of a first-class outdoor story of the West. Molly is the old prospector's young daughter, companion and partner. The mines—believed to be worthless. Sandy—one of the three owners of the Three Star ranch. How Sandy keeps his word given to the old prospector, dying under his wrecked wagon, is the story.

The author—J. Allan Dunn, who knows his people and his ranch land, and has written many a good yarn.

CHAPTER I

—1—

Grit.

"Mormon" Peters carefully shifted his weighty bulk in the chair that he dared not tilt, gazing dreamily at the saw-toothed mountains shimmering in the distance, sniffing luxuriously the scent of sage.

"They oughter spell Arizona with three 'C's,'" he said.

"Why?" asked Sandy Bourke, wiping the superfluous oil from the revolver he was meticulously cleaning.

"'Count of Climate, Cactus, Cattle—an' Coyotes."

"Makin' four, 'stead of three," said the managing partner of the Three Star ranch.

Came a grunt from "Soda-Water" Sam as he put down his harmonica, on which he had been playing "The Cowboy's Lament," with variations.

It was Sunday afternoon on the Three Star rancheria. The three partners, saddle-chums for years, ever seeking mutual employ, known through Texas and Arizona as the "Three Musketeers of the Range," sat on the porch of the ranch house, discussing business and lighter matters. One year before they had pooled their savings and Sandy Bourke, youngest of the three and most aggressive, coolest and swiftest of action, had gloriously bucked the faro tiger and won enough to buy the Three Star ranch and certain rights of free range. The purchase had not included the brand of the late owner. Originally the holding had been called the Two-Bar-P. As certain cattlemen were not wanting who had a knack of appropriating calves and changing the brands of steers, Sandy had been glad enough, in his capacity of business manager, to change the name of the ranch and brand. Two-Bar-P. was too easily altered to H-B, U-P, U-B, O-P, or B; a score of combinations hard to prove as forgeries.

There had been lengthy argument concerning the new name. Three Star, so Soda-Water Sam—whose nickname was satirical—opined, smacked of the saloon rather than the ranch, but it was finally decided on and the branding irons duly made.

Sandy Bourke had dark brown hair, inclined to be curly, a tendency he offset by frequent clipping of his thatch. The sobriquet of "Sandy" referred to his grit. He was broad-shouldered, tall and lean, weighing a hundred and seventy pounds of well-strung frame. His eyes were gray and the lids sun-puckered; his deeply tanned skin showed the freckles on face and hands as faint inlays; his long, limber legs were slightly bowed.

Not so the curve of Soda-Water Sam's legs. You could pass a small keg between the latter's knees without interference. Otherwise, Sam, whose last name was Manning, was mainly distinguished by his enormous drooping mustache, suggesting the horns of a Texas steer, inverted.

As for Mormon, disillusioned hero of three matrimonial adventures, woman-soft where Sandy was woman-shy, he was high-stomached, too stout for saddle-ease to himself or mount, sun-rouged where his partners were burned brown. His pate was bald save for a tonsure-fringe of grizzled red.

Mormon, with stubby fingers wonderfully deft, was plaiting horsehair about a stick of hardwood to form the handle of a quirt. He stopped suddenly, staring at the fringe of the waving mesquite.

"Look at that ornery coyote!" he said. "Got his nerve with him, the mangy calf-eater, comin' up to the ranch thataway."

"Mormon, you need glasses fo' yore old age. That ain't a coyote, it's a dawg," pronounced Sandy.

The creature left the cover of the mesquite and came slowly but determinedly toward the ranch house, past the corral and cook shack, its daring proclaiming it anything but a cowardly, foot-hill coyote. Its brush was down, almost trailing, its muzzle drooped, it went lamely on all four legs and occasionally limped on three.

"Collie!" proclaimed Sandy. "Pore devil's plumb tuckered out."

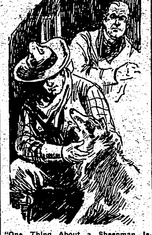
"Sheepdawg!" affirmed Sam, disgust in his voice. "H—l of a gall to come round a cattle ranch."

The gray-white dog came on, dry tongue lolling. It halted twenty feet from the porch, one paw up, as Sandy bent forward and called to it.

"Come on, you dawg. Come in, ol' feller. Mormon, take that hair out of that pan of water an' set it where he can see it."

Mormon shifted the pan in which he had been soaking the horsehair for easier plaiting and the dog sniffed at it, watching Sandy closely with eyes that were dim from thirst and weariness. Sandy patted his knee encouragingly, and the tired animal seemed suddenly to make up its mind. Ignoring the water, it came straight to Sandy, uttered a harsh whine, catching at the leather tassel on the cowman's worn leather chaparejos, tugging feebly. As Sandy stooped to pat its head, powdered with alkali dust that covered its coat, the collie released its hold and collapsed on one side, panting, utterly exhausted, with glazing eyes that held appeal.

Sandy reached for the pan, squatting down, and chucked some water from the palm of his hand into the open jaws, upon the swollen tongue.



"One Thing About a Sheepman Is Allus Good," Said Mormon, "His Dawg."

The dog licked his hand, whined again, tried to stand up, failed, succeeded with the aid of friendly fingers in its ruff and eagerly lapped a few mouthfuls.

Again it seized the tassel and pulled, looking up into Sandy's face imploringly.

"Somethin' wrong," said the manager of the Three Star. "Tryin' to tell us about it. All right, ol' feller, you drink some more wateh. Let me look at that paw." He gently took the foot that clawed at his chaps and examined it. The paw was worn to the quick, bleeding. "Come out of the Bad lands," he said, looking toward the range. "Through Pyramid pass, likely."

Sandy rolled the dog on his side and found the other pads in the same condition. Running his fingers beneath the ruff, scratching gently in sign of friendship, he discovered a leather collar with a brass tag, rudely engraved, the lettering worn but legible.

"GRIT. Prop. P. Casey."

"They sure named you right, son," he said. "We'll 'tend to P. Casey, soon's we've 'tended to you. You need fixin' if you're goin' to take us to him. You'll have to hoof it till we cut fair trail. Sam, fetch me some adhesive, will you? An' then saddle up; Pronto fo' me, a hawss fo' yoreself an' rope a spare mount."

Sam went into the house for the medical tape, then to the corral. Sandy bathed the raw pads softly, cut patches of the tape with his knife, put them on the abrasions, held them there for the warmth of his palm to set them. Grit licked at his hands whenever they were in reach, his brightening eyes full of understanding, shifting to watch Sam striding to the corral.

"One thing about a sheepman is allus good," said Mormon. "His dawg. Reckon you aim on me tendin' the ranch, Sandy?"

"Come if you want to."

"Two's plenty, I reckon. I do more ridin' through the week than I care to nowadays. I'll stick to the chair."

"Prod up Pedro to git some hot water ready. Keep a kittle b'ilin'. No tellin' what time we'll git back," said Sandy.

He pressed the dog on its side, in the shade, and went into the house. Mormon followed him. Grit watched them disappear, gave a little whine of impatience, accepted the situation philosophically as he listened to sounds from the corral that told him of horses being caught, and drooped his head on the dirt, lying relaxed, eyes closed, gaining strength against the return trip.

Sam rode to the porch on his roan, Sandy's pinto and a gray mare leading, and "tied them to the ground" with trailing reins as Sandy came out bearing a pan of food, a package and a leather case.

He coaxed the collie to eat the food from his hand while Sam brought the whisky.

"Load my guns, Mormon," he requested.

Mormon did it without comment. The two blued Colts were as much a part of Sandy's working outfit as his belt, or the bridle of his horse. Sam buckled on his own cartridge belt, holster and pistol, fixed his spurs, tied the package of food to his saddle, filled two canteens and did the same with them. Sandy offered the pan of water to Grit, who drank in business-like fashion, assured of the success of his mission. He stood up squarely on his legs, eased by the plastering. They were only tired now.

As Sandy and Sam mounted, the latter leading the gray mare, Grit ran ahead of them and came back to make certain they were following. Then he headed for the spot in the mesquite whence he had emerged, marking the opening of a narrow trail. The horses broke into a lope, the two men, the three mounts, and the dog, off on their errand of mercy.

CHAPTER II

Casey.

The two men followed the dog across the flats, through mesquite, through chaparral to barren slopes set with strange twisted shapes of cactus. When it became apparent that Sandy's hazard had hit the mark, as they entered the defile that made entrance for Pyramid pass, the only path across the Cumbre range to the Bad lands beyond, Sandy reined in, coaxed up Grit, resentful, almost suspicious of any halt, lifting the collie to the saddle in front of him. Grit protested and the pinto plunged, but Sandy's persistence, the soothe of his steady voice, persuaded the dog at last to accommodate itself as best it could, helped by Sandy's one arm, sometimes with two as Sandy, riding with knees welded to Pronto's withers, dropping reins over the saddle horn, left the rest to the horse.

"I figger we got some distance yet," he said to Sam. "Dawg was goin' steady as a woodchuck ten mile' from water. Reckon my guess was right—he wore his pads out crossin' the lava beds, though what in time any hombre who ain't plumb loco is trapesin' round there for, beats me. Reckon this P. Casey is a prospector, Sam. One of them half crazy old-timers, nosin' round tryin' to pick up lost leads. Them fellers is born with hope an' it's the last thing to leave 'em."

"Hope's a good hawss," said Sam. "But it sure needs Luck fo' a runnin' mate."

"You said it." Sandy relapsed into silence.

At the far end of the pass the dog struggled to get down.

"I'll let him give us a lead," said Sandy, "soon as we hit the lava. We can foller his trail that fur. Sit tight, son." Grit whined but subsided under the restraining hands.

Sandy took the lead, bending from the saddle, reading the trail that Grit's paws had left in the alkali and sand. Once the dog's tracks led aside to a scummy puddle, saucered by alkali, dotted with the spoor of desert animals that drank the bitter water in extremity. Then it ran straight to a wide reef of lava. Sandy set down the collie. Grit ran fast across the pitted surface, ahead of the horses, waiting for them to cross the lava. They had hard work to get him to come to hand again, but he gave in at last to the knowledge that they would not go on otherwise.

The two riders went silently on at a steady walking gait.

"Never see a prospector with a dawg afore," said Sam at last. "An' that a sheep dawg."

"Dawg 'ud be apt to tucker out in desert travel," agreed Sandy. "Mean one more mouth fo' water."

He, like Sam, speculated on the kind of a man J. Casey—if it was Casey they were after—might be. If not a sheepman or a prospector, a third probability made him an outlaw, a man with a price on his head, hiding in the wilds from punishment. It sufficed to them that he was a man whom a dog loved enough to bear a call to help his master.

Slowly, the mesa ahead took on more definite shape. Sandy picked up Grit's trail once again. The collie wriggled, shot up its muzzle, whined, licked Sandy's face.

"Nigh there," suggested Sam. Sandy nodded and let the dog get down. Grit raced off, nose high, streaking around a curve. When they reached it he was out of sight. The road rose at a steep pitch, cliff to the right, precipice to the left, stretching on and up to the summit of the pass.

Grit, unseen, ahead, was barking in staccato volleys. There was another sound, a faint shout, unmistakably human. The men looked at each other with eyebrows raised.

"That ain't no man's voice," said Sam. "That's a gal." He looked quizzically at Sandy, knowing his chum's inhibition.

Sandy was woman-shy. Men met his level glance, fairly, with swift certainty that here stood a man, four-square; or shiftily, according to their ease of conscience, knowing his breed. Sandy was a two-gun man but he was not a killer. There were no notches on the handles of his Colts. In earlier days he had shot with deadly aim and purpose, but never save in self-defense and upon the side of law and right and order. Among men his poise was secure, but, in a woman's presence, Sandy Bourke's tongue was tied, save in emergency, his wits tangled. Whatever he privately felt of the attraction of the opposite sex, the proximity of a girl produced an embarrassment he hated but could not help.

He gave Sam no chance for banter. Action was forward and it always straightened out the short-circuitings of Sandy's mental reflexes toward womankind. He touched Pronto's flanks with the dulled rowels he wore, and the pinto broke into a lope. A big bowlder was perched upon the nigh side of the road. Grit came out from behind it, barked, whirled, and seemingly dived into the canyon. Coming up with the mare, Sam found Sandy dismounted, waiting for him.

What had happened was plain to both of them. The rotten, hastily made road collapsed under the lurch of a wagon jolting over outcrop uncovered by the rains. Scored dirt where frantic hoofs had pawed in vain, tire marks that ended in side scrapes and vanished were evidence.

Sam got off the roan, the tired horses standing still, snuffing the marks of trouble. Far down the slope Grit gave tongue. The cliff shouldered out and they could see nothing from the broken road. How anyone could have hurtled over the precipice and be still able to call for help without the aid of some miracle was an enigma. They listened for another shout, but, save for the barking of the dog, there was silence in the grim gorge. In the sky, two buzzards wheeled.

Sandy untied the package of food and the leather medicine kit; Sam slapped his hip to be sure of his whisky flask. Aided by their high heels, digging them in the unstable dirt, they worked down the cliff, rounding the shoulder.

A wide edge of outcrop jutted out from the canyon wall jagged into battlements. Piled there was a wagon, on its side, the canvas tilt sagged in, its hoops broken. A white horse, emaciated, little more than buzzard meat when alive, lay with its legs stiff in the air, neck flattened and head limp. A broken pole, with splintered ends, crossed the body of its mate, a bay, gaunt-hipped, high of ribs. It lay still, but its flanks heaved, catching a flash of sun on its dull hide.

Between the wheels of the wagon knelt a girl in a gown of faded blue, head hidden behind a sunbonnet. She leaned forward in the shadow of the wagon. Sandy caught a glimpse of a huddled body beyond her. Grit sat on his haunches, head toward the road, thrown back at each bark. Sandy reached the ledge first. The girl did not turn her head, though his descent was noisy. He touched her gently on the shoulder, telling himself that she was "just a kid."

She looked up, her face lined where tears had laned down through the mask of dust. Now she was past crying. Her eyes met Sandy's pitifully, holding neither surprise nor hope.

"He's dead." She seemed to be stating a fact long accepted. "He's dead. An' he made me jump. You come too late, mister."

The man lay stretched out, head and shoulders hidden, his gaunt body dressed in jeans, once blue, long since washed and sun-faded to the green of turquoise matrix. The boots were rusty, patched. The wagon-bed, toppling sidewise, had crashed down on his chest. Rock partly supported the weight of it. Sandy picked up a gnarled hand, scarred, calloused and shrunken, the hand of an old prospector.

"If you did that—took my Daddy's place," she said, "why we'd be pardners, same as him an' me was."

Cementation Steel.

Cementation steel is of the high carbon variety, but it contains more sulphur and less manganese than ordinary tool steel. The cementation steel is so dense that it remains unresolved under the microscope with a magnification of 1,200 to 1,600 diameters, although that of open hearth, crucible and Bessemer steel can be resolved with a magnification of 100. Its elastic limit is said to be very high and its ultimate tensile strength 80,000 pounds per square inch.

DYED HER DRAPERIES, SKIRT AND A SWEATER WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple that any woman can dye or tint faded, shabby skirts, dresses, waists, coats, sweaters, stockings, hangings, draperies, everything like new. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is guaranteed, even if you have never dyed before. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run. So easy to use.—Advertisement.

Thoughtful Enough.

"Helen, did you let Mr. Borleigh go home in all this rain without offering him un umbrella? How thoughtless of you!"

"It wasn't thoughtlessness, mother. I knew he'd make the returning of the umbrella an excuse for calling again." —Boston Evening Transcript.

Timely Comments on Agricultural Topics for Our Readers

HOG PRICES ARE LOWER

Grain Prices Uncertain But Firm During the Week.

U. S. Bureau of Markets, Washington, D. C, for week ending February 2, 1923.

GRAIN—Grain prices uncertain but firm during the week and closed slightly higher. Sentiment less bearish account rapid absorption of offerings the past few days. Chicago May wheat up one cent; Chicago May corn up 1⅝c. Wheat trade very light on the 2nd with market unsettled but prices closed firm on strength in corn. Corn higher throughout on confirmation of heavy damage to Argentine corn crop. Sentiment becoming more bullish. Closing prices in Chicago cash market; No. 2 Red winter wheat $1.33; No. 2 Hard winter wheat $1.17; No. 2 mixed corn 73c; No. 2 yellow corn 73c. No 3 white oats 43c. Average farm prices; No. 2 mixed corn in central Iowa 60c; No. 1 Dark Northern wheat in central North Dakota 99c, No. 2 Hard winter wheat in central Kansas $1. Closing future prices; Chicago May wheat $1.18; Chicago May corn 74⅝c, Minneapolis May wheat $1.18⅛, Kansas City May wheat $1.10⅛, Winnipeg May wheat $1.12¼.

FEED:—Markets, weak transactions small. Cottonseed meal and cake prices declined further. Supplies exceed demand. Hominy feed offered freer, prices steady. Gluten feed situation unchanged. Western markets soliciting orders for future shipment in the east. Jobbers well supplied and buying little. Linseed meal and cake show easier tendency. Domestic feeding demand quiet and export inquiry negligible for oil meals. Stocks ample to meet demand. Shipments fair. Quoted February 2, Bran $26.25, middlings $26, Flour middlings $28, Ryo middlings $25.50. Minneapolis, white hominy feed $30, St. Louis, $30.50, Chicago; Gluten feed $42.65 Chicago; 36 per cent cottonseed meal $41 Memphis, $42 Atlanta; 34 per cent Linseed meal $52.75, Minneapolis.

LIVESTOCK AND MEATS:—Chicago hog prices ranged from five cents lower to fifteen cents higher than a week ago. Beef sters 10 to 15c off, butcher cows and heifers steady to 50c feeder steers and light medium weight veal calves steady to 25c off. Fat lambs steady to 25c higher and feeding lambs 25 to 50c up. Yearlings and fat ewes unchanged. On Feby. 2 Chicago hogs opened 10 to 25c lower, closed weak around 25c lower; beef steers and butcher heifers 10 to 15c higher; stockers and feeders weak; fat lambs steady to 10c higher and fat sheep fully steady. February 2, Chicago prices; hogs top $8.45; bulk of sales $7.75 to 8.25; medium and good beef steers $7.65 to 10.50, butcher cows and heifers $3.75 to 9.75; feeder steers $6 to $8; light and medium weight veal calves $8 to $12; fat lambs $13 to $15.25, feeding lambs $13.25 to $15.50; yearlings $9.25 to $13, fat ewes $5 to $8. Stocker and feeder shipments from 12 important markets during the week ending Jany. 26th were—Cattle and calves 62,865, Hogs 11,481, Sheep 17,784. In eastern wholesale fresh meat markets beef and veal steady to $1 higher for the week, lamb $2 to $3 lower, veal generally steady to $1 higher, mutton good grade steady to $1 higher, medium grade weak to $1 lower, light pork loins steady, heavy loins $1 lower. On February 2, beef was about 50c lower at New York, steady elsewhere, veal weak at Phila, weak to $1 lower elsewhere, lamb 50c to $2 lower at New York, weak to $1 lower at other markets, mutton weak to $1 lower at New York about steady elswhere, pork 50c to $1 lower at New York, weak elsewhere. Feby. 2nd prices good grade meats—Beef $15-17, Veal $13-20, Lamb $21-23, mutton $13-16, light pork loins $15-17, heavy loins $12.50-$14.

DAIRY PRODUCTS:—Butter markets unsettled and weak. Supplies only moderate but buying support lacking. Buyers not interested beyond current needs unless Sellers will guarantee protection against lower prices.

Closing prices 92 score butter—New York 46¾c, Chicago 46½c.

Cheese markets weak and lower. Heavy buyers off market temporarily. Production increasing in Wisconsin and running heavier than last year. Cheese prices at Wisconsin primary markets February 1st—Twins 25¼c, Daisies 26¼c, Double Daisies 26, Young Americas 27, Longhorns 26½, Square prints 27½c.

PERTINENT POINTERS for MODERN FARMERS

Prepared Under Direction of North Dakota Agricultural College

USE IODIDE TO PREVENT HAIRLESS PIGS

(By J. H. Sheppard)

What causes hairless litters of pigs and goitre in human beings is not well understood. It seems to be well established, however, that a little potassium iodide in the feed of sows will prevent it.

Some years the sows in a given region will nearly all preduce hairless pigs; perhaps the next season there will be none. The following is an example:

At the North Dakota Agricultural college in 1919 we farrowed 13 good gilts that had been well fed and exercised. and had been given good care in every way. The entire 13 had hairless or goitred pigs. Twelve sows two years old or over farrowed two hairless and ten good litters. Mature sows are less liable to this hairless litter trouble than gilts. The sows were kept in the same barn and had the same feed as the gilts in 1919.

The year previous, 1918, we did not have a hairless litter from either sows or gilts and Herdsman Geiken and I both thought we had better conditions in 1919 than in 1918. In 1920 we had five hairless litters out of eleven gilts and four hairless litters out of 14 sows, all fed the same feed and housed in one barn.

Looking over our results back I find that in the college barn we had the following results from our gilts:

1916— 5 hairless litters, 3 good litters.
1917— 1 hairless litter, 4 good litters.
1918— 0 hairless litters, 8 good litters.
1919—13 hairless litters, 0 good litters.
1920— 5 hairless litters, 6 good litters.

Since 1920 we have given iodine to the main body of our gilts and have been free from the trouble.

We have had six or eight gilts yearly on a trial that have had no iodine and in 1921 produced a small percentage of hairless pigs, which indicated that it was not a bad hairless year. In 1922 no hairless litters were produced in our trials and hairlessness was not common in this part of the state.

The above records indicate that no one can tell when hairless litters are coming, but the iodine treatment does no harm and may save a pig crop.

It takes only a very little potassium iodide—from 1½ to 2 grains—for a dose and if they should get a little more no harm will be done.

Herdsman Geiken mixes it with the feed so that they get it without knowing it.

There are 5,760 grains in a pound of potassium iodide. The rule for giving potassium iodide is 1½ grains per sow per day, if you give them their dosage for 70 days before farrowing, and two grains per day if you have but 50 days to feed it before farrowing.

If you have 10 sows for 70 days you will need 1,050 grains (nearly a fifth of a pound) of potassium iodide. If you choose to give it 50 days you will require 1,000 grains of it.

If you mix ten days feed at a time have your druggist weigh it out in ten-day amounts for your entire herd of sows. For example, if you are on a 70-day basis you will want seven packages of 150 grains each, if you are on a 50-day basis you will want five packages of 200 grains each.

If you are very careful you can guess at it by putting a "pinch" of the ground potassium iodide in for a two-grain dose, but it is far better to have it weighed and mixed in the feed as suggested above.

Potassium iodide may cost at the rate of from five to six dollars a pound. The druggists in towns probably have little call for it and will have to carry it for a long time and buy it in small quantities when they get it. On this account the price may be high but it will not probably be more than $5.75 per pound to you weighed out in 1500 to 200 grain packages.

If you get it at that price, you will get ten hog doses for a cent or enough to supply a sow for the 50-day period for ten cents.

If your druggist does not keep it apply to your county agricultural agent. He will be able to get it for you in case there is no local supply. This warning is sent out on the basis of safety first.

If no goitre comes the iodine will do no harm; if it is coming this year it should save your pig crop. It is some trouble to see to it but fortunately the cost is moderate.

$14 PER AGRE COST OF RAISING WHEAT

Bismarck, N. D.—J. A. Kitchen, North Dakota commissioner of agriculture and labor, has returned from Sioux City, Iowa, where the South Dakota legislature had, by concurrent resolution, called a meeting of agricultural commissioners of the wheat growing states.

The meeting was in an attempt to arrive at some relief plan for the farmers.

Montana, North and South Dakota, Minnesota, Iowa, Nebraska, Kansas, and Missouri were represented, according to Mr. Kitchen.

Because of the difference between raising winter and spring wheat and other factors such as wide variety in yield it was found difficult to arrive at the cost of raising wheat—one of the subjects discussed—but it was decided that it averages about $14 an acre. Because of the variety in yield factor no cost per bushel for raising wheat, was arrived at.

Storage Control Plan Approved.

One plan to permit the farmer to control sale of his grain after it has been stored in terminal elevators, met with considerable approval, according to the North Dakota commissioner.

When a farmer takes his wheat to the local elevator he gets a warehouse receipt for it. Then it is shipped to a terminal. Under the present system the terminals sell it to the flour mills and elsewhere as they can.

It was felt that the federal government might to good advantage pass a law requiring the terminals to hold the grain until the farmer disposed of his warehouse receipt. It was believed that in this way the farmer could hold the grain for more favorable prices.

DRESS-UP CLOTHES SHOULD NOT MAR A CHILD'S HAPPINESS.

If when ideally clothed, one is quite unconscious of what one wears, then just how many tiny folks, especially when "dressed up" are really dressed as they should be? Take a look around you, suggests Mrs. Catharine Griebel, clothing specialist of the New Jersey Agricultural college.

Here comes a pretty little girl wearing a pink silk dress, white shoes and stockings and a ducky little bonnet trimmed with dainty flowers and tied beneath her delectable chin with a big pink bow. She looks like a fairy and you turn to stare after her to see her stumble, child fashion, and to see mother just in time, catch her and give her a good shaking.

Away down the street you hear angry tones warning the small girl that a good whipping awaits her if——. You hurry on sure that your small fairy is not unconscious of what she is wearing, at that particular moment anyway.

Isn't it a pity to be made miserable because one's dress is pink and made of silk, when it might just as well have been made of stuff which would look nicer every time it went into the wash tub? We see things like the pink frock in the shops. Garments which one is sure will not stand the use a healthy child puts her clothes to—and yet they are so lovely that we linger and often buy.

When every mother knows that her child should wear clothes that will let her enjoy herself, why should she not consider it when buying or making the little garments? To be sure there mu be some dress-up clothes. Even at four one needs a party dress. But why not choose washable materials, made in such a fashion that the laundering takes little time? When sister goes out you expect her to come home soiled and mussy. She will not disappoint you in this respect, but one look at her radiant face will convince you that she has not even remembered she was "dressed up," she has just had a wonderfully good time.

Next day the party dress goes into the tub and ocmes out as good as new.

Naming the farm is a costless procedure but the distinction and advestising value to be gained is great.

About time to renew your subscription to the home town paper?

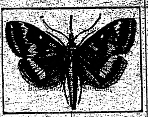
* * *

The successful South Dakota farming system recognizes three classes of field crops; the cultivated, small grain and legume crops. The most successful farmers annually plant nearly the same acreage of each class.

ETERNAL VIGILANCE IS NEEDED IN WAR ON MANY INSECT PESTS

(Prepared by the United States Department of Agriculture.)

Much attention has been given during the past fiscal year by the bureau of entomology of the United States Department of Agriculture, to the control of the Japanese beetle, peach insects, the European corn borer, citrus fruit insects in Florida, the Mexican bean beetle in the southeastern states, the pea aphis, boll weevil, gipsy moth and western pine beetle. The work of the bee-culture laboratory has been investigational rather than educational.



Female Moth of European Corn Borer.

Japanese Beetle Spreading.

Work against the Japanese beetle, which threatens to become a pest of first-class importance, has been prosecuted as heretofore in co-operation with the New Jersey and Pennsylvania state departments of agriculture. State quarantines have supplemented federal quarantine No. 48 for intrastate traffic, the enforcement of which has been delegated to bureau authorities who co-operate with the federal horticultural board. During the season of 1921 some 205,498 baskets of sweet corn were inspected and more than 5,000 beetles were removed from within the tips of the corn—a marked increase in inspection work and in the number of beetles found.

Continued work in the suppression of the plum curculio, brown-rot and scab of peaches in Georgia has resulted in a very satisfactory 1922 harvest. Paradichlorobenzene has been found useful under certain conditions in controlling the California peach borer in the Santa Clara valley, California. The San Jose scale is again becoming troublesome in certain parts of the country, and has been especially injurious in apple orchards in the Ozarks. Special attention has been given to control of this insect in bearing orchards at the Bentonville (Ark.) laboratory, and material progress made.

More Gipsy Moths.

Shortage of funds curtailed the work with the gipsy moth infestation in New England to some extent. On July 1, 1922, the federal horticultural board placed under quarantine for the gipsy moth additional areas in Maine, New Hampshire, Vermont, Massachusetts and Connecticut, amounting to 3,645 square miles. Scouting work along the border of the brown-tail moth infestation shows that there has been a heavy decrease in the infested area during the year. In Maine, New Hampshire, Massachusetts and Rhode Island 2,342 square miles have been released from brown-tail moth quarantine.

Parasites to Control Borer.

The work of introducing the natural enemies of the corn borer from Europe has made rapid strides during the year. More than 500,000 specimens of a single species of parasite imported from Hyeres in southern France and reared in this country were liberated during the summer of 1922 in the heavily infested regions of New England. The present plans of the bureau include the continuation of this work in order to insure, where possible, the establishment of all available insect enemies of the pest before it becomes widely distributed throughout the United States.

Major outbreaks of the so-called green bug, which is a most destructive wheat pest, are dependent exclusively on the presence of volunteer grain, it has been found, and the remedy is obviously for farmers to prevent volunteer grain from springing up to furnish breeding places for the green bug.

Although only one-half of the appropriation of $40,000 was used for grasshopper-control work, a saving of crops in North Dakota and Wyoming amounting to over $600,000 was effected. A heavy outbreak occurred in the summer of 1922 in Montana and Wyoming, and a field laboratory was established at Billings, Mont., in April, 1922, to aid farmers and extension workers in combating the pest.

Progress With Other Insect Pests.

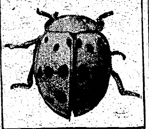
The results of recent Hessian fly surveys show the insect to be causing very little damage, owing to the work of state and federal entomological workers during the previous year.

Investigations of insects attacking meat, particularly the ham skipper and larder beetles, have resulted in much valuable information. An investigation of insects attacking dried fruit is under way.

New facts have been discovered about the rust-mite, a citrus fruit pest in Florida. These, with methods for rearing the insect, bear directly on methods of control. Certain insect-killing fungi have been found which will aid citrus growers in controlling the citrus mealy bug and the rust mite.

Mexican Bean Beetle a Menace.

The presence of the Mexican bean beetle in 111 counties in six Southern states indicates that this pest is one of major importance. Everything points to the fact that the beetle is more prolific and destructive in the new environment than in the West and Southwest, and it appears that the application of arsenicals to bean plants in the Southeastern states is more hazardous than in the West and Southwest. The probability is that the Mexican bean beetle will be able to extend its range over a very large part of the United States. Careful studies have been made of the possibilities of natural control.



Adult Mexican Bean Beetle.

The process of controlling the boll weevil by dry calcium-arsenate dust has been further developed. Much valuable information was obtained through experimental work under the direction of the Delta laboratory as to the modifications of the poisoning system necessary in different regions.

The most important recent addition to tobacco hornworm control has been the perfecting of a tandem-wheel shaftless type of duster for the application of insecticides to the tobacco plant. Since the work was begun more than 200 acres have been dusted with the experimental model, in one-third the time and with much better results than could have been obtained with hand-dusters.

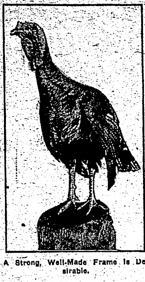
Adult Boll Weevil.

POULTRY

SUCCESS IN TURKEY RAISING

One of the Most Important Steps Is Selection of Breeding Stock—Look for Vigor.

One of the most important steps toward success in turkey raising is the proper selection of breeding stock. Unhatchable eggs, weak poults, and small, scrubby turkeys are largely the result of carelessness in the selection of the parent stock. In selecting turkeys for breeding purposes, strength and vigor are the first points to be considered. To indicate this the body should be deep and wide, the back broad, and the breast round and full. The head should be of good size and of a clean, healthy appearance. A strong, well-made frame is shown by thick, sturdy shanks and straight, strong toes.



A Strong, Well-Made Frame Is Desirable.

Inbreeding is harmful and if carried on very long will result in the loss of vigor and vitality. It is, therefore, advisable each year to obtain a new tom of unrelated blood, but of the same type. Nothing is to be gained by crossing varieties, as such practice soon reduces purebreds to mongrels.

By purchasing breeding stock early in the season one not only has a larger number to choose from, but the birds are given ample time to become acquainted with their new surroundings before the mating season.

GEESE THRIVE ON PASTURE

Fowls Will Pick Up Most of Their Living Except During Winter and Breeding Season.

Geese are usually raised where they have a good grass range or pasture as they are good grazers and usually pick most of their living, except during the winter months and the breeding season. Goslings should be fed a mash of two parts shorts and one part cornmeal by weight, changing at the end of three weeks to equal parts of shorts and cornmeal with 5 per cent each of beef scrap and grit. A fattening ration may be made of a mash of one part shorts and two parts cornmeal by weight with 5 per cent of beef scrap, fed in the morning, and a feed of corn at night.

SLIGHT IMPORTANCE OF GRIT

Lack of Material Will Cause Indigestion and Impaired Health—Gravel Also Helps.

Many poultry raisers gradually begin to slight the importance of grit. Lack of grit means poor digestion and impaired health. Regular poultry grit should be kept before the fowls in boxes or hoppers at all times. In addition, a load of gravel near the chickens' home would improve the health and increase the egg yield.

POULTRY NOTES

It does not pay to feed runts.

* * *

Variety in feed helps to keep the flock in good condition.

* * *

Have the poultry house dry, well ventilated and free from drafts.

* * *

A pullet is a female less than a year old, and when over that age is a hen.

* * *

Removing the cause of disease is better than doctoring the chicken afterward.

Local News

N[illegible] BOARD WILL RUN CREAMERY

T. Bjerke, Secretary of Association, Makes Statement to Banner.

T. Bjerke, the newly-elected secretary of the Thief River Falls Co-Operative Creamery Association, stated to The Banner this week that the new creamery board contemplates no change so far is as known regarding the operation of the Goodridge creamery next summer. The new officials contemplate conducting the institution on essentially the same basis as the outgoing board.

The decision of the creamery board to operate the local creamery this year will be hailed everywhere as good news, there being an opinion current among many that they may decide to discontinue its operation. The creamery last year showed a good profit, having demonstrated to the satisfaction of all that it was advantageous to continue to operate it.

The contract for the hauling of ice has been let and it is expected that the job will soon be completed. It is also highly probable that other improvements will be made to the property before the formal opening of the institution next spring.

LENT!

By REV. H. LUTZ.

Text: "Let the word of Christ dwell in you richly in all wisdom. (Col. 3,16).

The exhortation given in this text is very appropriate, especially for the Lenten season. Lent begins wish Ash Wednesday and lasts until Palm Sunday. The week beginning with Palm Sunday and including Maundy Thursday, Good Friday and Holy Saturday, is called Holy Week. This is the season of the year which the Christian church in its early days set aside as a special time during which its members might "come closer to their God," especially by studying and pondering and meditating upon that which took place some 1900 years ago during Holy Week, namely, the great suffering and death of our Savior, Jesus Christ, and all that is connected with it.

"Let the word of Christ dwell in you richly." That is the word which He spoke, and which tells us of Christ. We should do that at all times, but especially during Lent, when Christ and His sufferings are to occupy our thoughts and meditations. The more richly the word of Christ dwells in us, the more blessed and profitable will the Lenten season be to us. For this word first of all is able to make us humble, penitent, contrite. It tells us of the untold agonies, of the superhuman sorrow and pain, of the mockery and ridicule of men, of the hellish torments of being forsaken of God, of bloodshed and finally death. It tells us also that "HE hath borne OUR griefs and carried OUR sorrows—HE was wounded for OUR transgressions." Great, unspeakly great, is the punishment which the Son of God has borne for us, great must be our sins for which He suffered! That is the one thought which should determine all our acts and words during the Lenten season. If that is the case, then we will observe this season as they which mourn—mourn, not so much because it is Jesus that suffered, but because it is OUR sins that caused His suffering. "Weep not for Me, but weep for yourselves and your children," said the Savior to those people who bewailed and lamented Him when He was being led to Calvary to be nailed to the cross. And so He says to us: Weep not for yourselves and your children because of your sins.

And because Lent is a season of repentance and mourning, many observe it by fasting and prayer and by abstaining from all worldly amusement and pleasures, or at least by temperance and moderation in all things.

That is a very good practice if done in the right spirit. If we fast and humiliate ourselves with the intention of crucifying our flesh with its desires and lusts, and giving ourselves entirely to an earnest contemplation of our Savior's suffering, then it is good. But if we do it merely to make a show before men, or even try to make ourselves worthy or to earn something before God, then it is not good, but is sinful. Therefore we are exhorted to "let the word of Christ dwell in us richly IN ALL WISDOM." That is wisdom, divine wisdom, which flows from a penitent God-fearing heart and seeking for itself not honor and praise but mercy and forgiveness of sins. In such wisdom we should observe Lent.

May these quiet and solemn days of the Lenten season bring us closer to our Lord Jesus, deepen our sense of wickedness and unworthiness and also strengthen our faith and trust in the merits of our crucified God and Brother! May we learn to sing:

My soul looks back to see
The burden Thou didst bear,
When hanging on the cursed tree,
And knows HER guilt was there.

—Amen.

Note: The series of sermons on the commandments will be taken up again after the holiday season, if it please the word.—H. L.

How are your resolutions holding out?

Meet Lady Bruce of Clovercrest

The First Guernsey of the State

LADY BRUCE OF CLOVERCREST

(From the Tribune)

Ladies and gentlemen, The Tribune begs leave to introduce Lady Bruce of Clovercrest, champion producer of butter fat in the State of Minnesota and one of the first ten Guernsey cows in the entire world.

Just get that straight and fixed in your mind: The whole wide world.

It seems almost a myth that Thief River Falls should be the home of the champion butter fat producer of the whole state, yet such is the case. Lady Bruce of Clovercrest, distinguished, undefeated and supreme, stands at the head of the class proudly flaunting her record of 710 pounds of butter fat for the year and daring any other prize bossy to equal it.

Lady Bruce of Clovercrest makes her home on the farm of F. B. Conklin, well-known breeder of Guernseys in this section of Minnesota and the possessor of the finest show animals in the state, who have won several blue ribbons at various National Dairy shows throughout the country. She is but three years old and has not yet arrived at the height of her career as a champion, and The Tribune does not dare venture an opinion as to how high in the legends of Guernseydom her fame will land her.

Suffice it to say, she may safely be placed as one of the first 10 Lady Guernseys in the whole wide world, and that's something to crow over when one hears and reads of the fame and reputation of dairy animals in far away Denmark, Scotland and Germany, where raising dairy producers is almost a religion with the inhabitants.

Lady Bruce of Clovercrest first saw the light of day on the Jensen dairy farm at Clearbrook. She spent her heifer days there and when one year old, Mr. Conklin fell in love with her and brought Lady Bruce to Clovercrest, where she has been hobnobbing with others of her kind ever since. Little did Mr. Conklin realize then the fame and glory the little lady was later to bestow upon her new owner. She looked innocent and insignificant enough as a yearling and nobody really expected any great things from her. But 710 pounds of butter fat! Thats' almost enough to garner fame for a pair of pure-breds. And Lady Bruce did it alone!

Champion boxers, runners, wrestlers, politicians, financiers and journalists go through many years of conditioning and training before they attain fame—if they ever do—but Lady Bruce broke a state record the very first year of her career.

Just take another look at Lady Bruce standing down there on the bank of the Red Lake River and see if you don't think she indicates champion caliber! If ever a young lady appeared proud and could look the world square in the eye it is the Lady from Clovercrest. There she stands as healthy as a Canadian maple tree, her sturdy supports firmly on the ground, ears pricked up and her little four-inch horns shooting defiance straight at you, challenging the world to dislodge her from her claim to the championship of the Great State of Minnesota. Lady Bruce is just as pure as the air she breathes, kind, loving and affectionate.

There are about 23 other Guernseys on the Conklin dairy farm and Lady Bruce shares the regular bed and board. There are no trimmings to the bill of fare of Lady Bruce, and she thrives on substantially the same food her 23 brothers and sisters subsist on. She doesn't lay claims to frills and fancies of her own and is the most democratic kind of a Guernsey you ever saw.

Lady Bruce of Clovercrest has one daughter, who also makes her home at the Conklin farm. The youngster possesses all the familiar traits and character of her famous mother and the indications are that she will develop into some champion herself.

The record made by Lady Bruce this year is considered remarkable in face of the fact that last summer and fall, during the busy season on the Conklin farm, she had to worry along with one milking a day instead of two, which is customary with heavy producers. The record was taken down by representatives of the State Dairy department, who have made semi-weekly trips to the Conklin farm to make tests and in order to make the record authentic in every way.

Jean Du Luth Cornet, a pure bred Guernsey from the famous Jean Du Luth farms near Duluth, last year sold at the National Dairy show for the snug and handsome sum of $7,500 in cold cash. This animal was not the possessor of a champion record yet she brought that neat sum last year when placed on exhibition. The Tribune mentions this detail so that some indication of the value of Lady Bruce may be gained.

All hail the glory of the Lady from Clovercrest! Standing at the head of the list of butter fat producers with a total of 710 pounds for the year, she deserves the plaudits of the multitude, and The Tribune bows in humble recognition of the fame she brings to Thief River Falls and Northern Minnesota as The Home of the Dairy Cow.

No Mail Received Here During Storm Wednesday

Goodridge received no mail from any place except Thief River Falls on Wednesday morning. This undoubtedly goes to prove that severe weather and storms were present throughout the rest of the country.

FARMERS FORCED TO REMAIN IN TOWN WHEN STORM HITS

A large number of farmers from distances up to 20 miles from home were caught in town by the severe weather Tuesday and forced to spend the night in town. These farmers had left home in the morning when the weather was quite nice and were already in town when the storm became a danger to the life of a traveler. Although the storm had not abated much the next morning, the majority of the farmers started on their return journey home, as many had families anxiously awaiting their return and horses and cattle needed attention.

BAD BLIZZARD KEEPS FARMERS IN VILLAGE

Terrific Gale of Tuesday Is Worst in "Thousands of Years."

One of the most violent blizzards in the history of the Northwest hit this community Tuesday afternoon about 2:30 o'clock. This, together with the heavy fall of snow, made the inside of a building seem a rather comfortable place.

The terrific gale blew from a northwesterly direction and caused the traffic on roads to be nearly totally suspended during the storm. Those who ventured out found the blinding snow and cold wind no easy task to combat. Some of the local school busses were forced to abandon any hope of making the homeward trip and the children remained in town during the night.

LUTHERAN CHURCH

(Missouri Synod)

Sunday, Feb. 18: Mr. G. W. Schoedell will conduct English services at Big Grove at 10:30 A. M. and in the parsonage at 8 P. M. The pastor will preach and celebrate the Lord's Supper at Thorhult Sunday, Feb. 25. Mr. Schoedel will preach at Erie at 10 A. M. and at Neptune at 3 P. M. The pastor will preach and distribute communion at Grygla and Esplee. Business meeting at the latter place. "But as of sincerity, but as of God, in the sight of God speak we in Christ." (2. Cor. 2,17).

H. LUTZ, Pastor.

Happiness, just like beefsteak or bacon, must be earned.

LEGION INSTALS FULL SET OF RADIO STUFF

Citizens Nightly Tune in on Entertainment and Song From Faraway.

The radio receiving set has been installed and every evening since its installation the public has enjoyed programs from various broadcasting stations. The only trouble that the Legion is having with the set is that they experiencing difficulty in holding the wave from the broadcasting stations.

This is undoubtedly due to the various broadcasting stations using the same wave length. As a result they conflict with each other. The best radio program concert enjoyed so far was picked up Friday at 11:45 from Kansas City, Mo., with the Kansas City Star broadcasting station. Other stations from which programs were picked up were WLAF, or "The Call of the North" at Minneapolis. Also Los Angeles, Cal., Davenport, Ia., and Fort Worth, Tex., Chicago and Calgary, Canada.

No attempt will be made to give any advertised public performance until the technicalities of the radio are mastered. With the purchase and installation of the machine that picks music and lectures out of the ether, the villagers need no longer feel that they have never heard a grand opera or a real jazz orchestra. The radio is a source of satisfaction to all; it can satisfy all tastes. If one desires to listen to a hymn, turn a knob and eventually hear "Rock of Ages" in the ether, or if one is inclined to listen in on something diabolical and satanic, turn the knob till you get an orchestra playing "Make That Trombone Laugh." Or if you are a lover of oratory, catch a wave with a slapstick jest or a prayer.

School Suspended Because of Severe Cold and Blizzard

Many of the school children who live out in the country and who ride in the busses spent Tuesday night in Goodridge because of the impossibility to drive the busses. School was suspended Wednesday forenoon because of the severe blizzard and extremely cold weather.

Luther League Will Meet Again Wednesday, Feb. 21

The Luther League of the Norwegian Lutheran Church will hold its usual meeting at the church Wednesday night, February 21. A good program and lunch has been arranged and you are sincerely requested to be present.

A lot of "clinging vines" turn out to be poison ivy.

A Few Reasons Why We Are Proud of Our Bank

This bank is proud of the fact that 80 per cent of the business and professional men of our village do their business with our bank.

We act in a small way as a Clearing House for over 75 per cent of checks issued in this vicinity which are drawn on banks in our village and are presented here for payment.

Our Checking Accounts have increased one-third since a year ago. The credit for this growth is due the patrons of our bank.

Just 10 New Accounts have been opened with our bank in the past two weeks. This means One New Depositor for every day of business uring that time.

"DADDY, DADDY!"

SYNOPSIS—To the Three-Bar ranch, Arizona, owned jointly by Sandy Bourke, "Mormon" Peters and "Soda-Water Sam" Manning, a fine collie makes its way, in the last stages of exhaustion. Inscription on its collar says its name is Grit, "property of P. Casey." Scenting a desert tragedy, Bourke and Sam mount and let the dog lead them. The two find a dying man, Patrick Casey, pinned under an overturned wagon. Kneeling beside the wagon is his young daughter Molly, fifteen.

CHAPTER II—Continued.

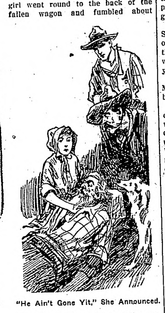
—2—

"Yore dad?" he asked, kneeling by the girl.

"Yes." She stood up, slight and straight, with limbs and body just curving into womanhood. "The hawsses was tuckered out," she said, "or Dad c'ud have made it. They didn't have no strength left, 'thout food or water. The d—d road jest slid out from under. Dad made me jump. I figgered he was goin' to, but his bad leg must have caught in the brake. We slid over like water slides over a rock. He didn't have a h—l-chance." As she spoke them the oaths were merely emphasis. She talked as had her father.

Sandy nodded.

"Got an ax with the outfit?" he asked. Then turning to Sam as the girl went round to the back of the fallen wagon and fumbled about through the rear opening of the canvas tilt: "Man's alive, Sam. Caught a flirt of the pulse. Have to pry up the wagon. Git that bu'sted end of the tongue."



"He Ain't Gone Yit," She Announced.

The girl handed an ax to Sandy mutely, watching them as Sandy pried loose the part of the tongue still bolted to the wagon, getting it clear of the horses.

"Think you can drag out yore dad by the laigs when we lift the body of the wagon?" he asked her. "May not be able to hold it more'n a few seconds. May slip on us, the levers is pritty short."

She stooped, taking hold of a wrinkled boot in each hand, back of the heel. A tear splashed down on one of them and she shook the salt water from her eyes impatiently as if she had faced tragedy before and knew it must be looked at calmly.

The two men adjusted the bowlders they had set for fulcrums and shoved down on the stout pieces of ash, their muscles bunching, the veins standing out corded on their arms. The wagon-bed creaked, lifted a little.

"Now," grunted Sandy, "snake him out."

The girl tugged, stepping backward, her pliant strength equal to the dead drag of the body. Sandy, straining down, saw a white beard appear, stained with blood, an aged, seamed face, hollow at cheek and temple, sparse of hair, the flesh putty-colored despite its tan. Grit leaped in and licked the quiet features as Sam and Sandy eased down the wagon.

"Whisky, Sam."

The girl sat cross-legged, her father's head in her lap, one hand smoothing his forehead while the other felt under his vest and shirt, above his heart.

"He ain't gone yit," she announced.

The old miner's teeth were tight clenched, but there were gaps in them through which the whisky Sandy administered trickled.

"Daddy! Daddy!"

It might have been the tender agony of the cry to which Patrick Casey's dulling brain responded, sending the message of his will along the nerves to transmit a final summons. His body twitched, he choked, swallowed, opened gray eyes, filmy with death, brightening with intelligence as he saw his daughter bending over him, the face of Sandy above her shoulder. The gray eyes interrogated Sandy's long and earnestly until the light began to fade out of them and the wrinkled lids shuttered down.

Another swallow of the raw spirits and they opened flutteringly again. The lips moved soundlessly. Then, while one hand groped waveringly upward to rest upon his daughter's head, Sandy, bending low, caught three syllables, repeated over and over, desperately, mere ghosts of words, taxing cruelly the last breath of the wheezing lungs beneath the battered ribs, the final spurt of the spirit.

"Molly—mines!"

"I'll look out for that, pardner," said Sandy.

The eyelids fluttered, the old hands fell away, the jaw relaxed, serenity came to the lined face, and no little dignity. For the first time the girl gave way, lying prone, sobbing out her grief while the two cowmen looked aside. The bay horse began to groan and writhe.

"Got to kill that cavallo," said Sam in a whisper.

"Wait a minute." The girl had quieted, was kneeling with clasped hands, lips moving silently. Prayer, such as it was, over, she rose, her fists tight closed, striving to control her quivering chin—doing it.

"We got to bury him, 'count of them d—n buzzards."

"We'll tend to that," said Sandy. "Ef you-all 'll take the dawg on up to the hawsses . . ."

"No! I helped to bury Jim Clancy, out in the desert; I'm goin' to help bury Dad. It's goin' to be lonesome out here—" She twisted her mouth, setting teeth into the lower lip sharply as she gazed at the desolate cliffs, the birds swinging their tireless, expectant circles in the throat of the gorge.

"See here, miss," said Sandy, while Sam crawled into the wagon in search of the dead miner's pick and shovel that now, instead of uncovering riches, would dig his grave, "how old air you?"

"Fifteen. My name's Margaret—Molly for short—same as my Ma. She's been dead twelve years."

"Well, Miss Molly, suppose you-all come on to the Three Star fo' a spell with my two pardners an' me? You do that an' mebbe we can fix things up and arrange about yore daddy. We'll come back an' git him an' we'll make a place fo' him under our big cottonwoods below the big spring."

Molly Casey gazed at him with such a sudden glow of gratitude in her eyes that Sandy felt embarrassed. He had been comforting a girl, a boyish girl, and here a woman looked at him, with understanding.

"You're sure a white man," she said. "I'll git even with you some time if I work the bones of my fingers through the flesh fo' you. 'Thanks' don't amount to a d—n 'thout somethin' back of 'em. I'll come through."

She put out her roughened little hand, man-fashion, and Sandy took it as Sam emerged from the wagon with the tools. The bay mare groaned and gave a shrill cry, horribly human. Sam drew his gun, putting down pick and shovel.

Sandy picked up the tools and moved toward Sam as the bay collapsed to the merciful bullet. The girl washed away as best she could the stains of blood and travel from the dead face while Sandy sounded with the pick for soil deep enough for a temporary grave.

The body would have to lie on the ledge overnight, nothing but burial could save it from marauding coyotes, though the wagon might have baffled the buzzards. The two set to work digging a shallow trench down to bedrock, rolling up loose bowlders for a cairn. Lizards flirted in and out of the crevices as the miner was laid in his temporary grave, the girl dry-eyed again.

She had brought a little workbox from the wagon, of mahogany studded with disks of pearl in brass mountings. Out of this she produced a handkerchief of soft China silk brocade, its white turned yellow with age. This she spread over her father's features, showing strangely distinct in the failing light.

"I don't want the dirt pressin' on his face," she said.

From the dead man's clothes Sandy and Sam had taken the few personal belongings, from the inner pocket of the vest some papers that Sandy knew for location claims.

"Want to take some duds erlong to the ranch?" he asked Molly. "We can bring in the rest of the stuff later. Got to shack erlong, it's gittin' dark. Brought an extry hawss with us. Can you ride?"

"Some. I ain't had much chance."

"Don't know how the mare'll stand yore skirt. If she won't Pinto'll pack you."

"I'll fix that." She clambered into the wagon. Before she came out with her bundle they piled the cairn, a mask of broken rim-rock heavy enough to foil the scratching of the coyotes.

It looked to Sandy as if the girl had changed into a boy. The slender figure, silhouetted against the afterglow, softly pulsing masses of fiery cloud above the top of the mesa, was dressed in jean overalls, a wide-rimmed hat hiding length of hair.

"I reckon I can fool that hawss of yores now," she said. "I gen'ally dress thisaway 'cept when we expect to go nigh the settlements or a ranch where we aim to visit."

The gray mare made no bother and soon they were riding down toward the strip of Bad lands. Sandy let the collie go afoot for the time.

It was close to midnight when they reached the home ranch, riding past the outbuildings, the bunkhouse of the men where a light twinkled, the cook shack, the corrals, up to the main house. There they alighted. Sandy lifted Molly from the saddle and carried her up the steps, across the porch, kicking open the door of the living room where the embers of a fire glowed. There was no other light in the big room, but there was sufficient to show the great form of Mormon, stowed away in a chair, asleep and snoring.

Sam struck a match and lit a lamp. He struck Mormon mightily between his shoulders.

"Gawd!" gasped the heavyweight partner. "I been asleep. But there's a kittle of hot water, Sandy. Where's the—what in time are you totin'? A gel or a boy?"

"This is Miss Molly Casey," said Sandy gravely, setting down the girl. "Miss Casey, this is Mr. Peters. Mormon, Miss Molly is goin' to tie up to the Three Star for a bit."

Mormon, a little sheepish at the suddenly developing age of the girl as she shook hands with him, recovered himself and beamed at her. "You're sure welcome," he said. "Boss hired you? Cowgirl or cook?"

Sandy noticed the girl's lip quiver and he slipped an arm about her shoulders. He was not woman-shy with this girl who needed help, and who seemed a boy.

"Don't you take no notice of him an' his kiddin'," he said. "We'll make him rustle some grub fo' all of us an' then we-all 'll turn in. I'll show you yore room. Up the stairs an' the last door on the right. Here's some matches. There's a lamp on the bureau up there. Give you a call when supper's ready."

He led her to the door and gave her a friendly little shove, guessing that she wanted to be alone.

"The kid's lost her father, lost most everything 'cept her dawg," he said to Mormon. "Thought we might adopt her, sort of, then I thought mebbe we'd hire her—for mascot."

"Lost her daddy? An' me hornin' in an' tryin' to kid her! I ain't got the sense of a drowned gopher, sometimes," said Mormon contritely.

"She's game, plumb through, ain't she, Sam? Stands right up to trouble?"

"You bet. Mormon, open up a can of greengages, will ye? I reckon she's got a sweet tooth, same as me."

Molly Casey was not through standing up to trouble. They coaxed her to eat and she managed to make a meal that satisfied them. Then she got up to go to her room, with Grit nuzzling close to her, her fingers in his ruff, twisting nervously at the strands of hair.

"Do you reckon," she asked the three partners, "that Dad knows he fooled me when he told me to jump? If I'd known he c'udn't git clear I'd have stuck—same as he would if I was caught. Do you reckon he knows that—now?"

"I'd be surprised if he didn't," said Sandy gravely. "You did what he wanted, anyway."

She looked at them gravely and went out.

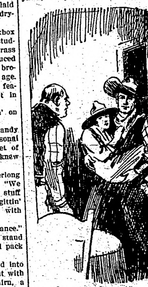
"Botherin' about playin' square in jumpin'," said Sandy. "That gel is square on all twelve edges."

"How'd you come to know so much about gels?" asked Mormon.

"Me? I don't know the first thing about 'em," protested Sandy.

"No more'n any man," put in Sam. "'Cept it's Mormon. He's sure had the experience."

"Experience," said Mormon, with a yawn, "may teach a man somethin' about mules but not wimmen. No, sir, that feller in the po'try who says, 'I learned about wimmen from 'er,' was braggin'. Now, this gel of Casey's 'pears like what her dad 'ud call a good prospect, but you can't tell. Fool's gold is bright enough, but you can't change it to the real stuff no matter how you polish it."



"Where's the—What in Time Are You Totin'—a Gel or a Boy?"

"Mormon, you warn't calculated to handle wimmen. This li'l gel is game as they make 'em, an' I reckon she's right sweet if she on'y gits a chance. Leastwise, I see several signs of pay dirt this afternoon an' evenin' as I reckon Sandy done the same. She's been trailin' her dad all over h—l an' creation, talkin' like him, swearin' like him, actin' like him. Never see nothin' different. All she needs is a chance."

"What's the idee in pickin' on me?" asked Mormon aggrievedly. "She's as welcome as grass in spring. They ain't no one got a bigger heart than me fo' kids."

"No one got a bigger heart, mebbe," said Sam caustically. "Nor none a smaller brain. All engine an' no gasoline in the tank!"

"She's an orphan," went on Sandy. "She ain't got a cent that I know of. The claims her old dad mentioned ain't no good because, in the first place, they'd have to be worked if they was; second place, they're over to Dynamite an' the sharps say Dynamite's a flivver. All she has in sight is the dawg. Some dawg! Comes in from the desert an' takes us out to her an' Pat Casey—him dyin'. Ef it hadn't been fo' the dawg, she'd have stayed there, to my notion. Got some sort of idee she'd deserted ship ef she hadn't stuck till it was too late fo' her to crawl out of that slit in the mesa. She's fifteen an' she's got sense. I figger we better turn in right now an' hold a pow-wow with the gel termorrer."

"Second the motion," said Sam.

"Third it," said Mormon.

And the Three Musketeers of the Range went off to bed.

CHAPTER III

Molly.

Molly came down next morning in the faded blue gingham. Sandy marked how worn it was and marked an item in his mind—clothes. He smiled at her with the sudden showing of his sound white teeth that made many friends. She was much too young, too frank, too like a boy to affect him with any of his woman-shyness.

Molly had a snubby nose, a wide mouth, Irish eyes of blue that were far apart and crystal clear, freckles and a lot of brown hair that she wore in a long braid wound twice about her well-shaped head. She was a combination of curves and angles, of well-rounded neck and arms and legs with collar-bones and hips over-apparent, immature but not awkward.

Grit, entering with her, divided his attentions among the men, shoving a moist nose at last into Sandy's palm and lying down obedient, his tail thumping amicably.

"Fo' a sheepdawg," said Mormon, "he sure shapes fine."

Molly's eyes flashed. "He don't know he's a sheepdawg," she protested. "He's never even seen one, 'less it was a mountain sheep, 'way up against the skyline. Don't you like him?"

"I like him fine," Mormon answered hurriedly. "Fine!"

"Ef you-all didn't, we cu'd shack off somewheres. I cu'd git work down to the settlemints, I reckon. I don't aim to put you out any. I've been thinkin' erbout that. 'Less you should happen to want a woman to run the house. I don't know much about housekeepin', but I cu'd l'arn. It's a woman's job, chasin' dirt. I can cook—some. Dad used to say my camp-bread an' biscuits was fine. I cu'd earn what I eat, I reckon. An' what Grit u'd eat. We don't aim to stay unless we pay—someway."

There was a touch of fire to her independence, a chip on the shoulder of her pride the three partners recognized and respected.

"See here, Molly Casey"—Sandy used exactly the same tone and manner he would have taken with a boy—"that's yore way of lookin' at it. Then there's our side. You figger yore dad was a pritty good miner, I reckon? The last two words he says was 'Molly' and 'mines.' I give him my word then and there, like he would have to me, to watch out for yore interests. My word is my pardners' word. I'm willin' to gamble those claims of his'll pan out some day. Until they do, ef you-all 'll stay on at the Three Star, stop Mormon stompin' in from the corral with dirty boots, ride herd on Sam an' me the same way, mebbe cook us up some of them biscuits once in a while, why, it'll be fine! Then there's yore schoolin'. Yore dad 'ud wish you to have that. I don't suppose you've had a heap. An' you sabe, Molly, that you swear mo' often than a gel usually swears."

She opened her eyes wide. "But I don't cuss when I say 'em. An' I don't use the worst ones. Dad wu'dn't let me. I can read an' write, spell an' cipher some. But Dad needed me more'n I needed learnin'."

"But you got to have it," said Mormon earnestly. "S'pose them claims pan out way rich and you git all-fired wealthy? Bein' a gel, you sabe clothes, di'monds, silks, satins an' feather fuss. You'll want to learn the pianner. You'll want to know what to git an' how to wear it."

"If you did that—took my Daddy's place," she said, "why, we'd be pardners, same as him an' me was. When the claims pan out, half of it'll have to be yores. I won't stay no other way."

The glances of the three partners exchanged a conclusion, a mutual approval.

"That goes," said Sandy, putting out his hand. "Fo' all three of us. When the mines are payin' dividends, we split, half on 'count of the Three Star, half to you. Providin' you fall in line with the eddication, so's to do yore dad yo'se'f an' us, yore pardners, due credit when the money starts comin' in. Sabe?"

"He kissed me while I was asleep, the d—d skunk," flared Molly.

"Every Picture Tells a Story"

Winter Find You Tired and Achy?

DOES winter find you miserable with an aching back? Do you get up lame and stiff—lag through the day tired, weak and depressed? Do you know why you are so run down?

There's good reason for your condition and likely it's weak kidneys. Winter's colds and chills throw a heavy burden on the kidneys The kidneys fall behind and poisons accumulate. It's little wonder, then, that you suffer backache, rheumatic pains, headaches, dizziness and bladder irregularities.

Don't risk serious kidney disease. Use *Doan's Kidney Pills* before it is too late. *Doan's* have helped thousands and should help you. *Ask your neighbor!*

"Use Doan's," Say These Good Folks:

John Fennern, Bottineau, N. D., says: "I get attacks something like lumbago, which come from taking cold. I have been so lame in the muscles of my back and hips during these spells I have hardly been able to bend, and if I lifted anything my back hurt as though it would break. My back ached so badly right over my hips I could hardly get any rest at night. Doan's Kidney Pills, however, have always cured me of these attacks."

Mrs. D. Swan, W. 5th St., Hastings, Minn., says: "Hard, strenuous work weakened my kidneys. Heavy, bearing down pains across my kidneys bothered me and when I did any stooping they became more intense. Dizzy spells came on during the day and black spots danced before my eyes, blurring my sight. The worst trouble of all was the too free action of my kidneys and I became nervous. I knew Doan's Kidney Pills were good and after using three boxes my kidneys became strong and well."

DOAN'S KIDNEY PILLS

At All Dealers, 60c a Box. Foster-Milburn Co., Mfg. Chem., Buffalo, N. Y.

Small United States Towns.

It has been estimated that there are about 120,000 small towns in the United States, half of them with populations of 500 or less.

DYED HER SKIRT, DRESS, SWEATER AND DRAPERIES WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her worn, shabby dresses, skirts, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is sure because Diamond Dyes are guaranteed not to spot, fade, streak, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.—Advertisement.

FREEDOM FROM LAXATIVES

Discovery by Scientists Has Replaced Them.

Pills and salts give temporary relief from constipation only at the expense of permanent injury, says an eminent medical authority.

Science has found a newer, better way—a means as simple as Nature itself.

In perfect health a natural lubricant keeps the food waste soft and moving. But when constipation exists this natural lubricant is not sufficient. Medical authorities have found that the gentle lubricating action of Nujol most closely resembles that of Nature's own lubricant. As Nujol is not a laxative it cannot gripe. It is in no sense a medicine. And like pure water it is harmless and pleasant.

Nujol is prescribed by physicians; used in leading hospitals. Get a bottle from your druggist today.—Advertisement.

On Another Track.

"What's become of the young men Edith used to have in her train?"

"Oh, one by one they switched off."

A political pull is often a great strain on the candidate's leg.

Probably a slow-thinking, deliberate man hates "pep" most.

DR. KING'S *New Discovery*

Never let a cold get a hold!

Break it—*in time!*

Stuffy heads—irritated throats—cough-tired chests—welcome the cooling, soothing relief so quickly brought by this dependable 50-year-old family remedy. Don't let your cold drag you down. Ask for Dr. King's New Discovery at your nearest druggist.

Proven safe for children as well as grown-ups.

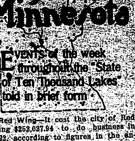
Small Pill. Small Dose. Small Price.



News of Minnesota

EVENTS of the week throughout the "State of Ten Thousand Lakes" told in brief form

Red Wing—It cost the city of Red Wing $252,027.94 to do business in 1922, according to figures in the annual report of City Clerk S. T. Irvin. This was about $30 for every man, woman and child in the city, basing figures on the last census.

Hibbing—Bids are to be opened here on Feb. 20 for the paving of 40 blocks of village streets. The village board at first had decided to pave only 30 blocks, but at its last meeting 10 additional blocks of paving were ordered.

Triumph—J. M. McConnell, grand master of the Masonic grand lodge of Minnesota, accompanied by other grand lodge officers, delivered the charter to Tri-mont lodge, composed of Masons from the "twin villages," Triumph and Monterey. Following formal presentation of the charter, the grand officers installed the officers of Tri-mont lodge.

Austin—L. H. Marbell, of Buffalo Center, Iowa, was awarded the contracts for graveling 68 miles of roads in this county this year by the county board. The highest bid was $100,697.77 and the lowest $61,019.58, a difference of $39,678.19.

Red Wing—After a survey of the situation Louis P. Wolff, an engineer of St. Paul employed by the city, has made a report to the city council advising that an electric light and power plant can be constructed and maintained by the city with a fair prospect of reducing rates as the business grows.

Waseca—Orson L. Smith, a pioneer of Waseca county and county surveyor for 33 years, died at his home here. He was prominent in G. A. R., having marched with Sherman on his trip from Atlanta to the sea and later served in the Indian war in the Black Hills country under General Crooks. He was 78 years old.

Duluth—Representatives of the police departments of Minneapolis, St. Paul and Duluth, meeting here, agreed upon certain changes in a proposed new police pension bill. The bill, as approved, provides for a flat minimum pension of $70 a month, the maximum to remain at $75. Another provision grants a policeman's widow and family $75 regardless of the number of children surviving. Furthermore, if the widow remains unmarried, each child will receive $10 a month until 16 years of age.

Roughton—The new $10,000 building recently erected by the Roughton Co-operative Creamery company, was dedicated with appropriate ceremonies. A banquet was served following the dedication exercises. The company has 231 shareholders. One-half of the cost of the new building was paid out of a sinking fund created a few years ago.

Owatonna—Officers were elected by the Owatonna Shrine club at their annual meeting here. C. A. Tincher was elected president; M. K. Brown, vicepresident; Will H. Darby, secretary and G. B. Bennett, treasurer.

Redwood Falls—A century anniversary automobile tour of the Sioux Historic trail from Fort Snelling through the Minnesota valley to Big Stone lake is being planned for the coming summer. In connection with the tour, a two day program will be given by the State Historical society at Redwood Falls, at the invitation of the Commercial club.

Hibbing—Considerable excitement was created in a local business place when a man holding a telephone receiver in his hand exclaimed, in apparent terror: "Take it! Take it before I drop it." A clerk relieved the man of the receiver, and then it was found that, although he is 80 years old, he had never before listened to a telephone message.

St. Paul—Governor Preus has called farmers and all others interested in our agricultural welfare, to give their aid and support to a conference of farmers, bankers, business men and public officials of the states of North Dakota, South Dakota, Montana, Iowa, Wiconsin, Nebraska, Kansas, Illinois, Michigan and Minnesota to consider the means of stabilizing prices of farm products and thus remedying the deplorable condition in which agriculture now finds itself. There has been organized a Minnesota Farmers-Bankers Council, made up of two persons from each agricultural district. Members of this Council, farm bureau officials and others interested in agriculture, have joined in a call for a Northwest Agricultural Price Stabilization Conference, to be held in Saint Paul, February 27 and 28.

Hibbing—Vergilo Bertone of Chisholm, is the choice of the Italian Federated Clubs of Northern Minnesota for the appointment as deputy sheriff on the range. John Capra, of Hibbing, was the second choice. Mr. Bertone is a former mail carrier in Chisholm and a prominent union man. Capra is a former employe of Hibbing.

Lakefield—The city council has taken the first steps on a street paving program for Lakefield. It is proposed to pave the main business street of the city first. A mass meeting has been called for Feb. 13, at which time the matter will be finally discussed.

[illegible]

Early one morning before the traffic towers were erected [illegible] traffic policeman was [illegible] "Stop and Go" sign [illegible] in the center of a street when a man drove up on a heavily loaded hay wagon and proceeded to turn "left."

"Hey, you can't do that!" shouted the policeman wrathfully.

"Oh, yes, I think I can make it," called back the man, cheerfully.

And it was necessary for the policeman to leave his post of duty to explain that although he possibly could "make it," the man had better keep to the right.—Indianapolis Star.

Cuticura for Sore Hands.

Soak hands on retiring in the hot suds of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with tissue paper. This is only one of the things Cuticura will do if Soap, Ointment and Talcum are used for all toilet purposes.—Advertisement.

And There Are Many Such.

A man appeared at the children's home to adopt a boy. Among the children playing in the yard was a boy who had just arrived. He was ragged and dirty.

The man decided to take him and said: "Son, go get ready now and we shall soon be off."

"Mister," said the boy seriously, "I—I ain't got nothing to get ready with."—Exchange.

Brave at Wrong Time.

"Dar is such a thing as misplaced bravery," said Uncle Eben. "Tryin' to interduce loaded dice in our Saturday Evenin' club crap game ain' nuffin' but a waste of courage."—Washington Star.

MANY WOMEN AVOID OPERATIONS

Through the Use of Lydia E. Pinkham's Vegetable Compound

Two Interesting Cases

Some female troubles may through neglect reach a stage when an operation is necessary. But most of the common ailments are not the surgical ones; they are not caused by serious displacements, tumors or growths, although the symptoms may appear the same. When disturbing ailments first appear, take Lydia E. Pinkham's Vegetable Compound to relieve the present distress and prevent more serious troubles. Many letters have been received from women who have been restored to health by Lydia E. Pinkham's Vegetable Compound after operations have been advised by attending physicians.

Mrs. Edwards Avoids Operation

Wilson, N. C.—"For about a year I was not able to do anything, not even my housework, because of the pains in my sides and the bearing-down pains. I could only lie around the house. The doctor said nothing but an operation would help me, but I tried different medicines which did no good, until my sister insisted on my trying Lydia E. Pinkham's Vegetable Compound. She said there was nothing like it. I know that she was right, for I began to improve with the first bottle and it has done me more good than anything else. I am able now to do anything on the farm or in my home and I recommend it to my friends."—LILLIE EDWARDS, R.F.D. 3, Box 44, Wilson, N. C.

Another Operation Avoided

Akron, Ohio.—"I can never praise Lydia E. Pinkham's Vegetable Compound too highly for what it has done for me. I had such pains and weakness that the doctor told me nothing but an operation would help me. But my mother had taken the Vegetable Compound and she told me what it had done for her, and so I took it and I am glad to tell every one that it made me a strong woman, and I have had two children since then."—Mrs. R. G. WESTOVER, 325 Grant Street, Akron, Ohio.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent you free upon request. Write to the Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contain valuable information.

10 Cents Gives Charming New Color Tone to Old Sweaters

PUTNAM FADELESS DYES—dyes or tints as you wish

Marriage and All That.

"Marriage used to mean cleaving to each other. Cleaving, sir. Now, it's just a trick to make sure that there shall be at any rate two persons in the world who will never meet again."

"Man is an inexperienced motorist in the Alps and women are his hairpin turns."

"After you have been married five years, there should always be someone to dinner."

"Compromise is the breath of married life; and it is almost more important for a man to learn what his wife deprecates than what she applauds. The temperature of the hot water into which he is predestined periodically to plunge will be lower if he fails to share her antipathies."—E. V. Lucas.

Bright Idea.

He was full of his trip on the Berengaria, the biggest ship in the world, and, talking to his best girl between the acts of the play, he said:

"Do you know the Berengaria can steam 24 knots?"

Taking another chocolate from the box that rested in her lap, she said, with a bright smile:

"I suppose they steam the knots so that the sailors can untie them more easily. Is that it, George?"

The Cruel Retort.

They were seated on a little rustic bench. The moon shone through the trees. All at once the girl timidly said: "Jack, dear, I can't understand why you lavish all your affections on me above all other girls in the world. Why is it?"

"Hanged if I know," he replied, "and all the other fellows down at the house say that they can't make it out, either."—Denison Flamingo.

When it comes to dispensing wisdom the average man thinks that he has Solomon beaten.

To err is human, but to err with spite is not so much so.

SETTLED THE WHOLE MATTER

Flapper Saw Dreadful Possibility if She Followed Advice Given Her by Business Woman.

The Capable Business Woman is an "employment expert" in one of the large downtown offices. The types that come to her are many and interesting. One girl applied. She wore clothes that were technically within the law, and no more. Her face wore a heavy mask of rouge and powder, while her "frizzled" bobbed hair was adorned with a ridiculous hat.

"I'd like a position as steno, here," she announced.

"I'm afraid I have nothing for you," replied the Business Woman somewhat coldly, and then becoming conscience-stricken at her total lack of sympathy with the flapper, she added in a friendlier tone: "May I give you a bit of advice? I hope you won't misunderstand me when I say you are not appropriately dressed for an office. You should dress more discreetly, otherwise you may be misjudged. Next time you apply for a position wear a dress with real sleeves, don't curl your hair so tightly, and if you must wear rouge, put it on sparingly. You might also get a semi-tailored hat—"

"Good heaven!" interrupted the flapper, aghast. "If I dressed that way I'd look like you."—New York Sun.

In Vanity's Eyes.

He was an old man and he was standing beside the hat counter of a department store.

"No, no!" he exclaimed angrily to the very young salesman, "I don't want that hat. Why, that's an old man's hat you're trying to give me. Show me something more suitable, boy."

Mostly.

Comedian—"When is an actor not an actor?" His Friend—"Nine times out of ten."

Our idea of a foolish man is one who argues with a friend.

Too Reminiscent.

I overheard a remark the other eve ning which would form a good addi tion to that remarkable series of play fully satirical drawing by Du Maurie in "Punch," entitled, "Things one woul rather have left unsaid." A very gush ing lady and her daughter swept acros a room and up to a little lady who wa standing there and said: "My, hov sweet you look this evening;" the turning to her daughter, remarked i a very audible tone, "My dear, sh must have been lovely when she wa young."—Cleveland Plain Dealer.

Due for Disappointment.

"Well, I'll tell you, Gap," said Zek Lopp, "I aim to sell off some of m stuff, pack the rest of it and the o woman and children into the waggi whistle to the dogs, and start for Okl homy."

"All right," replied Gap Johnson Rumpus Ridge. "But 'pears like I' heered from two, three fellers th have been there, that the rave hain't running no free boarding hou in Oklahomy this year."—Kansas Ci Star.

"I Don't Sink So."

A little New York girl, eight yea old, accompanied her mother to a stu exhibit where many rather languid dies and gentlemen were viewing poorly painted and rather questiona picture, about which they were m ing polite but insincere remarks. I the middle of the studio to a place front of the special canvas little La strode; after a moment's look at picture she turned around and in high-pitched voice cried out:

"Zat's a very bootiful sing, bu don't sink so!"—Youth's Companion

Robe Rolls Like Shade.

Rolling like an overgrown wind shade a new automobile lap robe is turned when idle by a spring int case that serves as a foot rail.

The man who has no time to wa never gets into an argument wit suffragette.

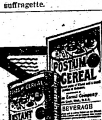
What is good health worth to you?

HEALTH is priceless. You wouldn't knowingly part with it for anything in the world.

Why then do you risk it needlessly for the sake of a few cups of coffee? Coffee contains caffeine, a harmful drug which often interferes with nerves and digestion.

There's an easy, pleasant way to avoid this menace to health, without any sacrifice of comfort or satisfaction. Drink Postum instead of coffee.

Postum is a pure, cereal beverage—wholesome and delicious—a safeguard for health.



Your grocer sells Postum in two forms: Instant Postum (in tins) prepared instantly in the cup by the addition of boiling water. Postum Cereal (in packages) for those who prefer to make the drink while the meal is being prepared; made by boiling fully 20 minutes.

The Goodridge Banner

An Independent Legal Weekly Newspaper Published Every Friday at Goodridge, Minnesota.

S. V. ARNESON
Editor and Publisher
JOSEPH CHRISTIANSON
Associate Editor

Entered as second-class matter at the postoffice at Goodridge, Minn.

EDITORIAL

HERE GOES AGAIN.

The Banner has a habit of printing certain "stuff' that doesn't "set" well" with some individuals, and as a consequence this newspaper catches particular h—— for so doing, but rather than assume the position of a jellyfish organ, The Banner is quite willing to take its portion of abuse.

So here goes again!

It has come under The Banner's observation that a few are wont to criticize and find fault with schools and educational institutions as at present conducted. Admitting that in some cases schools are maintained at a high cost and are a burden in many respects, the price we pay is well worth the benefits derived. If this were not true, most of us would be as ignorant as the "single-barrel" minds that now are so bitter in their denunciation of education as it is "dished up" in this day and age.

It is a known fact, however, that those who pay the least are doing most of the sqwaking. Without much gray matter themselves, they find consolation in condemning and tearing asunder the very foundations of our civilization—the public schools.

But remember this: The public is trying the best it can to give the most for the least, and that is precisely what you are getting. If you can do any better, why not announce your candidacy for the school board next year and the people will give your notions a whirl. Chances are, if your ideas are meritorious, they'll place you on the board for life, and everybody will be better off, our children will get to be as smart as you are and the teaching staff will have an opportunity of soaking up a small part of the intelligence you undoubtedly possess.

But The Banner doesn't believe you have the nerve to do it. You like the sound of your own voice too well for that.

LISTEN TO THE VOICE OF WISDOM.

Frank A. Day is making a gallant fight against the proposition to restore capital punishment in Minnesota. He opposes it from a high moral ground and defies its proponents to controvert his argument. Frank is right, as usual, and gives sound reason for the faith that is in him. Capital punishment is nothing short of legalized murder.—Olivia Times.

Of course, he's richt!

Frank Day, as The Banner remembers, once published a newspaper at Missoula, Mont., and while there probably he saw a little more of what capital punishment really means than some of the newspapers that are so loudly clamoring for the death penalty in Minnesota.

Seeing a man hung would cure a lot of legislators and others of the desire to see Minnesota pass a law legalizing capital punishment.

Let them see the black hood shoved down over the victim's head and the awful dull redound of the fatal trap released beneath his feet, sending him into eternity, and they, too, chances are, would come over to the side of Frank Day.

Folks used to spank their children when they come home late. Nowadays the kids don't get home in time to get spanked.

Some newspapers give such glowing tributes to the departed that The Banner feels it most prove embarrassing to the ministers who preach the funeral sermon. Obituaries, at least, are one form of news wherein newspapers don't have to "stick to the facts"—if they are glowing enough.

The other day The Banner happened to hear of a man who had a grouch against Congressman Steenerson. He must have been recovering from an old-fashioned case of bellyache.

Thief River Falls and surrounding community—the head, feet and gizzard of the moonshine industry—will be on trial next week when the February term of district court opens.

If you don't like the public schools, vent your spleen by keeping your kids out of school or they may get wiser than you are and bury you in the Graveyard of the Order of Damphools.

A five-year-old boy was permitted to vote at the recent elections in England. They probably figured he would be able to vote more intelligently.

DID YOU SEE HIM?

Dr. Coue, the famous French exponent of auto-suggestion for ills, was in Goodridge the other day. The Banner man mentioned his theories and told him that they indeed were wonderful. Asked what he thought of his own theories, he said:

"Conscious auto-suggestion is nothing more than talking to yourself. When you are feeling blue you know how comforting it is to meet a jolly friend. What is it in him that changes your mood? It's his smiling face, his cheering words, and his lively actions. What hinders you yourself from supplying this mental tonic? You can step before your mirror and reproduce your friend's smile, can't you? That smile in the mirror, if it is genuine, you will have the same effect on you as your friend's smile. You can talk health, hope and happiness to yourself, can't you? You can hum a lively tune, can't you? You can dance a jig, can't you? You may rest assurred that if you do these things with a strong desire and determination to cast off your gloom, it will vanish like mist before sunshine. Yes, you can banish your blues, if you really want to.

Most people don't know how to talk to themselves. A lot of them tell themselves they are sorry for themselves. That's no way to bring about contentment and cheer. Tell yourself you're feeling fine; tell yourself you are blest far beyond your deserts; tell yourself you ought to be thankful for health, food, raiment, shelter, every good; tell yourself you ought to have peace of mind; tell yourself you have good reason to be happy; tell yourself that to make friends you will have to be one; tell yourself that life is just what we make it; argue it out with yourself how much worse your condition could be than it really is, and how much better you can make it if you really try.

And ever since the interview The Banner day by day and in every way has been getting better and better.

If you don't agree with what The Banner says editorially the best and most honorable way this newspaper can think of for you to demonstrate it is to pay up your subscription. In that way your animosity wouldn't appear quite so cheap.

What is the matter with Europe, you say? This is a question that is often heard. The Banner doesn't profess to know, but here is one answer: There are nearly 4,500,000 men under arms in Europe today. A quarter million are encamped, gun in hand, in the Near East. Fifty warships, ready for hostilities, frown on Constantinople. Two per cent of the entire population of Europe is being montained by the state for war purposes. Perhaps that is what is the matter with Europe. Militarism plus!

Red Lake Drainage Bill Is Killed in State Legislature

Senator C. L. Hansen, Marius Waldal and W. J. Brown Appear Before Drainage Committee.

The Red Lake Drainage Bill, of which Senator F. L. Cliff of Traverse county was the author, was last week killed in conference before the proposed measure reached the floor of either branch of the legislature.

The express purpose of the law has not been established, but it is presumed that it was aimed to make the Red Lake river drainage project workable and it is thought that it had for its object the framing of legislation which would enhance the chances of the project going through. The dismissal of the entire drainage proceeding, however, by Judges Andrew Grindeland and C. W. Stanton at Crookston Saturday would probably have nulled the effect of the law had it passed.

Senator C. L. Hansen stated this week that he had received 76 letters from various objectors to the proposed bill, residing in the area affected, and was prepared to do his utmost to defeat the measure in the event it reached the floor of the senate.

Senator Hansen, Marius Waldal, member of the house from this district, and W. J. Brown, attorney for the objectors, appeared before the senate committee on drainage and vehemently protested a favorable report on the measure in face of the almost unanimous opposition of the farmers and land-owners residing in the drainage area.

Mr. Brown returned to Thief River Falls Tuesday morning from St. Paul, where he had spent several days in the interests of the drainage objectors. A similar bill introduced in the house by Representative Neumann, also of Traverse county, was killed in conference.

Trade 1918 War Savings For Treasury Certificates

Holders Are Urged to Present Stamps For Cash Redemption or For Exchange.

Secretary of the Treasury A. W. Mellon has today released the following statement regarding exchange of 1918 War Savings Stamps for new Treasury Savings Certificates:

"Final reports as to exchanges of [illegible] new Treasury Savings Certificates [illegible] not yet available but reports received [illegible] date show that issues of the new certificates on that account already amount to over $65,000,000, representing about $80,000,000 in maturity value. Exchanges are still coming in steadily and will reach a considerably larger figure when the returns are all in from postoffices and banks. This satisfactory response to the treasury's special exchange offering indicates that the new certificates are meeting a real demand and figures well for continued sales during the coming months.

"Out of the $638,000,000 or thereabouts, of War Savings Certificates of the series of 1918 outstanding when the present operations began, the total redemptions, including the $65,000,000 exchanged for Treasury Savings Certificates, had reached about $500,000,000 (maturity value) by January 31, 1923. On this basis and according to the best estimates which are obtainable, there are matured War Savings Certificates with a maturity value of about $133,000,000 still outstanding. Holders of these certificates are urged to present them promptly either for cash redemption or for exchange into the new Treasury Savings Certificates. Registered certificates must be presented to the postoffice where registered, but unregistered certificates may be presented at postoffices throughout the country, Federal Reserve Banks and branches, or the Treasury Department at Washington, while banking institutions generally are undertaking to handle such transactions for their customers."

[illegible] County of Pennington

DISTRICT COURT

Fourteenth Judicial District

Rambeck & Stone Company, a Corporation, Plaintiff,

vs.

Grover C. Shannon, Robt. R. Wheelwright and John B. Shannon, Defendants.

SUMMONS.

The State of Minnesota to the Above Named Defendants:

You, and each of you, are hereby summoned and required to answer the complaint of the plaintiff in the above entitled action, which complaint has been filed with the Clerk of said Court and to serve a copy of your answer to said complaint upon the subscriber at his office in the city of Thief River Falls, in the county of Pennington and State of Minnesota, within twenty (20) days after the service of this summons upon you, exclusive of the day of such service.

If you fail to so answer said summons within the time aforesaid, the plaintiff will take judgment against you and each of you for Six Hundred Sixty-one and 98-100 dollars ($661.98) and interest thereon at the rate of eight (8) per cent per annum from July 22, 1922, together with the cost and disbursements of this action.

H. O. CHOMMIE,
Attorney for Plaintiff,
Thief River Falls, Minnesota.
Feb. 16-23-M 2

Lecture on Christian Science

Entitled

Christian Science: The Interpretation of Truth

Delivered at the Church Edifice, First Street and LaBree Avenue, Monday, February 12, by Frank K. Leonard, C. S. B., Member of the Board of Lectureship, Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

Whenever I hear or think of that quotation from John, "And ye shall know the truth, and the truth shall make you free," I likewise think of the question asked of Jesus, "What is truth?" And perhaps the most interesting thing, so far as I am concerned, in the entire quotation, is the fact that Jesus did not answer that question. He practically said: If in view of everything that you have known to be done in Judea under my ministry you are still asking the question, "What is truth?" then no words would ever convey one single item of information on that point. My conviction is quite well borne out by the fact that when John the Baptist again became doubtful, after he had admitted that Jesus was the Redeemer who was looked for, and sent to Jesus to find out whether or no he was the one they had expected, Jesus did not answer directly. He did many things, and then he said: Now, go and tell John what I have done, then let him find out for himself who I am; and on the basis of what Jesus had accomplished, John knew that he was the Redeemer.

Now, Truth is one Truth. In my recent lecture tour in Europe, a very prominent divine in the Lutheran Church remarked that it was dangerous to say God is Truth, because he said, there are so many truths that it would be a question as to which one God is. That was a theological opinion, but it was not Christian. All the human opinions on the face of the earth as to what constitutes Truth may be wrong. There are millions of human opinions, but when we begin to limit Truth, when we begin to say that there is this truth and that truth and the other truth, we are getting away from the Bible fact, which tells us that there is just one Truth, and that this Truth is God, the infinite One. In order that any one may be free from any kind of discord, he must know the truth that proves the discord untrue. In other words, nothing can really exist without Truth.

Truth is the same yesterday, today, and forever. Truth never began and it never will end. Truth is always good, it is always pure, it is always lovely, and it always accomplishes just one result, and that is the fruitage of God. Humanly speaking, we could not build this building if we did not have Truth, for, humanly speaking, nothing on earth could be accomplished were it not for Truth. Why, as a matter of fact, you cannot even lie until you know the truth. Have you ever thought of that? Because a lie is a misstatement about the Truth. And so you see the whole of our investigation and research along all lines will lead us straight and absolutely to the contemplation of Truth.

We must answer, each of us, and for ourselves the question—what is Truth? We must every one of us prove in ourselves and to ourselves and for ourselves the freedom from everything untruthful which a knowledge of the Truth that is God brings to us.

Truth Comes to Human Consciousness.

Christian Science came into this world as it came, not accidentally. It did not come under the impulsion of human opinions at all, but it came because away down underneath with every one in this world is a desire and a hope for Truth. And so, naturally, sooner or later, Truth began to appeal to human consciousness, in a way it could apprehend until Truth finally sprang forth arrayed in all its beauty and glory and majesty, the manifestation of God himself, in order that Truth itself should be known, and our acceptance of it be justified by reason of what it accomplishes in the world.

We have had a wonderful experience with Truth in our own day as it has been presented to us. It has been a marvel to those who have known it why or how any one could question the fact that Christian Science reveals the Truth. This has been questioned because it has been questioned as a revelation. It has been questioned as a revelation because it has been questioned as having had a revelator; and the whole thing has been questioned because the world, until Christian Science brought the fruitage of Truth into it, has not comprehended Truth at all in its spiritual sense; because men have turned away from the teaching and preaching of our Lord and Master while he was on earth, and have gone away after strange teachings and divers theories and beliefs.

Christian Science brings this Truth to us in such form and manner that the little children understand it. They understand it so well that they are every day of their lives doing wonderful things to bring out the realization of Truth.

I just want to tell you one thing that came under my notice. A little girl seven years of age had gone out to play with another little girl. She came in in about half an hour with a face which showed conclusively that she was not very happy. Her mother asked her what was the trouble. The little girl just shut her lips together and went right to her own room, sat down and played with her own things. She had been in there about 20 minutes when she came out with her eyes wide open and said, "Why, mother, what do you think? I almost forgot that we are both God's children." Then she went back to play with her companion again.

You see, she had analyzed Truth without human or personal distinction, and when she had done that, Truth appealed to her as belonging to every one in exactly the same quantity and quality that it belonged to any one, therefore she recognized that what she had been doing was to limit Truth in seeing only herself as God's child. It then occurred to her if one of them was God's child they both were, and as soon as she saw this the disturbance was healed, the anger and resentment disappeared, her thought had been cleansed and purified, and with the simplicity of a child she said so frankly and went back to her playmate.

Now that ought to teach us how we may use the truth of being to bring about a cessation of discord and dissension, and to establish a universal brotherhood of man wherein there shall be no distinction, no line of separation, no difference of any kind, but we shall all be working for the universal good. That is the mission of Christian Science in this world.

The only way the Christian mission can possibly be accomplished is by the spreading of the truth about God, about Jesus the Christ, about man and the universe, so that the whole world shall understand and comprehend the infinite God and the infinite capacity and ability of His children to go to Him in any of their misunderstandings, whether these are called want or woe, sin or sickness, and find for every one the help which the Bible teaches us God has for us.

The Coming of Christian Science.

One of the questions that has been asked very often is why we should assume that this revelation had come through a woman of whom no one had ever heard up to that time, rather than through some of the men or women who had consecrated years of their lives to the study of the Bible. Well, really, we cannot understand that question. Only God can answer that. But we can say as did Christ Jesus: "I thank thee, O Father, Lord of heaven and earth, because thou hast hid these things from the wise and prudent, and hast revealed them unto babes." Mrs. Eddy assuredly conformed to what babe means in her loyalty to the teachings of the Bible, in taking them as being absolutely true.

When other children were hearing the little fairy stories and things of that sort, to which we all have loved to listen, Mrs. Eddy was hearing from her mother the history of things recorded in the Bible, the stories of true events. Her mother did not tell her about what this or that one said; she was constantly telling her stories of their works, and what the Word of God accomplished, so that Mrs. Eddy was familiar when a young girl with all the activities recorded in the Bible, to her they were not mere historic accounts or events, they were real, living, actual facts, the proofs of God's allness. She clung to them as she grew up; then when she had reached maturity she met with an accident which the doctors said would result fatally. A few of her friends accepted and believed this, and her minister stopped to pray with her in the morning, believing, as they all did, that she would not be on earth to be prayed with at the termination of the morning service. After he had done his kindly loving work for her, she asked those with whom she was staying to give her her Bible, and to leave her alone with God. They did as she requested, and when the minister stopped again later to see if he could be of any assistance, Mrs. Eddy herself opened the door to him and stood before him for the first time since her girlhood, perfectly well, normal and natural in every particular.

The Bible tells us of many happenings of that kind. Yes, and there are many events of that sort about which we know that have happened outside of Bible times. But what is the difference between those and Mrs. Eddy's case? This—the others all accepted their healing to be a manifestation of a special dispensation on the part of God, and the next time they had a pain they took a pill. They thought their healing was a special occasion and that a special privilege had been given to them to be specially made well by the Word of God. Mrs. Eddy did not accept this. We know in Christian Science that there is no such thing in heaven or in earth as a special dispensation, because if we believe what Jesus said, we know he said that if we believe what Jesus said, we know he said that if we believe on him, we shall all do the works he did. He intended, therefore, to say that it was not a special dispensation which had enabled him to do these things, but that it was a universal gift to men when they were willing to follow God in his footsteps as he had taught them to do. Mrs. Eddy did not accept her healing as a special dispensation, for she knew that she had been made well through the activity of the law of God, and that she had a right to her birthright, the knowledge of God and Jesus Christ whom He had sent, which would give her dominion over the earth and the fullness thereof, and take from her every sense of fear that God might be absent, or that there was another power to which she might be subject, therefore that God might not be omnipotent, omniscient, and omnipresent. Then she became a student night and day, week in and week out, month in and month out, year in and year out. She studied. And what did she study? The Bible. It was the only book she had to study. No commentaries would help her, nothing but a determined and consecrated effort to know the truth of being in its spiritual import would suffice to bring about the knowledge which she felt was her birthright and which she was entitled to have. So she studied and studied and studied, and then after a while her old theological belief, instead of being a cloud, became simply a mist, and then that grew less and less, until finally she began to get hold of the light of God in its eternal activity, so that she was able to heal others even as she had been healed, and thus she learned to know God even better. She found herself able to tell others how to heal as she had been healed, and then her revelation fulfilled itself when it came to her so clearly that she was able to put it down in words that you and I can grasp and understand and comprehend, so that as we take what she said and go to our Bible with it, we, too, find the spirit of the Word of God which enables us to worship Him in spirit and in truth, and so fulfill His law.

So we know by results that the revelation came to Mrs. Eddy and through her to the whole world.

Impartiality of Truth.

Please do not think that we Christian Scientists imagine that we have a peculiarly close position relative to God. Do not think for a moment that we are indicating or mean to indicate that we think God loves us better than He does anybody else. He does not. His attitude towards all His children is the same, and never changes. Truth is irresistible, irrefutable, and irreversible and is equally applicable by all. The only distinction to the human sense of things might be illustrated in the difference between perhaps a dozen students in a classroom in school. One grasps the fundamentals, the law, the progression and the rule, and so brings out a successful answer to his problem. Another does not grasp it so well, and fails to get a complete, correct answer. The others have not grasped it at all, and they do not get any answer that shows any intelligent knowledge of the subject whatever. But the principle is there, and when one uses it correctly, he finds himself in direct line, and he is able to solve the problem and to get the right answer.

So it is just a question, my dear friends, of service. It is a question of using what you have or abusing it, or turning your back upon it. We find that it is essentially true that we have departed far from God. I always wondered why it seemed to be that there began in the year 300 such retrogression from the use of the Word of God for the solving of all problems. But when I learned, as I did in my trip in Europe, that Constantine, crowning himself as the vicegerent of God on earth, never became a Christian, never laid down his false Gods, and that the Christian people of that day did not ask him to, did not expect him to, but followed him just because he was a successful fighter in war, I could understand then why at that time and period the Christian people began to find themselves incapable of understanding the law of God sufficiently to make it operative in the meeting of their necessities and desires.

One thing you may rest assured of. Your application of Christian Science must be honest from the inside out. It does not make much difference what you say if your speech is not the manifestation of what you have accomplished, what you know you are capable of accomplishing, when you are obedient to the Bible command wherein it is said unto us, "Let this mind be in you, which was also in Christ Jesus." You see that it requires something of us in order that we may get this mind of Christ, because the Bible says, "Let this mind be with you, which is also in Christ Jesus." And so it requires and demands of us that our human theory and opinion shall be set aside, and that we shall no longer glory in what we call diversity of opinion, but that we shall glory in the single purpose which brings out the one Truth, the one God, and the one Christ.

The Bibe the Guide.

The Bible to the Christian Scientist is not essentially a Church book. Of course, he uses it in church—but it is also to him a work book. To the business man it is a business book. To the housekeeper it is a book of rules telling how to keep house comfortably, pleasantly and harmoniously. To the child in school it is the textbook which teaches that child how to think. And to every man, woman and child on earth it is the foundation of right thinking wherein we may find our freedom.

Christian Science is a field for everybody on the face of the earth upon which to get busy and work out his own salvation. We have not been accustomed to think that the laity should work particularly hard on religious subjects, because a man has sometimes thought that he was a pretty good Christian if he kept a pew in church, saw that his family attended regularly and he himself occasionally when the opportunity seemed ripe. He would go and he would listen to the result of another man's hard labor and work, and come away and nod his head. "That was a pretty good talk." He would feel that he had done his part of the religious work until he again associated himself with other members of his church in its meetings.

But, my dear friends, there is a great difference between creed and religion. Religion demands of us that we shall work constantly and continuously to think right, and consequently to do right. Well, one might say, it is pretty hard work to be a Christian Scientist. Consider, however, your human experiences, and all of the human differences between persons, and you will find it is pretty hard work not to be one. The fact is that you have had enough trouble in the experience you have had, and you would like to change it if you could. We have all had that suggestion. No, it is not hard to be a Christian Scientist, not as hard as it is not to be one.

Where do you start to be a Christian Scientist? With every right thought you think. That is your start. Therein is to be found your progress, and in the successful attitude of always thinking right do you find the key of heaven. You have had the thought that heaven is afar off, and yet, every time you use the Lord's Prayer, what do you pray? "Thy kingdom come. Thy will be done in earth, as it is in heaven." Have you meant it? When you talk about "Thy will be done in earth, as it is in heaven," have you meant it? Have you ever stopped to think whether you meant it or not? Has it ever meant to you that you are praying that there should come unto you and through you and in you such a consecrated knowledge of God that you would stop thinking and doing wrong, and think and do the right, and that would bring what has been termed the millennium here,—in other words, the kingdom of God and His righteousness on earth as it is in heaven?

Our Lord and Master saw the necessity for it, so he taught us all to pray that prayer, and he did not mean that we should pray for it to come at some other time. One thing we must learn is to know that we are not praying for a kingdom that is yet to come, but we are praying for that knowledge of God which brings that kingdom into our midst in proportion to our right thinking.

Christian Science and Prayer.

But it has been said that Christian Scientists do not pray. Why, the whole activity of the Christian Science movement is prayer. It is entirely prayer. You know that the Bible says that we are to pray without ceasing. Now, you ask some Christian of the orthodox churches: "Do you know that the Bible says that you are to pray without ceasing?" And he will say, "Yes." Then you say to him: "Do you do it?" And he will say: "Why, no, of course I don't, I have to take care of my house, I have to take care of my business, to keep my books, to do my stenographic work; I have all these things to do and I could not do them if I prayed all the time."

I want to say that Christian Science teaches us beyond peradventure that we must pray without ceasing, and that there is no such thing as the possibility of true success unless it is predicated upon constant prayer.

The trouble is that we have a wrong conception of what constitutes prayer. We have thought prayer to be simply a petition to God to do this or that, or to give this or that, or to take away this or that. To be sure, the Bible says that God is the same yesterday, today, and forever, without variableness or shadow of turning. Nevertheless, in the human misapprehension which surrounds the term prayer, there has been constant appeal to the Unchangeable to become the very essence of changeableness.

Now, just to illustrate it, let me ask, have we ever thought how strange it would sound if we were suddenly endowed with the power to hear all of the petitions called prayer which are sent up to God at the same time? For instance, here are two perfectly sincere Christian business men in the same city. Their stores are on the same street in the same block and they are side by side. One sells umbrellas and rubbers and the other sells spring bonnets. One man prays for rain, and the other prays for fair weather, and what is God going to do?

That is not the kind of prayer that Jesus used at the tomb of Lazarus. He did not ask God if God were willing that Lazarus should live. He simply said, "Father, thank thee"—and then on the foundation of this thanks unto God he turned to the tomb and said; "Lazarus, come forth": and Lazarus came forth.

Now, the greatest book of prayer that there is in the whole Bible is the book of Psalms. We all know that David had been wonderfully blessed; that he had more opportunities to serve God than it seemed possible for a human being to have; then he began to be pretty proud of David; he began to think that David was doing a lot of these things instead of God's doing them, and the result was that he began to slip backward and downward until he finally got down into the mud and mire of disloyalty to God but that if we turn in the right direction we shall find God standing by our side giving us, in proportion to our willingness to accept the Christ mind, relief and surcease from the discord which has environed us. And so in the very depths of his wretchedness and misery, David found God again. If we will take the Psalms we shall see how full they are of praise, how David glorifies God, how he recognizes that all there is is the manifestation of God in His great consideration even for the sons of men in their striving to work out their salvation. To be sure, once in a while we find a psalm that is pretty doleful—that is the human side of David—but he always gets hold of it in the next psalm and his prayer then is more joyful than ever. So it shows that he recognized that thanksgiving unto God is real prayer; and that indicates to us that there is nothing so infinitesimal in our daily occupation than we may not praise God for it.

I want to tell you—it may not interest the gentlemen much, but it will interest the ladies—that we can praise God in washing dishes. How? By being happy that you have the dishes to wash and the ability to wash them, rather than getting mad because you have to do it. In every human experience we can praise God because every blessing flows from Him. He is the Father of light, and every good and perfect gift cometh out from Him unto His children, and for the service of the sons of men when they are willing to use them.

Christian Science and Business.

We have heard a great deal of the discord surrounding us, that we are in the midst of the greatest financial depression the world as a world has known in history. Everybody is worried—that is, no, not everybody, but everybody who is not a Christian Scientist is worried, and perhaps a few of the Christian Scientists are, too, because we find ourselves at times looking on the doleful side of things.

Some person maybe asks the question: "Do you use your religion for the solution of your financial problems?" We must assuredly do, and why not? Well, then, some one of you says that the Bible says that the Son of man had not a place to lay his head. Yes, it does say that, and on the basis of that we have been taught from generation to generation that Jesus was poor beyond the expression of words. But if we are thoughtful, and become familiar with the conditions and circumstances of the age in which he lived, we shall see that he simply made reference to the fact that like all religious teachers of that time he wandered continually from village to hamlet, doing the work of a man of God as he saw it, and resting peacefully with some true believer wherever the shades of night found him; because the Bible tells us that at the time he made that statement he was clad in a seamless garment, the most expensive form of clothing that they knew in those days. Poor? Why, the riches of Jesus were beyond human computation or expression. He made the greatest demonstration of provision that the world has ever known anything about. I am going to tell you about it, and you will recognize it when I begin to speak of it.

It was at the time when Jesus stood as usual discoursing to the people, and one of the disciples came up to him and said in substance, "Master, the collector for Caesar's tribute waits without and wants his money." And what did Jesus do? Did he dismiss the concourse of people and gather the disciples together to see if amongst them they might be able to raise the pittance required so that Jesus might go on raising the dead? Isn't it strange that the incongruity of the two beliefs has never appealed to us, as it does now? This is what he did. He did not dismiss the people at all. He just stopped for a moment and said to one of his disciples: "Peter, you go down and cast in your line and the first fish that you get, open its mouth and there you will find a piece of money which will be for Caesar's tribute."

A lady in Kansas City said to me one time she was glad I spoke of that, because she had always thought that that passage meant that Jesus told Peter to go down and fish, and that Peter went down and fished long enough to get fish enough to take up to town and sell for money enough to meet the demand of Caesar's collector.

Well, as a matter of fact, is there any other interpretation to it when we come to know the spirit of the Word as Christian Science gives it to us? A person asks a Christian Scientist: "Do you believe that that thing actually happened?" "Absolutely." There is no question about it whatsoever. It is absolutely proof to us when there is a time when we seem to be called upon to be obedient to the demand of owing no man anything save to love one another, that we can take the word of God, and find the wherewithal to do it if we glorify God and cling to Him everlastingly.

What do you say? You say that your money will do just such and such a thing, just so much, and that is all that it will do. Well, so long as you count your dollars that way that is all they will do for you, there isn't any question about that. But do you remember the multitude which Jesus fed with the few loaves and fishes? Do you remember that five thousand had all they could eat, and that after they had finished there was more left over than they had when they started?

Oh, yes, you say, but that was Jesus. He said that if we believed on him we should do the things that he did. Are you going to let God be true and believe it, and let every man be a liar, as the result of the human theory of limitation?

I want to tell you a little experience of my own on the question of finance that will probably be helpful. I had at one time a salary of one hundred dollars per month. I was always rather methodical about such things, so I took my hundred dollars and I put it down here, and on the other side I put house rent and clothing and food, and incidentals, and my little innocent amusements, and then church—when I got down to church I didn't have anything left, the other things took the whole hundred dollars. May I say—and I say it without criticism or intentional criticism—that oftentimes the penny or the nickel in the contribution plate represents the thought of the man who has put everything else down and the church last. But I did that for a while and then it began to worry me; in other words, a knocking at my thought said to me: The only reason you are upon the face of the earth is because of what Christian Science has done for you, and yet you are putting the church last; and after a while I saw it, and then I took a desperate plunge; and I turned it around and put the church first. And I put down for the church what seemed to me a perfectly enormous amount—yes, and I put it in, too. I did not just put it down, I put it in. I did not change my method of living. I was not conscious of having made any change whatsoever; but at the end of the third month I found that I had paid all my bills, I had given to the church what I had pledged my own conscience to give, and I had five dollars left over to put in the bank.

Now, then, what was the difference in the two methods? In the first I trusted my God and I found the limitation removed and in this present-day crisis it is for the Christian Scientists to put trust in their God and go on with joy and happiness in the realization that the inexhaustible treasure of God is at their command, until they stop counting their dollars, and begin to count their blessings, and the result will be that Love "will life the shade of gloom" and for all "make radiant room, midst the glories of one endless day," as Mrs. Eddy has taught us in the "Communion Hymn."

Christian Science is the open way for us to come out from "the shade of gloom" to find the real, legitimate, lovely peace which passes understanding, wherein God is glorified first, last, and all the time.

Synonymns for God.

Mrs. Eddy has unfolded to us a marvelous knowledge of God in the synonymns which she has given in "Science and Health with Key to the Scriptures" for the word "God." Many people have thought that they did not believe in God, but every one believes in God when he knows what He is; and so these synonymns which Mrs. Eddy has given to the world would eventually have been sufficient to have saved the entire world if she had never written another thing. And I am going to speak briefly on a few of these, in order that we may have the blessing which comes to the Christian Scientist who knows these synonymns. They are not unusual, except in perhaps one instance, but they are exceptional in the enlightenment which they give us as to what God is.

Now Mrs. Eddy, in using these synonyms, does not limit or consent to the truth of the statement that there are two kinds of love, for instance; one that may turn into envy, murder and hatred; and the other the love which Jesus Christ showed when he was enabled to say of those who were attempting to destroy him: "Father, forgive them; for they know not what they do."

Mrs. Eddy teaches us that God is Life. The Bible teaches us that God is Life. It says so in so many words—Life, that is, without beginning or without ending; Life, which manifests itself to be the eternal activity and creator; Life, that we are all longing and looking for. Any one knows that God and Life are one, and we are all working for Life—we all believe in Life; and that is why we are working for it, and so because we believe in Life, we do believe in God.

I have spoken to you of the teaching that God and Truth are one, and we do know that nothing on earth can be accomplished if it be not for the realization of Truth which is changeless; and because we all do believe in God.

Then Mrs. Eddy teaches us that God is Love, the Love which Jesus showed in that hour of great testing and tribulation, and when we acquire that depth of Love we have reached a place—and not until then—when we can love our neighbors as ourselves, and when we find our own in establishing another's good.

Then Mrs. Eddy teaches us that God and Principle are one. A person when he hears that statement very often will say: "Well, now, that is one of the objections that I have to some of the teachings of Christian Science. It takes my God away from me, and it gives me nothing but an ephemeral theory that I am to take and believe in."

The Bible says that God is Life. Do you think that Life is a person? The Bible says that God is Truth. Do you think that Truth is a person? And the Bible teaches us that God is Love, and you know that Love is not a person. It is the impossibility of the finite grasping the infinite that makes the appeal to some of us in a strong way humanly that we want a God who is like ourselves. We want to think of a man sitting on a throne in a place as a judge; and we cannot have that kind of a God, my dear friends, if what the Bible teaches us about God is true, because the Bible teaches us that God is omnipotent, omniscient, and omnipresent, All-in-all, and we know that no human sense of person can possibly be omnipresent, or All-in-all.

Mrs. Eddy teaches us that God and Principle are one, and, as I say, that seems to be an abstract statement, but it is not when we understand it. What is it that always brings to a successful issue, if properly used, every problem? Is it primary law, the rule of progression? Is that the problem, or the solution? No, it is the principle of mathematics which underlies all [illegible] answer. It is in this method and manner that Mrs. Eddy uses the statement that God and Principle are one. She means that God is the foundation, the literal foundation we build, the superstructure wherein God, man and the universe are coincident and in co-agreement, all of them manifesting eternal Life, Truth, and Love which constitute God.

Mrs. Eddy also teaches us that God and Mind are one. That has been a controverted point, perhaps more so than any other of Mrs. Eddy's teachings. I don't know why. There isn't anything new in that statement or teaching. She has not propounded anything new for our acceptance in teaching that God and Mind are one.

What does John say in opening his gospel? He says this: "In the beginning was the Word, and the Word was with God, and the Word was God." On a simple analysis let us see where that statement leads us, so far as the foundation is concerned.

What is the word? The word is the expression that accompanies or precedes the thought. Thought is the activity of Mind. Therefore, because this is true, Mrs. Eddy's statement would be equally correct if it were used to say that in the beginning was Mind, and Mind was with God, and Mind was God—and then we instantly see why it is implored of us that we should let that Mind be in us "which was also in Christ Jesus," and we see what our Master meant when he said that it was not he that did these wonderful words but that it was the Father working in him who accomplished them. And, incidentally, therefore, in further corroboration of the correctness of this teaching, let us revert to the first chapter of Genesis, wherein we read: "God said, . . . and it was so"; and we know that the spoken word is the expression of the thought which goes with it, and thought is the activity of Mind.

Therefore, it is not an abnormal, it is not an abstract statement to say that God is Mind, and when we come to know that God is the Mind of Christ, then we know that our God is omnipotent, omniscient, and omnipresent; that He is the same yesterday, today, and forever, and without variableness or shadow of turning.

It has been said also of the Christian Scientists that they are not Bible students, that they devote all of their time to the study of Mrs. Eddy's works. We may think we know some one in the Christian Science church, or attending the Christian Science church, who does that; but such a one is not a Christian Scientist. Mrs. Eddy gained her whole revelation from the Bible, and Christian Scientists are Christian Scientists only as they know the Word of God and are able to analyze its spiritual import and meaning as we find it in our Bible; and when we do that with the aid and illumination of the Christian Science because we are striving to follow the Word of God to its ultimate demonstration and proof, and nothing less than that constitutes real, legitimate, lovely, Godlike Christian Science.

Understanding Life.

I have called attention to the Biblical teaching that God is Life, and because God is Life it is natural and normal that all of us should be striving to know Life and striving to demonstrate life. That is the reason that a calendar is such a liar. When it says life is born, it lies; it lies when it says that it is a year old; it lies when it says it is forty years old; the calendar lies when it says that it is dead. It never did tell the truth and it never will, because it tries to fix Life between the point called birth and another point called death. The time for us to refuse to have anything to do with the calendar is when we begin to think, not waiting until our hair is white or gone. Begin it and cling to it, and keep on clinging to the thought that it does not make any difference to us what the calendar says, that we know that God is Life; and that man, the image and likeness of God, knows that He is not a God of the dead, but a God of the living, and that man's birthright is Life.

Now we Christian Scientists do not claim that we have yet reached the point where we completely overcome what is universally termed sin, disease, or death, but we do call attention to the fact that according to the returns of the 1910 census—I have not been able to get the figures yet of 1920—that during the twenty-five years preceding that time there was an average increase of longevity of sixteen years, and that was the first twenty-five years during which Christian Science had become universally known and was being practiced the world over. In the first twenty-five years of this knowledge of the allness and changelessness of God as Life in our feeble grasp of it, it could have produced such a condition as that, we know that, as we come to a better, and a higher, and a holier, and a purer knowledge of God, we shall continue to grow in longevity until we shall again have upon the earth the age of the antediluvians: and then if that sense of limitation will pass away, we shall know God and Jesus Christ whom He hath sent, and to know Him is eternal Life, as the Bible teaches us.

That age of the antediluvians has been an unhappy feature for the natural scientists. They could not explain it away. They could not get around it; but recently they decided that they could get around it, for just before going to Europe last spring, a little magazine published in New York was sent to me in which the editor expressed himself as delighted to think that at last the scientists—not the Christian Scientists, but the natural scientists—had found the explanation for the age of the antediluvians. The magazine went on to say that they had resolved, or rather had determined, after all these ages of research, that the only measure of time, which would mean a month, and that therefore in these stories of the age of antediluvians, wherever the word "year" appears, there should be substituted the word "month"; and then it went on to give an illustration. It said, for instance, these stories tell us that Adam lived to be nine hundred and thirty years of age, and the word "month" being substituted, and those months being resolved into years by the division of twelve, it would show that Adam lived to be seventy-eight years of age which was rather a close approximation to the theory of three score and ten being the natural life of man upon earth.

Now, that sounds quite logical, and coming from the natural scientists it is bound to have a good deal of force. But there are one or two little things that interfere with the acceptance of that theory and I want to call your attention to two of them. In the same story in the Bible where they teach us that Adam lived to be nine hundred and thirty years of age it also tells us that when Seth was born Adam was one hundred and thirty years of age. Call that months, resolve it into years, and it shows that Seth was born when Adam was ten and one half years of age; and he already had two children.

It is even worse with Methuselah, because the Bible says that when Methuselah was born his father, Enoch, was sixty-five years of age, and reading that in the same way it shows that when Methuselah was born, Enoch, his father, was five and one half years old.

Is it not amazing that every attempt on the part of human theory to explain away the almightiness of the Word of God and its truth always slays itself, because it is not and cannot be logical; but when it is presented to us as it should be, the logic is clear to us and brings to us the thought of the old patriarch, who cried to us, "Turn ye, turn ye from your evil ways; for why will ye die . . ."

I have been much interested in an advertising sign that is liberally sprinkled all over the United States. Part of the legend of that sign is this: "Eventually, why not now?"

That is the question which Christian Science is asking. Eventually you will turn, then why not now? I want to say that nothing that was ever good in all our life, nothing that we ever found good in our own experiences, theories, or beliefs, but that we shall find when we come to grow to a knowledge of God and our Lord and Master, wherein there is no limitation in our thought about His ability or His willingness to help.

[illegible] of God [illegible] we shall know [illegible] from every [illegible] is Life. We shall find coming to us more and more a knowledge of the almightiness of God, and the more we know the almighty the less we shall be concerned with the human theories, and we shall learn that there is no power apart from God that can thwart those who have the wish and desire to make the meaning of the children of men unto eternal, everlasting Life.

We shall find that the more we learn to know God as Christian Science teaches God to be, the more loving we shall be, the more consciousness of Life we shall have, the more Truth we shall discern, and as every step presents itself unto us, the more we shall become conscious of the Principle of right thinking, so that we can make no mistake, but shall go on with the light which never lost a case which came to it for healing; and the more we cling to that, the more we shall have that Christ-mind which enables us to do for ourselves and for our brethren in this world the healing from every discord that seems to afflict us.

"Thy kingdom come.
Thy will be done in earth, as it is in heaven."

Prize Beet Man Speaks of Crop

Alfred Flattum Clears $50 Per Acre on Plot Planted During 1922 Season.

Believes Crop Well Adapted to Northern Minnesota and Pennington.

Alfred Flattum, Pennington county sugar beet raiser who produced 18 tons of sugar beets last year on a five-acre plot of ground, which for sugar content tested the highest of any grown in the United States, according to reports, told The Tribune this week of some of his experiences in bringing the new crop into being. Incidentally, Mr. Flattum gave this newspaper some enlightening information about beets and the adabtability of the crop to Pennington county.

In the first place, it must be stated that Mr. Flattum is extremely enthusiastic over sugar beets and will triple his acreage this year, intending to plant at least 15 acres into the crop. He started two years ago with but three acres and, like every new proposition, Mr. Flattum stated that he had much to learn. There were many ups and downs, but after the smoke cleared, the grower had produced eight tons of beets on the three acres, which were sold at the Chaska factory at the regular price.

The following year—1922 — Mr. Flattum planted five acres into beets and his experiences of the previous year stood him in good stead for he increased the production, and from the five acres harvested approximately 18 tons. All of which goes to show what experience of one year had taught him. The first year Mr. Flattum depended altogether on second hand information, admitting that he knew but little about growing sugar beets. He secured all bulletins and literature known to the industry and made a study of sugar beets down to the last analysis. Last year Mr. Flatum secured the services of a Polish family to assist him during the growing season, with great success.

One of the most valuable lessons learned, according to Mr. Flattum, is the conditioning power of sugar beets. "It's the greatest thing in the world to clean land," said Mr. Flattum, "and I've never seen anything like it in all my life. Take that land which I had planted into beets two years ago. You should have seen the wheat field I had on it last year. Threshermen told me that it was the finest stand of wheat they had ever seen, even better than some of the wheat seen here in the banner year of 1917, when good wheat was the general rule. Up here in this section where we are molested more or less by obnoxious weeds we need something like beets to clear the land of the pests, and I consider sugar beets as that thing."

Mr. Flattum believes that spring plowing is best for sugar beets and stated that was what he did last year, whereas the year previous he had plowed his land in the fall. Spring plowing, he said, has the effect of holding the foul seed in check until the beet plant gets a start.

It's like the case of the sheep killing the butcher, for after the sugar beet plant gets an honest start in life it will kill off anything, sow thistle and all forms of weeds notwithstanding.

Mr. Flattum, as said before, is enthusiastic over sugar beets and likes to talk about them to others contemplating planting them this year. He stated that had not the heavy rains raised havoc with his acreage last year, he would have increased his beet crop by several tons.

In summing up, the grower admitted that the raising of sugar beets meant work, and he agreed with the line of talk given by the sugar beet factory officials at the Auditorium last Friday, but said that anyone who really wants to make a success of the venture can do so once he makes up his mind. "Profiteering" to the extent of $50 per acre on the patch put into beets last year doesn't look at all bad to Flattum and he feels confident that inasmuch as he could do that while still "green," he can do ever so much beter when field men and instructors arrive here this year to do the coaching.

Flattum will grow wheat on the land he had planted to beets last year and he figures that he is going to show all concerned what beets will do in the line of conditioning land. He invited The Tribune reporter out to his place to watch him "nurse" his wheat land along this year. The latter intends to take advantage of the opportunity, and also to "look over" his 15-acre beet plot this year. In fact, the reporter feels duly flattered to be invited to view the plant of the grower which produced the prize beets of the entire country.

NEWS REVIEW OF CURRENT EVENTS

Lausanne Conference Breaks Up and War Cloud Hovers Over the Near East.

THREATS OF TURK AT SMYRNA

French Occupy More German Towns and Increase Stringency of Their Rule—Italy Ratifies Navy Limitation Treaty — President Asks Congress to Approve British Debt Funding Agreement.

By EDWARD W. PICKARD

> IN THE army appropriation bill as passed by the senate there is an allowance of $56,000,000 for rivers and harbors. Many senators denounced this as "pork," and advocates of national defense asserted that cause was sacrificed in order to fill the "pork barrel." Does public sentiment in your neighborhood support the action of the senate?

ONCE more war correspondents, last week, were looking up steamer and rail schedules to the Near East. The headline writers found their favorite "war cloud" hanging over that part of the world again. The Lausanne conference came to an end, for the time being at least, without the signing of a peace treaty, and the air was filled with the recriminations and defiant phrases of the British and the Turks. In the last days of the conference the American representatives, ably seconded by the Italian and French delegates, tried earnestly to persuade Ismet Pasha to yield to Marquis Curzon's ultimatum. The Turk argued that it was useless for him to sign a pact which he was sure would not be ratified by the national assembly at Angora. He had in mind the fate of the treaty of Versailles in the American senate. Curzon angrily departed for London and a day or two later the conference broke up.

The British, the Greeks and the Turks all had been exceedingly active in a military way, anticipating the failure of the negotiations, and at this writing there is real danger of an outbreak of hostilities. For the time chief attention was centered on Smyrna. The Turkish governor there ordered all allied warships to quit the harbor within a specified time. To this the French, British and Italian governments replied with an order to their vessels to remain and defend themselves in case of attack. The British also hurried naval reinforcements. Preparations were made to take the foreign colonies aboard ship. It was said the Turks were mounting six-inch guns on the south side of the Gulf of Smyrna, where the shallow waters force ships entering the harbor to hug the shore. However, the governor postponed the time for attempting to enforce his order and Adnan Bey at Constantinople said the matter was not serious and would be settled soon. The Paris press was not so optimistic, asserting a declaration of war was inevitable unless the Turks receded from their position.

One American warship, the destroyer Edsal, is at Smyrna, but dispatches said the Turks defined it as a neutral and also outside the prohibited class in tonnage.

IT IS not necessary to go into details as to the Turkish objections to the peace treaty that was submitted to them. Both Lord Curzon and Ismet Pasha asserted they had gone to the limit in concessions. Ismet balked especially at the proposed provisions for guarantees for the security of the persons and property of foreigners in Turkey, and at certain economic financial clauses. The French and Italian delegates warmly supported Lord Curzon. In a formal statement Curzon said he rejected several overtures for the conclusion of a separate peace between England and Turkey.

It is pointed out that in case of war the Turks would have the advantage in Asia Minor at the start and could speedily drive the British out of Mosul. On the other hand, Constantinople would be at the mercy of the British fleet, and the British troops there could retire to Chatalja and there join forces with some 100,000 Greek troops from the Maritza river line.

If Turkey counts on the active support of soviet Russia, it appears from dispatches from Moscow that she will be fooled. The soviet leaders, these reports say, have been holding a series of conferences and have come to the definite decision that Russia will not participate in any war growing out of either the Near East or the Ruhr situation. She will defend herself if attacked but will not even help the German workers should they start a revolution.

COL. WILLIAM HASKELL, former head of the American relief work in Russia, has added himself to the growing number of those who do not believe the Turks are as bad as they have been painted for many years. After visiting Lausanne and Constantinople he went to Moscow, and there told American correspondents he believes America should feed the 500,000 Turks at Smyrna and its hinterland whose homes were demolished wilfully by the retreating Greeks, instead of aiding the Greeks and Armenians, who, he says, are sitting around waiting for America to give them their next meal. Colonel Haskell gave the lie to stories of Turkish atrocities circulated in American churches. On the contrary, he believes that the Greeks acted like barbarians.

GERMAN opposition to the French in the Ruhr was considerably strengthened by a visit which Chancellor Cuno made to Essen at the call of the labor unions. The food situation had grown acute and the union leaders made it plain that the government control of foodstuffs from the producers to the workers was the only way to save the Ruhr from a communist uprising. Cuno consented to try the plan and appointed Burgomaster Schmidt of Dusseldorf as Ruhr dictator, with power to ration food and fix prices.

Cuno and his cabinet then decided not to break off diplomatic relations with France entirely. It was said they feared further French seizures, but the French went right on with the seizing. Across the Rhine from Strasbourg they occupied two junction points on the Transalpine railway; in Hesse they advanced to Goddelau, apparently on their way to Frankfurt; and in the Wupper valley they seized several towns between the English zone of occupation and Elberfeld, which city they surrounded with troops, preventing the export of any coal to southern Germany. The Germans have been notified that persons found damaging railway property will be sentenced to death, and in other respects the French regulations are growing more and more stringent. Still public opinion in France is that Premier Poincare is too lenient to the Germans.

THE naval limitation treaty and the pacts relating to submarines and gas in warfare and to China and the Chinese tariff, negotiated in the Washington conference, were ratified on Wednesday by the Italian chamber of deputies. Premier Mussolini and his government had declared in favor of the treaties, so the opposition was negligible.

From Paris comes word that the navy treaty will soon be presented to the French parliament, with a recommendation for its adoption, but with the understanding that the limitations on French armament shall not be accepted as establishing a principle.

PRESIDENT HARDING appeared before congress and asked that legislation be passed approving the agreement on the funding of the British war debt. He read the report of the American commission and heartily indorsed its statement that the agreement "is a business settlement, fully preserving the integrity of the obligations, and it represents the first great step in the readjustment of the intergovernmental obligations growing out of the war."

Bills to carry out the President's recommendation were introduced at once in both house and senate, with good chances of speedy approval.

Mr. Harding took advantage of the opportunity to urge upon congress once again the wisdom of passing the ship subsidy bill, placing on the legislators the responsibility for continued losses in the operation of government vessels in the event of their failure to act on the measure. In a tone of desperation he pleaded with congress to take definite action either for or against the subsidy bill. The managers of the filibuster that has prevented a vote in the senate appeared unmoved by the President's words.

SENATORS WADSWORTH, Borah, Ashurst, Lenroot and others strove in vain to stave in the "pork barrel" in the army appropriation bill—the allotment of $56,000,000 for rivers and harbors. The budget bureau had recommended the sum of $27,000,000 and there were various attempts, all in vain, to have it cut down to this or some other figure. Spencer, the new senator from Missouri, was strong for the "pork," declaring that even the $56,000,000 was inadequate.

THE government is preparing for participation in the Pan-American conference that opens March 25 in Santiago, Chile, and eight eminent gentlemen have been named as our representatives. The government, in response to a question from a South American nation, has declared against broadening the scope of the Pan-American union so as to include any nation or group of nations not located within the two American continents. The intimation was that the League of Nations might be willing to be represented in the union. The administration said it was desirous that there should be co-operation between the Pan-American countries and the league or any other agency that promised better international understandings, but that official representation of the league at the forthcoming conference did not appear to be in harmony with the purposes for which the Pan-American union was organized.

After two months of successful work the Central American conference in Washington came to an end last Wednesday. A treaty of peace and amity, eleven conventions and three protocols designed to bring about closer relations were signed.

OUR little "army of occupation" from the Rhineland arrived safely at Savannah and was given a boisterous welcome. Sixty-three of the boys brought with them German wives, while five of them had Belgian spouses and three proudly introduced French wives.

THE house committee on immigration has approved a bill revising immigration quotas downward and including a provision which would prohibit the immigration of the Japanese. The measure apparently will cut the number of aliens admissible in any one year to 186,437, as against 358,837; but the number will be increased by the operation of provisions designed to prevent the division of families.

The senate passed a bill authorizing admission into the United States of Armenian refugees, with special provision for admitting up to 25,000 Armenian orphans under sixteen years of age.

THE Ku Klux Klan must be chuckling in its myriad throats over the troubles that beset Tolerance, the Chicago organ of the association organized to combat the Klan. The publishers and editors of the paper are fighting among themselves, and now several more or less prominent Chicagoans have sued the publication for large sums for alleged libel because they were stated to be members of the Klan or applicants for membership.

TWO serious mine disasters occurred on Thursday. At Dawson, N. M., an explosion entombed 122 miners, and it was feared nearly all of them would perish. A blast in the Cumberland mine on Vancouver island, B. C., killed 18 men and injured as many more. In both cases the actual cause of the explosion was unknown.

ONE of America's leading astronomers, Edward E. Barnard of the University of Chicago and the Yerkes observatory, died last week at Williams Bay, Wis. His discovery of the fifth satellite of Jupiter in 1892 brought him international fame and recognition.

GRAIN CROPS WILL BE TOPIC

Short Course at Agricultural College Feb. 19 to 24 to Study Problems.

COURSE OPEN TO ALL

Development of Rust-resistant Grains And Good Crop Rotations Will Be Taken Up—Large Attendance Is Expected.

Fargo, N. D.—Solutions for the small grain crop problems which face North Dakota farmers will be thoroughly discussed during grain crop week of the winter short course at the North Dakota Agricultural college, February 19 to 24 inclusive, according to O. B. Waldron, dean of agriculture, in charge of arrangements for the unit courses which opened January 22 and close March 16. Dairy week was in progress last week, and poultry week is being held this week.

Open to all Interested.

Besides the farmers and other students who are enrolled for the entire eight weeks of the course, persons especially interested in the subject matter given during one of the weekly units are enrolling for the one week alone, Mr. Waldron states. Because small grain growing has reached a critical stage in the state, a large enrollment is expected during grain crop week. Such topics as the development of rust-resistant varieties, and good workable systems of crop rotations will be taken up. Successful farmers of the state will co-operate with college specialists in leading the discussions.

Among staff members who will participate in the discussions are: Dr. H. L. Walster, O. O. Churchill, J. W. Haw, O. A. Stevens, and Theodore Stoa.

The Week's Program.

8:00 to 10:00 a. m. daily—Wheat: Varieties, classes, and types. Methods of production and improvement. Rust resistance, the wheat outlook, barley, rye, oats, and flax. Methods of production, varieties; regions suited for these crops and their places in a general system of general farming.

10:00 a. m. daily—Crop rotation and soil fertility. A consideration of the leading cropping plans and results obtained, practical methods of maintaining high production.

11:00 a. m. daily—Indian corn: Varieties, methods of planting and cultivation, harvesting, making silage, seed selections and improvement.

1:15 p. m. daily—Weed control: A study of quack grass, sow thistle, wild oats and other annual weeds and methods of their eradication or control.

2:05 p. m. daily—Judging corn and other grains.

HOOVER, WALLACE TO MEET

Cabinet Members Invited to Attend St. Paul Conference.

St. Paul, Minn.—Several members of President Harding's cabinet and other nationally known leaders of agricultural interests were urged to attend the northwest agricultural price stabilization conference to be held here February 27 and 28, in telegrams dispatched by Governor J. A. O. Preus of Minnesota, president of the conference.

Invitations were sent to Henry C. Wallace, secretary of agriculture; Herbert Hoover, secretary of commerce; Julius H. Barnes, United States chamber of commerce; Walton Peteet, director of markets, American Farm Bureau federation; A. W. Mellon, secretary of the treasury; and O. E. Bradfute, president of the American Farm Bureau federation.

The conference was organized to bring together governors, agricultural leaders, and businessmen of ten wheat growing states—Minnesota, Michigan, Montana, Nebraska, North and South Dakota, Iowa, Illinois, Kansas, and Wisconsin—to discuss price stabilization of farm products.

STOCKYARDS RATE WAR ON

Chicago.—A rate war among stockyard commission men was forecast with the announcement by the Progressive Livestock commission company of a 40 per cent reduction in their charges for handling cattle and hogs in carload lots. The reduction takes effect immediately.

A saving to the farmer and livestock producer of from $300,000 to $400,000 a year will be affected if the reduction becomes general. The livestock exchange has had a committee considering a reduction for several weeks, but it is said the matter has been buried in the committee and is not likely to be reported back for action.

Herrin Trial Jurors Called.

Marion, Ill.—The first group of veniremen called for jury service was on hand when Williamson county circuit court convened for the second trial growing out of the Herrin mine riots last June in which 25 men were killed. Nine men, including four of the five who were acquitted in the first trial, and Hugh Willis, miner official, faced charges of first degree murder in connection with the death of Antonio Mulkavitch of Erie, Pa., a guard at the Lester strip mine. Charges against four were dropped.

DECLARES TANLAC "IS BEST OF ALL"

St. Paul Woman Says Stomach Trouble Is Gone and She Has Gained 10 Pounds.

"Tanlac has meant health and happiness to me, and I think it has no equal," declared Mrs. Albert Kaping, highly-respected resident of 29 E. 10th St., St. Paul, Minn.

"I was so terribly run down my housework seemed like a mountain to me, and lots of times I had to give up and rest. I was nervous, weak, and had splitting headaches and awful dizzy spells. My stomach was so badly out of order almost everything I ate would sour and I suffered terribly from gas, heartburn and a distressing smothering feeling. I could not sleep nights, my back ached terribly, I lost weight till my clothes didn't fit, and was in a generally wretched condition.

"But now I get real joy out of caring for my house. Since taking Tanlac I have gained ten pounds, never have indigestion and all my aches and pains are gone. I take pleasure in recommending Tanlac."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.—Advertisement.

Man's Length of Life.

According to the president of Cornell university the average length of life in North America is fifty-six years. In 1870 it was forty-one and in 1910 fifty-two and one-half years. Students of this interesting subject say that the average life could be prolonged twenty years if all people could learn and profit by what health experts know. Health education has a lot to do with it. In tropical India the average man is destined to die at twenty-four. Longest lived people in the world are the progressive New Zealanders. They are said to live sixty years on the average.

Timely Comments on Agricultural Topics for Our Readers

POULTRY

PEKIN DUCKS GROW RAPIDLY

Young Fowls Intended for Market Should Never Be Given Anything but Soft Feed.

The Pekin is the only duck that grows rapidly enough to make a good green duck. Ducklings that are to be marketed as green ducks should never have anything but soft feed. Start them on bread crumbs or dry bran, and as soon as they have learned to eat well give a mash of two parts bran, one part middlings and a very little corn meal, moistened with water till crumbly, and with about 5 per cent sand or chick grit added. This may be fed at first five times a day, but should soon be gradually diminished to three times a day. Never forget the sand, for the ducklings must have it to digest their food. The amount of corn meal in the mash may be gradually increased and a little beef scrap added after two weeks, though some duck raisers never feed it, and it is a good plan to mix cut up alfalfa or other greens in the mash until the ducklings have learned to eat without cutting. By the eighth week the mash may consist of equal parts bran, corn meal and middlings, with 5 per cent beef scrap, and always sand. The last two weeks some of the big duck men add a little oil meal for finishing. The point is to make the mash richer and more fattening as fast as the birds are able to digest it, and to get them to market at the earliest possible moment. After the market is flooded with broilers prices drop rapidly. The greatest demand is of course in cities.

Start Ducklings on Bread Crumbs or Dry Bran.

DIFFERENT BREEDS OF DUCKS

Pekin Is Probably Most Profitable for Meat While Runner Is Superior as Egg Layer.

Like hens, ducks are divided into meat producing and egg producing breeds. The Pekin is the most popular and probably the most profitable of the large breeds, though the Aylesbury and Cayuga are also profitable meat producers. The Runner is the layer of the duck family, and is also an excellent table bird, though smaller than the other standard breeds. Like turkeys, there is a strain of wild blood in some of the best breeds.

FISH MEAL FOR LAYING HENS

About Twenty Per Cent of Mash Will Give Good Results—Protein Is Big Need.

Fish meal is being fed to some laying hens with good results. About 20 per cent of the mash is the usual recommendation. The commercial dried buttermilk is another source of protein that is meeting with favor among poultrymen. A good grade of beef scrap is still the reliable standby of many breeders. But whatever you feed, do not neglect the protein if you need winter egg money.

CHARCOAL GOOD PREVENTIVE

Value Can Hardly Be Over-Emphasized and Should Be Fed to Fowls of All Ages.

The value of charcoal can scarcely be over-emphasized and it should be fed to fowls of all ages as a preventive of bowel discords and disease. It is best to keep it before the fowls at all times, as there is no danger of them eating too much. Charcoal has a great purifying effect in absorbing noxious gases and will correct many digestive discords.

PERTINENT POINTERS for MODERN FARMERS

Prepared Under Direction of North Dakota Agricultural College

BEWARE OF FEEDING MOLDY SWEET CLOVER

(By A. F. Schalk, Veterinarian, North Dakota Experiment Station)

During the last few months many stockmen and veterinarians have reported considerable losses in cattle in the state, to the veterinary department of the Agricultural college. This information comes from 21 farms in 12 rather widely separated areas in eight different counties.

The disease is confined chiefly to young cattle under three years of age, but older animals are not entirely free from it. When once it gets a stronghold upon them they rarerly recover. It usually runs a rapidly fatal course, ending in death within from 24 hours to two or three days.

Animals affected become dumpy and depressed and show but little inclination to eat and drink. When forced to move about they usually have a stiff gait and may be more or less lame in one or more limbs.

In the cases examined it appears that the sick animal actually bleeds to death. The bleeding may take place in various ways.

Perhaps the most common form is the occurrence of numerous and extensive hemorrhages under the skin where large swellings or tumor-like formations can be easily seen and felt. At first sight these swellings somewhat resemble the disease known as blackleg, but closer examination shows them entirely different. They range in size from a few inches to more than a foot in diameter and may contain many pounds of free blood.

In other cases the bleeding is more internal, where it appears in large bloody areas under the linings of the body cavities or under the coverings of the various internal organs. Quite often both these forms of bleeding are found in the same animal and may be accompanied by nose bleeding a few hours before death.

On some farms the animals have bled to death externally following the operation of dehorning. The blood does not seem to clot or thicken as it should in healthy animals and the great loss of blood leads to death within four to twelve hours after the operation.

After making a most careful and thorough survey of the possible cause of this fatal disease condition, the evidence points very strongly towards moldy sweet clover hay and silage. We find that upon every one of the 21 farms where the disease has been found that spoiled sweet clover hay was the chief and in many cases the only source of food.

These findings do not necessarily prove that the moldy sweet clover hay is causing the death of these animals, and it would be folly for one to attempt to condemn it entirely upon present knowledge. However, we believe there is enough evidence before us at this time to strongly recommend that musty, moldy, sweet clover hay of a questionable nature be entirely discarded for stock food until further light can be thrown on the subject.

Sweet clover is a very succulent forage paint and during the last summer heavy rainfall was experienced in many sections of the state during the harvest season. These conditions were very favorable for the development of molds, fungi; and possibly other dangerous conditions, and consequently a large amount of spoiled sweet clover hay has been put up and is now being used for stockfood.

The department of veterinary medicine of the Agricultural college is beginning a systematic research upon this problem and will push its investigations as fast as facilities will permit in order to more definitely determine if questionable sweet clover hay and silage are the sole cause of this disease.

New York state has 8,500 one-teacher school buildngs. But just because they are small is no reason why they cannot be adequately equipped; and many districts are realizing this.

BEE-KEEPING GROWING N. D. INDUSTRY

(By Dr. R. L. Webster)

The greater part of North Dakota's honey crop comes from sweet clover, which produces an exceptionally high quality of honey. An acre of sweet clover should support a hive of bees. Beekeeping ought to be profitable in any place where sweet clover is available. Locations near streams are preferable because of the necessity of pollen for spring brood rearing.

Beekeepers agree that Italian stock is the best race of bees to handle because of their disease resistant qualities and usually milder temper. Hybrid bees should be requeened wtih a good Italian queen.

In making a start with bees usually it is best to purchase them locally if possible. The college does not sell or distribute bees. You are referred to dealers advertising in beekeeping journals. Bees in combless packages may be purchased from the South. If this is done during a good honey flow in spring, they soon build up strong colonies and should produce an excellent surplus the first year. There is also less danger of disease in package bees.

The standard ten-frame Langstroth hive is the most popular hive with commercial beekeepers, especially in the production of extracted honey, when bodies and supers are interchangeable. Other larger hives have certain advantages, especially in swarm control, and these are preferred by some. The main objection to the large hive is the weight when filled with honey.

In spring bees must have an abundance of stores, ample room for brood rearing and plenty of protection. In North Dakota it is advisable to winter in a dry cellar with at least a shallow super of honey for stores. Most beekeepers believe that 45 degrees is about the best temperature for the bee cellar.

The best way to learn beekeeping is to purchase a single hive and take care of it. To be successful the good beekeeper must study his bees and be prompt in his manipulations. Don't plunge into bees. While the prospects for beekeeping in North Dakota are undoubtedly exceptional, there is still much to be learned. The beekeeping industry is not a paying business for a shiftless beekeeper.

FRUIT GROWING IN NORTH DAKOTA.

(By A. F. Yeager)

I—Currants.

The most frequent reason for failure with currants is a lack of pruning. A currant bush bears large full clusters of fruit on one, two, and three years old wood. Older wood blossoms but produces small fruit on scattering bunches mixed with leaves. A neglected bush quickly becomes unproductive because it is too thick and is composed mainly of old wood.

An ideal bearing currant bush should have nine canes; of these, three should be one year old, three two years old, and three three years old. When once this condition is established the annual spring pruning will consist in taking out the three oldest canes each year and thinning the one-year ones to three well-spared sprouts. Ordinarily, if one cuts off the canes which lie on the ground he will thereby remove the oldest which have become bent by fruit bearing, then the remainder of the bush can more easily be thinned to admit light and air. A well-handled currant bush may produce four to eight quarts of fruit.

The leading varieties at present are Perfection and Long Bunch Holland for red, and White Grape for white. Tree currants are not recommended. Spacing should be four to five feet apart, and of course good cultivation is essential. The currant worms may be killed by spraying with lead arsenate as soon as they are seen.

Uncle Ab says: Unending sunshine is just as bad as none at all.

Says Sam: There an't hardly anyboys as big a fool as he looks in a nightgown.

* * *

Burning the leaves in the fall helps avoid a lot of plant disease, especially those which affect shade trees.

* * *

Relax, sink into a chair and go "dead to the world" for about three minutes the next time you are weary with housework. It freshens you up like a nap and takes much less time.

FILM ANALYZES HORSE MOVEMENTS

Despite Large Number of Tractors Now Used by Farmers the Draft Horse Still Holds His Own on Most Farms.

(Prepared by the United States Department of Agriculture.)

You have seen a horse walk, trot, pace, gallop, run and jump, but do you know just how he does it? You can learn how from a new United States Department of Agriculture motion picture, "The Horse in Motion."

This one-reel film, sponsored by the bureau of animal industry, is an analysis by means of a high-speed camera of all the important gaits of horses. The gaits are first shown at normal speed, followed by the retarded action, one-eighth of normal. The normal pictures were made 16 to the second, but the slow pictures were made 128 to the second. Among the types of horses shown are draft animals, pacers, trotters, hunters, runners and cavalry horses.

The technique of the jumps is demonstrated by Dandy Dude, owned by Gen. John J. Pershing, who was present at the first showing of the film in Chicago, before the Horse Association of America. The movements of cavalry horses are shown by three troops of United States cavalry in a stirring charge on the parade ground at Fort Meyer, Va.

"The Horse in Motion" will be circulated through the Department of Agriculture's film distribution system. Copies may be bought by authorized purchasers at the cost of printing.

LEATHER LOSSES CAN BE REDUCED

Careless Handling on Part of Farmer Reduces Value.

Long-Used Vegetable Tanning Materials, Products of Farm and Forest, Are Totally Inadequate at the Present Time.

(Prepared by the United States Department of Agriculture.)

In calling attention to the need for more study of the care of hides, the making of leather and its care, the bureau of chemistry of the United States Department of Agriculture says that the farm, which produces the raw materials, uses more of the finished products than does any other industry. The total number of hides and skins used in making leather in this country in 1914 was more than 140,000,000, costing the tanners, it is estimated, $240,000,000 plus $45,000,000 worth of tanning, curing, and finishing materials. The factory value of leather goods made from these materials is estimated at more than $650,000,000, for which the ultimate user paid at least $1,000,000,000.

Better methods of tanning, says the department, should materially reduce the cost of shoes and harness to the farmer. Country butchers and farmers now supply about 30 per cent of the hides and skins used in this country. Carelessness, lack of knowledge of taking off, curing, and selling these hides and skins cause the loss of about one-third of the value to the farmer. These losses are at least $15,000,000 annually.

The long-used vegetable tanning materials, which are direct products of the forest and farm, are totally inadequate at the present time, says the department, to supply the country's needs. Through better processes and more intelligent care many millions of dollars can be conserved annually in leather goods. The Department of Agriculture has published bulletins dealing with the tanning of hides and the care of leather shoes, harness, belts, etc.—to make it wear longer.

EXPERIMENTS ON DRY COW

Lime and Phosphorus Have Much to Do With Milk Production and Unborn Calf.

The United States Department of Agriculture has made some experiments with regard to the feeding of a dry cow. Lime and phosphorus have much to do with the milk production and building up of the body of the unborn calf. For that reason it is a good practice to feed the cows well when they are dry and at the end of their lactation period in order that they may store up these valuable elements for use when the large demand of the lactation period is made.

PUREBRED STOCK IS BETTER

Offspring Worth Practically 50 Per Cent More in Sale Value Than Grades and Scrubs.

More than 500 farmers and breeders raising all kinds of domestic animals answered questions sent out by the United States Department of Agriculture, and from these replies it has been determined that these men consider purebreds 40 per cent better from a utility standpoint than common stock. They say that offspring of purebreds are worth practically 50 per cent more in sale value than the offspring of grades and scrubs. Also, purebreds were found in nearly all cases to be more readily salable.

Plans for Trapnests.

Simple plans for the making of trapnests may be had from the Department of Agriculture. These nests are used for determining the profitable producers of the flock, and also to avoid making mistakes in the selling of eggs for breeding purposes.

San Jose Scale Coming Back.

Some farmers say that San Jose scale is coming back strong; yet it can't come back unless the dormant spray is neglected.

FACTS IN CO-OPERATIVE MOVE

Farmers Must Keep Close Account of Their Expenses.

Official of Department of Agriculture Says Attention Should Be Given to Proper Determination of Charges for Use of Land.

(Prepared by the United States Department of Agriculture.)

To prevent either undue enhancement or depression of prices of farm products, farmers engaged in co-operative marketing must keep close account of their costs of operation, Dr. Henry C. Taylor, chief of the bureau of agricultural economics, United States Department of Agriculture, said in substance in addressing the American Farm Economic association at Chicago.

"Farmers who associate themselves for collective bargaining are likely to go wrong if they are not guided by proper cost accounting," Doctor Taylor said. "They may either unduly enhance prices in specific cases, contrary to the Capper-Volstead act or they may over-stimulate production and in the long run depress prices below the proper point.

"To make the right decision regarding what crops to grow, equipment to use, intensity of culture, and the most profitable method of disposing of the products, the cost of various operations as well as total costs are needed. Particular attention should be given the proper determination of charges for the use of land, unpaid labor and other non-cash items, and to the costs incurred by new producers who have entered the field on account of rising prices."

Such accounting will also give agricultural economists considerable information necessary in the proper analysis of agricultural conditions, it was pointed out.

Nothing great was ever achieved without enthusiasm.—Emerson.

THE DAIRY

SUGGESTIONS ON DAIRY CALF

Great Care and Attention Is Necessary to Raise Animal Successfully on Skim Milk.

In dairying the farmer should raise his own calves. Many farmers are not successful in raising them on skim milk. Whole milk may produce the best calf, but not necessarily the best cow. As good an animal can be produced on skim milk as can be produced on whole milk, but greater care and attention is required in producing the former.

The calf should nurse its mother for the first few days, after which it should be removed and fed by hand. Whole milk, warm and fresh from the mother, should be given for ten days or two weeks at least. Ten to twelve pounds per day in two or three feeds should be given at first, and the length of time that it should be continued depends upon the strength of the calf. Ordinarily ten days to two weeks will be required to make the change from whole milk to skim milk.

Gradually substitute skim milk for whole milk, increasing the former until the whole milk is entirely replaced. This may be a week, or it may be a month. Skim milk should be warm and sweet when fed, as cold, sour milk is the greatest cause of scours. It may be fed for six or seven months, depending mainly upon the supply. It should be given until the calf is five months of age at least.—Extension Service, Colorado Agricultural College.

Teaching the Calf to Drink.

SMUTTY SILAGE FED SAFELY

No Harm Follows Test Made by Expert in Feeding Tainted Material to Holstein Heifer.

Smutty silage can be fed to live stock with no danger of ill consequences, says T. W. Gullickson of the dairy husbandry division at University farm at St. Paul. Not so long ago many inquiries were being received at the dairy division headquarters regarding the advisability of feeding smut-infested corn in the form of ensilage. To answer these questions authoritatively Mr. Gullickson had collected some 800 pounds of pure corn smut which he ran through the ensilage cutter and put in sacks which he placed in the silo and covered with about ten feet of ensilage. A few months later the corn smut in the bags was substituted for the regular silage ration and fed to a Holstein heifer at the rate of 18 to 30 pounds a day. The heifer was not forewarned of the abrupt change in her diet, but took no exceptions to the corn-smut menu, appearing in fact to relish it. Mr. Gullickson says the feeding of the smut was continued for three weeks, during which the heifer remained normal in every respect.

PUMPKIN SEEDS NUTRITIOUS

Mistaken Idea to Think That Material Will Increase Kidney Secretions in Cows.

There is a tradition among some farmers that pumpkin seeds increase kidney secretions, tend to dry up cows, and therefore should not be fed. There is no real foundation for such an opinion. Pumpkin seeds are nutritious and should not be wasted. There is no danger whatsoever in feeding them to dairy cows.

CAREFULLY WATCH ALL COWS

Animal Losing Flesh Rapidly Probably Needs More Feed, or More Balanced Ration.

Watch the cows. The animal that loses flesh rapidly probably needs more feed, or a more perfectly balanced ration. When a cow takes on fat instead of giving a full flow of milk, it is probable she needs more protein and less carbohydrates in her ration.

Miss Adeline Davids left Friday evening for Bagley, Minn., where she has spent the week-end at her parental home. She returned Tuesday morning.

Miss Louise Besancon arrived Saturday from Thief River Falls and visited at her parental home east of the village until Monday night when she returned to Thief River Falls.

More Lasting Work Is Good Roads Aim

Real Purpose of Bond Plan Given By Commissioner in Fifteen Words.

Light on Most Important of Legislative Matters Presented in Paragraphs.

"Stop frittering away road money on endless repairs and put it into lasting improvements."

The whole purpose of first state highway bond issues was boiled down in these fifteen words by Charles M. Babcock, state highway commissioner, talking over the radio the other night.

"Plug the leaks of highway funds for constant patching and mending by building more and permanent improvements and the saving will more than pay the interest," he added. "There will be more good roads for public use all over the state and every year without a cent of increase in auto or road taxes. It's just a way of getting the most value for a given amount of money."

Seems to Be the Thing to Do.

A member of the legislature was at home on a week-end visit and here is what the local newspaper printed:

"John says he has been against the bonding proposition of C. M. Babcock and that he went down with the intention of not yielding on that point. But he says he cannot vouch for what he will do or what anyone else in the legislature will do, now that a convention of representative farmers from all parts of the state after passing resolutions against bonding changed their minds after Babcock talked to them for fifteen minutes.

"'These men,' says John, 'could only stand the pressure for fifteen minutes before giving in. But the same fellows will kick a legislator for not standing a much harder and more systematic pressure for fifteen weeks.'"

Counties Get Money Back.

Cash payments of $877,866.22 to counties in trunk highway refundments and reimbursements from 1921 and 1922 taxes paid on automobiles are shown by official records. Auditors of counties entitled to this money will verify the statement to prove that the state has relieved the counties of the burden of improving and maintaining the expensive main highways.

Other like claims soon falling due [illegible] authorized by the legislature are repaid on time.

Many counties are using money returned by the state to speed improvement of local roads and others are reducing local road and bridge taxes.

Foes Are Twisting Facts.

False statements that higher taxes will result, that the highway fund is overdrawn and that no sinking fund will be set aside to pay off the bonds are being made by opponents of the highway bond proposals.

The bond plan is not a proposition of how much taxes but one to get the biggest results with money now coming in, highway officials assert.

Every collar of motor vehicle tax receipts must go into the trunk highway sinking fund first, under the state constitution, and only after the necessary amounts are provided for bonds and interest can any amounts be used on the highways.

A pessimistic farmer insisting that the highway bonds would be paid from general tax funds learned that he couldn't lose anyway. Minneapolis, St. Paul and Duluth owners pay one-third of the automobile taxes, but nearly half or 46 per cent in general property taxes and therefore would be obliged to contribute even more to the cost of good roads in the country.

Constituents or Conscience.

A report from the capitol is that many members of the legislature are trying to decide whether to vote state highway bonds which they know ought to be authorized or to vote against the highway bonds to please a few letter-writing folks back home who don't understand and don't know that the bonds will profit them.

Surest Help For Farmers.

Congress and many state legislatures are trying to frame laws—mostly experimental—to help the farmer of the nation.

Good roads advocates everywhere point out that one of the surest ways to help the farmer is to build better highways to reduce his expense of hauling products to market and enable him to sell at top prices.

The Minnesota legislature will act on a plan to give the farmers of this state the use of more good roads without delay or any tax increase, according to highway officials. The plan is advanced as one which will benefit the farmers most and in many ways, raise the value of his land, increase his net returns from it and add to his comfort and prosperity.

Yet a few farmers are opposing the plan, it is reported, and urging adoption of questionable experiments.

Must Be More Reasonable.

Farmers everywhere in Minnesota are making demands on the state highway department and on boards of county commissioners for road improvements. Yet some of them fail to realize that the first necessary step is to provide funds.

Some are actively opposing the highway bond proposals which Highway Commissioner Babcock gives positive assurance will put the road program ahead five years and give every year the use of more good roads without any increase in taxes.

One suggestion is that the bond-opposing farmers are unreasonable.

Favored By Those Who Pay.

Representatives of all the automobile clubs in the state last week gave the state highway bond proposal a unanimous endorsement.

The action was rated significant because all trunk highway tax outlays are paid by automobile owners. Minneapolis, St. Paul and Duluth car owners pay about one-third of the money which must be used on roads outside these cities. A club official asked when the automobile owners want to pay for and speed the building of better roads through farming communities, why should the farmers object?

CREAMERIES' SUPPLY DEPARTMENT GROWS

The supply department of the Minnesota Co-operative Creameries Association, opened on January 1, in 30 days handled $26,000 worth of business, according to A. J. McGuire, general manager. "On this amount," he said, "the saving has been around 20 per cent."

Creameries in the western section of Wisconsin, while unable to join the state association, are patronizing the supply department liberally, Mr. McGuire says.

John Burroughs in his last book, published since his death, tells of a story that Emerson always chuckled over. An old woman had a farm in Indiana near the Michigan line. A re-survey set her farm in Michigan. She protested vigorously, saying that she could not stand the winters in Michigan.

A pessimist, my son, is the optimist who ran for office.

[illegible] FOR POTATO GROWERS

Steps to obtain for Minnesota potato growers either a lower freight rate or a relief from threatened transportation discriminations were taken last week in St. Paul. The state House last week unanimously passed a resolution asking the Interstate Commerce Commission to order a temporary reduction in the rate on Northwest potatoes. The resolution was inspired by reports of a one-fifth reduction on potatoes moving from inter-mountain states to terminal markets.

N. J. Holmberg, Commissioner of Agriculture, and other farm leaders, are demanding that there be no such reduction, unless similar slashes are made for potatoes moving out of the Northwest.

Grain Growers' Sales Co. On a Paying Basis

The volume of business handled by the U. S. Grain Growers Sales Company of Minneapolis has been steadily increasing, until at present the farmers' agency on that market has reached a self-sustaining basis, according to T. H. Hagen, general manager. "In three months, we are further along than we expected to be in a year," he said. The company has put on its second field man. A. E. Carlson of Warren, Minn., will work in the Red River Valley territory.

If you are discouraged because you seem to lack vast opportunity, read this by Alice Freeman Palmer: "You put yourself into people; they touch other people; these others still; and so you go on working forever."

STARVED

Looking each day upon the sky,
I never saw its shining blue;
I never saw the sun come up
As if it were some wonder new.
One day from out the dust and heat
Of the blurred city, came a lad
Who, daily toiling in a mill,
Found little leisure to be glad.
I saw him gaze upon the sky
As if his soul were drinking blue—
He looked at it—and looked again,
As if it were not true.

SENIORS AN[illegible] JUNIORS TO PUT O[illegible] CLASS PLAY

"Forest Acres" Will Be Presented to the Public Friday Evening, Mar. 30.

The Senior and Junior classes of the local high school have combined and will give their class play entitled "Forest Acres," Friday, March 30. The characters have been chosen and the rehearsals have already begun.

The play is a comedy in three acts, written by Fannie Barnett. The scene is laid in New England, the Crocketts being typical New England farm folks. Scene 1 takes place in the dining room of the Lemuel Crockett farm house, scene 2 in the library of the Brixley home, and scene 3 the same as scene 1. There isn't a dull moment throughout the whole play, and the public is assured of a splendid entertainment, and a big turnout is expected.

The list of characters is as follows: Lemuel Crockett, a miserly farmer, Alvin Halvorson; Mrs. Crockett, his wife, Mabel Graff; Hiram, his son, Maynard Halvorson; Elizabeth and Hepzibah Crockett, his daughters, Eunice Tvedt and Olga Grimley; Franklin Arthur, a business man, Gust Thompson; Miss Ruby Ruggles, school teacher, Edith Schie; Evelina Newcomb, a bashful maid, Ida Anderson; Andy Hobbs, a country boy, Herbert Nelson; Jeffrey Brixley, a New Yorker, Gorman Thompson; Elsie Brixley his wife, Clenora Urdahl; Constance Loring, their niece, Ruby Thompson.

OF IMPORTANCE TO FARMERS.

The Farmers Elevator and Milling Company is this week containing an advertisement containing the statistics of the total number of bushels of flax raised and the amount required and the number of bushels which have to be imported. This should awaken the farmers to the realization that they should raise more flax. There is no reason why flax can 'tbe raised here as it has been proved that it can profitably be done. So why should this country send $50,000,000 or more to Canada and Argentina for raw material that can be profitably raised here? Think it over.

Party in Honor of Birthday.

Seven of the little friends of Leona Bundhund tendered a delightful birthday party in her honor at her home Saturday afternoon. A very enjoyable afternoon was spent by the youngsters in playing games, etc. Misses Pearl Bergeson, Adeline Davids and Minnie Lindbloom chaperoned the party. The following were present: Adeline Stephenson, Orida Urdahl, Muriel Stephenson, Ailce Resan, Laurel Stephenson, Dorothy Sund and Violet Edseth.

Edmund Reopelle transacted business at Thief River Falls Wednesday.

ELMER BLY FAMILY RETURNS TO RESUME FARMING HERE

Mr. and Mrs. Elmer Bly and three children arrived here Tuesday morning from Garretson, South Dakota, and will start farming here immediately, having rented a farm south of the village. The Bly family is well known here, having resided in these parts until two years ago, when they left to seek their fortune elsewhere. The return of Mr. Bly and family no doubt proves that our part of Pennington county is not such a bad place after all.

LOCAL NEWS NOTES

Bert Gerrling of Esplee was a shopper in the village Tuesday.

Miss Adeline Davids was a visitor at Thief River Falls Saturday.

Bart Weber went to Thief River Falls Monday on a business mission.

Miss Constance Klungness of Germantown was a shopper and visitor in our village Saturday.

Miss Pearl Bergeson visited and attended to business matters at Thief River Falls Saturday.

Mrs. J. P. Jenesn was a week-end visitor at Thief River Falls. She returned Monday evening.

L. J. Mork of Germantown attended to business matters in Goodridge Saturday afternoon.

Miss Olga Sigrud of Erie spent the week-end visiting at the Henry Tollefson home.

Mrs. Olive Chirstianson of Neptune was in the village Tuesday morning enroute to Thief River Falls.

Raymond Jensen was a week-end visitor at Thief River Falls. He returned Monday evening.

Mrs. Ole Lokken left Tuesday for Thief River Falls to visit her daughter, who is ill.

J. P. Jensen attended to business matters at the county seat Tuesday between trains.

County Superintendent Ole Sande was an over night visitor in Goodridge Wednesday of last week.

Ole Rodal of Thorhult transacted business in the village Tuesday afternoon.

Father Noesen of Thief River Falls conducted Catholic services in the village Tuesday.

Albert Johnson of Germantown was a visitor and business transactor in our town Wednesday.

H. S. Dahlen of Thief River Falls attended to business matters in Goodridge Wednesday.

The undertaker is about the only man who can successfully wait for business.

Andrew San returned Saturday from Gimmell, Minn., where he has been employed throughout the winter.

Albert Johnson of Germantown returned Tuesday from Gimmell, Minn., where he has been employed.

LUTHER LEAGUE HOLDS MEETING

Fine Weather Brings Large Crowd and Good Program is Enjoyed.

The Luther League held its meeting Wednesday, Feb. 21. The very favorable weather was the cause of a large crowd being present, and the program was greatly enjoyed by all. To those who took part in the program much credit is due for the talented manner in which they handled their various selections. The Luther League is growing very rapidly. In fact, the membership roll has increased beyond expectation. Those who are not already members are cordially invited to join.

Following is the program rendered: Song, Luther League; scripture reading and prayer, Rev. Aaker; song, by male quartette composed of Oliver Resan, H. B. Rockne, Elmer Resan and G. C. Gulrud, accompanied by Miss Gretta Gulrud on the organ; reading, Pearl Lamporter; vocal solo, Minnie Lindbloom, accompanied by Adeline Davids on the organ; reading, Gustav Thompson; accordion solo, Oscar Wiseth; resitation, Laurel Stephenson. Another song by the male quartette concluded the program, after which the usual lunch was served.

W. Norby of Grygla was an overnight visitor and business transactor in the village Wednesday.

Mrs. Henry Lutz visited with relatives and friends at her home near Grygla over the week-end.

Mr. and Mrs. Herman Kissow and daughter, Lena, left Saturday for an extended visit at Garfield and Parkers Prairie, Minn., and other points.

Miss Clara Ferdinandson, who is teaching a rural school east of the village, spent the week-end at her parental home here.

Mrs. Carl Christianson was a business visitor at Thief River Falls on Tuesday. She returned the same evening.

Willard Hegstrom of Kratka was a passenger to Thief River Falls Tuesday, where he attended to business matters.

The recent thaws have already commenced to break up the roads, according to farmers who have hauled heavy loads.

Rev. V. O. Aaker left Friday afternoon for Crookston, where he will attend the Lutheran Ministers' conference.

Kern Olson, salesman for Gamble-Robinson Co., attended to business matters in the village Tuesday morning.

I. D. Converse of Red Lake Falls spent a few days last week in the village visiting with friends and attending to business matters.

Gilbert Gunderson on Saturday visited his son, Harold, who is a patient at the Oakland Park Sanatorium in Thief River Falls.

Goodridge was the recipient of a real April thaw Sunday. Snowballing and hiking formed the day's diversions.

Why not at least give The Banner one news item a week from each reader? Call 55 or send them in. With the kind assistance of our readers we can make this a real newsy sheet. Let us pull together.

SCHOOL NOTES

The Seniors gave a party for the Freshmen Saturday evening. All the Freshmen were present but three. A number of jokes were played and later a booby lunch was served, which consisted of a pickle and a piece of cheese. After that ice cream, cake and wafers were served. The Freshmen all reported a good time.

Ray Jensen was absent from school Monday.

The Juniors and Seniors began to practice for their play, called "Forest Acres," Tuesday. It will be given the latter part of March.

The six weeks' examinations are being held this week.

Jerdis Thoreson was absent from school Monday.

A basket social will be held Friday, the proceeds of which will be used to buy song books for the Glee Club and school.

Thursday, Miss Lindbloom, Miss Davids and Miss Burgheson's rooms went together and had a progarm in honor of Washington's birthday.

Railway Reduces Fares to Homeseekers in Minnesota

Offers Cheaper Transportation to Prospective Settlers From the Central States.

The re-establishment of the round-trip homeseeker tickets by the Great Northern Railway to points in Minnesota, North Dakota, Montana, Washington, Idaho and Oregon marks a revival of the old established conolization methods which have been employed by this company for so many years. The homeseeker tickets provide cheap transportation for prospective settlers from the Central states. This rate will be in effect the first and third Tuesdays of each month, March to November inclusive, from all points in the Middle Western states as far east as Chicago.

The owners and renters of high priced agricultural land in the Central states and young men looking for locations are thereby given an opportunity to investigate the advantages offered homeseekers along the Great Northern Railway at a very trifling expense. The tickets permit stopovers in both directions, which gives the settlers the opportunity of deciding for themselves as to which section best suits their needs.

The general reduction in the value of farm products and consequent losses suffered by farmers everywhere during the past two years is forcing upon the owners and renters of high priced land the importance of securing cheaper lands of equal productivity.

The re-instatement of low round-trip homeseeker tickets and the reduction in charges for carload movement of settlers' effects to pre-war levels are certain to bring about a revival in the movement of settlers to the Northwest. In the broad expanses of fertile land, natural forests, magnificent natural scenery and healthful climate, the Northwest offers to the most robust and energetic manhood of the United States a real opportunity.

Entertain.

Mr. and Mrs. Nick Bundhund entertained at their home the following guests at supper Sunday evening: Mr. and Mrs. Jay Payne, and Mr. and Mrs. H. B. Rockne and family.

FOR SALE.

Twenty-four cows to chose from, one fanning mill, scales and other farm machinery. Two and one-half miles south of Erie.

GEO. D. NERESON.

Daniel Payne viisted at the Wil' Wayne home near Germontown Saturday. He returned Saturday evening.

I. D. CONVERSE PURCHASES ELMER KATELY PROPERTY

I. D. Converse of Red Lake Falls closed a deal this week with Emery Kately whereby he becomes the owner of Mr. Kately's lot and buildings in the eastern addition of the village. Mr. Converse will go into the raising of poultry, having chosen the Barred Plymouth Rocks as the breed he will start with.

Mr. Converse is well known here and just recently removed to Red Lake Falls after having been a resident here for many years. The Banner wishes Mr. Converse the best of luck in his new venture.

Lutheran Church, Missouri Synod.

H. Lutz, Pastor. Sunday, March 11: English services at Big Grove at 10:30 a. m., and in the parsonage in Goodridge at 8 p. m. "Incline your ear and come unto Me; hear, and your soul shall live; I will make an everlasting covenant with you!"—Isaiah 55,3.

Norwegian Lutheran Church.

V. O. Aaker, Pastor. Sunday, Mar. 4: Services with communion at Erie at 11 a. m. English services at Goodridge at 8 p. m. The confirmants will meet as usual. Sunday, Mar. 11: Norwegian services at Torgerson at 2 p. m. Confirmants immediately after the services. Norwegian services in the evening at Goodridge.

Price of Auto Tags to Go Up 25c Per Day March 1

Intended to and generally credited with smoothing Minnesota's main highways, new 1923 motor vehicle tax plate have begun at the usual places throughout the state.

Lucky numbers are going out first, registration officials said, and some fifty thousand sets were issued last month. More than 300,000 will be issued this month if conditions are favorable. The price will go up at the rate of 25 cents per day after March 1, for all who use their cars during the windy month or before. Recent action by the legislature so fixed 1923 regulations of motor vehicle taxes.

Auto tax rates generally for 1923 will be the same as last year, except on machines going into the 3-year-old class getting 25 per cent cut and the 5-year-old list, which carries half the regular tax.

Mrs. Elev Aakre of Reiner township returned from Thief River Falls Wednesday morning after spending a few days with her brother, who is a patient at the hospital.

G. C. Gulrud left Friday for Decorah, Iowa, to attend the funeral of Olaf Fjose, who recently froze to death, and also to visit among friends and relatives.

Much grain is being hauled in to the local elevators these days. The farmers are evidently making an attempt to get their grain hauled before the roads break up.

GREATEST MEETING OF COMMUNITY CLUB RADIATES MUCH PEP

Friday Evening Session Attended by Large Crowd. Excellent Program.

The Community Club meeting held Friday night was a rouser in every sense of the word. A crowd that filled the large school auditorium to capacity was present. The electric car from Thief River Falls brought several enhtusiastic vistors, which also added to the success of the meeting. An exceptional program had been arranged and this, combined with the speeches of the visitors, made it an altogether entertaining and beneficial evening. The local band, which has recently been reorganized, rendered several snappy selections, which helped to key the crowd to the proper pitch of enthusiasm. The many other numbers on the program were worthy of much praise and the perofrmers deserve much credit for their willingness to take a part to make it a success. The hit of the evening was no doubt the shadow picture pantomime entitled "Hash," which clearly illustrated the dire results of over-indulgence in the above named delicatessen when the indulgent suffered attacks of acute indigestion which resulted in a most amazing metamorphosis of the hash into a member of the feline family, which the practical physician who was hurriedly summoned extracted from the "innards" of the sufferer.

Speeches were deilvered at intervals throughout the program. Among the speakers were Dr. Froehlich, president of the Thief River Falls Commercial Club, and Math Barzen, also of Thief River Falls, who delivered a few powerful words in behalf of Pennington county's new industry, the raising of sugar beets. Mr. Barzen no doubt convinced many of the profitable benefits to be derived from the growing of sugar beets. H. W. Protzeller, manager of the Northwestern Electric Railway, also delivered a few chosen words. Thos. H. Smith, banker at Mavie, was also called upon for a speech, and gave the audience a real lesson in loyalty to their country.

After the program a delicious lunch was served in the school basement at a charge of ten cents per plate, which netted the Community Club a neat little sum.

Another meeting will be held in the near future, which The Banner wil lbe "Johnny on the spot" to put you wise to. Attend these club meetings and show that you are interested in the welfare of your own country.

H. B. Rockne was a business visitor at Grygla Wednesday.

A Few Reasons Why We Are Proud of Our Bank

This bank is proud of the fact that 80 per cent of the business and professional men of our village do their business with our bank.

We act in a small way as a Clearing House for over 75 per cent of checks issued in this vicinity which are drawn on banks in our village and are presented here for payment.

Our Checking Accounts have increased one-third since a year ago. The credit for this growth is due the patrons of our bank.

Just 10 New Accounts have been opened with our bank in the past two weeks. This means One New Depositor for every day of business uring that time.

MOLLY'S LUCK-PIECE

SYNOPSIS—To the Three-Bar ranch, Arizona, owned jointly by Sandy Bourke, "Mormon" Peters and "Soda-Water Sam" Manning, a fine collie makes its way, in the last stages of exhaustion. Inscription on its collar says its name is Grit, "property of P. Casey." Scenting a desert tragedy, Bourke and Sam mount and let the dog lead them. The two find a dying man, Patrick Casey, pinned under an overturned wagon. Kneeling beside the wagon is his young daughter Molly, fifteen. They extricate the old prospector, who dies repeating, "Molly—mines!" "I'll look out for that, pardner," says Sandy. It is agreed that Molly stays as mascot of the ranch, she and the "Three Musketeers" becoming partners in the mines. Sandy insists upon an education for Molly. Jim Plimsoll, gambler, visiting the ranch, insults Molly. He claims he grubstaked Casey, which made him the old man's partner. Mormon drives him off. Miranda Bailey, spinster, tells the partners of malicious gossip.

CHAPTER IV—Continued.

—4—

"Mebbe, but you can't stop what's started any more'n a horn-toad can stop a landslide, Sandy Bourke. You can't kill scandal with gunplay. The girl's too young, in one way, an' not young enough in another, to be stayin' on at the Three Star. You oughter have sense enough to know that. Ef one of you was married, or had a wife that 'ud stay with you, it 'ud be different. Or if there was a woman housekeeper to the outfit."

The flivver horn squawked outside. Miranda pointed her finger at Sandy.

"There's chores waitin' fo' me. I didn't come off at daylight jest to be spyin', whatever you men may think. You either got to get a grown woman here or send the gel away, fo' her own good, 'fore the talk gits so it'll shadder her life. Now, I've said my say, you-all talk it over."

Sandy went to the door with her, helped her into the machine. He came back with his face serious.

"She's right," he said. "We got to send her away. Me, I'm goin' into Hereford tonight. I aim to interview Jim Plimsoll an' then bu'st his bank. One of you come erlong. Match fo' it."

"Bu'st the bank with what?" asked Sam.

Sandy produced the ten-dollar luck-piece and held it up.

"This. Mormon, choose yore side."

"Heads."

Sandy flipped the coin. It fell with a golden ring on the floor. "Tails," said Sandy, inspecting it. "You come, Sam. Staht afteh noon. Oil up yore gun."

"I knowed I'd lose," said Mormon dolefully. "Dang my luck, anyway."

It was a little after seven o'clock when Sandy and Sam walked out of the Cactus restaurant, leaving their ponies hitched to the rail in front. They strolled down the main street of Hereford and stopped outside the place labeled "Good Luck Pool Parlors. J. Plimsoll, Prop." The line "Best Liquor and Cigars" was half smeared out. Sandy patted gently the butts of the two Colts in the holsters, whose ends were tied down to the fringe ornaments of his chaps. Sam stroked his ropey mustache and eased the gun at his hip. Sandy pushed open the door and went in. A man was playing Canfield at a table in the deserted bar. As the pair entered he looked up with a "Howdy, gents?" shoving back a rickety table and chair noisily on the uneven floor. The inner door swung silently as at a signal, and Jim Plimsoll came out.

"Dropped in to hev a li'l talk with you an' then take a buck at the tiger, said talk bein' private," Sandy announced.

Plimsoll threw a glance at the man who had been posted for lookout and he left with a curious gaze that took in Sandy's guns.

"Sorry I was away from the ranch, time you called," said Sandy, sitting with one leg thrown over the corner of the table. "Hope to be there nex' time. I hear you-all claim to have an interest in Pat Casey's minin' locations, his interest now bein' his daughter's?"

"That any of your business?"

"I aim to make it my business," replied Sandy.

For a moment the two men fought a pitched battle with their eyes. It was a warfare that Sandy Bourke was an expert in. The steel of his glance often saved him the lead in his cartridges. Jim Plimsoll was no fool to wage uneven contest. He fancied he would have the advantage over Sandy later, if the pair really meant to play faro—in his place.

"I grubstaked him for the Hopeful-Dynamite discovery," he said. "I've got witnesses."

"Well, we'll let that matteh slide till the mines make a showin'. Meantime, there's talk goin' on in this town concernin' the gel an' her livin' at Three Star. I look to you to contradict that so't of gossip, Plimsoll, from now on."

Plimsoll flushed angrily.

"Who in h—l do you think you are?" he demanded. "Who appointed you censor to any man's speech?"

"A 'man's' speech don't have to be censored, Plimsoll. An' I reckon you know who I am."

"You come here looking for trouble with me?"

"I never hunt trouble, Jim. If I can't help buttin' into it, like a man might ride into a rattlesnake in the mesquite, I aim to handle it. Ef I ever got into real trouble an' it resembled you, I'd make you climb so fast, Plimsoll, you'd wish you had horns on your knees an' eyebrows."

Plimsoll forced a laugh. "Fair warning, Sandy. I never raise a fuss with a two-gun man. It ain't healthy. You've got me wrong in this matter."

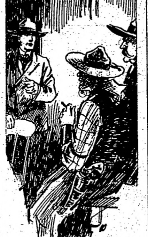
"Glad to hear it. Then there won't be no argyment. Game open?"

"Wide. An' a little hundred-proof stuff to take the alkali out of your throats. How about it?"

"I don't drink when I'm playin'. I aim to break the bank ternight. I'm feelin' lucky. Brought my mascot erlong."

"Meaning Sam here?"

All three laughed for a mutual clearance of the situation. Sandy had said what he wanted and knew that Plimsoll interpreted it correctly.



"You Come Here Looking for Trouble With Me?"

They went into the back room amicably. Plimsoll left them and went back to a table near the door, where his chair was turned down at a game of draw. He started talking in a low tone to a man seated next to him. The first interest of their entrance soon died out. Sim Hahn, the dealer at faro, went on imperturbably sliding card after card out of the case, and the players shifted their chips about the layout or nervously shuffled them between the fingers of one hand.

Sam nudged Sandy, speaking out of the corner of his mouth words that no one else could catch. "The hombre Plimsoll's talkin' to is 'Butch' Parsons. He's the killer Brady hired over to the M-Bar-M to chase off the nesters."

Sandy said nothing, did not move. As the play began he turned and looked at the "killer" who had been named "Butch," after he had shot two heads of families that had preempted land on the range that Brady claimed as part of his holding. Whatever the justice of that claim, it was generally understood that Butch had killed in cold blood, Brady's political pull smothering prosecution and inquiry. Butch had a hawkish nose and outcurving chin. He was practically bald. Reddish eyebrows straggled sparsely above pale blue eyes, the color of cheap graniteware. He packed a gun, well back of him, as he sat at the game. Meeting Sandy's lightly passing gaze, Butch sent out a puff of smoke from his half-finished cigar. The pale eyes pointed the action. It might have been a challenge, even a covert insult. Sandy ignored it, devoting his attention to the case-keeper.

In twenty minutes Sam borrowed a stack from Sandy's steadily accumulating winnings and departed for the craps table. He wanted quicker action than faro gave him. Luck flirted with him, never entirely deserting him. And Sandy won until the news of his luck spread through the room. The gamblers began to get the hunch that the Three Star man was going to break the bank.

Sandy did not have many chips in front of him, but there were five small oblongs of blue, markers representing five hundred dollars apiece. It had come down to the last turn of the deal again. Every player and onlooker knew what the three cards were—a queen, a five and a deuce. If the order of the three cards were named correctly the bank would pay four to one. If Sandy staked all on his call he would win over ten thousand dollars. Plimsoll would have to open his safe. Hahn did not have that amount in his cash drawer.

Plimsoll himself was looking on. Butch Parsons stood beside him for a second and then strolled into the front room. Another man followed him.

Sandy shoved the markers across the board, followed by his chips. Apparently aimlessly, he hitched at his belt and the two Colts with their tied-down holsters swung a little to the front, their handles just touching his hips.

"Deuce—queen—five, I'm bettin'," he said. "An' deal 'em slow." His voice drawled and his eyes lifted to Hahn's and rested there.

Hahn had been mechanically chewing gum most of the evening. Now his cheek muscles bulged more plainly and the end of his tongue showed for a second between his lips. His right hand dropped and he drew out a deuce. Eyes shifted from Sandy to Plimsoll, to Hahn. Little beads of moisture oozed out on the dealer's forehead. The atmosphere was charged with intensity. Plimsoll's dark eyes were boring through the dealer's lowered lids.

"Move yo' fingehs, dealer, an' reveal royalty," drawled Sandy. "The queen wins!" His hands were on his hips, fingers touching the butts of his guns, his eyes burned. For all its drag there was a ring to his voice.

Hahn shot one swift look at him and removed his hand. The queen showed. The room gasped. Plimsoll clapped Sandy on the shoulder.

"You did it," he said. "Broke the bank when you called that turn. Game's closed and the drinks on the house. How'll you have it?"

The crowd made way as Plimsoll walked across to his safe, twirled the combination, opened the doors and took out a stack of bills.

"Bills from a century up," said Sandy. "The odds and ends in gold—for the drinks."

The excitement was dying down. The man from the Three Star had won and had been paid. Plimsoll's game was square. The drinks were brought. Two men lounged out into the front room after they had tossed theirs down. Sandy slipped the folded bills into the breast pocket of his shirt in a compact package.

"See who went out?" asked Sam in his side whisper.

"Yep. Saw it in the glass of that picture. We'll go out the back way. Not yet." He shouldered his way through the congratulating crowd, Sam close behind him, into the front room. It was empty. The short end of Sandy's winnings still provided liquor. For a moment they were alone. Plimsoll had not followed them. Sandy swiftly socketed the bolt on the inside of the front door, turned the key and slid that into his pocket.

"Now we'll go out the back way," he said. "I ain't strong fo' playin' crawfish, Sam, but I ain't keen on bein' potted in the dark. I'll bet what I got in my pocket Butch is huggin' the boards to one side of this shack. I got too much money on me to be a good insurance risk."

Sam chuckled. Plimsoll met them just inside the door.

"Makin' a short cut," said Sandy. "Good night."

As the pair went out at the rear, Plimsoll jumped into the front room. Sam, closing the back door behind them noiselessly, heard the gambler cursing at the bolted door. Silently as a cat, he covered the short distance between the house and the arroyo of the creek and disappeared, merged in its shadow. Sandy joined him and they made their way swiftly along the bottom, climbing the bank where the railroad bridge crossed it, striking off for the main street, lit by sputtery arc-lamps, making for their ponies, still standing patiently outside the all-night restaurant.

"No sense in runnin' our heads into a flyin' noose," said Sandy. "Plimsoll owns the sheriff. Married his sister. We'd be wrong whatever stahted. They'd frisk me of my roll an' we'd never see it ag'in, less we made a runnin' fight of it."

They mounted, swung their horses and loped off toward the bridge across the creek. There were two spans, one built since the advent of automobiles, the other ancient, little used. They headed for the latter.

CHAPTER V

In the Bed of the Creek.

Sandy was minded to get back to the ranch as soon as possible with his winnings. Five thousand for Molly, five thousand for the Three Star, that was the agreement, the custom, and he knew the girl's breed well enough to have no hesitation in making the split as he would with a man. The next thing to do was to pick out a school for her. There Sandy was at a loss. He mulled it over as he rode, his outer senses playing sentinels to his consciousness.

Sandy could not quite gauge Plimsoll's actions in tamely paying over the winnings and he looked and listened, noting every movement of Pronto moving free-muscled beneath him, for some sign of alarm—perhaps a rifle-shot out of the mesquite.

The ponies struck the loosened planks of the bridge clop-clop, springing forward into a gallop as their riders touched heels to flanks. The pinto was the quicker to get into his stride. Just past the center of the bridge Sam saw Sandy's mount jump like a startled cat into the air. He saw Sandy pliant in his seat, marked against the starry sky. Then came a spurt of red flame from the far bank—to the right—another—and another—from the left. A bullet hummed by him and his own horse slid stiff-legged, plowing the planks, hind feet flat from hoof-points to fetlocks as the pony whirled away from the yawning gap in the bridge, where boards had been pried away in the preparation of the ambush.

Helpless for the moment until he got his bearings and his pony gained solid footing, Sam automatically whipped out his gun, cursing as he saw Sandy slide from the saddle, clutch at the rim of the gap, drop down to the bed of the creek, while Pronto, frantic at the loss of his master, leaped the opening and fled with clatter of hoof and swinging stirrup into the desert.

Sam, wild with rage at the thought of Sandy shot, scrambling in bloody sand below him, flung himself from the roan as more bullets whined, whupping into the planks. One seared his upper arm, another struck the saddle tree as he vaulted off, slapping the roan on the flanks, yelling at it as it gathered, leaped the gap and followed Pronto.

"You d—d, cowardly, murderin' pack of lousy coyotes!" swore Sam mechanically, as he knelt on the edge of the gap and tried to pierce the blackness, listening fearfully for a groan. He had not fired back. There was nothing to fire at but clumps of blurred growth.

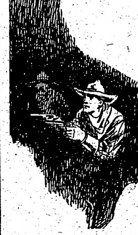
He kneeled over the rim of the last plank, turned, caught with his hands, revolver thrust back into its holster, swung, dropped. A hand closed about his ankle pulled him down sprawling on the soft sand.

"I'm O. K.," whispered Sandy, and Sam's heart leaped. "Only plugged the rim of my hat. I faked a fall to fool 'em. Snake erlong down the crick bed. Here's where we git even." Sam knew that ring in his partner's voice, low though it was, and his blood tingled. Immediately above the bridge were the stripped trunks of cottonwoods, stranded in a flood. Peering through the boughs, they saw stooping figures running along the bank. A man called from the lower side of the bridge, a shot was fired harmlessly. The hunters in view raced back.

"Think they saw us," whispered Sandy. "They'll hear from us, right soon." He led the way back, crossing to the town side beneath the bridge, keeping half-way up the bank, close under the stringers of the bridge, crawling between bushes on his belly, Sam with him. Now they could see no gunmen but occasionally they caught a whisper, the slight sound of moving brush.

Sandy found a stone imbedded in the bank, loosened it, squatted on his haunches and passed it to Sam, taking a gun in each hand.

"Chuck it into that sunflower patch," he said with his mouth close to Sam's ear. "Then fire at the flashes." Sam pitched the stone through the darkness. It fell with a rustle, chinked against a rock. Instantly there came a fusillade from the opposite bank, four streaks of fire, the bullets cutting through the dried stalks, the marksmen evidently hunting in couples.



Instantly There Came a Fusillade From the Opposite Bank.

Sandy, crouching, pulled triggers and the shots rattled out as if fired from an automatic. Beside him, Sam's gun barked. Each fired three times, Sandy flinging six bullets with instinctive aim while the bed of the creek echoed to the roar of the guns and the air hung heavy with the reek of exploded gases. Then they rushed for the top of the bank, wriggling behind the cover of bushes, lying prone for the next chance.

One yell and a stream of curses came from across the arroyo. Two indistinct figures bent above a third lifted it, hurrying back toward a clump of willows. The fourth man trailed the others, his oaths smothered, running beside the two bearers, his hand held curiously in front of him, dimly seen.

> "Your half, Molly," he said. "Five thousand bucks. Busted the bank!"

(TO BE CONTINUED.)

It is small tax on strength to hand out advice.

WOULD BLOCK PACKER MERGER

Sec. Wallace Changes Mind and Now Seeks to Stop Big Consolidation.

MERGER IS DELAYED

Declares Acquisition Would Effect a Restraint of Interstate Commerce and Would Be Creating a Monopoly.

Washington—Another battle was begun by the government against what it claims would be a monopoly in industry when Secretary Wallace of the agricultural department took steps to prevent Armour & Co. of Chicago from acquiring the plants and business of Morris & Co., another of the "big five" packers. Consummation of the consolidation would result in the largest meat packing enterprise in the history of the country with annual sales of more than $1,000,000,000.

P. Edson White, president of the Armour & Co., declaring the present administration had proclaimed its belief in "less government in business and more business in government" said in a statement made public here and in Chicago that his company heartily subscribed to that slogan, and was willing to meet the issue involved speedily and without fear of the result. Before legality of the merger is finally decided, several months is expected to lapse, and in all probability the case will reach the supreme court for determination.

Secretary Wallace, proceeding under authority given him in the packers and stockyards act, served complaints on Armour & Co., J. Ogden Armour, and Morris & Co., charging them with violation of the act by entering into a written agreement for the sale of Morris & Co. The complaints said transfer was to be made on or before February 28 and that Morris & Co. would be eliminated entirely as a competitor in the packing business. The acquisition, the complaints set forth, would effect a restraint of interstate commerce and would have the effect of creating a monopoly in many sections of the United States in the purchase of livestock and in the shipment and sale of meat and other livestock products in this country and abroad. The merger would materially increase the power of Armour & Co., it was stated, to control and dominate the livestock and meat packing industry.

FARM MANAGEMENT WEEK

A. C. Short Course Will Take Up Farm Manageemnt March 5-10.

Fargo, N. D.—New data pointing the way to more profitable methods in farm management and more effective systems of farm finance and marketing will be presented to farmers and others who attend the sessions of "Farm Management Week" at the North Dakota Agricultural college, March 5 to 10, inclusive, according to C. B. Waldron, dean of agriculture. Farm management week is one of the uint weeks of the eight week winter short course in progress at the college now.

Organization and the systematizing of the farmer's own business, and the development of organizations by farmers as a whole for the purpose of financing and marketing their products, are subjects which will be stressed during the week. Potato and horticulture week precedes farm management week, and farm machinery week follows. While most of the persons attending the short course are enrolled for the entire eight weeks, the course has been so arranged that farmers who are particularly interested in a single week's subject matter may attend only one week.

The program for farm management week is as follows:

8 a. m. to 10 a. m., Monday, Tuesday, and Wednesday — Farm accounting; importance and extent of work, how to keep farm records, farm inventory, possibilities and limitations of cost of production work, results obtained in North Dakota in cost of production and plans for future work. Rex E. Willard.

8 a. m. to 10 a. m., Thursday, Friday, and Saturday—Farm manageemnt; importance of planning, size of farm, farm organization, land, labor, capital, farm reorganization, and farm layout. Professor Miller.

Future Trading Act Before Court.

Washington—The supreme court for the second time has been asked to determine whether congress, in its efforts to regulate future trading in grain and to provide governmental supervision under which farmers' co-operative associations would be admitted to membership on grain exchanges, had exceeded its constitutional authority. In the former case when congress attempted control through its taxing power, the court held that act invalid. Congress holds that it was acting within its power.

HAIR STAYS COMBED, GLOSSY

"Hair Groom" Keeps Hair Combed—Well-Groomed.

HAIR GROOM
Keeps Hair Combed

Millions Use It—Fine for Hair!—Not Sticky, Greasy or Smelly.

A few cents buys a jar of "Hair-Groom" at any drug store. Even stubborn, unruly or shampooed hair stays combed all day in any style you like. "Hair-Groom" is a dignified combing cream which gives that natural gloss and well-groomed effect to your hair—that final touch to good dress both in business and on social occasions.

Greaseless, stainless "Hair-Groom" does not show on the hair because it is absorbed by the scalp, therefore your hair remains so soft and pliable and so natural that no one can possibly tell you used it.

His "Surgical Operations."

Will Campbell of Cotter performed two quick surgical operations on himself recently when in stepping from his house he slipped and fell. As he was falling he twisted his body, throwing one shoulder out of joint. When he hit the ground the dislocated shoulder flopped back into place. He did not know what had happened until he consulted a physician.—Arkansas Gazette.

John W. McLain

How to Gain Strength and Endurance

Milwaukee, Wis.—"For the last twenty years I have used Dr. Pierce's Golden Medical Discovery at times, as a general tonic with excellent results. One bottle in the spring, and one in the fall, is usually sufficient. It gives me added strength and endurance and greatly aids me in following my strenuous occupation. I have also found Dr. Pierce's Pleasant Pellets very beneficial and mild in action.

"I have been thru Dr. Pierce's Invalids' Hotel and Surgical Institute at Buffalo, N. Y., and have found everything just as represented."—John W. McLain, 188 Wisconsin St.

Get the "Discovery" in tablets or liquid and you'll be surprised at the way you'll pick up.

Write Dr. Pierce's Invalids' Hotel in Buffalo, N. Y., for free confidential medical advice. Send 10 cents if you desire a trial pkg of the tablets.

Never let a cold get a hold!

Timely Comments on Agricultural Topics for Our Readers

DAIRY

CLEANLINESS IS IMPORTANT

Reduce Source of Contamination and Insure Cleanest Possible Grade of Milk.

Unclean and improperly cared for milk causes more disease and death among infants during the summer than any other one factor. But why wait until summer before taking action?

"Use the cooler days of spring," say dairy specialists of the agricultural colleges, "to reduce the sources of milk contamination to a minimum and thus insure the cleanest possible grade of milk during the critical summer season."

Cleanliness is the first of the two "C's" of the well-kept dairy. Milk from the time it leaves the cow until it is consumed is always in danger of infection from some kind of bacteria. These bacteria are constantly present on the body of the cow, in dusty, impure air, in bad water, in unclean utensils and on the hands and clothing of the helpers.

Good milk can be produced under ordinary farm conditions by observing the following points:

1. Have the barn well ventilated at milking time and see to it that no operations are going on that will stir up dust. Feed hay and sweep after milking.

2. Be sure that at least the teats and udder of the cow are clean.

3. Use a small-top, sterile milk pail and have all other utensils clean and sterile. If possible use steam; if not, boiling water.

As the bacteria that get into milk are dormant and increase slowly at lower temperatures, but will increase rapidly as long as the milk remains warm—above 50 degrees F., the second "C" in producing and handling wholesome milk under average conditions is cold. The fourth point then to be considered is that of cooling the milk as soon as produced to a temperature below 50 degrees F. and maintaining that cold temperature until the milk is delivered.

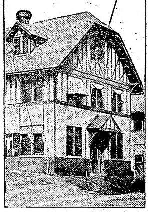
Get into the habit now of following these simple practices. It will insure the public against sour milk and unwholesome infant food in the hot days to come.

ICE CREAM MAKING IS EASY

Small Manufacturer Relieved of Work of Putting Milk and Other Ingredients Together.

(Prepared by the United States Department of Agriculture.)

The creamery at Grove City, Pa., which is operated under the supervision of the United States Department of Agriculture, during the past year adopted the practice of supplying ice cream manufacturers with ready-made mixtures for making ice cream. This method relieves the small manufacturer of the work and trouble of putting the milk, cream and other ingredients together in proper proportion, and is proving very popular. The "mix" is ready for freezing when received by the buyer.



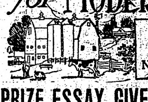
Creamery at Grove City, Pa., Operated Under Supervision of the Dairy Division of the United States Department of Agriculture—Here Are Tested Under Commercial Conditions Findings of Investigators.

HIGH PRODUCING DAIRY COW

Animal Yielding 8,250 Pounds of Milk Yearly Uses Half of Ration for Maintenance.

A dairy cow producing 8,250 pounds of milk a year—a common production—must use one-half of her ration for the maintenance of her weight and to keep her in good condition, and has, therefore, only one-half of the ration left for making milk.

PERTINENT POINTERS for MODERN FARMERS



Prepared Under Direction of North Dakota Agricultural College

PRIZE ESSAY GIVES POINTERS ON PORPER FEEDING OF DAIRY CALF

Charles Abercrombie, a 16-year-old farm resident near Ardoch, Walsh county, won first place in the state-wide boys' and girls' dairy essay contest conducted under the auspices of the North Dakota Dairymen's association according to an announcement made by the committee of judges consisting of H. E. Rilling and J. R. Dice of the North Dakota Agricultural college, and Wm. Page, assistant state dairy commissioner.

Others who placed for premium money are Margaret Schieb, Bordulac, second; Willie Punton, Ayr, third; Norman Ellingson, Valley City, fourth; Sidney Punton, Ayr, fifth; Della Gransberg, Kempton, sixth; Charles Boise, LaMoure, seventh, and Dennis Schulze, Casselton, eighth. More than 50 essays were entered in the contest and cash premiums ranging from $15 for first to $1 for eighth place were awarded. In addition, Abercrombie was awarded a special prize of a purebred Jersey bull calf offered by Sam Crabbe of Fargo.

Of the eight winners in the contest, at least four are boys' and girls' club members, according to Mr. Rilling, and have already engaged in raising stock and garden and field crops. They are Charles Abercrombie, Willie Punton, Sidney Punton, and Della Gransberg. Miss Gransberg is president of the state boys' and girls' club institute and has been in club work for four years.

The prize-winning essay by Charles Abercrombie, entitled "Care and Management of Dairy Calves," follows:

"Nearly everyone has heard the old saying, 'The boy is the father of the man.' Is it not just to say, 'the calf is the mother of the cow?' Both the boy and the calf must be properly cared for and raised if they are to become a strong and healthy man and cow.

"The feeding of the calf begins before it is born. Poorly nourished cows give birth to weak, puny calves which are hard to raise. It is, therefore, necessary that the cow should be well fed previous to calving time. The food elements necessary for the calf are taken into the stomach of the cow, digested and transmitted to the calf.

"Early weaning makes it easier to teach the calf to drink. The young calf should always receive its mother's milk at first as this milk possesses properties which stimulate the calf's stomach and other digestive organs to action. The calf is sometimes weak at birth, and for this reason, should have nourishment as soon as possible. The calf is now usually more easily induced to suck the cow than to drink from the pail. Because of this, it is best to let the calf remain with the cow for about forty-eight hours immediately after birth. This also allows the mother to carefully dry the calf by licking within the first few hours of it's life.

"The calf should be kept without food for at least twelve hours before attempting to teach it to drink. At the end of that time it will be hungry and will drink milk from the pail much more readily than when not hungry. Once it gets a taste of milk, it will usually drink without further trouble. I have found that by wetting my finger with the warm, sweet milk of the mother and letting the calf suck it, at the same time drawing my hand down till it is under the milk, will usually induce the calf to drink.

"Cleanliness is the first essential to the successful raising of the dairy calves. All milk and feed should be fresh and clean. The milk pails must be carefully washed and scalded with boiling water. Calf pens should always be kept clean and be filled with plenty of dry bedding. Any feed left after the calf has eaten, should be removed from the feed boxes, which should be thoroughly cleaned and brushed each day. Attention to these details is the best prevention of disease, and an ounce of prevention is always worth a pound of cure.

"Milk from cows infected with a disease which can be carried from one to another should be pasturized, which is heating to 145 degrees fahrenheit, holding it at that temperature for 30 minutes, before it is fed to calves. When milk from a creamery is fed, it should always be pasturized.

"Care should be taken to see that any milk fed to young calves is of a temperature of about 90 degrees fahrenheit. Many feeders attempt to overcome poor quality in the feed by increasing the quantity, that is, they feed more skim milk than they do whole milk. The idea of this is that the added amount will make up for the butterfat which has been removed from the whole milk, but this is a great mistake. It is always better to slightly underfeed than to overfeed.

"Many dairymen make the mistake of letting the calf have all the milk it wants. To do this would probably be all right if the calf was fed every two or three hours, but this causes so much trouble and expense that most dairymen find it best to feed only two or three times a day, and when the calf has been without feed for twelve hours or more and is given all the milk it will take, there is danger that it will gorge itself, thus causing digestive troubles.

"Most dairymen have found that it pays to feed the calves three times a day rather than two. When this is done, the periods between feeding should be as nearly equal as possible. The advantages of feeding in this manner are that the calf cannot overload its stomach and that the digestion of the food is more evenly distributed throughout the 24 hours. When the calves are fed only twice a day, great care must be observed so as the feedings are as nearly 12 hours apart as possible.

"The most delicate age of the calf is the first four weeks. For the first four days, from eight to 12 pounds of milk from the dam should be fed the calf. After that time, whole milk from any cow in the herd may be used until the calf is about three weeks old. At the beginning of the third week, a substitution of about one pound a day may be commenced. This may be increased slightly each day until at the end of the third week the calf should be getting about one-half whole milk and one-half separated milk. This change may be continued until by the end of the fourth week the calf will be getting all separated milk. Any increase should be made slowly to accustom the calf to it.

"After the second week, the calf may get roughage and grain of the best quality. Clover and alfalfa hay are very good for young calves. It is very essential that the roughage be of good quality and be kept clean. Cracked corn and wheat bran have been found to be a very good grain for calves when fed about three parts of cracked corn to one part of wheat bran. After the calf is two weeks old, it should have access to salt.

"I am feeding and taking care of a dairy calf which is now four weeks old. Calves should be kept in separate pens or stanchions to keep from being jostled about and from sucking each other. They should be allowed to exercise each day. Their pens or stalls must be well lighted, bedded and dry. A calf can stand more cold if it is kept dry than it can if it were allowed to lay in wet, dirty bedding.

"Calves are easily dehorned by use of caustic potash. Use potash as soon as the horns can be felt when the calf is three to ten days old. Moisten the potash slightly and rub the skin around horns till white. Do not rub until blood comes. I have seen several calves going around with their heads festering and covered with flies causing one of them to die and the others were stunted until they were two or three years old.

Says Sam: Stick a "p" in front of the word "luck" and say it in American.

That lucky fellow who wins first prize at the corn show isn't the one who went down to the crib to select his entry on the day before the show.

PROBABLE INCREASE IN SPRING PIGS IS INDICATED BY SURVEY

(Prepared by the United States Department of Agriculture.)

The number of sows bred to farrow during the first six months of 1923 will be 13 per cent more than the number of sows which actually farrowed in the spring of 1922, provided farmers carry out their intentions as indicated in the December 1, 1922, pig survey made by the United States Department of Agriculture. For the 11 corn belt states the survey shows an intention to breed 15.6 per cent more sows than a year ago. Most of the southern states show an actual decrease in prospect for 1923.

Increase in Corn Belt.

The probable increase in farrowings in the spring of 1923 over 1922 compares with an increase of 22.8 per cent in the spring of 1922 over 1921 in the 11 corn belt states. The spring pig crop of 1922 in the southern states was about the same as in 1921. Comparisons for other states are not available.

Whether or not the expressed intentions of farmers with regard to the number of sows to be bred to farrow next spring will be carried out will depend largely on the relative prices of hogs and corn, the department says.

An actual increase of 16 per cent in the number of spring pigs in 1922 over 1921 is shown in the December survey as compared with the estimated increase of 14.5 per cent shown in the May survey. The number of pigs saved per litter up to July 1, 1922, in the corn belt states is placed at 5.8 as compared with 5.7 saved up to May 1. This increase in number of pigs saved accounts for the revised estimate in the number of spring pigs in 1922, the department says.

The number of litters farrowed in the United States in the fall of 1922 shows an increase of 18.6 per cent over the fall of 1921. An increase of 27.8 per cent is shown for the 11 corn belt states as compared with an intended increase in these states of 49 per cent in the number of sows to be bred for fall farrowing, as reported last May. The survey shows that in the corn belt states 6.1 pigs per litter were saved in the fall of 1922 as compared with 5.9 pigs saved from the 1921 fall litters. For the entire United States a saving of 6.1 pigs per litter in the fall of 1922 as compared with 6 pigs per litter in 1921 is shown.

The decrease in actual number of pigs produced last fall as compared with intentions of farmers the preceding May is attributed to the decline in hog prices, increased corn prices, increased losses from hog cholera and other diseases, and to the publicity given the results of the spring pig survey made by the Department of Agriculture. Losses from hog cholera and other diseases in the 11 corn belt states for the year show an increase of 22.6 per cent over losses in 1921.

Replies to Questionnaires.

The department received for this report more than 200,000 replies to questionnaires distributed and gathered by rural mail carriers in all sections of the United States where pigs are produced for market. The survey is but the second of its kind that has been made and there has not yet been opportunity to check any differences that may exist between the figures shown for the farms reporting and those for all farms. It is pointed out, however, that the forecast made last spring of an increase of 14.5 per cent in the number of spring pigs over the preceding year is being borne out by the increased volume of receipts at the principal stockyards during the past three months. The surveys also show that the production of fall pigs in proportion to spring pigs has increased materially during the past two years, thus making for a more stabilized supply of pigs throughout the year.

Hog Yards Must Be Kept as Clean as Possible and Above All Must Be Well Drained.

The department points out that increased production does not necessarily mean an over-supply or decline in prices. Total receipts of hogs at all public stockyards during the first 11 months of 1922 were 5 per cent more than in 1921. During the last four months of 1922 the increase totaled nearly 20 per cent. The number of hogs slaughtered under federal inspection during the same period was 7.7 per cent more than in 1921 and the cold storage holdings of pork and lard resulting from this slaughter shows an increase of 461,246,000 pounds for the 11 months. Despite these increases cold storage holdings of pork and lard averaged considerably less than during 1921, and prices showed a substantial advance over 1921. The department's explanation for this situation is that improved industrial and economic conditions resulted in an increased consumptive demand and a much freer, current movement of pork and lard into trade channels.

Farmer's Best Friends.

The purebred hog is the farmer's best friend, the purebred dairy cow next.

RAT VIRUSES ARE UNRELIABLE

(Prepared by the United States Department of Agriculture.)

Special investigations regarding the effectiveness of the various rat viruses on the market were recently made by the biological survey of the United States Department of Agriculture, in co-operation with the experiment station of the North Dakota Agricultural college and the bureau of animal industry of the department. All the results obtained in connection with these investigations and a large percentage of reports from users of these products throughout the country indicate that such viruses are generally unreliable, and at their best the cost is out of all proportion to the destruction of rats that may be accomplished by their use.

A survey made during the year of conditions of rat infestation in 27 states east of the Mississippi river showed that rats and their depredations were a problem common to all. The problem is equally serious in western states. Many local campaigns have been waged against rats throughout the country, and the bureau has responded to innumerable requests for information, for practical plans of organization and for effective methods of combating these animals in concerted community efforts.

In Utah more than 125,000 people co-operated in a state-wide rat campaign, working largely through the schools. There were distributed 15,000 farmers' bulletins on rats, 25,000 circulars giving directions for trapping, and 20,000 circulars containing specific instructions on methods of control; 6,000 students received special demonstrations, 37,000 posters were made in the schools, 30,000 essays were written on the subject, 29,000 educational questionnaires were circulated, and 1,250 pounds of barium carbonate were used in poisoned baits. Iowa carried on a similar campaign. Great numbers of rats were destroyed and many buildings were rat-proofed as a result.

POULTRY

MAKE MONEY RAISING GEESE

Success Can Be Had With Small Numbers Where There Is Low Pasture and Water.

The Toulouse and Emden are the most popular breeds of geese in this country. The Toulouse is the largest breed, the adult gander and geese weighing 25 and 20 pounds, respectively, while the standard weights of the Emden are 20 and 18 pounds.

Geese can be raised in small numbers successfully and at a profit on many farms where there is low, rough pasture land containing a natural supply of water. The market for geese is not so general as for chickens, but the demand and prices are especially good in sections where goose fattening is conducted.

Geese need only a house during cold or stormy weather, when an open shed should be provided. One gander is mated with from one to three geese, and the matings are not changed from year to year unless they prove unsatisfactory. When mated, they are allowed to run together in flocks. Toulouse and Emden geese will breed when about two years old. The females are usually kept until they are from twelve to fourteen years old, or as long as they lay well. Sex is difficult to distinguish, especially in young geese. The gander is usually somewhat larger and coarser than the goose, and has a leaner, longer neck and a larger head. The sex is sometimes determined by a critical examination or by the action of the geese at mating time.

Large boxes, barrels or shelters are provided as nests for geese, or they are allowed to make nests on the floor of the house. The eggs should be collected daily and kept in a cool place. First eggs are usually set under hens while the last ones which the goose lays may be hatched either under hens or under the goose if she "goes broody." If the eggs are not removed from the nest where the goose is laying, she will usually stop laying sooner than if they are taken away. The period of incubation of goose eggs varies from 28 to 30 days. Moisture may be added after the first week by sprinkling the eggs or the nests with warm water. Goose eggs hatch slowly, especially under hens, and the goslings are usually removed as soon as hatched and kept in a warm place until the hatching is completed.

Toulouse Geese Are Largest Breed.

RATION FOR EGG PRODUCTION

Best Feed Is That Suited to Local Conditions—Prepared Material Is Economical.

In feeding for egg production, the economical feeder wishes to use the grain he has. The best ration is the ration that best suits the local conditions. If one must buy all the feed, then he will probably find the ready prepared scratch feeds and mashes as cheap as buying the varieties of grains and mixing his own. The agricultural colleges have worked out rations which are practical for farm flocks.

OPEN NESTS UNSATISFACTORY

Fowls Roost on Sides and Scratch Out Litter—Broken Eggs Encourage Bad Habit.

Open nests are unsatisfactory, as the birds roost on the sides at least during the day. They scratch in the nest litter and often kick the eggs against the sides of the box. These eggs are often broken and help start the egg-eating habit.

Delinquent Tax List

STATE OF MINNESOTA } ss DISTRICT COURT
COUNTY OF PENNINGTON. } FOURTEENTH JUDICIAL DISTRICT

The State of Minnesota, To all persons, companies, or corporations who have or claim any estate, right title, or interest in, claim to, or lien upon, any of the several parcels of land described in the list hereto attached:

The list of taxes and penalties on real property for the County of Pennington remaining delinquent on the first Monday in January, 1923, has been filed in the office of the Clerk of the District Court of said county, to which that hereto attached is a copy. Therefore you, and each of you, are hereby required to file in the office of said Clerk, on or before the Twentieth day after the publication of this notice and list, your answer in writing, setting forth any objections or defense you may have to the taxes, or any part thereof, upon any parcel of land described in said list, in, to, or on which you have or claim any estate, right, title, interest, claim, or lien, and in default thereof, judgment will be entered against such parcel of land for the taxes on said list, appearing against it, and for all penalties, interest, and costs.

(SEAL)

ADOLF EKLUND,
Clerk of the District Court, Pennington County, Minnesota.

List of Real Property for the County of Pennington, on which taxes remained delinquent on the first Monday in January, 1923.

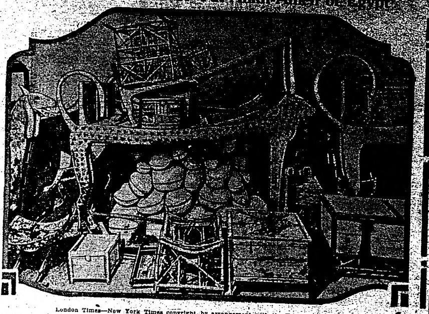
Treasures in Tomb of Tut-Ankh-Amen of Egypt



London Times—New York Times copyright by arrangement with the Earl of Carnarvon.

Opening of the tomb of Tut-Ankh-Amen, the "heretic" king of the Eighteenth Egyptian dynasty, at Luxor, has revealed an unexampled storehouse of treasures. This photograph gives a view of the antechamber looking west. Among the articles shown are a box containing the king's undergarments and other things; a large gilt couch with supports in the form of lions; a couch with supports in the form of "hat-hor" cows; numerous boxes containing mummified meat; a painted red box containing jewelry and ornaments; a papyrus rush-work stool, much decayed; the king's stool; another couch; four alabaster unguent vases of unique type and beauty; a semi-circular veneered box having minute detail of inlaid ivory.

HIS FUNERAL FLOWERS

London Times—New York Times copyright by arrangement with the Earl of Carnarvon.

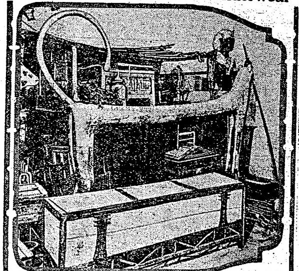
In the tomb of Tut-Ankh-Amen, king of Egypt, who died more than three thousand years ago, were found these funeral flowers, which are wonderfully preserved, still showing a trace of green.

Entrance to the Tomb From Within

London Times—New York Times copyright by arrangement with the Earl of Carnarvon.

View of the antechamber of King Tut-Ankh-Amen's tomb at Luxor from within looking toward the entrance doorway.

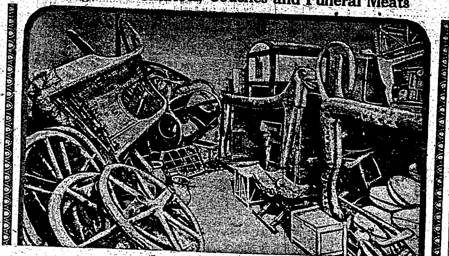
Box of Tut-Ankh-Amen's Underwear



London Times—New York Times copyright by arrangement with the Earl of Carnarvon

Here in the antechamber of his tomb, is the long white wooden box which contained the underwear of King Tut-Ankh-Amen, who reigned in Egypt more than three thousand years ago. It also held many of his weapons.

King Tut's Chariots, Couches and Funeral Meats



London Times—New York Times copyright by arrangement with the Earl of Carnarvon.

In this photograph of the antechamber of the tomb of Tut-Ankh-Amen, king of Egypt more than thirty centuries ago, the principal objects seen are the king's stool, made of solid ebony with ivory and having gold mountings; a large royal ceremonial gilt couch; the king's throne which is covered with gold and silver and inlaid with precious stones; a wood trellis stool, a large wooden casket; a carved wood and ivory chair of exquisite workmanship; wheels, bodies, poles, harness and other parts of four chariots; wood gilt trellis work from an object of unknown use.

KING'S ROBE CHEST

London Times—New York Times copyright by arrangement with the Earl of Carnarvon.

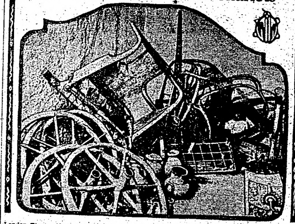
This beautiful painted casket, found in the tomb of King Tut-Ankh-Amen of Egypt, contained the king's robes, decorated with elaborate bead and gold work of lapis-lazuli and turquoise; a gilt headrest like these used in Japan today, several pairs of sandals ornamented with inlaid gold, a black amber necklace, a collarette of faience, and other objects.

GUARDS THE SEPULCHER

London Times—New York Times copyright by arrangement with the Earl of Carnarvon.

One of the two statues of King Tut-Ankh-Amen guarding the sealed entrance to the sepulcher of that ancient Egyptian monarch. They are of wood, covered with a black material and richly decorated with gold.

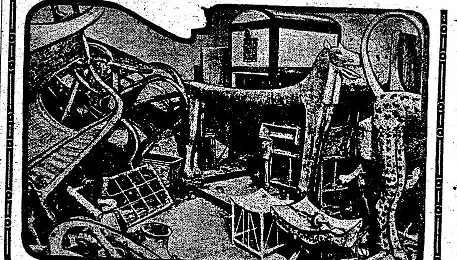
Tut-Ankh-Amen's Four Chariots



London Times—New York Times copyright by arrangement with the Earl of Carnarvon.

Here are the wheels, bodies, poles and other parts of four chariots as they were found in the tomb of King Tut-Ankh-Amen at Luxor, Egypt. They are made of various hard woods, covered with stucco gilt, leather and inlaid ivory. The floors are of hide, in one case of leopard skin.

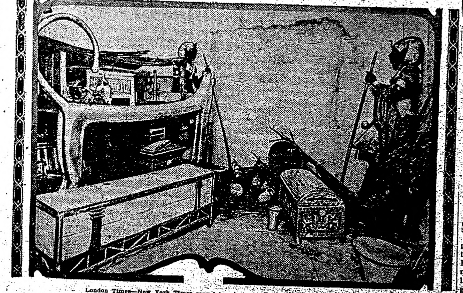
King Tut-Ankh-Amen's Typhon Couch of Solid Gilt



London Times—New York Times copyright by arrangement with the Earl of Carnarvon.

This view of the antechamber of the tomb of King Tut-Ankh-Amen at Luxor, Egypt, shows the royal ceremonial couch of solid gilt supported by animals of the Typhonic type. Upon it is a large white wooden chest, and beneath and in front of it other objects including gold, ivory and wooden chairs.

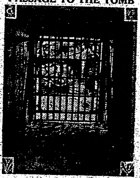
Statues of King Guarding Doorway of Sepulcher



London Times—New York Times copyright by arrangement with the Earl of Carnarvon.

For more than three thousand years the wooden statues of King Tut-Ankh-Amen, seen in this photograph, stood undisturbed at the sealed doorway of his sepulcher in his tomb at Luxor, Egypt. In this antechamber are to be seen also the funeral flowers, a painted chest containing the royal robes and jewels, a long box containing the king's underwear and weapons, a ceremonial couch and many other objects.

PASSAGE TO THE TOMB



London Times—New York Times copyright by arrangement with the Earl of Carnarvon.

View looking down the rock-hewn passage leading to the antechamber of the tomb of Tut-Ankh-Amen at Luxor, Egypt, in which was found such a marvelous collection of objects. The light showing through the modern steel gate emanates from electric lamps installed by the excavators.

Alabaster Vases in King Tut's Tomb

London Times—New York Times copyright by arrangement with the Earl of Carnarvon.

Cluster of alabaster unguent vases of unique type, just as they were discovered in the tomb of Tut-Ankh-Amen, the ancient Egyptian king, when it was opened. The vases still contain unguents which give off a faint odor.

King Tut-Ankh-Amen reigned in Egypt at least 3,250 years ago, and some authorities claim as far back as the days of Moses, and that it was his armies that were engulfed in the Red sea when pursuing the Children of Israel. At least his reign was as far back as that of Saul, first king of Israel.

After Every Meal

WRIGLEY'S

In work or play, it gives the poise and steadiness that mean success.

It helps digestion, allays thirst, keeping the mouth cool and moist, the throat muscles relaxed and pliant and the nerves at ease.

Save the Wrappers

FOR A BETTER SCORE

Grippe

Physicians advise keeping the bowels open as a safeguard against Grippe or Influenza.

When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus secures regular bowel movements by Nature's own method—lubrication.

Nujol is a lubricant—not a medicine or laxative—so cannot gripe. Try it today.

Nujol

This May Happen Some Day.

"I see where a judge had a culprit before him who acknowledged that he assaulted the plaintiff, but he got off with a mild rebuke."

"What won his honor's sympathies?"

"The culprit caught a musical comedy actor outside of a theater and made him admit that there are other streets in the world besides old Broadway."—Birmingham Age-Herald.

SHE DYED A SWEATER, SKIRT AND CHILD'S COAT WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her worn, shabby dresses, skirts, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is sure because Diamond Dyes are guaranteed not to spot, fade, streak, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.—Advertisement.

His Occupation.

"Howdy, Gap!" saluted an acquaintance. "Been to town lately?"

"Well—p'tu—no; not to say right lately," replied Gap Johnson of Rumpus Ridge. "I was there about a week ago, 'sorter stomping holes in the sidewalk."—Kansas City Star.

News of Minnesota
EVENTS of the week throughout the "State of Ten Thousand Lakes" told in brief form

Faribault—The Southern Minnesota Medical society will have a one day convention here June 11.

Willmar—The board of county commissioners have laid out a program for 70 miles of graveling for the summer, costing $70,000.

Two Harbors—M. H. Brickley, Duluth and Iron Range telephone manager, will head the independent voters ticket at the spring election as the candidate at a caucus of citizens.

Thief River Falls—Ralph E. Thompson of St. Paul was appointed as engineer to make a survey of the dam property here. The council holds an option on the purchase of the property for $50,000.

Hibbing—Secretary S. V. Saxby of the Duluth Commercial club extended an invitation to the Lions club of Hibbing to attend the "Over the Top" chamber of commerce banquet at Duluth.

Hibbing—Five persons indicted by the grand jury on charges of violating the prohibition law, were arraigned in district court here and pleaded not guilty. Their bail was fixed at $500 each.

Rochester—According to a ruling made by the city council, farmers along the right of way in Olmsted and Wabasha counties will hereafter be able to get electric light and power from the Rochester plant.

East Grand Forks—Galpsha Purcell was elected city treasurer by the council, to succeed the late James McIlraith, who died last week. Mr. Purcell was born and raised here and has been in the real estate business.

Red Wing—The Busch garage, operated in this city by William F. Busch, has been sold to the McCoy-Curran company of Cloquet, who have filed articles of incorporation with the register of deeds for a $50,000 corporation.

Wadena—Bob Newman brought his team in first in the Class 1 Central Minnesota dog derby under the auspices of the Lion's club. About 3,000 persons watched the derby. In the same event, Paul Koch came in second and Cyril Hensler third.

St. Paul—Minnesota, with 58 per cent of the urban population living in zoned municipalities, ranks third among the states on the basis of percentage of urban population zoned, according to a report made public by the division of building and housing of the department of commerce.

Faribault—August Kolterman, a farmer, 28 years old, died at his home near Fox Lake following the alleged drinking of liquor at a party. It is reported two neighbors of Kolterman also partook of the liquor and were made ill, but recovered. The sheriff and coroner are investigating.

International Falls—Raymond Belton, alias Raymond Arlington, who was taken in custody here by customs officials on the charge that he entered this country without the proper procedure, is being held in the county jail. Belton will be held here pending the disposition of his case by the secretary of labor.

Mankato—John N. Van der Vries of the Chicago office of the Chamber of Commerce of the United States of America, will speak at the March membership meeting of the Mankato Civic and Commerce association, Wednesday, March 7. In the week that he appears in Mankato, Mr. Van der Vries is also to speak before the civic commercial organizations in Albert Lea, Fairbault and Rochester.

Mapleton—The campaign to place a purebred sire on every farm in the state was given hearty support at a massmeeting here attended by 300 farmers, bankers and business men. Representaives of Mapleton banks pledged finanical aid to farmers in building up their livestock herds after details of the drive were outlined to those attending the meeting. Several farmers signed up for sires following the session.

Crookston—With only one defeat on its home floor, the Crookston Company M basketball team, champions of Northwestern Minnesota, has closed its 1923 season with victories over every team played. In the thirty games played, Crookston won twenty-two and lost eight, with a grand total of 829 points against their opponents' 583. Altho the local Gunners lost seven games away from home return games played resulted in victory for the local quint. The only visiting team to win was the Two Harbors All Stars, who won the first game of three played here and two played at Two Harbors.

Luverne — At the annual meeting of the Hills Co-operative Creamery association, the secretary's report showed that more than $81,000 worth of business was transacted last year. More than 224,000 pounds of butter were sold and the butter fat was supplied by 1,226 cows.

Winona—The annual Winona automobile show will be conducted at the armory here four days, beginning Feb. 28, dealers announced. Thirteen dealers will be represented by the latest model cars, while accessories will also be exhibited. Seven thousand persons attended the last year's show.

Fergus Falls—Lewis Nelson, former county treasurer at Glencoe, died at his home of congestion of the lungs. He was 72 years old.

St. James—Mr. and Mrs. Henry Berntsen, residents of Watonwan county for the last 58 years, celebrated their golden wedding anniversary at their home here.

Ortonville—O. J. Kvale of Benson, congressman-elect of the seventh district, has announced the appointment of his son, Paul Kvale as his secretary.

Windom—Bernard and Irvin Meyers, brothers living near Bingham lake, have been bound over to the district court here on a charge of chicken stealing. They are out on $500 bail.

Willmar—A farmer's co-operative elevator will be erected at Lake Lillian, the new station on the Luce Electric line in Kandiyohi county. A co-operative association has been formed and a committee of six men appointed to solicit shares and draw up the articles of incorporation.

Morristown—A special election called by the village council resulted in the voting of a $50,000 bond issue for the financing of a municipal water works system. The election gave the project a majority of 161 with 208 for and 47 against passage.

Hibbing—S. M. Chambers of Duluth, discussed the proposed county welfare consolidation bill here at a meeting of the Crescent Aid society. He also addressed the Civic club on the same topic. No formal action on the bill was taken.

Duluth—Pope Pius XI has appointed Rt. Rev. John T. McNicholas, Catholic bishop of Duluth, bishop assistant to the throne at Rome, according to a cable from Rome received here. The title is purely honorary and will not necessitate Bishop McNicholas' attendance in Rome.

Winona—The Mississippi river at this point is gradually rising after droping to a stage exceeded only once since records have been kept here. The recent fall reached a point nine-tenths of a foot below what has been designated here for many years as low water mark.

Park Rapids—The rear cars in a southbound Great Northern stock train were derailed by a broken rail near Horton, seven miles south of here, and Conductor Blossingham of Melrose received bruises and cuts on the arm and body when the caboose, in which he was riding, overturned.

Worthington—The annual ice harvest on Lake Okabena is being completed. The work has furnished employment for a large crew of men for several weeks. More than 300 cars of ice have been shipped to Omaha for use of the North Western railway, and upwards of 10,000 tons have been sent to the surrounding towns.

Fergus Falls—Lewis Nelson, 72 years old, former county treasurer at Glencoe, Minn., died Saturday in his home here from congestion of the lungs. M. W. Horton, who has been in the painting business here for 39 years, died of pneumonia. He was 69 years old.

Elbow Lake—Another name was added to the list of those who died in the storm when it became known that Dorothy Whitman, aged 14, living on a farm three miles north of Barrett, perished while on her way to the river for a pail of water. Her body was found near her home the following day.

Luverne—Edward Gillham died at his home at the age of 78 years, following a long period of poor health. Mr. Gillham is said to be the first white man who entered this territory in the early days. In 1878 he was elected to the office of sheriff of Rock county and served two terms.

Red Wing—Reorganization of the Red Wing Co-operative Creamery company, into the Red Wing Creamery company, with a capital stock of $30,000 instead of $10,000, was perfected at the annual meeting of the creamery's stockholders. Under the reorganization plan E. W. Redmond, Anoka, and W. E. Redmond, Shakopee, will take over 50 per cent of the stock and the former stockholders of the company the other 50 per cent.

Bemidji—An order denying the petition for the imporvement of the channel of the Red Lake river, as requested by the Red Lake Drainage and conservancy board, has been signed by Judge Andrew Grindeland of Warren and Judge C. W. Stanton of Bemidji. The Red Lake drainage and conservancy project has been in progress for several years and a hearing was held at Thief River Falls recently to determine whether the work should begin on the project as recommended by the engineers.

Hibbing—Hibbing high school basketball five has made a fine record for the season with eleven games played, eight won, and a total score 274 to 138 in their favor. Of the eleven games two were practice tilts with the alumni, which had no bearing on the district standing. Hibbing will go to the district tournament with but little to fear except Gilbert, which is now heralded as the likely district champion. Hibbing drew Two Harbors as their opponents in the district tournament to be held at Virginia on March 9, 10, 16 and 17.

Virginia — Proceedings have been started in court here to close 11 homes on the north side of the city as well as business places where liquor has been made or sold.

St. Cloud—L. H. Dufresne is awarded $1,200 insurance on his automobile through a decision filed by Judge J. A. Roeser nullifying the decision of three appraisers, which set the value at $600. Action was brought by Dufresne against an insurance company which insured against theft for $1,200. The car was stolen and three arbitrators agreed upon to fix the valuation. The court ruled the appraisal unfair.

Aspirin

Say "Bayer" and Insist!

Genuine

BAYER

Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer product prescribed by physicians over twenty-two years and proved safe by millions for

Colds Headache
Toothache Lumbago
Earache Rheumatism
Neuralgia Pain, Pain

Accept "Bayer Tablets of Aspirin" only. Each unbroken package contains proper directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Advertisement.

VICTIM OF HIS OWN ERROR

American Tourist Really Had No Right to Complain of Extortion, Under the Circumstances.

"Ambassador Herrick," said a returned tourist, "told me in Paris that a good deal of the so-called extortion we tourists complain about is due to misunderstandings.

"He instanced the case of a tourist in Brussels who got on a tramcar to make the whole journey round the exterior boulevards. When the conductor asked him where he wanted to go he said:

"'Toute le journee.'

"He thought that this meant, 'The whole journey,' but it really meant, 'All day long'; and so the conductor, putting him down as an eccentric, gave him 15 tickets and charged him 15 francs.

"Fifteen francs! What an extortion! The tourist from that day on couldn't knock Europe and European grafters hard enough."

Cole's Carbolisalve Quickly Relieves and heals burning, itching and torturing skin diseases. It instantly stops the pain of burns. Heals without scars. 30c and 60c. Ask your druggist, or send 30c to The J. W. Cole Co., Rockford, Ill., for a package.—Advertisement.

Where "Flapper" Idea Came From.

It is said that the original flapper was the Haytian girl who adopted short skirts decades ago and who used to "roll her own" as far back as 1915. The girls of that island make regular trips to market and it is their custom to ride on the back of burros. They carry their stockings and slippers under their arms until they reach the outskirts of the city and then as they ride along they don their footwear, the stockings being held in place by a deft twist about the tops just as our girls have been doing lately. As they return home the footwear is removed and laid away.

Cuticura Soap for the Complexion.

Nothing better than Cuticura Soap daily and Ointment now and then as needed to make the complexion clear, scalp clean and hands soft and white. Add to this the fascinating, fragrant Cuticura Talcum, and you have the Cuticura Toilet Trio.—Advertisement.

Movies That Really Are Safe.

A movie picture show in the home, by the aid of a machine which has no more to do with lights or inflammable things than a typewriter or a sewing machine, is an accomplished fact.

The moviescope, the invention of an Englishman, throws pictures on to its marvelous mirror simply by means of ordinary daylight or the artificial light used to illuminate the room.

The pictures are seen with extraordinary clearness. It depends on the viewer—who is also the operator—whether the picture is a slow-motion affair or one of normal movement.

Britain's Arable Area Reduced.

The arable area of Great Britain since 1918 has been continuously reduced. Land now under the plow is not much greater in extent than immediately before the war, according to a report from the board of agriculture. The total area under crops and grass showed less change in 1922 than for several years past, the figures being 26,025,000 acres in 1922, against 26,140,000 in 1921. The arable area, however, was reduced by 303,000 acres, while the permanent grass area was increased by 189,000 acres.

Off Form.

Alice—What sort of a girl is she?

Virginia—Oh, she's one of those who are glad long skirts are back.

[illegible] WHILE AT WORK

Mrs. Banes Says Tanlac Ended Indigestion, Sourness and Palpitations and Made Labors Light.

"Tanlac has helped me so much I wish everyone suffering like I did would follow my suggestion to use it," said Mrs. Sadie Banes, 2057 Washington St., Kansas City, Mo., the other day.

"Before I took Tanlac my appetite was so poor it seemed beyond cultivation, and the little I managed to eat gave me indigestion and caused awful sourness and palpitation. I was simply miserable from nervous headaches, dizziness and knife-like pains in my back, always slept poorly, and felt so bad that at times I just had to quit my housework and lie down.

"Tanlac was so well suited to my case that it has only taken three bottles, half of the full treatment, to restore me to perfect health. It makes me so happy to be without an ache, pain or trouble of any kind that I go about my work humming and singing. I just can't help rejoicing over what Tanlac has done for me."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.—Advertisement.

"ELEGY" WAS WORK OF YEARS

Thomas Gray's Masterpiece Clearly Not the Result of a Moment of Inspiration.

It was eight years from the time Thomas Gray, English poet, began the most famous of all his poems, "Elegy Written in a Country Churchyard," until he had finished it. He began it in 1742, and it was finished in June, 1750. It attracted so much attention in manuscript that a pirate announced his intention of printing it. This caused Gray to authorize a publisher, to whom he loftily yielded all the profits, to print an edition in 1751. It attracted at once the popularity it has never lost, and was much parodied and imitated throughout the western world.

It was his love of romantic scenery and his morbid temperament which gave Gray his post of eminence among the "Churchyard Poets." He was shrinking and fastidious, and he was also depressed by the standards of his age in respect to poetry. Biographers say that he was indolent and irresolute.

Habit Clings.

One of the clubs elected as secretary the credit man of a store. After the officers had been installed they were asked to speak. The president and vice president spoke, hoping for the success of the club under their administration. Then it was the credit man's turn.

"You'll soon hear from me," he said. "It's just time for our annual dues to be paid. Your statements will be mailed to you and please remit as soon as possible."

Truth in Ejaculation.

The lumberjack was directed to proceed from camp to the nearest town and arrange for certain supplies. This entailed a long tramp through a forest composed of hemlock. For miles and miles he trudged through a neverending growth of hemlock. At night he camped. The hemlock was hard to cut, and when it was cut it made a poor fire. Hemlock roots tripped him and boughs of hemlock scratched his face.

So when he finally emerged it was not inappropriate that he remarked: "Gosh all hemlock!"

A man soon gets used to the distrust he has of himself.

All real men have an inherent ability to make mistakes.

CHILDLESS HOMES MADE HAPPY

Presence of Little Ones a Great Blessing

Four Interesting Letters

Cortland, N. Y.—"I took Lydia E. Pinkham's Vegetable Compound because I was weak and wanted to become strong and have a child. My husband read about it in the 'Cortland Standard' and thought it might help me. It certainly did for I now have a lovely boy fifteen months old who weighs forty pounds. I recommend Lydia E. Pinkham's Vegetable Compound to my friends and you can certainly use my testimonial in your little books and in the newspapers, as it might help to make some other childless home happy by the presence of little ones as it has done mine."—Mrs. CLAUDE P. CANFIELD, 10 Salisbury St., Cortland, N. Y.

A Message to Mothers

Hamilton, Ohio.—"I have known about Lydia E. Pinkham's Vegetable Compound since girlhood, having taken it when I was younger and suffering from a weakness and backache. Lately I have taken it again to strengthen me before the birth of my child, as I was troubled with pains in my back and a lifeless, weak feeling. I think if mothers would only take your wonderful medicine they would not dread childbirth as they do. I recommend the Vegetable Compound to every woman."—Mrs. JOS. FALCOIN, JR., 552 S. 11th Street, Hamilton, Ohio.

St. Louis, Mo.—"I want to tell you what Lydia E. Pinkham's Vegetable Compound did for me seven years ago. I was run down and had a weakness such as women often have. I took Lydia E. Pinkham's Vegetable Compound and after being married sixteen years became the mother of a sweet little girl. I now have four lovely children—three fine boys and the little girl six years old. I had longed for children all the while and wept many a day and envied every woman with a child. I was 36 years old when my first baby was born. I recommend Lydia E. Pinkham's Vegetable Compound to any woman who is ailing with female weakness."—Mrs. J. NAUMANN, 1517 Benton St., St. Louis, Mo.

Was Weak and Run Down

St. Louis, Mo.—"My mother took Lydia E. Pinkham's Vegetable Compound when I was a girl, and when I was troubled with cramps I took it, and later when I married I again took it to make me strong as the doctor said I was weak and run down and could not have children. I took it and got along fine and now I have three girls. So you know why I keep the Compound in the house. I am a well woman and do my work and sewing too."—Mrs. JULIUS HARTMAN, 2501 W. Dodier St., St. Louis, Mo.

Disordered Stomach

Take a good dose of Carter's Little Liver Pills —then take 2 or 3 for a few nights after.

You will relish your meals without fear of trouble to follow. Millions of all ages take them for Biliousness, Dizziness, Sick Headache, Upset Stomach and for Sallow, Pimply, Blotchy Skin. They end the misery of Constipation.

Entered as second-class matter at the postoffice at Goodridge, Minn.

E D I T O R I A L

WHY NOT A WOMAN?

The village election is but a few days off, and The Banner being intensely interested in seeing to it that this village secures the best possible governing power, wishes to make a suggestion.

Goodridge has heretofore been blessed with an abundance of good government and this newspaper is not attempting to belittle the efforts of former administrations, but why not step outside the bounds of custom and select a woman for mayoress of this village?

The Banner can think of several cities and villages throughout the Northwest that have selected women to govern them, with satisfactory results. For example, a little town out in North Dakota—Des Lacs—a year ago elected a woman good government ticket from the head of the council down to the night patrolman, the former ruling with a tactful and capable hand and the latter swinging the wickedest kind of a night stick.

It does not require a ponderous amount of governing ability to stand guard over the destinies of a village the size of Goodridge and, off hand, The Banner can think of several who would make good candidates. In fact, the village may be highly commended for the number of women living here who take a keen interest in anything pertaining to the welfare of Goodridge.

Somebody has got to be a mayor. We must have one. Women thruout the country have demonstrated their adaptability in ruling posotions and many times have entlrely revolutionized civic government by showing the old autocratic body of male governors that is does not necessarily follow that mayors, councilmen, etc., must shave, swear and chew Climax.

The Banner is waiting to hear from the women of Goodridge and would support their choice down to the last ditch. She need not be over 50 nor good looking, but possessed of a desire to give us 100 cents worth for every dollar we pay for local government.

Who can tell? Goodridge may yet have a president that buttons up the back.

ABOUT MR. TOWNLEY.

The Rochester Post asks, "Can Townley Come Back?". At the risk of offending Joe Reynolds we will say that in our opinion A. C. Townley is a man who will not stay down. eH is a wonder. He has cost the Fat Boys barrels of money and thousands of sleepless nights. He may not be right but he fills his place in the economy of our affairs. As a rule the men who are lambasting him are as the molehill to the mountain.

DID YOP EVER STOP TO THINK—

That if business is falling off, you should step right out of the rut and increase it by the right kind of advertising.

That getting the business is not always a selfish proposition. Modern business entails a certain amount of service that is of as much interest to the buyer as to the seller.

That you will find in the stores of your city, the obliging clerks, the ones who greet you with a smile, who wait on you courteously, solicitous of your every wish, who answer your questions politely, who are willing to take the trouble to supply any information wanted, they help to make better business.

That mail order houses succeed because they advertise. You can beat them at their own game by advertisl ing in your local papers.

That many citizens would be pleasantly surprised if the were to investigate the various kinds and classes of merchandise obtainable in their city. With this knowledge, they could spend all their money at home. A dollar spent in your own city helps your city. A dollar spent in some other city, helps that city. Buy at home.

That your city is the best city in which to live. Don't hesitate to tell the world about it.

No! Absolutely. Yes, it's final. No more free space in this paper to solicit space for starving anybody anywhere. That has been worked to death. Space in this paper will be devoted hereafter for a time to raising the funds with which to help starving us, to pay our grocer and butcher, to get us something to eat and wear.—Anoka Union.

A death from poison moonshine near Faribault last week indicates that the fool killer is still gathering unto himself those who will tamper with the stuff.

The trouble with most of these third party movements is that they are usually led by third class statesmen—or worse.

The trouble with the average young woman is that she wants a cake-eater instead of a bread-winner.

STATE OF MINNESOTA
County of Pennington

DISTRICT COURT
Fourteenth Judicial District

Rambeck & Stone Company, a Corporation, Plaintiff,
vs.
Grover C. Shannon, Robt. R. Wheelwright and John B. Shannon, Defendants.

SUMMONS.

The State of Minnesota to the Above Named Defendants:

You, and each of you, are hereby summoned and required to answer the complaint of the plaintiff in the above entitled action, which complaint has been filed with the Clerk of said Court and to serve a copy of your answer to said complaint upon the subscriber at his office in the city of Thief River Falls, in the county of Pennington and State of Minnesota, within twenty (20) days after the service of this summons upon you, exclusive of the day of such service.

If you fail to so answer said summons within the time aforesaid, the plaintiff will take judgment against you and each of you for Six Hundred Sixty-one and 98-100 dollars ($661.98 and interest thereon at the rate of eight (8) per cent per annum fron July 22, 1922, together with the costs and disbursements of this action.

H. O. CHOMMIE,
Attorney for Plaintiff,
Thief River Falls, Minnesota
Feb. 16-23-M 2

NOTICE OF MEETING.

The stockholders of the Red Lake Eastern Marshall Farmers Telephone Company will hold their annual meeting in Goodridge on Tuesday, March 6, 1923, at 1 o'clock sharp. You are requested to attend this meeting as important business will be transacted.

A. HAMMEDSTEIN, Pres.

Nick Bundhund was a passenger to Thief River Falls Wednesday evening to look after business matters.

Co-Op Marketing Held Solution of Farmers' Problem

Walton Peteet, Farm Bureau Marketing Director, Speaks at Conference.

Leaders From All Parts of Northwest Gather For Frank Discussion.

Steps that may be taken to bring immediate relief to the Northwest's agricultural industry and basic principles that may be adopted by farmers to insure their permanent prosperity were discussed at two important conferences in St. Paul this week.

The Northwest Agricultural Price Stabilization Conference was held on Tuesday and Wednesday, and on Friday there will be a special marketing meeting, called for the purpose of getting down to "brass tacks" on an expansive co-operative program for Minnesota. In addition, there were other smaller conferences.

The present 66-cent dollar with which the farmer is trying to run his business was the theme of all meetings. Delegates came from ten wheat growing states, seeking a sound answer to this question: "What can be done to reduce the present disparity between what the farmer gets for his products and what he is obliged to pay for necessities?"

An outstanding feature of the Stabilization Conference was an address by Walton Peteet, director of marketing for the American Farm Bureau Federation. Mr. Peteet told his audience that the farmer could not expect to prosper so long as he was content to compete, as an individual, with group action in all other lines of industry. "The time has come for the farmer to establish his own selling agencies, following principles that have been proved sound in this and other countries," he said.

At the conference, utmost latitude was given to assure a free discussion of all phases of the farm problem. Controlled production was advocated as one remedy. Methods that may be used to reduce items of expense in the farmers' business were advanced by other speakers. Freight rates were condemned as being too high. There were those who said the farmer should bring more efficiency into his business and there were others who held the [illegible] which would guarantee prices and the Government to buy the exportable surplus, was both advocated and condemned. The present tariff was denounced as having worked a hardship on the Northwest.

On the program as speakers were Governor Preus, Governor Kendall of Iowa, J. F. Reed, president of the Minnesota Farm Bureau Federation; John R. Mitchell, representing the Federal Reserve Board; Harry Owen, publisher of a Minnesota agricultural paper; Magnus Johnson, Farmer-Labor candidate for governor; Victor E. Anderson, treasurer of the Minnesota Farm Bureau; and others. Scores of "dirt" farmers joined the discussion.

Exactly what steps should be taken and remedies that would be recommended was a question that only the powerful resolutions committee could answer, and it had not reported as this is written.

The Co-operative Marketing meeting was called jointly by the American Farm Bureau Federation and the Minnesota Farm Bureau Federation, co-operating with farm leaders in the state. It was organized as a working conference, designed to consider steps that may be taken to expand, correlate and strengthen the co-operative movement in this state. Among the speakers on the program are Aaron Sapiro, noted advocate of co-operative marketing; Mr. Peteet; President Bradfute of the American Farm Bureau Federation, and others.

All developments indicated that the week would bring results which will be of far reaching importance to not only farmers but all lines of industry in the Northwest.

"Better Homes Exposition" Last Week in Minneapolis

Color, Harmony and Good Furniture Are Emphasized at Big Furnishings Show.

France has been called "the land of theatres," Italy has been called the "land of churches," and America is called the "land of homes." With America's national life centered in the home, housewives all over the country have been endeavoring to give to the home the touches of beauty bestowed in foreign countries upon other objectives.

Art in the home was demonstrated last week to thousands of visitors at the "Beter Homes Exposition" in Minneapolis. Twenty-five completely furnished rooms circled the interior of the Armory. In the center was constructed a full size model bungalow surrounded by landscaped gardens. In both the rooms and the bungalow the art of home decoration was exemplified to the best of the ability of furniture creators.

For the first time in the furniture exposition history, a painted Jacobean suite was shown. Another painted furniture display was in the sun-room of the model bungalow. Other features were a colonial hallway, a living room with kidney furniture, two slender Heppelwhite bedrooms, an Italian Reaissance dining room suite, a Queen Anne bedroom suite and some rooms to show how furniture of different periods can be used together.

The three points emphasized in all of the exhibitions were color, harmony and good furniture, with such individual touches for any special room as might might be required to make it expressive of the good taste of its mistress.

Kellogg's
TOASTED CORN FLAKES

"Say, fellows, look at the big chief! Says he can't break away till he finishes his Kellogg's Corn Flakes! Guess he knows good things, aw' right!"

Mighty appetizing to open the day with Kellogg's Corn Flakes

Those big, sunny-brown "sweet-hearts-of-the-corn" just seem to get things going right, from the littlest "star boarder" to the eldest! For, Kellogg's Corn Flakes hit-the-spot as no other cereal ever could; and they are a continuous taste-thrill!

Tempting in their appearance, wonderful in supreme flavor and crunchy and crispy to the very last degree, Kellogg's Corn Flakes are really and truly a revelation in good things to eat—for breakfast, for any meal and for between-times nibbles!

How all your folks will delight to get Kellogg's; how they'll appreciate Kellogg's crispness. For, Kellogg's are never tough or leathery or hard to eat! You'll see big and little bowls come back for "some more Kellogg's, Mother, please!"

Kellogg's
TOASTED CORN FLAKES
W. K. Kellogg

When you order Kellogg's today—insist upon getting KELLOGG'S—the delicious Corn Flakes in the RED and GREEN package! It bears the signature of W. K. Kellogg, originator of Corn Flakes. NONE ARE GENUINE WITHOUT IT!

Kellogg's CORN FLAKES

Also makers of KELLOGG'S KRUMBLES and KELLOGG'S BRAN, cooked and krumbled
